ANNUAL REPORTS OF 1880

SUBMITTED TO THE

GENERAL ASSEMBLY

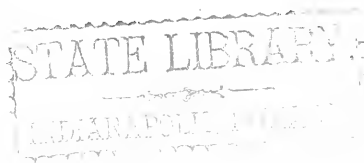

OF THE

STATE OF INDIANA,

IN FIFTY-SECOND REGULAR SESSION,

BEGUN JANUARY 6, 1881.

PART I.

INDIANAPOLIS:

CARLON & HOLLENBECK, PRINTERS AND BINDERS.

1881.

I 328.7
I 80 pt. 1

P R E F A C E.

THE STATE OF INDIANA,
OFFICE OF SECRETARY OF STATE,
INDIANAPOLIS, May 1, 1881.

In accordance with the requirements of an act, approved February 3, 1853 (1st G. & H., p. 358), the several administrative officers of State, and the Trustees and Superintendents of the Benevolent, Reformatory and Educational Institutions thereof, have submitted to the Governor, and filed in the Executive Department, the reports required of them for the fiscal year ending October 31, 1880, and the calendar year ending December 31, 1880, respectively, which have been entered of record in the order of their reception, and delivered to the Secretary of State for publication, under the order of the Board of Commissioners of Public Printing and Binding.

Sixteen hundred copies of these reports are now bound, in two volumes, and issued to the officers and persons designated by law to receive them. The usual number of copies of each report have also been bound in pamphlet form, and delivered to the responsible officer or superintendent of the institution, for distribution in such manner as they may deem for the best interests of the State.

E. L. HASTINGS,
Clerk Bureau Public Printing.

INDEX.

1. Report of Secretary of State.
2. Report of Auditor of State.
- 4 3. Report of Treasurer of State.

13. Report of Indiana University.
- 15 14. Report of State Normal School.
15. Report of Purdue University.
- 17 16. Report of State Librarian.

REPORT

OF THE

SECRETARY OF STATE

OF THE

STATE OF INDIANA,

FOR THE

YEAR ENDING OCTOBER 31, 1880.

TO THE GOVERNOR.

INDIANAPOLIS:

CARLON & HOLLENBECK, PRINTERS AND BINDERS.

1881.

THE STATE OF INDIANA,

GOVERNOR'S OFFICE.

Received December 30, 1880, examined and returned to the Secretary of State to be filed and preserved in his office and published as ordered by the Commissioners of Public Printing and Binding.

SAMUEL R. DOWNEY,

Secretary.

Filed in my office January 3, 1881.

J. G. SHANKLIN,

Secretary of State.

To His Excellency, ISAAC P. GRAY,

Governor of Indiana :

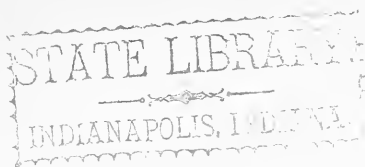

SIR—The law requires the Secretary of State to present a report of the business of his office, annually, to the Governor.

The official year ends October 31, and, of course, the record can not be fully made up until after that day. A careful compilation requires time so that it is always several weeks after the close of the official year before the report can be placed in the hands of the Governor. During the preparation of this Report the death of Governor Williams occurred, and I now present it to you as his successor. Trusting that it may be satisfactory to Your Excellency, to the Legislature about to convene, and to the people of Indiana, I have the honor to be,

Very respectfully,

J. G. SHANKLIN,

Secretary of State.

REPORT.

EPITOME OF ROUTINE WORK.

The tables elsewhere in this report will show, in detail, a variety of business that may be classed generally as miscellaneous. As a matter of convenience, however, for those into whose hands copies of this report may come after it is printed, and who may not care to wade through the long, and it must be admitted, dull monotony of the tables, I have prepared the following summary:

During the official year that ended October 31, 1880, there have been issued from the executive department commissions to state, judicial and county officers five hundred and eighteen; to justices of the peace, one thousand four hundred and ninety-three; to notaries public, eight hundred and forty, and twenty-four to commissioners of deeds.

There have also been issued two proclamations, eighty-one pardons, forty remissions, three commutations, four respites, seventeen swamp land patents, twelve university patents, sixty requisitions, and forty-four warrants.

All of the above acts of the executive and commissioners have been duly attested and registered in this office.

CORPORATIONS.

Of the articles of incorporation filed in this office, thirty-six are of railroads, one hundred and twelve of manufacturing and

mining. Some of these are amendments to papers previously filed, and some are consolidations of two or more companies.

PUBLIC PRINTING.

At the special session of the General Assembly of 1875, an act to provide for the Public Printing and Binding, approved March 13, was passed, organizing a Bureau of Public Printing and Stationery, making the Governor, Auditor of State, and Secretary of State, *ex-officio*, Commissioners of the Public Printing and Binding, and defining their duties in regard to the same.

On the fifth day of May the Commissioners appointed the clerk of the board, and, in accordance with the law, advertised for sealed proposals for doing the work for two years from the first day of July, 1875. This contract was awarded to the Indianapolis Sentinel Company, and expired on the thirtieth day of June, 1877. The Indianapolis Journal Company was awarded the contract for two years from the first day of July, 1877, for the first and third parts, and William B. Burford for the second part. These contracts expired on the thirtieth day of June, 1879. John Carlon was awarded the contract for two years from the first day of July, 1879, which will expire on the thirtieth day of June, 1881.

There has been paid, on requisitions issued through the Board of Commissioners of Printing and Stationery, from the first day of July, 1875, to the thirty-first day of December, 1880, five years and six months, for printing, binding and stationery, the sum of \$98,958.49, as follows :

From July 1, 1875, to June 30, 1877, two years . . .	\$44,091 03
From July 1, 1877, to June 30, 1879, two years . . .	34,662 19
From July 1, 1879, to December 31, 1880, one year	
and six months	20,205 27
	<hr/>
Total cost for five years and six months	<u>\$98,958 49</u>

It will be seen from the above statement that the cost per year, for five years and six months, has been at the average rate of \$17,-992.44.

For the eleven years previous to the establishment of the Bureau, there was expended for this branch of the public service \$590,629.75, as follows :

For the fiscal year of 1865	\$54,148 84
For the fiscal year of 1866	80,062 00
For the fiscal year of 1867	75,624 86
For the fiscal year of 1868	36,904 83
For the fiscal year of 1869	61,367 65
For the fiscal year of 1870	44,881 07
For the fiscal year of 1871	84,816 89
For the fiscal year of 1872	35,586 61
For the fiscal year of 1873	51,328 39
For the fiscal year of 1874	25,238 20
For the fiscal year of 1875	40,670 41
	<hr/>
Total cost for eleven years	<u>\$590,629 75</u>

Average cost per year for eleven years, \$53,420.88. This shows there has been a saving in the cost to the State of \$35,428.44 per year, under the present system of contracting the work.

PROCLAMATIONS.

A PROCLAMATION BY THE GOVERNOR OF INDIANA.

A Proclamation declaring the number of votes for and against each amendment to the Constitution proposed and submitted to the electors of the State, at the election held on the first Monday of April, 1880, for their adoption or rejection :

THE STATE OF INDIANA,
Executive Department.

To the People of Indiana :

In compliance with the provisions of an act approved March 10, 1879, entitled "An Act providing for the submission to the electors of the State of Indiana for ratification, the Constitutional Amendments proposed to and adopted by the General Assemblies of said State at the sessions of 1877 and 1879, prescribing certain duties of officers of election and others, providing penalties for violations thereof, and other provisions relating to the subject matter," it is hereby announced and proclaimed, that at the election held on the first Monday of April, 1880, the votes for and against the several amendments submitted were as follows :

For number one, 169,479 votes, against 152,363 votes ;
For number two, 177,542 votes, against 139,002 votes ;
For number three, 174,400 votes, against 144,812 votes ;
For number four, 176,320 votes, against 136,279 votes ;
For number five, 181,887 votes, against 136,177 votes ;
For number six, 175,612 votes, against 141,296 votes ; .

For number nine, 176,981 votes, against 126,999 votes,
as shown by a certificate of the Secretary of State, this day made to me, and by certificates of the Clerks of the Circuit Courts on file in his office.

WITNESS the seal of the State and the signature of the
[SEAL.] Governor, at Indianapolis, this 28th day of April,
1880.

By the Governor :

JAMES D. WILLIAMS.

J. G. SHANKLIN, *Secretary of State.*

A PROCLAMATION OF THANKSGIVING.

To the People of Indiana :

The President has, by proclamation, appointed Thursday, November 27, as a day of national thanksgiving and prayer, and has earnestly recommended that the people of the United States meet together on that day in their respective places of worship, there to give thanks and praise to Almighty God for his mercies, and devoutly beseech their continuance. A year of great harvests and of general good health has made us again a prosperous community, and has largely increased our material wealth and lessened the burdens of many, if not all, of our citizens. Justice has been established and freely administered; public order has been maintained within our borders, and liberty is yet perpetuated among us. As a people, we are grateful to Almighty God for the free exercise of the right to choose our own form of government. All men are secure in their natural right to worship Him according to the dictates of their own consciences, while no man is compelled to attend, erect or support any place of worship, or to maintain any ministry, against his consent. Enjoying the countless mercies bestowed upon us by our Heavenly Father, shall we not with one accord render unto Him the voluntary homage of our grateful hearts upon a day hallowed by religious custom and recognized by our laws? I earnestly recommend a general observance of the day appointed.

WITNESS, the Seal of the State and my signature, at Indianapolis, this fifth day of November, in the year of
 [SEAL.] our Lord one thousand eight hundred and seventy-nine.

By the Governor,

JAMES D. WILLIAMS.

J. G. SHANKLIN, *Secretary of State.*

THE CONSTITUTIONAL AMENDMENTS.

The only special work performed by this office during the year was that imposed by an act of the General Assembly, approved March 10, 1879, with the following title :

“An Act providing for the submission to the electors of the State of Indiana for ratification the Constitutional Amendments proposed to and adopted by the General Assemblies of said State at the sessions of 1877 and 1879, prescribing certain duties of officers of election and others, providing penalties for violations thereof, and other provisions relating to the subject matter.”

The ballots, tally-sheets and certificates were prepared and distributed in accordance with this act, as the receipts of the sheriffs of the various counties in the State now on file in this office will show ; and the election was duly held, in strict accordance with the terms of the law, as may be seen by the certified returns of the clerks of the various counties in the State, which are also on file in this office. The following was the result :

PROPOSED AMENDMENTS TO THE CONSTITUTION OF THE STATE OF INDIANA.

No. 1.

Amend section 2 of article 2 so as to read as follows : Section 2. In all elections, not otherwise provided for by this Constitution, every male citizen of the United States of the age of twenty-one years and upwards, who shall have resided in the State during the six months, and in the township sixty days, and in the ward or precinct thirty days immediately preceding such election, and every male of foreign birth of the age of twenty-one years and upwards, who shall have resided in the United States one year, and shall have resided in this State during the six months, and in the township sixty days, and in the ward or precinct thirty days immediately preceding such election, and shall have declared his intention to become a citizen of the United States, conformably to the laws of the United States on the subject of naturalization, shall be entitled to vote in the township or precinct where he may reside, if he shall have been duly registered according to law.

Yes received 169,479 votes.

No received 152,363 votes.

No. 2.

By striking out the words "no negro or mulatto shall have the right of suffrage," contained in section 5 of the second article of the Constitution.

Yes received 177,542 votes.

No received 139,002 votes.

No. 3.

Amend section 14 of the second article to read: Section 14. All general elections shall be held on the first Tuesday after the first Monday in November; but township elections may be held at such time as may be provided by law: *Provided*, That the General Assembly may provide by law for the election of all judges of courts of general or appellate jurisdiction, by an election to be held for such officers only, at which time no other officer shall be voted for; and shall also provide for the registration of all persons entitled to vote.

Yes received 174,400 votes.

No received 144,812 votes.

No. 4.

Strike the word "white" from sections 4 and 5 of article 4.

Yes received 176,320 votes.

No received 136,279 votes.

No. 5.

Amend the fourteenth clause of section 22 of article 4 to read as follows: In relation to fees or salaries, except that the laws may be so made as to grade the compensation of officers in proportion to the population and the necessary services required.

Yes received 181,887 votes.

No received 136,177 votes.

No. 6.

Amend section 1 of the seventh article to read: Section 1. The judicial power of the State shall be vested in a Supreme Court, Circuit Courts, and such other courts as the General Assembly may establish.

Yes received 175,612 votes.

No received 141,296 votes.

No. 9.

Strike out all the sections of the thirteenth article, and in lieu thereof insert the following: Section 1. No political or municipal corporation, in this State, shall ever become indebted, in any manner or for any purpose, to any amount, in the aggregate, exceeding two per centum on the value of taxable property within such corporation, to be ascertained by the last assessment, for State and county taxes, previous to the incurring of such indebtedness, and all bonds or obligations, in excess of such amount, given by such corporations, shall be void; *Provided*, That in time of war, foreign invasion, or other great public calamity, on petition of a majority of the property owners, in number and value, within the limits of such corporation, the public authorities, in their discretion, may incur obligations necessary for the public protection and defense, to such an amount as may be requested in such petition.

Yes received 176,981 votes.

No received 126,999 votes.

DISTRIBUTION OF LAWS.

The acts of the General Assembly were distributed in accordance with the provisions of an act approved March 31, 1879, entitled:

“An Act to provide for the prompt publication of the acts of the General Assembly.”

THE APPENDIX.

A variety of historical and statistical matter will be found in the appendix to this Report. The "Forms of Executive Practice," which appeared in my Report for the year 1879, having been found a convenience by those who have had business with any of the State officers, are reproduced.

CONCLUSION.

In concluding this my final report, I may be allowed for a moment to allude to those who have been associated with me as assistants since entering upon the duties of this office. Mr. Wm. A. Peelle, Jr., has been so long connected with this department that he is well known throughout the State. During the two terms of my predecessor, Mr. Peelle acted as Assistant Secretary of State, so that with the completion of my term, he will have served six years. I wish to add my testimony to that which was given concerning him by my predecessor in his final report. His position has been a laborious one, but he has always been equal to the task before him. In the details of the office—its varied and often difficult duties—he is thoroughly informed, and ready to afford any information to interested inquirers.

I have trusted him absolutely and he has been worthy of that trust. In his personal relations as in his business capacity, Mr. Peelle is intelligent, capable, amiable, and, in every way, reliable.

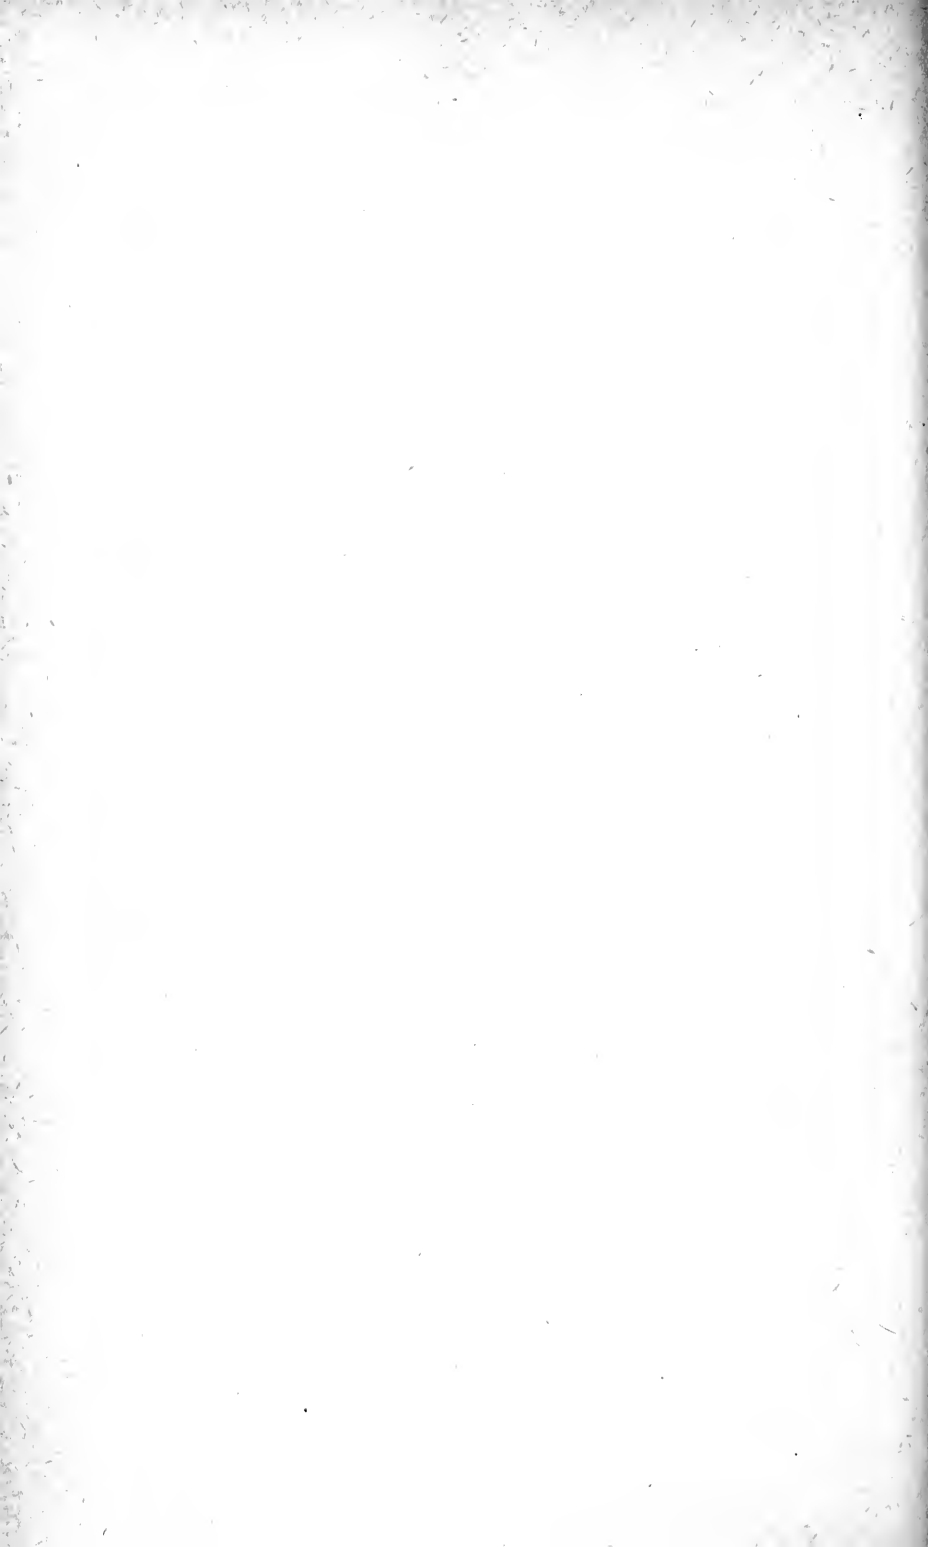

Mr. Charles P. Hutchinson, Clerk of Printing Bureau, a position which he holds by appointment of the Board of Printing Commissioners, and which he has held since the law creating the Board was enacted, has been a faithful public servant. Being thoroughly familiar with the business of stationery and printing, his services have been invaluable to the State. He has never neglected his duties because the remuneration was small, but on a paltry salary has guarded the interests of the taxpayer as faithfully as though they were his own.

Miss Mary H. Peacock has filled the position of clerk in this office during the last two years, and these personal allusions would be incomplete did I fail to express my appreciation of her efficient services.

This concludes my report for the year ending October 31, 1880.

J. G. SHANKLIN.

APPENDIX.

REGULATIONS AND FORMS

OF

EXECUTIVE PRACTICE.

To secure accuracy in the transaction of the public business and uniformity in the records of the Executive Department, regulations and forms have, from time to time, been adopted, and are published in this permanent form for convenient reference.

NOTARIES PUBLIC.

The statute authorizing the appointment of notaries public requires that persons shall be appointed to the office upon a certificate of qualification and moral character from the Judge of the Circuit Court of their counties, respectively (1 G. & H., p. 445). When a notary public removes from the county in which he resided at the time he was appointed, he thereby vacates his office. (Opinions of Attorney General, 1873, p. 14.) A new certificate is necessary as the basis of an appointment in another county.

[FORM 1.]

THE STATE OF INDIANA,

_____ County.

TO HIS EXCELLENCY,

The Governor of Indiana :

SIR:—I respectfully request that I be appointed and commissioned a Notary Public, resident and qualified in this county, with

the jurisdiction and powers conferred by the Acts of June 9, 1852, and February 12, 1855. In support of my application, I submit herewith a certificate of my qualifications and moral character from the Judge of the Circuit Court of the county, as required by the statute.

Dated at _____,
 _____, 18—.

TO HIS EXCELLENCY,

The Governor of Indiana:

SIR:—I hereby certify that _____, of _____ county, is a person of good moral character and qualified to exercise the powers and discharge the duties of a notary public.

_____,
 Judge of the _____ Circuit Court.

Dated at _____,
 _____, 18—.

Commissions in renewal of an appointment are issued at the expiration of a term without a new certificate, where a sufficient certificate remains on file as a part of the record of the former appointment and the applicant continues a resident of the same county.

COMMISSIONERS OF DEEDS.

A person asking an appointment as a Commissioner of Deeds of this State, resident in any other State or Territory, or in any foreign country, must furnish to the Governor satisfactory proof of his character and qualifications. The recommendation of the Governor of the State or Territory in which he resides is desirable as being the best evidence. Commissions in renewal of an appointment are issued upon application and the presumed good character and qualifications of the appointee of a former administration.

JUSTICES OF THE PEACE.

Vacancies in the office of Justice of the Peace are filled by appointment of the Board of Commissioners of the county in which they may occur. The appointment may be properly certified as follows :

[FORM 2.]

THE STATE OF INDIANA.

_____ County.

Be it Remembered, That at a _____ meeting of the Board of Commissioners of _____ county, held at _____, on the — day of —, A. D. 18—, present Messrs. —, — and —, Commissioners, the following proceedings were had:

[Copy the order verbatim.]

I, —, Auditor of — county, hereby certify that the foregoing is a full, true and complete copy of the order of appointment of — as a Justice of the Peace to fill a vacancy under authority of the act of March 10, 1875, as the same appears upon the record of proceedings in my custody.

Witness, the seal of the Board of Commissioners of the county, and my signature, at _____, this — day of —, 18—.

_____,
Auditor.

REQUISITIONS FOR FUGITIVES.

In order that due care may be exercised in granting requisitions on the Governors of other States for the apprehension of fugitives from the justice of this State, the following regulations have been adopted :

The application should be in writing, addressed to the Governor, and should contain a statement, in plain and concise language, of the facts in the case, and of the reasons why, in the opinion of the applicant, a requisition should be issued. It should nominate a proper person to be appointed as the agent to receive the fugitive when apprehended, giving his residence and his official character, if he have any. It should be accompanied by a duly certified copy

of the indictment, if one has been found against the offender. If no indictment has been found, there should be furnished a certified copy of a sufficient affidavit made and pending before a magistrate in the county where the alleged offense was committed. It should appear from a certificate of the Clerk of the Circuit Court that the magistrate is an acting Justice of the Peace, in and for the county. The application should be accompanied, also, by an affidavit that the person charged is a fugitive from justice; that is, that he has fled from the State to avoid arrest; and should show, particularly as may be, the time and circumstances of his flight, and in what State or Territory he is; that he fled from the State before an arrest could be made; and that the ends of justice require that he be brought back to this State for trial. The opinion of the Prosecuting Attorney of the Circuit as to the propriety of granting the requisition should also be furnished.

Requisitions will be granted only upon the express condition inserted therein, that the State will pay no part of the expenses incurred in the pursuit and arrest of the fugitive.

The purpose in granting requisitions is to aid in the administration of the criminal law. No requisition will be issued to aid in collecting a debt, or enforcing a civil remedy against a person who has left the State. In all cases of false pretenses, embezzlement and similar crimes, affirmative evidence, in the form of affidavits, will be required that the real object is not the collection of a private debt.

As notaries public are not magistrates within the meaning of the Federal law, no requisition will be granted upon an affidavit made before a notary public. The law of Congress clearly contemplates an affidavit made in the county where the crime is alleged to have been committed, and before a magistrate having authority to hear the charge when the fugitive shall have been returned by such process to make answer thereto.

If the offense is not of recent occurrence, sufficient reason must be given why the application has been delayed. In no case will a requisition for an offender be granted at the same time upon the Governor of more than one State. Duplicates of all papers necessary upon the application must be furnished, that one set may be retained in this department and the other attached to the requisition; though but one set need be certified.

[FORM 3.]

TO HIS EXCELLENCY,

The Governor of Indiana :

I respectfully ask that you issue a requisition to the Governor of the State of —— for the apprehension and rendition of ——, who stands charged by an —— pending in the —— Court with the crime of ——, committed in —— county, but who has, since the commission of said offense, and before an arrest could be made upon process issued by said court, and with a view of avoiding the same, fled from the justice of the State of Indiana, and into the said State of ——, where I believe he now may be found.

The ends of justice, in my opinion, require that he be brought back to this State for trial. I herewith present a duly certified copy of the original —— now on file in the office of —— in said county. In my opinion, the facts stated in said —— are true, and I believe that the prosecution of the said —— would result in his conviction of the crime charged. I nominate ——, of ——, as a proper person to be appointed and commissioned by you as the agent of the State of Indiana to receive the said fugitive, when he shall be apprehended, and bring him to this State and deliver him into the custody of the sheriff of said county. The requisition asked for said fugitive is not sought for the purpose of collecting a debt, or enforcing a civil remedy, or to answer any other private end whatever.

Dated at ——, —— 18—. _____

THE STATE OF INDIANA, —— COUNTY.

I, ——, being duly sworn, on my oath say that the facts stated in the foregoing application are true. _____

Subscribed and sworn to before me, this — day of ——, 18—. _____

To the Governor :

In my opinion it would be proper for Your Excellency to issue the requisition asked. _____

Prosecuting Attorney.

PARDONS.

In order that due care may be observed in the exercise of the pardoning power, the following rules have been adopted, viz :

1st. Petitions for pardons should set forth all the facts of the case, and state the grounds upon which the pardon is asked ; and should be accompanied by recommendations of officers and citizens of the county in which the conviction took place ; and if the offense was committed in a county different from that in which the trial occurred, there should also be recommendations from officers and citizens of the county in which the offense was committed.

2d. A statement of the substance of the evidence certified by the Judge who presided at the trial, or the Prosecuting Attorney who conducted the prosecution, must also be furnished.

3d. If a statement of the substance of the evidence can not be obtained from the Judge or Prosecutor, the reason why it can not be obtained should be stated, and then a statement of any other officer or credible person (verified by affidavit), who heard the evidence, may be substituted.

4th. If the applicant is confined in a county jail, the opinion of the Board of Commissioners of the county as to the propriety or impropriety of granting the pardon should be furnished.

5th. If judgment was pronounced on a plea of guilty, and no evidence heard on the trial of the case, a copy of the indictment or information must be furnished, so that the precise nature of the offense may be understood.

REMISSIONS.

In order that applications for the remission of fines and forfeitures may be brought within the constitutional jurisdiction of the Governor, the following information is furnished : " An act to regulate the remission of fines and forfeitures," approved June 14, 1852 (1 G. & H. 347), provides " That all applicants to the Governor for the remission of fines and forfeitures, shall forward to him with their application, the opinion of the propriety of so doing of a majority of the following officers in the county where the fine was

assessed, or the forfeiture occurred, viz: the Clerk of the Circuit Court, Auditor, Sheriff, County Treasurer, and such officers as shall from time to time have the care and custody of the Common School Fund within the county."

The following form of opinion is recommended to be substantially followed.

To the Governor of Indiana :

We, the Clerk of the ———— Circuit Court, the Auditor, Sheriff and Treasurer of ———— county (*and the other officers who may join in the opinion*), are of the opinion that it would be proper (*or improper*), for you to remit a certain fine assessed (*or judgment taken*), against ————, in the ———— Circuit Court, on the ——— day of ————, 18—, in a case wherein (*set out the substance of the judgment, and the nature and circumstances of the crime*), for the following reasons: (*setting them out*).

Where the application is made by sureties, satisfactory proof must be made by affidavits, or other evidence, that they have no indemnity or means of future indemnification.

It having been decided by the Supreme Court (9 Indiana, page 20), that the power of the Governor to remit fines and forfeitures is not absolute, and can only be exercised according to legislative direction, a strict compliance with the statute above recited will be required.

Dates, amounts and other means of identifying and describing the judgment complained of should be accurately and carefully given.

It should be shown that a judgment termed a "forfeiture," is a *final* judgment rendered upon a forfeited bond and not merely an entry of forfeiture. (See 2 G. & H., pages 396-400, especially sections 44, 48 and 50).

INDIANA OFFICIAL REGISTER.

TERRITORIAL GOVERNORS.

Arthur St. Clair, Governor Northwest Territory.

ANNUAL REPORT

OF THE

AUDITOR OF STATE

OF THE

STATE OF INDIANA,

SHOWING THE RECEIPTS AND DISBURSEMENTS AND OTHER TRANS-
ACTIONS OF THE TREASURY DEPARTMENT DURING THE
FISCAL YEAR ENDING OCTOBER 31, 1880.

TO THE GOVERNOR.

INDIANAPOLIS:

CARLON & HOLLENBECK, PRINTERS AND BINDERS.
1880.

THE STATE OF INDIANA,
GOVERNOR'S OFFICE.

Received November 19, 1880, and transmitted to the Secretary of State to be
filed and preserved in his office and published as may be ordered by the Commis-
sioners of Public Printing.

SAMUEL R. DOWNEY,
Secretary.

Filed in my office November 19, 1880.

J. G. SHANKLIN,
Secretary of State.

STATE OF INDIANA,
OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, November 1, 1880.

To His Excellency, JAMES D. WILLIAMS,
Governor of the State of Indiana:

In compliance with law, I have the honor to submit for your examination, and the consideration of the Legislature, my annual report of the financial transactions of the State for the fiscal year closing October 31, 1880.

M. D. MANSON,
Auditor of State.

RECEIPTS AND DISBURSEMENTS.

The following statement is a condensed exhibit of the balance cash in the State Treasury of each of the funds November 1, 1879; the amount received and disbursed during the fiscal year from the several funds, closing October the 31, 1880 :

Total amount of cash in the State Treasury October,	
31, 1879	<u><u>\$583,751 92</u></u>

The above amount was the aggregate of balances belonging to the various funds of the Treasury as follows :

Balance in General Fund	\$226,584 91
Balance in Common School Fund . .	2,692 20
Balance in School Revenue for Tuition.	134,632 23
Balance in College Fund	5,532 83
Balance in College Fund, excess of bids	302 02
Balance in College Fund, Interest . .	105 16
Balance in Swamp Land Fund. . . .	549 96
Balance in Fund of Unclaimed Estates	11,948 43
Balance in Sinking Fund, excess of bids	2,088 52
Balance in New State House Fund . .	199,315 66
	<u><u>\$583,751 92</u></u>

Receipts from all sources during the fiscal year ending October 31, 1880, were as follows :

To General Fund	\$1,477,609 92
To School Revenue for Tuition . . .	2,010,845 61
To College Fund	13,409 14

To College Fund, excess of bids . . .	\$326 16
To College Fund Interest	7,023 17
To Swamp Land Fund	486 56
To Fund of Unclaimed Estates . . .	2,258 56
To New State House Fund	175,845 47
To Fund of Escheated Estates	1,365 97

Total amount of Treasurer's receipts
filed during year \$3,689,170 56

Deduct amount of transfer and refund-
ing receipts filed during year . . 236,961 54

Leaves net cash receipts to the Treas-
ury during year \$3,452,209 02

Add cash balance in the Treasury Oc-
tober 31, 1879 583,751 92

Makes total receipts, including balance
during year \$4,035,960 94

The amount of warrants drawn on
the State Treasury from the several
funds, from October 31, 1879, to October
31, 1880, are as follows:

From General Fund	\$1,199,299 89
From School Revenue for Tuition . .	1,993,354 26
From College Fund	10,550 00
From College Fund Interest	4,493 10
From Swamp Land Fund	11 00
From Fund of Unclaimed Estates . .	1,118 12
From New State House Fund	177,626 70
From College Fund, excess bids . . .	604 04

Total amount of warrants drawn dur-
ing year \$3,387,057 11

Deduct amount of Transfer and Re-
funding Warrants 236,961 54

Leaves net Cash Disbursements from
the Treasury during year 3,150,095 57

Which being deducted from total re-
ceipts, leave cash in Treasury,
October 31, 1880 \$885,865 37

The above balance of Cash in the Treasury, October 31, 1880, consists of balances of the various funds, as follows:

Balance in General Fund	\$504,894 94
Balance in Common School Fund . .	2,692 20

ESTIMATED RECEIPTS AND EXPENDITURES OF THE STATE

For the Fiscal Years 1882 and 1883.

The necessary appropriation for the fiscal year ending October 31, 1881, having been made by the Legislature of 1879, it is necessary for the estimates in this report to be for the fiscal years 1882 and 1883. By referring to the table of detailed estimates for these two years, it will be seen that for the year 1882, there will be required \$1,117,470; and for the year 1883, \$1,255,470.

The excess of 1883 over the preceding year is owing to the year 1883 being a Legislative year. These estimates are made to correspond with the Appropriation act, and Fee and Salary act of 1879, as near as deemed practicable. These amounts having been adequate to meet their purposes in the past, I thought it but just to adopt them. To meet these expenditures it is necessary to estimate the receipts for such purposes. The receipts to the General Fund (for in this matter no other fund can be considered), during the last fiscal year ending October 31, 1880, were \$1,477,609.92. Of this amount \$1,054,895.23 was derived from taxation, the balance from Insurance Tax, Insurance Fees, Docket Fees, Miscellaneous receipts and earnings of the Benevolent and Penal Institutions. The decrease in value of taxable property of the State in the last year will approximate one hundred and twenty millions of dollars. Provided the levy of twelve cents on the one hundred dollars is not changed, this decrease in value of taxable property, represents a decrease in tax receipts of \$144,000. But in my judgment the value of personal property in the years 1881 and 1882 will be increased to such an extent that the decrease in tax receipts will not exceed one hundred thousand dollars, and I think it safe to estimate

the net receipts to the General Fund each of the two years 1882 and 1883, at \$1,337,000. Taking this amount as a correct basis, we find that after paying the ordinary expenses of the State for the year 1882 (estimated at \$1,117,400), a balance of \$259,530 is left to pay any extraordinary expenses which may occur, and for the year 1883 an excess of receipts over expenditures of \$121,530.

As for the year 1881, the expenses of the State seem well provided for. There being a cash balance in the State Treasury to the credit of the General Fund, of \$504,894.94; from this amount deduct \$100,000, to be transferred to the new State House Fund, as required by Act approved March 13, 1879, leaves a balance of \$404,894.94; add to this amount \$1,400,000, the probable and expected receipts during the year, makes the total sum of \$1,804,894.

Estimating the ordinary expenditures, including Legislative, not to exceed \$1,200,000 leaves a balance of \$604,894.94 at the disposal of the Legislature to apply on the State debt, pay any extraordinary expenses which may arise, or make any public improvements, which in the judgment of this Honorable Body, will best serve the interests of the State.

EXECUTIVE AND ADMINISTRATION.	For Year 1882.	Total for 1882.	For Year 1883.	Total for 1883.
For Governor's Salary.....	\$5,000 00		\$5,000 00

THE STATE DEBT.

THE CONDITION OF THE PUBLIC DEBT OF THE STATE AT THE
DATE OF THIS REPORT, OCTOBER 31, 1880, IS AS FOLLOWS:

FOREIGN DEBT.

Five per cent. Certificates, State Stock	\$14,469 99
Two and one-half per cent. Certificates, State Stock	2,925 13
War Loan Bonds, six per cent. . . .	139,000 00
Temporary Loan Bonds, five per cent., due April 1, 1884	510,000 00
Temporary Loan Bonds, registered five per cent., due December 1, 1884 .	200,000 00
Temporary Loan Bonds, held by Pur- due University, five per cent., due April 1, 1881.	200,000 00
Internal Improvement Bonds	27,000 00
Total	\$1,093,395 12

DOMESTIC DEBT.

School Fund Bond No 1, January 1, 1867	\$709,024 85
School Fund Bond No. 2, January 20, 1867.	2,658,057 30
School Fund Bond No. 3, May 1, 1868	184,234 00
School Fund Bond No. 4, January 20, 1871	177,700 00
School Fund Bond No. 5, May 3, 1873	175,767 07
Total	3,904,783 22
Total debt	<u>\$4,998,178 34</u>

STATEMENT OF VALUATION

OF

Real and Personal Property in the State.

The total valuation of real and personal property in the State, during the last twenty-five years, together with the increase or decrease each year, is shown as follows:

Year.	Total.	Increase.	Decrease.
For the year 1856.....	\$279,032,209
For the year 1857.....	317,932,958	\$38,900,749
For the year 1858.....	318,204,964	272,006
For the year 1859.....	435,367,862	117,162,898
For the year 1860.....	455,011,378	19,643,516
For the year 1861.....	441,562,339	\$13,499,039
For the year 1862.....	421,406,936	20,155,408
For the year 1863.....	443,455,036	22,048,100
For the year 1864.....	516,805,999	73,359,963
For the year 1865.....	567,381,553	50,575,554
For the year 1866.....	578,484,109	11,102,556
For the year 1867.....	577,869,079	615,030
For the year 1868.....	587,970,549	10,101,470
For the year 1869.....	655,521,479	67,550,930
For the year 1870.....	662,283,178	6,761,699
For the year 1871.....	653,944,159	8,839,019
For the year 1872.....	653,367,451	576,708
For the year 1873.....	933,581,067	280,213,616
For the year 1874, estimated.....	954,857,475	21,276,408
For the year 1875.....	897,739,783	57,117,692
For the year 1876.....	864,720,440	33,019,343
For the year 1877.....	855,190,125	9,530,315
For the year 1878.....	850,616,987	4,573,138
For the year 1879.....	884,368,828	33,751,841
For the year 1880.....	728,944,231	155,424,597

NOTE.—Since the year 1875 the decrease in value of the three classes of taxable property in this State, is as follows: Lands and improvements, 15¼ per cent.; lots and improvements, 14¼ per cent.; personal property, 17½ per cent.

BANK DEPARTMENT.

In compliance with section eighteen of the act approved February 7, 1873, and section forty-seven of the act approved May 12, 1869, I have caused examinations to be made from time to time of the Banks of Discount and Deposit, and of the Savings Banks. By the reports of examinations recently made, it is conclusively shown that those banks are very ably managed, their deposits properly invested, and the interests of their depositors carefully guarded. It would be impossible to speak in terms of praise of one without doing injustice to the others. The reports are given in detail, and in the following order :

Name of Bank.	Location.	Capital Stock.
Adams County Bank.....	Decatur.....	\$50,000 00
Citizens' Bank.....	Hartford City.....	25,000 00
Citizens' Bank.....	Noblesville.....	60,000 00
Citizens' Bank.....	Portland.....	30,000 00
Citizens' Bank.....	Rockport.....	67,800 00
Citizens' Bank.....	Union City.....	32,000 00
Citizens' State Bank.....	New Castle.....	130,000 00
Citizens' State Bank.....	Petersburg.....	25,000 00
Commercial Bank.....	Union City.....	60,000 00
Elkhart Bank.....	Elkhart.....	25,000 00
Farmers' Bank.....	Frankfort.....	100,000 00
Farmers' Bank.....	Mooresville.....	50,000 00
Farmers' and Merchants' Bank.....	Winchester.....	80,000 00
Lake City Bank.....	Warsaw.....	65,200 00
People's Bank.....	Portland.....	50,000 00
Randolph County Bank.....	Winchester.....	100,000 00
Ridgeville Bank.....	Ridgeville.....	30,000 00
Sullivan County Bank.....	Sullivan.....	69,500 00*
St. Joseph Valley Bank.....	Elkhart.....	25,000 00

*Now a private bank.

NOTE.—By the courtesy of William O. Foley, the efficient Deputy Treasurer of State, I am permitted to use the above tabulated statement of receipts, it being an advanced sheet of the State Treasurer's Report.

M. D. MANSON,

Auditor of State.

LAND DEPARTMENT.

THE SINKING FUND.

Since my last report I would state that the work of properly ledgerizing the various loans to this fund has progressed as rapidly as possible. Owing to the varied duties of the department I have not been able to devote as much time to this branch of the office as I should have liked to have done, but am pleased to report that every payment of interest and principal made on these loans prior to June, 1857—a period of twenty-two years—and embracing Loans No. 1 to 2,181, inclusive, have been transferred to a blotter in convenient shape to go to the ledger. The value of these ledgers, when complete, can not be overestimated; but as the work is very tedious, slow, particular and perplexing, it can not be completed for several years to come, and much time is necessarily consumed in properly ascertaining the status of many of these loans, as many intricate points, at once difficult and tedious, present themselves and can only be unraveled and properly understood by the closest attention and scrutiny. It is hoped that each year will provide a portion of the time that the land clerk may devote to this important branch of the department until all of the Sinking Fund Loans, as well as the Surplus Revenue Loans, Bank Stock Loans and all other Trust Fund Loans have been properly entered, that a glance may show exactly the condition in which they stand.

The following is a complete list of the patents issued by the State during the year:

LANDS HELD BY THE STATE BY DEEDS.

The following described lands and city and town lots are the property of the State, conveyed to secure the State against loss through defalcation and otherwise :

No. 1. Lots Nos. 18, 19 and 20, in Morton, Coffin and Wright's subdivision of out lot No. 149, in the City of Indianapolis.

Conveyed to the State by John Stumph and wife and Samuel Lefevre.

No. 2. The east half of the southwest quarter of section 5, township 30, range 3 west ; the west half of the southeast quarter of section 5, township 30, range 3 west ; the northeast quarter of the

northwest quarter of section 8, township 30, range 3 west; the west half of the northeast quarter of section 8, township 30, range 3 west; the southeast quarter of the northeast quarter of section 8, township 30, range 3 west, containing 320 acres, all in Pulaski county; and,

No. 3. The south half of the northeast quarter of section 15, township 34, range 2 west, containing 80 acres in Starke county.

Conveyed to the State by Daniel A. Farley, ex-Treasurer of Pulaski county, to reimburse the Swamp Land funds, and University Land funds, in which funds losses to the amount of two thousand dollars had occurred while the said Farley was Treasurer of Pulaski county.

No. 4. Lots Nos. 242 and 243 in the "North Burying Ground," in Marion county.

Conveyed to the State by E. J. Peck and wife.

No. 5. One hundred acres in the southeast quarter of section 1, township 15 north, range 2 east, in Marion county.

Conveyed to the State by James P. Drake and wife, and by quit claim from James H. McKernan.

This land was originally purchased as a site for a House of Refuge, but, under an act in relation to the House of Refuge, approved March 8, 1867, it was sold to one McCaslin, who subsequently forfeited it by non-payment of purchase money, and the title of right reverted to the State. But it seems that, while the same was yet on the tax duplicate in the name of McCaslin, it was sold for taxes, and Mrs. McCaslin bought it, and under this title they are still in possession. To what extent this tax sale passes title, I am not apprised, but certainly they have a claim to the amount refunded them that they paid as taxes, from some source. This should be attended to at once, and the State placed in the possession of the land at once.

No. 6. Lot No. one (1), on west side of White river, opposite the City of Indianapolis, and immediately south of the National road, known as the ferry landing.

Lot No. 77, north side of Market street, between Mulberry street and Ohio avenue, in the city of Jeffersonville, Indiana.

This lot was mortgaged November 11, 1875, by one Theodore

W. McCoy and wife to the State of Indiana, to secure a defalcation in the sum of \$1,820. Said mortgage was foreclosed December 11, 1876.

The amount of the judgment, \$1,877.75.

Clarence A. Buskirk, Attorney General of the State, bid the same in at the sale under said foreclosure, July 14, 1877, for the sum of \$1,270.

Buskirk conveyed the lot personally to Wm. G. Oswald, in December, 1878, for the sum of \$1,000. Oswald paid \$200 cash, and gave his note for \$800. The \$200 was not paid into the State Treasury, but was retained by Colonel Merriweather, the attorney in the case, as his fee, as I am informed. Dr. Wm. N. McCoy, of Jeffersonville, Indiana, has offered \$800 cash for the property, and will pay Mrs. Oswald (widow of Wm. G. Oswald) the \$200 paid by her husband, which will make \$1,000. I would respectfully recommend the Legislature to authorize the Auditor of State to sell on the above terms. Under the circumstances I do not deem it right for the State to take the \$200 from the widow, as she would be required to make a quit claim deed to the State, to remove the cloud to the title, which she is willing to do.

LAND FORFEITED TO THE STATE FROM A LOAN FROM INDIANAPOLIS FUND.

The following tract of land has been, during the year, discovered as belonging to the State, to-wit: The west half of the north-east quarter of section number twenty-six, town twenty-two, north, range seven west (excepting four and one-half acres in the south-east corner), situated in Fountain county. This tract was mortgaged to the State, March 18, 1839, by Talmon Tripp, to secure five hundred dollars borrowed from the Indianapolis Fund. It was forfeited to the State and duly bid in by the State June 20, 1840, and on January 9, 1841, the State sold the same on credit to W. S. Palmer, who likewise forfeited it, and the State again bid it in on November 11, 1843, since which time it has belonged to the State, but seems to have been lost sight of. E. M. Weaver, Esq., of Lafayette, is protecting the timber for the State, under appointment from this office.

COLLEGE FUND LANDS.

I hereto subjoin a list of lands forfeited to the State for the use of the college fund, which lands have been abandoned, or which are held and occupied by persons unknown to this office :

No. 657. The southwest quarter of the southeast quarter, and the southeast quarter of the southwest quarter of section 13, in township 7 north, range 9 east, containing 80 acres ; also, the southwest quarter of the northeast quarter of section 11, in township 7 north, range 8 east, containing 40 acres, all in Jennings county. Forfeited in 1868, by Sarah A. Vail, for non-payment of \$821.13.

No. 701. Lot in Southport, Marion county, 13 rods and 4 feet by — feet, in the east half of the southeast quarter of section 7, township 14 north, range 4 east. Forfeited by William Wheeler in 1862, for non-payment of \$131.57.

No. 718. The east half of the southwest quarter, and the west half of the southeast quarter of section 18, in township 25 north, range 5 west, in Jasper county. Forfeited in 1870, by John A. Bradshaw, for non-payment of \$1,022.90.

No. 872. The southeast quarter of the southwest quarter of section 10, and the northwest quarter of the northeast quarter of section 22, in township 30 north, range 3 west, in Pulaski county. Forfeited in 1868, by D. A. Farley, for non-payment of \$613.31.

No. 791. The northeast quarter of the southeast quarter of section 33, in township 18 north, range 7 west, containing 40 acres, in Fountain county. Forfeited by DeWitt C. Reynolds, December 10, 1874, to the State for the use of the college fund for non-payment of \$1,017.63.

No. 763. The southwest quarter of the southeast quarter of section three (3), the northeast quarter of the southeast quarter of section four (4), and the southeast quarter of the northwest quarter of section thirty-two (32), all in township 30 north, range 7 west, in Jasper county, containing 120 acres. Forfeited by John Shearer, and bid in by the State, December 10, 1874, for \$701.22.

No. 657. The southwest quarter of the southeast quarter of sec-

tion 13, the southeast quarter of the southwest quarter of section 13, both in township No. 7 north, range 9 east, and containing 40 acres each; also, the southwest quarter of the northeast quarter of section 11, in township No. 7 north, range 8 east, containing 40 acres, and all situate in the county of Jennings. Forfeited by Sarah A. Vail, January 16, 1877, for non-payment of \$1,106.97.

No. 873. Lots Nos. 15, 16 and 17 in John A. Brouse & Co.'s subdivision of outlet No. 7, and part of lot No. 6 of Robinson & Voorhees' addition to the city of Indianapolis. Forfeited by John A. Brouse and Mary C. Brouse, January 16, 1877, for non-payment of \$579.91.

No. 890. Lot No. 7 of Robinson & Voorhees' subdivision of that part of the southeast quarter of section 5, in township 15 north, range 4 east, lying north of the center of the National Road, containing 2 58-100 acres. Forfeited to college fund by Charles W. Brouse, January 16, 1877, for non-payment of \$602.94.

No. 992. The northeast quarter of the northwest quarter of section 17, in township No. 8 north, range 10 east (except one square of five acres in the southeast corner of the above described tract), being 35 acres in Ripley county. Forfeited by E. L. Davis for the non-payment of \$418.26. Forfeited January 16, 1877.

No. 1,011. Lots Nos. 29 and 30, in Allen's second north addition to Indianapolis. Forfeited by James O. Woodruff for non-payment of \$606.40. Forfeited January 16, 1877.

No. 998. The northeast quarter of the southeast quarter of section 25, in township No. 30 north, in range No. 7 west, in Jasper county. Forfeited by David Yeoman and Emma E. Yeoman, April 22, 1878, for non-payment of \$589.50.

No. 1,044. The northwest quarter of the southeast quarter of section 6, in township 10 north, of range 4 east, in Brown county. Forfeited by Conrad Kiskey and Rebecca Kiskey, April 22, 1878, for non-payment of \$420.29.

No. 1,050. Lot No. 2, in J. M. Myer's re-subdivision of lots Nos. 56, 57, 58 and 59, in Drake and Mayhew's second addition to

Indianapolis. Forfeited by James M. Myers and Mary G. Myers, April 22, 1878, for non-payment of \$589.52.

No. 1,068. Lot No. 4, in John Young's first addition to University Place, in the town of Irvington, as laid out on Recorder's Plat, being 50 feet front on National avenue by 184 feet deep to an alley, situated in Marion county. Forfeited by Annie C. Young, April 22, 1878, for non-payment of \$235.44.

No. 921. Lots 2, 3 and 9, as laid down in plat of John Young's first addition to University Place, near Irvington, in northeast quarter of section 9, township 15 north, range 4 east, in Marion county, Indiana. Forfeited by John Young and Clarissa Young, January 23, 1879, for \$595.96.

No. 957. The northwest quarter of the southwest quarter of section nineteen (19), township seven (7) north, of range six west, containing forty-four and one-half acres, situate in Greene county, Indiana. Forfeited by Francis M. Trissal and Harriet D. Trissal, January 23, 1879, for \$637.54.

No. 1,058. Lot No. six (6), in J. Henry Kappes and James Frank's sub-division of the northeast part of the southwest quarter of section numbered thirteen (13), in township fifteen (15), north of range three (3) east. Forfeited January 23, 1879, by Frederick W. Winter and Mary Winter, his wife, for \$371.10.

No. 1,067. Lot No. three, in J. M. Myers' sub-division of part of lot No. three (3), in Mayhew's heirs' addition to the city of Indianapolis. Forfeited January 23, 1879, by John C. Tibbitts, for \$599.47.

No. 880. The northeast quarter of the northeast quarter of section fourteen (14), in township twelve (12), north of range two (2) east, containing forty acres, situate in Morgan county, Indiana. Forfeited by Isaac Coonfield and Julia Ann Coonfield, September 10, 1879, for \$482.30.

No. 1,051. Lot No. thirty-four (34), in Woodruff's subdivision of lots Nos. 7, 8, 9, 10, 11, 12, 17, 18 and 19 in Bethel F. Morris'

addition to the City of Indianapolis, Marion county, Indiana. Forfeited by Robert B. Driggs, September 10, 1879, for \$602.43.

No. 999. Lot No. two (2), in "Bruce Place," according to the plat thereof, recorded in plat book No. 6, page 122, in the Recorder's office of Marion county, Indiana, said lot lying in Marion county, Indiana. Forfeited by Jacob T. Wright and Sally A. Wright September 10, 1879, for \$601.82.

No. 1,064. Lot No. five (5), in J. M. Myers' subdivision of part of lot numbered three (3) in Mayhew's heirs' addition to the City of Indianapolis, Marion county, Indiana. Mortgaged by George G. Tanner, Charles L. Downie and Flora Downie, and forfeited July 8, 1880, for \$617.89.

No. 1,071. Lot one hundrd and fifty (150), in E. T., S. K. and A. T. Fletcher's Woodlawn addition to the City of Indianapolis, Marion county, Indiana. Forfeited July 8, 1880, by James H. F. Tompkins and Anna R. Tompkins, for 609.04.

No. 1,080. The north half of lot No. twelve (12), in Martindale & Company's subdivision of the west half of the southwest quarter of section thirteen (13), township sixteen (16), north of range three (3) east, in the county of Marion and State of Indiana. Forfeited July 8, 1880, by James W. Cole, for \$635.39.

No. 1,086. Lots fifty-one (51) and fifty-three (53), in Kappes and Frank's subdivision of the northeast part of the southwest quarter of section thirteen, township fifteen (15) north, range three (3) east, situate in Marion county, Indiana. Forfeited July 8, 1880, by Julia M. Frank and James Frank, for \$622.26.

No. 1,099. Lot No. five (5), in Henry G. Colgan's subdivision of lots ten (10) and nineteen, in E. F. Fletcher's first Brookside suburb of the city of Indianapolis, Marion county, Indiana. Forfeited by Charles A. Price, July 8, 1880, for \$361.24.

No. 1,102. Beginning at the northeast corner of lot No. thirty-seven (37), in block No. ten (10), in Hubbard, Martindale and McCarty's southeast addition to the city of Indianapolis, Indiana, in Marion county; thence running west one hundred and eighty (180) feet; thence south ninety-eight (98) feet; thence east one hundred

and eighty (180) feet; thence north ninety-eight (98) feet, to the place of beginning. The plat of said lot is recorded in plat book three, page 210, in the Recorder's office, in Marion county, in the State of Indiana. Forfeited by Margaret J. Hyde and Abner R. Hyde, July 8, 1880, for \$589.40.

I would recommend that the Legislature authorize the Governor, Auditor and Treasurer of State to appoint appraisers and have all of the foregoing forfeited lands, as well as the lands ordered sold by the Legislature of 1875 re-appraised and sold, thus placing them upon the tax duplicate, and enabling the State and counties to derive a revenue from their taxation, for as now held and appraised (and owing to the great amount in excess of their value that is required to purchase them from the State) there is no prospect for their sale.

THE KANKAKEE LANDS.

The last Legislature provided for the survey of certain lands adjacent to English Lake and the Kankakee river, in Starke and Laporte counties, with a view to securing the title to such lands in the State. No provision has been made looking to the furtherance of this end. If the State desires to perfect her title to the lands thus surveyed it should meet with some legislative action, as there is now no law on the statute books providing a mode of procedure. The lands surveyed being that tract of land lying between the river proper and the meandered lines as made by the United States Surveyor; it embraces several thousand acres, mostly wet and overflowed lands.

Of the lands ordered sold by the Legislature of 1875, but two tracts were sold, as follows: The northwest quarter of the southeast quarter of section 33, town 18, north of range 7 west, in Fountain county, mortgaged and forfeited by John Jarvis, in 1866; and the southeast quarter of the southeast quarter of section 33, town No. 18, north of range 7 west, situate in Fountain county, Indiana, mortgaged and forfeited by O. P. Jarvis, in 1866; both of these tracts were sold to John W. Copner and Sarah Copner for the sum of \$800, that being the appraised price of said lands under said act, and was sold on the following terms: Of the \$800 purchase money, the sum of \$400 was paid cash in hand, and said John W. Copner and Sarah Copner executed their two notes for the remaining \$400, each for \$200, on the 25th day of March, 1880, secured by mortgages on the premises, and additionally secured by the personal endorsement of Uriah Deer; payable—one in one year, and the other in two years from their date, with interest.

Of the lands mentioned in my last report, and known as "*Canal lots*," I desire to report that this land has been in litigation for several years, and by a compromise, as per agreement, between the Attorney General on behalf of the State and the Water Works Company, the Hendricks County Circuit Court ordered, among other things, that the title to the east half of that tract of land lying in the city of Indianapolis, and bounded on the east by West street, on the south by Market street, on the west by Blackford street, and on the north by the canal, and being known as a part of the "*Reservation*," be quieted in the State of Indiana. This tract

of land has been surveyed and divided, and the portion that fell to the State is now in possession of the State, but has been leased for a period of years to the Indianapolis Benevolent Society, for the purpose of a "Friendly Inn" for wayfaring men without employment, at an annual rental of two hundred dollars, payable quarterly, in advance, provided, however, that possession is to be given at any time so directed by the Legislature.

LANDS WHERE THE TITLE IN THE STATE IS QUESTIONABLE.

In my last report will be noticed a tract of land situate in White county, and described as follows: The southeast quarter of section seven, in township number twenty-seven north, in range four west, containing 160 acres, conveyed to the State by Robert Ellis and Anna Maria Ellis, said to be the property of the State. A careful investigation into this matter fails to show any title in the State, the party claiming to have conveyed it to the State not having any right or title to the land.

Also, the lands mentioned in my last report as having escheated to the State of Indiana for the use of the common school fund. (The same having been owned by Joseph Emmissberger, an alien, who left no heir-at-law capable of inheriting the same.) The judgment of the Newton County Circuit Court escheating the lands to the State for the use of the school fund has been reversed by the Supreme Court and the cause remanded for new trial. So it is not yet decided.

SWAMP LANDS UNPATENTED.

There are many tracts of swamp lands that have not yet been patented, and of course it is impossible to tell from our records just which tracts are still vacant as the law requires the entry to be made with the county auditor. However, that the present owners of such tracts as have long since been sold by the State, may be enabled to complete their title, I hereto subjoin a list of all swamp lands in the State not heretofore patented by the State to any one, and trust it may be beneficial in the settling up of these records.

UNIVERSITY LANDS.

Prior to the organization of the State government, Congress granted a township of land (township No. 2, south of range No. 11 west), to the territory, to enable the territory to endow a college; and by an act of Congress, approved April 19, 1816 (see Statutes at Large, vol. 3, page 290), a second grant of a township of land was made to the State; township No. 8 north, range 1 west, in Monroe county was selected, which lands have partly been sold and the funds applied to the State University at Bloomington, excepting, however, about 4,000 acres, part of township No. 2 south, range 11 west, in Gibson county, which was sold by authority of the Territorial Legislature, and the proceeds applied for the benefit of the Vincennes University. And by an act of Congress approved February 23, 1854, there was granted to the State in lieu of this land so sold by said Territorial Legislature, various tracts of land throughout the State, and was patented to the United States by the State by patent dated Nov. 10, 1854, now on file in this office, stipulating that the proceeds arising from the sale of said lands should be held in trust by the State of Indiana for the benefit of the Indiana State University.

By the statutes of the State this land is sold by the Auditors of the counties in which it lies, and on credit; requiring one-fourth of the purchase money to be paid in cash at the time of sale with interest on the remainder, and when the full amount is paid a proper patent from the State issues to the purchaser. The records here show many tracts unpatented. If the Auditor of the counties in which these tracts are situate has ever made sale of them, or whether they have once been sold and reverted to the State by non-payment of interest and principal due, this department is not apprised of it. Certain it is the State has issued no patents for them. The following is a full list of University lands so granted by Congress and not patented by the State, viz:

CANAL RECORDS.

During the past year every effort that I could exert has gone forth with the view of procuring the tract books and other records of the Wabash and Erie Canal, but every effort has thus far failed. They are now in the hands of Hon. George C. Duy, receiver of the canal, appointed by the United States Court to succeed Hon. S. B. Gookins, deceased. I am also informed that many of the original patents for canal lands now are in the hands of the receiver undelivered. It is hoped some ways and means may be devised to get these records in the archives of the State, as contemplated by the Act of March 3, 1877.

THE SALINE RECORDS.

I am still unable to report any improvement in the condition of the "Saline Records." They require attention in order to make them useful. This can only be had at the expense of a trip to Orange county. In order to do this there should be a small fund placed at the disposal of the Auditor of State by the next Legislature.

CONCLUSION.

I desire to suggest that an act be passed by the next Legislature directing all county auditors throughout the State to certify to the State Auditor a copy of the subdivisions of all school sections or parts of school sections in the State, with the name of the persons entering the same. These sections were subdivided by the different counties, but no report is on file here, and when this is properly certified to and the State secures the canal records, the files will be as complete as may be.

SUGGESTIONS TO THE LEGISLATURE.

The law makes it my duty to suggest "plans for the improvement and management of the public revenue, funds and incomes" of the State Treasury. In obedience to this requirement, I submit the following remarks which I hope will be of some utility to the next General Assembly in its labor of legislation.

ASSESSMENT AND TAX LAW.

In the last few years there has been a growing feeling of dissatisfaction at our present assessment and tax law, and its multitude of amendments. While I admit, it is too long and complicated, that it contains contradictory sections, that ambiguity exists in some of the clauses, I do not believe that these defects will justify the experiment of repealing the entire law and substituting a new one. The governing principles of the law, in my judgment are correct, and the defects exist only in the subordinate details of its provisions. To remedy the defects, a careful revision of the entire law should be made by competent parties, and if possible abbreviate it, eliminate the conflicting sections, and render plain the ambiguous phrases, and by this method a good and wholesome law will be obtained. The last Legislature, authorizing the appointment by the Supreme Court of a Board of Revision of the Laws, relieves me of the duty of pointing out in detail the defects of the law, and suggesting more suitable provisions.

PAY OF SPECIAL JUDGES.

The law providing the manner of paying for services of special judges should be repealed.

This law which stands approved March 29, 1879, provides that the compensation for services of special judges "shall be paid out of the county treasury, and the county receive credit for the amount on its settlement with the State." This provision results in creating ninety-two sub-State Treasurers over the State, to disburse State revenues, and if this precedent is established, allowing

State revenues to be paid out before reaching the State Treasury, it will be but a brief period till the State officers and members of the Legislature will be deprived of any intelligent idea what amount of money the State will receive from taxation ; and the Legislature at sea when it comes to making provisions for expenditures of money to conduct the State Government.

In my judgment the just and proper method of paying these expenses, would be, where presiding judges are not justly responsible for such special services, is to pay the amount out of the county treasury where the labor originates. This procedure keeps the records of public officers among their own constituents, who alone should have the right to hold them responsible.

FUND OF UNCLAIMED ESTATES.

By reference to this report, it will be seen that the balance in this fund is \$13,088.87. Much of the moneys derived for this fund is collected from county officials by the Attorney General of the State, who deducts 30 per cent., as fees for collecting same, before he pays the amounts into the State Treasury. In many instances, the amounts paid in by the Attorney General, remain but a short time till the legal heir or heirs present their claim to this department, accompanied with an order from court for the original amount collected from the county official by the Attorney General, thereby compelling the Auditor of State to issue a warrant for an amount, which causes the State to pay 30 per cent. for the use of the money.

Would it not be right to so change the law, that the county official or other parties who did not pay these moneys into the State Treasury within the time prescribed by law, be required to pay the fees for collecting the same ?

STATISTICAL DEPARTMENT.

This new State Department, created by an act of the last Legislature, under the able management of Prof. John Collett, in importance and usefulness to the State, is surpassing the most sanguine expectations of its originators and warmest advocates. The reports published and circulated have attracted the attention, not only in our own country, but have elicited lengthy and favorable comments of the European press, and the benefit resulting thereby to the people of the State, I believe, can not be overestimated. I hope

the Legislature will strengthen this infant department by liberal appropriations, and surround it with such laws as will enable it to exercise its fullest capacity in gathering up and publishing to the world Indiana's great resources.

THE BENEVOLENT INSTITUTIONS.

The new law enacted by the last Legislature governing the financial management of the Benevolent Institutions has been in operation about eighteen months. The record of the great savings to the tax-payers of the State, under its provisions and requirements, in my judgment, is a sufficient advocate for its perpetuity.

CONCLUSION.

On retiring from the office of Auditor of State, which I have had the honor to fill for the last two years, I desire to state that I have endeavored to carry out the laws regulating the duties of the Auditor, and I can say that there has been no warrant drawn upon the treasury that was not strictly authorized by the law, as interpreted by myself and the Attorney General. There has been a few cases of mandamus suits, to compel me to issue a warrant on the treasury for money, that I did not believe the parties were entitled to. In all of these cases the Courts have decided my ruling was correct, except in one—the case of Thomas Fogle, of Missouri—who, through his attorney, demanded a warrant for \$400, money paid into the State Treasury by Adjutant General Terrell, to pay bounty to said Fogle as a recruit in the war of the rebellion, credited to the city of Indianapolis, and by said city paid to said Terrell; my reason for refusing to issue the warrant was, said Fogle was reported as a deserter; but the Honorable Judge by whom the case was tried, decided that he was entitled to the money, and he received a warrant for the same.

The relations existing between myself and my brother State officials, their deputies and attaches, of the various State departments, in the last two years have been of the most pleasant nature, and for the assistance and uniform courtesies which they so cheerfully extended to me in the discharge of my official duties, I take pleasure in expressing my sincere thanks.

And I also wish to return in the most public manner, my sincere thanks to my able and efficient Deputy Auditor of State, John H. Piercy, Esq., for the honest, faithful, courteous and zealous

manner in which he has performed the duties assigned to him ; his experience in the office for the last six years has rendered him familiar with all the laws and rules governing the duties of the Auditor of State.

To Thomas B. Messick, Esq., for the able and efficient manner he has conducted the Insurance and Bank Departments of the Auditor's office. Mr. Messick, having had charge of these departments for the past twelve years, is familiar with all its details, and he has rendered valuable service to the State.

To James E. Baker, Esq., land clerk in this office. Mr. Baker has brought to the discharge of his duty, large experience as a practical surveyor. He fully understands all the surveys of the lands in the State, and all the acts of Congress granting lands to this State. He has kept his books and papers connected with the Land Department, in a neat and intelligent manner, and his labors have been duly appreciated by me, and

To James B. Crawford, Esq., clerk, for the intelligent and faithful manner that he has performed his duty ; and

‡ To the janitors of the building for the care they have taken of the public property, and the faithful manner in which they have performed their arduous and laborious duties.

Hoping that my successor, Hon. Ed. H. Wolfe, may have great success in the arduous and responsible duties awaiting him.

M. D. MANSON,

Auditor of State.

FOR THE

PURPOSE OF TAXATION

FOR THE YEAR 1880.

INDIANAPOLIS:

CARLON & HOLLENBECK, PRINTERS AND BINDERS.
1880.

PROCEEDINGS
OF THE
STATE BOARD OF EQUALIZATION
OF 1880.

OFFICE OF THE AUDITOR OF STATE,
INDIANAPOLIS, June 21, 1880.

Agreeable to an act of the General Assembly of the State of Indiana, entitled "An act for a uniform assessment of property, and for the collection and return of taxes thereon," approved December 21, 1872, the Board of Equalization, within and for the State of Indiana, convened at the office of the Auditor of State and organized as required by law.

The following members were present: Isaac P. Gray, Lieutenant Governor; M. D. Manson, Auditor of State, and J. G. Shanklin, Secretary of State.

The members of the Board present, and John H. Piercy, Deputy Auditor of State, as Secretary of the Board, took the oath as prescribed by law, as follows:

We, and each of us, do solemnly swear that we will support the Constitution of the United States, and of the State of Indiana; and that we will faithfully and impartially discharge our duties as members of the State Board of Equalization to the best of our ability.

JAMES D. WILLIAMS, *Governor of State.*

J. G. SHANKLIN, *Secretary of State.*

M. D. MANSON, *Auditor of State.*

W. FLEMING, *Treasurer of State.*

ISAAC P. GRAY, *Lieutenant Governor.*

I, John H. Piercy, do solemnly swear that I will support the Constitution of the United States, and of the State of Indiana, and that I will faithfully perform my duties as Secretary of the State Board of Equalization, to the best of my ability.

(Signed,)

JOHN H. PIERCY.

STATE OF INDIANA, } ss:
SUPREME COURT, }

Before me personally appeared the within named Isaac P. Gray, Lieutenant Governor; Mahlon D. Manson, Auditor of State; and John G. Shanklin, Secretary of State; members of the State Board of Equalization, and John H. Piercy, Secretary of the State Board of Equalization, and were duly sworn according to law, and subscribed their names hereunto.

Witness my hand this, the 21st day of June, 1880.

GABRIEL SCHMUCK,

Clerk Supreme Court.

On motion of M. D. Manson, Isaac P. Gray was chosen temporary chairman.

On motion of J. G. Shanklin, the Board adjourned till Tuesday, June 2, at 29 P. M.

TUESDAY, JUNE 29, 1880.

Board met pursuant to adjournment.

Members present, Isaac P. Gray, M. D. Manson, J. G. Shanklin and William Fleming.

Gabriel Schmuck, Clerk of Supreme Court, administered the oath of office to William Fleming, in compliance with the law.

By direction of the Board the Secretary reported that the following railroads had failed to render their annual reports for taxation in compliance with law: The Chicago & Canada Southern, Chicago & Illinois Southern, Cincinnati, Rockport & Southwestern, Evansville & Terre Haute, Indianapolis, Decatur & Springfield, Indianapolis & St. Louis, Indianapolis, Delphi & Chicago, Kingan, Logansport, Crawfordsville & Southwestern, Louisville, New Albany & St. Louis Air Line, and Terre Haute & Indianap-

olis, which roads the Auditor stated had been notified to report at once.

The file of reports of the assessment of property exhibited the fact that twenty counties were delinquent in their reports; these delinquencies, taken in connection with those of the railroads, rendered it impossible for the Board to take any decisive action as to equalizing the assessment of real estate or fixing any assessment on railroads. And, in order to facilitate the business, the Board decided to hear statements from parties either in the interest of the assessments of counties or railroads, in the order they presented themselves before the Board; the facts presented to be considered, but no decisive action to be taken until the necessary reports were on file. On motion of Mr. Shanklin, the Secretary of the Board was directed to notify the County Auditors who were delinquent in their reports of the "Abstracts of Assessment of Property" that the State Board of Equalization was in session, and they would please report immediately or the Board would be compelled to act independently of their reports.

On motion, the Board adjourned to meet the following day at 10 A. M.

WEDNESDAY, June 30, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Gray, Shanklin, Manson and Fleming.

The entire day was taken up in the Board hearing statements from various parties interested in the assessment of 1880.

On motion, Board adjourned to meet Tuesday, July 6, 1880, at 2 P. M.

TUESDAY, July 6, 1880, 2 P. M.

Board met pursuant to adjournment.

Members present, Gray, Shanklin, Manson and Fleming.

The owners of certain lands located in North township, Lake county, Indiana, by their agent, Morton Culver, appeared before the Board and made complaint that these lands had been appraised for taxation for the year 1880, at excessive figures; that they had presented the matter before the County Board of Equalization of

Lake county, and failed to obtain relief, and now asked that the State Board of Equalization take action in the matter, and, if possible, grant a reduction of the assessment.

By motion, the question as to whether the State Board of Equalization had legal authority to change local assessments or not was referred to the Attorney General of State for his consideration and legal instruction to the Board.

The question as to what constitutes the "right of way" of railroads, as expressed in section 72 of the assessment law of 1872; also whether towns and cities have the authority to assess the "right of way" of railroads, independent of the assessment made by the State Board of Equalization, by motion, were referred to the Hon. T. W. Woollen, Attorney General of State, for his decision.

On motion, the Board adjourned to meet the following day, at 10 A. M.

WEDNESDAY, July 7, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray, Manson and Fleming.

After having taken the oath, in compliance with law, Governor Williams was chosen President of the Board.

The Hon. T. W. Woollen, Attorney General of State, returned the papers in reference to the question of local assessments in Lake county, with verbal instruction to the effect that the State Board of Equalization had no legal authority to change assessments made by local authorities in individual cases.

The equalization of appraisements of lands was considered and discussed at length, but no positive or fixed action taken.

On motion, Board adjourned to meet the following day at 2 P. M.

THURSDAY, July 8, 1880, 2 P. M.

Board met pursuant to adjournment.

Members present, Williams Gray, Manson and Fleming.

The matter of equalizing the assessment of real estate was considered the entire afternoon.

On motion, Board adjourned to meet Tuesday, July the 13th, 1880, at 10 A. M.

TUESDAY, July 13, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray, Manson and Fleming.

The day was spent in considering the assessment of railroads.

By motion, Board adjourned to meet the following day at 10

A. M.

WEDNESDAY, July 14, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray, Manson and Fleming.

Railroad assessments were considered the entire day.

On motion, Board adjourned to meet the following day at 10

A. M.

THURSDAY, July 15, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray, Manson and Fleming.

The equalization of the assessments of real estate was considered the entire day.

On motion, Board adjourned to meet the following day at 10

A. M.

FRIDAY, July 16, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray, Manson and Fleming.

Matter of equalizing the assessments of real estate was taken up and considered the entire day, but no permanent figures fixed, as Marion and Floyd counties had not reported.

On motion, Board adjourned to meet Tuesday, July the 20th, at 10 A. M.

TUESDAY, July 20, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray, Manson and Fleming.

The equalization of the appraisement of real estate of the different counties was under consideration the entire day.

Board adjourned to meet the following day at 10 A. M.

WEDNESDAY, July 21, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray, Manson and Fleming.

The matter of equalizing the assessment of real estate of the different counties of the State was taken up. And, on motion, it was ordered that the assessment of real estate for the year 1880, of the following counties, be increased as follows: Benton, 10 per cent.; Daviess, 5 per cent.; Greene, 5 per cent.; Hendricks, 5 per cent.; Henry, 5 per cent.; Miami, 5 per cent.; Newton, 10 per cent.; Warren, 6 per cent.; and Marion, 6 per cent., excepting city lots of Marion, which would be considered at a future time. And on motion it was ordered that the assessment of real estate of the following counties, be decreased, as follows: Fulton, 5 per cent.; Huntington, 5 per cent.; Pulaski, 10 per cent.; Starke, 10 per cent.; Sullivan, 5 per cent.; Wells, 5 per cent.; and Whitley, 10 per cent.

On motion it was ordered the assessment of real estate of the following counties remain the same as reported to the Auditor of State: Adams, Allen, Bartholomew, Blackford, Boone, Brown, Carroll, Cass, Clark, Clay, Clinton, Crawford, Dearborn, Decatur, Dekalb, Delaware, Dubois, Elkhart, Fayette, Fountain, Franklin, Gibson, Grant, Hamilton, Hancock, Harrison, Howard, Jackson, Jasper, Jay, Jefferson, Jennings, Johnson, Knox, Kosciusko, Lagrange, Lake, Laporte, Lawrence, Madison, Marshall, Martin, Mouroe, Montgomery, Morgan, Noble, Ohio, Orange, Owen, Parke, Perry, Pike, Porter, Posey, Putnam, Randolph, Ripley, Rush, Scott, Shelby, Spencer, St. Joseph, Steuben, Switzerland, Tippecanoe, Tipton, Union, Vanderburgh, Vermillion, Vigo, Wabash, Warrick, Washington, Wayne and White.

On motion, the Auditor of State was ordered to notify each County Auditor in the State of the action of the Board.

Adjourned to meet Tuesday, July 27, 1880, at 10 A. M.

TUESDAY, July 27, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray and Fleming.

On motion, it was ordered that the appraisement of city lots in Marion county for the year 1880 be increased six per cent., and

that the appraisement of real estate of Floyd county remain the same as reported to the Auditor of State.

On motion, Board adjourned to meet the following day at 10 A. M.

WEDNESDAY, July 28, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray and Fleming.

A general review of the work done at former meetings, in the matter of equalizing the assessment of real estate, was made, and, on motion, it was ordered to remain as fixed by the Board.

On motion, Board adjourned to meet Tuesday, August the 3d, at 2 P. M.

TUESDAY, August 3, 1880, 2 P. M.

Board met pursuant to adjournment.

Members present, Williams, Gray, Manson, Shanklin and Fleming.

Marion county, by her County Commissioners and attorney, appeared before the Board with petition, asking that the action of the Board at former meetings adding six per cent. to the assessment of real estate in Marion county be reconsidered, and the assessment as reported to the Auditor of State be allowed to remain unchanged.

By motion, it was ordered that the equalization of real estate as passed upon by the Board at former meetings be changed as follows: Kosciusko county, Jasper and Lawrence, there be a deduction of five per cent. on each, and Marion to remain the same as reported to the Auditor of State by the County Auditor.

On motion, Board adjourned to meet the following day at 10 A. M.

AUGUST 4, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Gray, Manson and Fleming. Mr. Gray was chosen temporary chairman.

The assessment of railroad property was considered and canvassed during the entire session, but no values fixed permanently.

In compliance with a request of the Board at a former meeting, the Hon. T. W. Woollen, Attorney General of State, submitted a written opinion as to what is included in the "Right of Way," as mentioned in Sections 72 and 73 of the Assessment Law; also as to the right of cities and towns assessing railroad track, independent of the action of the State Board of Equalization. The opinion, by motion, was ordered to be spread upon the record and embodied in the report of the proceedings of the Board.

On motion, Board adjourned to meet Monday, August 9, at 10 A. M.

OFFICE OF ATTORNEY GENERAL, INDIANAPOLIS, July 27, 1880.

GENTLEMEN:—You refer to me for my opinion two questions:

1. What is included in the "Right of Way," as mentioned in Sections 72 and 73 of the Assessment Law, and denominated the "railroad track."
2. Have cities and towns the right to assess any part of this "railroad track" for municipal purposes, independent of the action of the State Board of Equalization?

In answer, it may be remarked, that our law is a copy of that in operation in the State of Illinois, from which it was taken, and the courts of that State hold that the right of way includes all the land and the improvements thereon which are used on the line of the road in its operation. The land may be narrow or wide, but if used and dedicated to the purpose of operating the road it becomes a part of the right of way, and is to be taxed as such. It may constitute lots and strips of land in cities and towns used for depots, stations, round-houses, side tracks, turnouts, etc., but it is still listed as a part of the "railroad track" under the statute. Real estate disconnected from the road, or held for purposes other than its operation, is assessed by the county, city or town authorities as other real estate.

In regard to the second question, the courts of Illinois seem to have held that towns could not assess and collect tax from any portion of the railroad track. It is hard to understand just what the law does mean, and the case in the Illinois court may not be reported as fully as would be necessary to understand its entire force.

I am of opinion, however, that cities and towns may assess a local or municipal tax upon the railroad property, and the only difficulty is, as to whether the assessment made by the State Board of Equalization is exclusive of any other val-

uation by the local authorities. Under section 74 of the act, taken in connection with its interpretation in the State of Illinois, it seems to me that the assessment made by the State Board must be taken by the cities and towns as the basis upon which to calculate the tax. These municipalities are entitled to tax their *pro rata* share of the main track as separated from the side tracks, etc., and in addition they may tax the side tracks, turnouts, etc., located within their corporate limits, but in doing so must take the valuation upon the property by the State Board of Equalization.

Very respectfully,

T. W. WOOLLEN, Attorney General.

To the State Board of Equalization.

MONDAY, August 9, 1880, 10 A. M.

Board met pursuant to adjournment.

Members present, Williams, Gray, Shanklin, Manson and Fleming.

Assessment of railroad property was considered the entire day.

On motion, adjourned to meet the following day at 10 A. M.

TUESDAY, August 10, 1880, 10 A. M.

Board met pursuant to adjournment, with all the members present.

The matter of assessment of railroad property was resumed, and the following valuation of the various roads in the State was unanimously agreed upon, and was ordered placed upon the records as the assessment for taxation for the year 1880:

TABLE No. 2.

Value per mile of Main Track, Side Track and Rolling Stock, as fixed by the State Board of Equalization, for the purposes of taxation, for the year 1880.

Anderson, Lebanon & St. Louis,

19.37 miles.	Main track, per mile	\$2,000
1.35 "	Side " "	800
19.37 "	Rolling stock, "	15

Baltimore & Ohio and Chicago,

146.35 miles.	Main track, per mile	\$8,000
15.63 "	Side " "	2,500
146.35 "	Rolling stock, "	1,800

Bedford, Springfield, Owensburg & Bloomfield (Narrow Gauge),

41.00 miles.	Main track, per mile	\$1,200
2.00 "	Side " "	400
41.00 "	Rolling stock, "	300

Bloomfield (Narrow Gauge),

9.00 miles.	Main track, per mile	\$1,000
"	Side " "	None.
9.00 "	Rolling stock, "	500

Cleveland, Columbus, Cincinnati & Indianapolis,

83.84 miles.	Main track, per mile	\$10,500
27.23 "	Side " "	3,000
83.84 "	Rolling stock, "	4,000

Cincinnati, Hamilton & Indianapolis,

78.63 miles.	Main track, per mile	\$7,000
8.68 "	Side " " 	3,000
78.63 "	Rolling stock, " 	2,000

Cincinnati, Richmond & Fort Wayne,

85.89 miles.	Main track, per mile	\$4,500
3.65 "	Side " " 	2,500

18.42 "	Rolling stock, " 	750

Cambridge City Extension of same,

20.97 miles.	Main track, per mile	\$3,000
.72 "	Side " " 	1,400
20.97 "	Rolling stock, " 	750

Kingan,

.42 miles.	Main track, per mile	\$5,000
.46 "	Side " " 	3,000
"	Rolling stock, " 	None.

Louisville & Nashville,

28.41 miles.	Main track, per mile	\$5,500
3.85 "	Side " "	2,200
28.41 "	Rolling stock, "	1,200

Louisville, New Albany & Chicago,

288.26 miles.	Main track, per mile	\$3,000
24.45 "	Side " "	1,000
288.26 "	Rolling stock "	575

Louisville, New Albany & St. Louis (Air Line),

26.00 miles.	Main track, per mile	\$2,000
" "	Side " "	None.
26.00 "	Rolling stock "	250

Little Miami,

4.19 miles.	Main track, per mile	\$5,000
.94 "	Side " "	2,000
4.19 "	Rolling stock, "	1,500

Lake Shore & Michigan Southern,

167.14 miles.	Main track, per mile	\$17,000
69.09 "	Side " "	4,000
167.14 "	Rolling stock, "	4,000

Lake Erie and Western,

157.89 miles.	Main track, per mile	\$5,500
14.14 "	Side " "	3,000
157.89 "	Rolling stock, "	1,000

Lake Erie, Evansville & Southwestern,

17.00 miles.	Main track, per mile	\$2,500
.45 "	Side " "	1,200
17.00 "	Rolling stock, "	400

Michigan Air Line,

5.62 miles.	Main track, per mile	\$5,000
1.01 "	Side " " 	2,000
	Rolling stock, " 	None.

Michigan City and Indianapolis,

12.75 miles.	Main track, per mile	\$3,000
5.06 "	Side " " 	1,400
12.75 "	Rolling stock, " 	1,000

Michigan Central,

42.41 miles.	Main track, per mile	\$17,000
24.72 "	Side " " 	4,000
42.41 "	Rolling stock, " 	4,000

Ohio & Mississippi,

171.89 miles.	Main track, per mile	\$8,000
28.32 "	Side " " 	3,000
171.89 "	Rolling stock, " 	1,800

Louisville Branch of same,

53.31 miles.	Main track, per mile	\$5,000
6.25 "	Side " " 	2,000
53.31 "	Rolling stock, " 	1,800

Pittsburg, Cincinnati & St. Louis,

416.64 miles.	Main track, per mile	\$7,750
45.72 "	Side " " 	3,000
416.64 "	Rolling stock, " 	1,700

Pittsburg, Fort Wayne & Chicago,

152.57 miles.	Main track, per mile	\$17,000
48.10 "	Side " " 	4,000
152.57 "	Rolling stock, " 	4,000

Terre Haute & Logansport,

115.07	miles.	Main track, per mile	\$3,000
9.50	"	Side " "	2,000
115.07	"	Rolling stock "	500

Terre Haute & Indianapolis,

79.88	miles.	Main track, per mile	\$12,000
74.82	"	Side " "	2,000
79.88	"	Rolling stock, "	4,500

Terre Haute & Southeastern,

40.00	miles.	Main track, per mile	\$3,500
2.37	"	Side " "	1,400
40.00	"	Rolling stock, "	230

Toledo, Delphos & Burlington,

37.30	miles.	Main track, per mile	\$1,000
.66	"	Side " "	1,000
	"	Rolling stock, "	None.

Union Railroad, Transfer & Stock Yard,

12.10	miles.	Main track, per mile	\$20,000
6.07	"	Side " "	6,000
12.10	"	Rolling stock, "	2,000

Wabash, St. Louis & Pacific,

166.00	miles.	Main track, per mile	\$12,500
46.00	"	Side " "	4,000
166.00	"	Rolling stock, "	2,500

Whitewater,

61.40	miles.	Main track, per mile	\$2,500
4.00	"	Side " "	1,200
61.40	"	Rolling stock, "	600

TABLE No. 3.

Table of Main Track, Side Track and Rolling Stock of Railroads in Indiana, for the year 1880, as assessed and equalized by the State Board of Equalization.

Number.	NAMES OF ROADS.	MAIN TRACK.			SIDE TRACK.			ROLLING STOCK.			Total Assessment.
		Miles.	Per mile.	Total.	Miles.	Per mile.	Total.	Miles.	Per mile.	Total.	
1	Anderson, Lebanon & St. Louis.....	19.37	\$2,000	\$38,740	1.35	\$800	\$1,080	19.37	\$15	\$290	\$40,110

On motion, it was ordered that the Auditor of State be authorized to draw warrants upon the State Treasury for expenses of the Board, as follows: To William Fleming, \$5.50, for amount paid by him for "Poor's Railroad Manual," for the Board; and to John H. Piercy, \$700.00, for services as Secretary of the Board, in preparing the report of the proceedings, spreading same upon the State records, having same published, and distributing same to the counties in the State.

The business and labor of the Board being completed, adjourned.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, August 10, 1880.

HON. M. D. MANSON, *Auditor of the State of Indiana*:

It is hereby certified that the foregoing record from page 376 to 410, inclusive, is the true, full and complete record of the proceedings of the State Board of Equalization for 1880, organized under the act entitled "An act to provide for a uniform assessment of property, and for the collection and return of taxes thereon," approved December 21, 1872, and that the same is a correct statement of the assessments made by said Board for the year 1880.

(Signed)

JAMES D. WILLIAMS,,

Governor of Indiana and Chairman of the State Board of Equalization.

JOHN H. PIERCY,

Deputy Auditor of State and Secretary of the State Board of Equalization.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, August 10, 1880.

I, M. D. Manson, Auditor of the State of Indiana, hereby certify that the within and foregoing is a true copy of the returns of the assessments made by the State Board of Equalization of Indiana, for the year 1880, as certified to me by the President and Secretary of said Board, on the 10th day of August, 1880.

Witness my hand and seal this 10th day
of August, 1880.

[SEAL]

M. D. MANSON,

Auditor of State.

NOTE.—"Pages 376 to 410, inclusive," named in the certificate, are pages of the records in the office of the Auditor of State.

ANNUAL REPORT

OF THE

TREASURER OF STATE

FOR THE YEAR ENDING OCTOBER 31, 1880.

TO THE GOVERNOR

OF THE

STATE OF INDIANA.

INDIANAPOLIS:

CARLON & HOLLENBECK, PRINTERS AND BINDERS.

1880.

THE STATE OF INDIANA,
GOVERNOR'S OFFICE.

Received, December 9, 1880, transmitted to the Secretary of State to be filed and preserved in his office and published as ordered by the Commissioners of the Public Printing.

SAMUEL R. DOWNEY,
Secretary.

Filed in my office December 11, 1880.

J. G. SHANKLIN,
Secretary of State.

REPORT.

TREASURER OF STATE'S OFFICE,

INDIANAPOLIS, INDIANA, November 1, 1880.

TO HIS EXCELLENCY,

JAMES D. WILLIAMS, Governor: .

In fulfillment of my duty as Treasurer of State, I have the honor to submit herewith a report of the financial transactions of this department during the fiscal year which ended October 31, 1880.

The total net receipts from all sources during the year, and including \$583,751.92, balance on hand November 1, 1879, were \$4,035,960.94.

The net disbursements for the year for all purposes were \$3,387,057.11, leaving a balance in the treasury, October 31, 1880, of \$885,865.37.

The balance in the General Fund, November 1, 1879, was \$226,584.91; the receipts were \$1,477,609.92, making the total receipts \$1,704,194.83. The disbursements from this fund during the year were \$1,199,299.89, leaving a balance on hand, October 31, of \$504,894.94, being a gain of \$278,310.03.

For a full detail of the financial operations of this department I beg to refer you to the accompanying exhibits and tables arranged in the following order:

First. Showing the condition of the various funds of the Treasury at the beginning of the year.

Second. Showing the gross and net receipts and disbursements during the year.

Third. Showing the receipts and disbursements of the various Treasury funds.

Fourth. Showing the gross receipts and disbursements for each month of the year.

Fifth. Showing the condition of the various funds of the Treasury at the close of the year.

Sixth. Showing the condition of the Foreign and Domestic debt of the State October 31, 1880.

Seventh. Tabular statement showing the condition of the General Appropriation accounts.

Eighth. Tabular statement showing the amounts paid in by the County Treasurers at the December settlements, 1879.

Ninth. Tabular statement showing the amounts paid in by the County Treasurers at the May settlements, 1880.

Tenth. Tabular statement showing the total amounts paid in by the County Treasurers during the year.

Eleventh. Tabular comparative statements, showing the amounts collected from the several counties for cost of maintaining offenders in the House of Refuge and Female Reformatory, and for clothing furnished pupils and patients in the benevolent institutions.

W. FLEMING, Treasurer of State.

STATEMENT I.

Showing the Condition of the Various Funds of the Treasury at the beginning of the Fiscal Year, November 1, 1879.

	<hr/>	\$885,865 37

STATEMENT VI.

*Showing the Condition of the Foreign and Domestic Debt of the State
October 31, 1880.*

FOREIGN DEBT.

Five per cent. Stocks outstanding	\$14,469 99
Two and one-half per cent. Stocks outstanding	2,925 13
Six per cent. War Loan Bonds	139,000 00
Five per cent. Bonds held by and payable to the Brooklyn Savings Bank of Brooklyn, N. Y., due Dec. 1, 1889, but payable at the pleasure of the State after April 1, 1884	200,000 00
Five per cent. Bonds due April 1, 1889, but payable at the pleasure of the State after April 1, 1884	385,000 00
Five per cent. Bonds payable on the same conditions held by Purdue University	125,000 00
Five per cent. Temporary Loan Bonds held by Pur- due University, payable April 1, 1881	200,000 00
*Twenty-one Internal Improvement Bonds past due	21,000 00

*NOTE.—The amount due the holder of these bonds is in controversy. There has been no interest paid on them since 1841. The State officers proposed to pay six per cent. on the principal, and six per cent. on the coupons after they became due, until February 13, 1873. This was refused, the holder of the bonds claiming interest at the rate of seven per cent. on both principal and coupons from the time they became due until they are paid. Suit was brought in the Superior Court of Marion county, and the owner's claim of seven per cent. allowed by that court. From this decision an appeal has been taken to the Supreme Court, where the case is still pending.

The amount required to pay these bonds will not fall far short of \$125,000. The State, by an act approved December 12, 1872, authorized the payment of one hundred and ninety-one of its old Internal Improvement Bonds, that being the number that was then thought to be outstanding. One hundred and sixty-four have been paid, leaving twenty-seven still unpaid. Of these the United States holds six, and the holder of the bond on which suit has been brought claims to have twenty-four more. This will leave four more of those old bonds that have not been provided for.

Six five per cent. Internal Improvement Bonds, due July 1, 1886, held by the United States. . . .	\$6,000 00
Total foreign debt.	<u>\$1,093,395 12</u>

DOMESTIC DEBT.

Six per cent. Non-negotiable Bonds due the Common School Fund, interest payable semi-annually, April 10 and October 10, to the School Revenue for Tuition Fund	3,904,783 22
Total debt of the State	<u><u>\$4,998,178 34</u></u>

STATEMENT VII.

STATEMENT XI.

In addition to the usual annual statement showing the collections from the counties in payment for clothing furnished the pupils of the Institute for the Blind, the Institution for the Deaf and Dumb, and the patients in the Insane Hospital, and for one-half of the maintenance of juvenile offenders in the House of Refuge and Female Reformatory, comparative statements of the collections for each institution, are given as long as any record has been kept. As will be seen, the total amount collected since November 1, 1875, is \$266,344.75. (The statements for the Insane Hospital and Deaf and Dumb Institution collections made prior to November 1, 1875), are not included in this total. Prior to the Legislature of 1877, this money was used by the several institutions, and went to increase their regular appropriations. In that year, the law was so changed as to deprive the House of Refuge and Female Reformatory of the moneys so collected, and limited their current expenses to the appropriation. The Legislature of 1879 made similar restrictions in regard to the three benevolent institutions. In making comparisons, therefore, one year with another, of the cost of running any of the institutions, the following summary and tables will be found convenient.

SUMMARY OF TABLES THAT FOLLOW.

Year.	Insane Hospital.	Deaf and Dumb Institution.	Blind Asylum.	House of Refuge.	Female Reformatory	Totals.
1876	\$13,659 70	\$3,054 89	\$1,715 58	\$31,903 45	\$10,647 25	\$60,980 87

REPORT

OF THE

ATTORNEY GENERAL

OF THE

STATE OF INDIANA

FOR THE

TWO YEARS ENDING NOVEMBER 6, 1880.

TO THE GOVERNOR.

INDIANAPOLIS:

CARLON AND HOLLENBECK, PRINTERS AND BINDERS.

1881.

THE STATE OF INDIANA,

GOVERNOR'S OFFICE.

Received January 6, 1881. Transmitted to the Secretary of State to be filed and preserved in his office and published as ordered by the Commissioners of the Public Printing.

SAMUEL R. DOWNEY,

Secretary.

Filed in my office January —, 1881.

J. G. SHANKLIN,

Secretary of State.

REPORT.

ATTORNEY GENERAL'S OFFICE, NOVEMBER 6, 1880.

SIR:—Although the law does not require the Attorney General to report to the Governor, yet I deem it proper to do so, and herewith submit to you my report for the two years during which I exercised the duties of the office.

At the time I took possession of the office, on the 7th day of November, 1878, there was a suit pending between the State and the Indianapolis Water Works Company, involving the title to a strip of land situated in the city of Indianapolis, and bordering on the Central Canal. It had been in litigation for some time, and by direction of the Governor and other State officers a compromise was effected, by which the State was decreed to be the owner of one half and the Water Works Company the other half of the property. This was deemed to be the best way of settling the controversy, as it was a doubtful one at best, and was costing the State considerable money to maintain her action.

During the term of my predecessor a mortgage had been foreclosed on a house and lot in the city of Jeffersonville, the property sold and bid in by the Attorney General, who received a deed. The property had been sold, and the purchaser had paid two hundred dollars of the purchase money, but believing such sale was void, I deemed it my duty to assert the right of the State to the premises, which I did, and they were turned over to the Auditor of State. The Governor, Auditor and myself conditionally disposed of the property for a thousand dollars, but as there was no authority to make an absolute sale it was understood that the sale

must be confirmed by the Legislature. Whatever may be done in the matter, provision should be made to refund to the purchaser the two hundred dollars above spoken of, as such purchase was made in good faith.

During my term, my attention was called to the fact by the Governor and Auditor of State, that the State had an apparent right to one-half of the bed of Beaver Lake, which she had never sold, and the title to which had been released to her by an act of Congress, approved January 11, 1873.

As will be recollected, the lake had been claimed by Messrs. Bright and Dunn, by reason of riparian proprietorship, and they had laid off the bed of the lake in forty acre lots, and each took alternate lots. That part falling to Dunn was conveyed to Bright by sheriff's deed. Bright subsequently conveyed the Dunn lots to the Treasurer of State for the use of the State, in satisfaction of a debt which Dunn owed the State. These lands were afterwards conveyed by the Treasurer to the State, by which the State acquired her title to one-half of the bed of the lake. Afterwards, by the act approved December 12, 1865, (acts special session 1865, p. 192), the Legislature authorized the sale of these lots, and in pursuance of that act, the 7,880 acres owned by the State, have been sold to different purchasers, and patents issued accordingly.

The other lots claimed by Mr. Bright have all been sold, and are held and claimed by different parties. As his claim was based on his riparian ownership, which was thought not to be good, it was deemed best to institute legal proceedings to test the question. I accordingly brought suit in the Newton Circuit Court, asserting the title of the State to the lands, which is now pending. Shortly afterwards the defendants made application to me for a continuance of the case until after the session of the Legislature. After a full examination of the facts, it seemed to me that there were equities in the case that could be better settled by the General Assembly than by the courts, and I consented to a continuance of the case from term to term, until the legislature could act. The fact that the State took the same title Bright had and sold the lands to other parties, and, as I am informed, has collected large amounts of taxes on the lands thus sold, would seem to make it doubtful whether she should now assert her title acquired by the act of Congress of

1873. It is proper, also, to remark, that at the regular session of the Legislature of 1875 (see Journal, vol. 1, p. 345), Governor Hendricks referred this matter to that body, but no action seems to have been taken thereon.

The State has large claims against the general government, which during my term I have endeavored to bring to a settlement. One of them is the balance due on the war loan, and which as originally filed in 1868, is as follows :

For amount of discount on \$2,000,000 of Indiana	
War Loan Bonds	\$243,107 51
For amount expended for printing, brokerage, etc.,	
in sale of same	1,685 39
For amount of interest paid on said bonds to May,	
1868	362,186 51
	<hr/>
Total	<u>\$606,979 41</u>

This claim accrued against the United States under the act of Congress approved July 27, 1861, and a joint resolution of March 8, 1862, by which the United States undertook to reimburse the States for "the costs, charges and expenses properly incurred" by the States "for enrolling, subsisting, clothing, supplying, arming, equipping, paying and transporting" troops, employed in aiding to suppress the rebellion. This claim was rejected by the accounting officer of the treasury, on the ground that the act was not broad enough to authorize its payment, but the claim was conceded to be just and that it ought to be paid. On the 6th of December, 1872, Senator Morton introduced a bill in the Senate of the United States providing for its payment, and similar bills have from time to time been introduced, but have failed of passage. The claim is a just one, and will doubtless be eventually paid. Other States have similar claims, and all keep agents in Washington to attend to their interests.

During my term a large number of cases of a criminal nature have been appealed to the Supreme Court, the larger part of which have been reversed. These cases have been properly briefed, but for some reason the errors seemed to be generally against the State.

I provided for the office a case docket, in which all the cases were entered, together with the proceedings had upon them.

I also provided a record of collections, and a journal and ledger, in which appear in full the collections made by the office, journalized and posted in double entry form. During my term I have made collections, and after deducting the fees allowed by law, have paid the moneys into the proper treasuries, as follows:

On account of Docket Fees	\$13,744 98
On account of Fines	15,571 80
On account of Unclaimed Fees	3,696 81
On account of Unclaimed Estates	2,367 96
On account of General Fund	6,816 61
On account of State School Tax	3,700 68
On account of New State House Fund	341 57
On account of Escheats	1,365 97
On account of Swamp Land Fund	72 08
Total	<u>\$47,678 46</u>

The amount which came into my hands to be
paid into the State Treasury was the sum of \$25,609 82

Which I paid in as follows:

1879.

January 7	\$1,163 49
March 7	1,665 01
December 31	2,230 67

1880.

July 21	1,799 87
July 22	2,980 82
September 3	3,339 25
October 30	3,729 33
October 30	1,236 86
November 26	1,718 13
November 29	4,977 10
December 22	769 29
	<u>\$25,609 82</u>

And the residue of said sum of \$47,678.46 has also been paid into the several proper County Treasuries above stated.

Under the act of 1872, providing for the redemption of the old Wabash and Erie Canal bonds to the number of 191, the officers charged with such redemption, adopted as a basis of settlement, the rule that they would pay six per cent. interest on the sums due, and that interest should cease after notice of the readiness of the State to pay. Under this rule, all the redemptions have been made, except in the case of Mr. Coughlan, a citizen of Great Britian, who claimed interest up to the date of payment, and that, as the bonds and coupons are payable in New York, interest shall be counted at seven per centum, according to the laws of that State. On refusal of the board to comply with his demand, Mr. Coughlan brought a writ of mandate against the Governor and other members of the board, to compel payment on his terms. The difference is very large in the aggregate. When I assumed the duties of the office, I found the suit pending, and with the consent of the other members of the board, I agreed upon a statement of facts, which, on being submitted to the court, was decided against the State. The case is now pending in the Supreme Court on appeal.

A large number of official opinions have been required of the Attorney General during my term, some of them of a very important nature, all of which will be found in the record provided for that purpose, remaining in the office. In addition to these official opinions, I have received a large number of inquiries from different officers and others, convering all manner of questions in the administration of the law, which I have answered as well as my time would permit, where answers seemed to be proper. These inquiries have grown to be a burden upon the office, and while the Attorney General is not bound to answer them, it would make his office very unpleasant if he should refuse.

I have the honor to be, very respectfully,

T. W. WOOLLEN,

Attorney General.

To His Excellency, The Governor.

BIENNIAL REPORT

OF THE

QUARTER-MASTER GENERAL

OF THE

STATE OF INDIANA.

1879-1880.

TO THE GOVERNOR.

INDIANAPOLIS:

CARLON AND HOLLENBECK, PRINTERS AND BINDERS.

CAVALRY.

Benton County Cavalry, one hundred sabres and equipments.

ARTILLERY.

Lime City Battery, Captain G. W. Whitmore, one cannon and implements.

Terre Haute Light Artillery, Captain William Drensiike, two cannons and implements.

In addition to arms named, the following companies have Gatling guns:

Evansville Rifles, one.

Governor's Guards, one.

Terre Haute Light Guards, one.

Richmond Light Guards, one.

Cannon belonging to State are at following places:

One at Greenfield, Capt. E. Huntsinger.

One at Delphi, A. B. Crampton.

One at Franklin, Wm. Barnitt.

One at Leavenworth, John Benz.

One at Richmond, J. H. Popp.

One at Lafayette, J. W. Robb.

One at Covington, S. J. Welton.

ARMS IN STATE ARMORY.

233 Springfield rifles, cal. 45.

480 Enfield rifles, rusty.

1,220 muskets, rusty.

2 Gatling guns, complete.

6 water buckets.

6 tar buckets.

- 2 drag ropes.
- 5 12-pound rammers.
- 6 6-pound rammers.
- 12 sponge covers.
- 1,679 cartridge boxes, worn.
- 1,375 bayonet scabbards, worn.
- 765 shoulder belts and plates.
- 662 waist belts and plates.
- 1,000 waist belts, worn.
- 1,300 gun slings.
- 1,480 cap boxes.
- 613 cavalry sabres.
- 4 tarpaulins.
- 250 main springs.
- 100 spring vises.
- 300 shoulder belts, new.
- 250 tumbler punches.
- 300 tumbler screws.
- 263 sear springs.
- 600 wipers, cal. 58.
- 600 screw drivers.
- 400 tompons, cal. 58.
- 200 new cartridge boxes, cal. 50.
- 75 cartridge boxes, cal. 45.
- 500 bayonet scabbards, steel.
- 34 N. C. O. swords.
- 100 canteens.
- 25,000 ball cartridges, cal. 45.
- 17,000 blank cartridges, cal. 45.
- 7,000 ball cartridges, cal. 50.
- 4,000 blank cartridges, cal. 50.
- 4,000 paper ball cartridges, cal. 58.
- 6,000 blank cartridges, cal. 58.

One lot of condemned and unserviceable arms, consisting of six hundred Kitridge and one hundred and twenty Spencer carbines, were sold by order of Governor Williams, for which \$1,086.25 were received; also cartridges and ammunition, to the value of \$749.26 were sold, which amounts have been paid to the State Treasurer.

Out of four disabled cannon carriages I have had one good one made without expending any money, payment being made with old irons left from the other three.

There were also a lot of old shoulder belts, useless as such, out of which I had three hundred and eighteen waist belts made, at an expense of five cents each, saving the State \$86.

There are now a lot of guns on hand that need attention at once to preserve them. There should be an allowance made by the Legislature for the use of the Quarter Master, to be expended in keeping military arms and stores in order.

There should also be an allowance made for each company joining the State militia to pay rent of armory and necessary current expenses; and the Quarter Master should collect of the State, and not of the companies, his fees for issuing arms, and expense of freight on sending and receiving them. As it is necessary for the State to have militia companies, it should be liable for above expenses, as it is too often the case that the entire expenses of the companies fall upon the officers of the companies. A number of good companies have returned their arms on that account.

Respectfully submitted.

SAMUEL BECK,

Quarter Master General.

Filed in my office January 10, 1881.

J. G. SHANKLIN,

Secretary of State.

REPORT.

To the Committee of Public Expenditures

of the General Assembly :

GENTLEMEN—In obedience to the requirements of the act, approved March 10, 1877, making appropriations for the expenses of the State government, and especially of the proviso contained in the first clause of section two, the Governor has the honor to report in detail the expenditures allowed by him from the Governor's Civil Contingent Fund, the Governor's Military Contingent Fund and the Governor's Office Expense Fund, provided for the year ending October 31, 1879, as follows :

Payments after November 20, 1880, until January 10, 1881,
were made upon bills of account endorsed as follows:

THE STATE OF INDIANA,
GOVERNOR'S OFFICE.

In compliance with the proviso of section 2 of the act approved March 25, 1879, making appropriations for the expenses of the State Government for the years ending October 31, 1880, and October 31, 1881, "that all sums paid out for office expenses for any of the offices of State, or for traveling, or contingent expenses for any of said officers of State, shall be paid only on bills of account for expenses actually incurred and approved by the Governor, who shall report in detail all such expenses and the items thereof to the next General Assembly" (Acts of 1879, page 69), I have examined and approved this bill of account and have retained a duplicate thereof for the purposes of the required report.

ISAAC P. GRAY,
Governor.

To the Auditor of State.

SUMMARY OF EXPENSES

From January 8, 1877, to January 8, 1881.

FIRST ANNUAL REPORT

OF THE

MINE INSPECTOR

OF

THE STATE OF INDIANA,

YEAR 1879-80.

TO THE GOVERNOR.

INDIANAPOLIS:

CARLON AND HOLLENBECK, PRINTERS AND BINDERS.

1881.

THE STATE OF INDIANA,

GOVERNOR'S OFFICE.

Received August 21, 1880, for the year ending October 31, 1880, *subject to supplement*. Transmitted to the Secretary of State to be filed and preserved in his office, and published as may be ordered by the Commissioners of the Public Printing.

SAMUEL R. DOWNEY,

Secretary.

Filed in my office November 27, 1880.

J. G. SHANKLIN,

Secretary of State.

REPORT.

OFFICE OF STATE COAL MINE INSPECTOR,
ASCENSION, INDIANA.

To His Excellency, JAMES D. WILLIAMS,
Governor of Indiana:

SIR:—In compliance with the act regulating the working of coal mines passed at the Fifty-first regular session of the General Assembly of the State of Indiana, March 8, 1879, I herewith submit my first annual report for the years 1879–80.

Yours, Very Respectfully.

HERBERT H. RICHARDS,
State Coal Mine Inspector.

INTRODUCTION.

I commenced my duties as State Coal Mine Inspector as soon as possible after receiving my commission. I may state, generally, that I found the mines deficient in ventilation, and in other respects not meeting the requirements of the law.

On my first inspection, I carefully examined all the details connected with the working of the mines, and pointed out every case in which the law was being violated, as well as other matters not specially mentioned in the act, but, in my opinion, requiring attention, as being dangerous to the workmen employed, and as being provided for in the general duty of the Inspector.

As a rule, I found both operators and workmen willing to carry out the law, and in some instances I found some things had been done in that direction.

On my second visit I found, with few exceptions, things much better, but I found in some instances the operators had failed to provide separate outlets, in accordance with Section 2 of the Act. In these cases I gave positive instruction that this section should at once be complied with, viz: that where more than fifteen thousand square yards had been excavated, not more than ten persons should be employed in said mine in every twenty-four hours. In some cases the operators pleaded they had not had sufficient time to provide these outlets, and asked for an extension, which, of course, I had no power to grant, and could only point them to the law as it stands. If I find, on my next visit, that any of them are employing more than the specified number of persons, I shall consider it my duty as Mine Inspector to at once take legal proceedings against them.

Without taking into consideration the question as to whether the time allowed, viz: six months, was sufficient in which to provide these outlets, I, as the Inspector, had no alternative but to insist on compliance with the law as I understand it.

My interpretation of the law on this point is, that where the operators have failed to provide the necessary outlets, they are bound to at once reduce the employes to the specified number.

Although I am not only anxious but determined to carry out the law, I have not, as yet, taken legal proceedings against any one—the operators having expressed their willingness and intention to work their mines according to the act.

I regret that this, my first report, is not more complete, but the difficulties my report will indicate, together with others, which it, perhaps, might not be judicious to fully explain, absorbed a portion of the time which ought to have been devoted to collecting and tabulating facts for my report.

I may just mention, that the collecting of fees takes much of my time, in some cases, several applications have to be made before the money is paid, [I think it right to state that this remark does not apply to any of the large operators], and when it is taken into consideration that some of these mines are located at great distances from each other, it will at once appear that this interferes very materially with my official duties. Although a majority of the operators cheerfully paid the fee when called upon to do so, yet the feeling is pretty general that it would be more in accordance with justice, if the expense was borne by the State. The small operators especially consider the tax an unfair one.

As will be seen from my report, there are 177 mines in operation in the State ; but a great many of them are small country banks, which only work in the fall of the year.

On my second visit I could only inspect fifty-six mines, the others not being in operation at the time.

It will be seen that the fees amount to eleven hundred and sixty-five dollars. From this must be deducted six hundred and twenty-three dollars for expenses, leaving me a salary of five hundred and forty-two dollars.

The expenses may appear large, but it must be remembered that the mines extend through seventeen counties, and that the extreme length from north to south of the coal field worked is about one hundred and sixty miles, and from east to west about sixty miles.

I have made during the year two hundred and thirty-three inspections. This, together with traveling and correspondence with the operators, and writing report, has absorbed all of my time. In giving the following report I think it best to take the counties in alphabetical order.

CLAY COUNTY.

On my first visit to the coal mines of this county I found ventilation very deficient, and as a matter of course, the other provisions of this act not in operation to any great extent.

On my second visit I found a great improvement and a general disposition to fully comply with the law.

The Brazil Block Coal Company had just erected a ventilating fan, and although, in my opinion, this machine was defective in construction, yet it was doing good work at the time of my visit. I did not ascertain the horse power in the air or the useful effect of the machine, but will take the trouble to do so on my next visit. I might just say that ten thousand feet per minute were circulating in the mine, being about one hundred and fifty feet per minute for each person employed. I hope in my next report to be able to mention other cases where ventilation by mechanical means has been adopted.

As a coal producing county this is by far the most important in the State. The two chief veins are known as block, or non-caking coal. The top vein is excellent for steam, domestic and manufacturing purposes ; the lower vein is valuable for the smelting of iron.

The coal is very hard and solid and free from impurities.

There is also another vein which is a caking coal, good for steam and domestic use, but is mixed somewhat with sulphur.

DAVIESS COUNTY.

There are, at the present, fourteen mines at work in this county. Nine of them are near to Washington; two of them extensively worked by Cable, Wilson & Co.

This being amongst the last counties I visited on my first inspection, I found much progress had been made at the large mines in the direction of carrying out the law, as far as they understood its requirements.

The mines were tolerably well ventilated, and were well conducted in other respects.

They have the Woodville safety-catches in use at one of the shafts owned by Cable, Wilson & Co. The catches have been put to a severe test on several occasions, and I understand they have answered their purpose admirably.

There are two principal veins worked. One is a caking coal, and is excellent for gas and coke, and other purposes, and is chiefly worked in the neighborhood of Washington. The other is known as cannel coal, and consists of three feet of cannel and two feet of caking coal, making five feet thick. This vein is only worked at Cannelburgh.

Total	402	155,595	\$104,512

Total number of mines, 14.

* This vein consists of three feet of Cannel and two feet of Caking Coal, making in all five feet thick.

DUBOIS COUNTY.

There are other veins of coal in this county which, as yet, are undeveloped, in addition to those now being worked.

There is only a small amount of coal raised for local purposes from last seam ; none being shipped to any great distance from the mine. The coal is not of very good quality so far as can be judged from mines now in operation.

FOUNTAIN COUNTY.

On my first visit to this county, I found ventilation very inadequate in some of the mines, and coming far short of meeting the requirements of the law. In one case, I found the air passing along the main entry, only amounting to thirty feet per minute for each person employed in the mine, and not even that amount reaching the working faces.

On my second visit, I found things greatly improved, both in ventilation and in other requirements of the law.

The coal is of good quality, and suitable for nearly all purposes. I understand that excellent coke has recently been made from the coal by the Fountain County Coal and Mining Company who have erected patent ovens for that purpose.

The coal where worked averages five feet thick.

* The amount of coal given for this mine is for six months' work.

† The coal here given is for four months' shipment for this mine.

GREENE COUNTY.

In this county there is a large belt of coal on the west side with an average thickness of six feet, and is of good quality.

At the little town of Linton this coal is not quite so thick but is of superior quality, and is said to be excellent for coke, gas, and the manufacture of iron.

This coal no doubt would be speedily developed if railway facilities were provided.

A narrow guage road is being built through the field which will perhaps afford an outlet, as it intersects the Evansville and Terre Haute at Sullivan, and the Indianapolis and Vincennes at Swits City.

This is not only a good coal, but it is covered by a good roof, and has a good floor which contributes largely to the economical working of the coal.

GIBSON COUNTY.

There is only one mine in operation in this county. A reference to my table will show that the coal is only two feet and six inches in thickness.

I may add that the coal is rather soft, and is not of very first-class quality. This mine is operated near to Oakland City.

TABLE SHOWING THE NUMBER OF MINES, ETC., IN GREENE COUNTY.

Names of Operators.	Address.	Veins of Coal.				Thickness of Each Vein.		Depth from Surface, in Feet.	Kind or Quality of Coal.	How Mined.	Number of Men Employed.	Yearly Production of Coal, in Tons.	Amount of Capital Employed.

KNOX COUNTY.

The only mines operated in this county are at Edwardsport; two are rather largely worked.

The operators are desirous to work their mines in compliance with the law. The coal in some parts of the mine is good, when the two little seams of sulphur are taken out.

There are other veins of coal in this county, which are as yet undeveloped. I hear that preparations are being made to work them.

MARTIN COUNTY.

I only inspected two mines in this county, one at Shoals and the other at Loogootee.

There are several other mines, but they were not in operation at the time of my visits.

At Shoals, the coal may be described as a semi-block, being of a hard nature, and being intersected by open fissures in a similar manner to the block of Clay county, and from what I can learn, it is an excellent burning coal.

The coal at Loogootee is a good caking quality, but in some cases divided by a band of dirt in the middle of the vein, which renders it difficult to keep clean.

TABLE SHOWING THE NUMBER OF MINES, ETC., IN KNOX COUNTY.

Total number of mines, 2.										

PARKE COUNTY.

There are fifteen mines in this county. Some of these are working the block coal and others are working a good quality of coking coal.

The same veins in this county are by no means uniform in quality. At some of the mines the coal is very good, and at others it is rather indifferent, containing as it does a considerable amount of sulphur. As a rule there is an excellent roof and a good floor; these contribute largely to the economical working of the coal.

TABLE SHOWING THE NUMBER OF MINES, ETC., IN PARKE COUNTY.

Total number of mines, 15.

PIKE COUNTY.

There are ten mines in this county, working coal of an average thickness of six feet six inches. Some of these veins are much thicker, being as much as nine feet thick.

This contains fully as much coal as any county in the State, and only requires railway facilities for its development.

The coal is uniformly of good quality, and is adapted for most purposes.

They have already reached this field with the New Albany and St. Louis Railway, about two miles east of Oakland City, Gibson county.

Total number of mines, 10.													

*The amount of coal given in the table for this mine is for the first two months of its being opened.

†This mine has been taking out coal for four months only.

PERRY COUNTY.

The coal in some parts of this county is very good, especially that at Cannelton, although not a very thick vein, it is of excellent quality, and is good for smelting iron, and for general purposes. It is not very extensively worked at the present time, as there are only eleven mines in the whole county.

There is a lower vein of coal under the present working seam which will eventually be operated.

SULLIVAN COUNTY.

This county is well supplied with coal; there are two veins which extend the whole length of the county, north and south. The upper vein, which is now worked by the Shelburn Coal Co., is of good quality, and excellent for steam and domestic purposes. The lower vein is excellent for gas and coke, and is chiefly worked from two to eight miles east of the Evansville and Terre Haute Railway. It is also worked by Shelburn Coal Company's shaft at Sullivan.

*This mine is now owned by the Shelburn Coal Co. The two veins are worked at this shaft.

SPENCER COUNTY.

This county stands second in number of mines, but does not stand in the same relation with respect to production of coal, as a reference to the tables will show.

Coal of good quality extends over a great portion of the county, but there appears to be difficulty in finding market for it.

There are also several mines working in the block coal, and is of excellent quality, free from sulphur, and very hard, but not largely worked, from the fact, there is no way of reaching a market with it.

VERMILLION COUNTY.

There are at present only nine mines at work, but it is expected that this number will soon be considerably increased. There is a fine vein in the northern part of the county, which has been worked but very little, and I am informed that this is exceedingly good coal for smithing purposes.

VIGO COUNTY.

This county has an abundant supply of coal. Coal of good thickness and quality underlies the city of Terre Haute, and extends through the greater part of the county.

The city of Terre Haute is rapidly becoming an important center of industry, and its present consumption of coal is very considerable, and this consumption will necessarily increase with the growth of the city. It seems to me that our capitalists have not given the matter the attention it deserves. I believe that mining in this county could be carried on with profit. At all events, I can see no reason why it should not.

VANDERBURGH COUNTY.

There are only two mines in this county. These are operated at Evansville, and are the deepest in the State. One of them, the Ingle mine, is probably the oldest one at work, it having been worked for over twenty years.

At the time of my last visit they were introducing the Jenkins Safety Catches. These were attached to the cage, and I am informed that they work very well.

The coal in these mines is good, but somewhat mixed with sulphur, which depreciates its value. It however answers very well for steam and general purposes.

WARRICK COUNTY.

There are nine mines working in this county, and the coal has an average thickness of four feet four inches, which is considered a good workable thickness.

Some of these mines are operated on the short road from Evansville to Booneville, and some at Newburgh, on the Ohio River. The quality of the coal is equal to the average of the bituminous coals of the State.

Total number of mines, 9.

As Mine Inspector, I present my first annual report in conformity with section 20 of the act regulating the working of coal mines in the State of Indiana.

On referring to this section it will appear that, in addition to his other duties, the Inspector is required to collect and tabulate a number of facts, and to give other information relative to coal mining, together with such recommendations as to future legislation that he may deem necessary.

The collecting of the items found in the tabulated forms has absorbed much of my time. I had in some cases to make several applications for the yearly production of coal, and the amount of capital employed, and in a few cases I have estimated both coal raised and capital invested, an evidence not altogether satisfactory.

In the case of slopes and drifts the operators were not always able to give me the depth of each vein from the surface. And to have ascertained this myself would have occupied more time than was at my disposal. The number of men is the average employed at the time of each of my visits, and even this may not be a fair average for the year. In fact I think that all these returns would be more reliable if the operators were required to give them in writing to the Inspector, who might test their accuracy without taking up too much of his time. This would enable him to devote more time to the other important duties of his office.

It is also very desirable that operators should be required to make the Inspector acquainted with all accidents occurring in their mines, giving the nature and circumstances attending such accident, when they result in the injury or loss of life of any of the employes.

In addition to the common dangers attending the working of coal in all States, there are dangers peculiar to each, and I believe a thorough investigation of each accident as it occurs would do much to point out the direction of future legislation on the subject, and I therefore suggest that the Inspector be required to give a full description of each accident with his remarks thereon in his annual report.

Referring to section 16, where provision is made for the examination of ropes by a competent person, and for the examination of the under ground working by a fire boss, it appears to me too much is left to the discretion of these examiners and the workmen

concerned. If some such words as : " The men shall not go into the mine until the same is stated to be safe," were added to this section, it would throw the responsibility more upon the examiners, and would tend to make their examinations more effective in preventing accidents.

While believing the provision made in section 16 for the examination of ropes, etc., a wise one, I still think it ought to be supplemented by an additional safeguard, viz: that safety-catches (apparatus for holding the cage when the rope breaks) ought to be attached to every cage used for hoisting out of, and lowering persons into, a mine. Apart from the question of safety to life and limb, and considered only in a commercial aspect, the investment would be a good one for the operators, for the cost of these catches would be very trifling, they would nevertheless prevent much destruction of property in the event of a rope breaking.

The steam boilers used at some of the mines, so far as I am able to judge from an external examination of them, are in a bad condition, and in my opinion periodical inspection of them is very desirable. This might be done by the engineer at these mines where they have a properly qualified man, and at those mines where they have not such a man one might be engaged to make the inspection at stated times. I consider this very important, for a boiler explosion may not only be attended with much destruction of property, but almost sure to be attended with the loss of life.

Section 2 provides that every mine where more than ten persons are employed, and wherein more than fifteen thousand square yards have been excavated, there shall be in communication with each seam worked two separate outlet, and these outlets must be always available as means of ingress and egress to the persons employed in the mine. When this section is read in connection with section 8 which prohibits the use of a furnace at the bottom of a shaft where the hoisting apparatus and buildings are built directly over the top of the shaft, it will be evident that where a furnace is used three outlets are required by the letter of the law. I refer to this because it is contended in some quarters that this is not the spirit of the law. I apprehend that the spirit of the law is simply to provide a second outlet in case the first should be rendered unavailable by accident. The furnace shafts as they at present exist, do not afford means of escape to the men. Of course they could be made to do so, but the shafts and machinery would have to be

so constructed as not to be liable to be injured by fire, and section 8 would require a slight modification.

Since my appointment to the office of Mine Inspector, I have spared neither time nor trouble to impress upon the pit bosses the importance of having good ventilation in their mines.

I found the mines as a rule inadequately ventilated. Some of them were in a very unsatisfactory, I may almost say wretched, state in this respect, and though much progress has been made during the past year, much remains to be done, and I shall not cease to use every effort until the task is accomplished.

I have had much difficulty with the pit bosses. As a class (I do not include all) they do not understand what may be called the science of ventilation. Many of them have the means of good ventilation directly under their control, having a good supply of fresh air in the intake, and yet leaving the rooms of the workmen practically without air.

In some cases an expenditure of a few dollars would divert the air into already existing roads, and conduct it properly to the workmen. In other cases a greater expenditure would have to be incurred, either to clear out old roads or make new ones. Many of the mines are worked in an irregular and unskillful manner, and these would be expensive to ventilate efficiently. In fact it appears that some of them have been laid out and worked without the slightest regard to ventilation.

I am fully convinced that if the air roads and working rooms of a mine were so arranged as to secure a plentiful supply of fresh air at the face, such a mine would be worked far more cheaply, because more methodically, than if worked on the haphazard system which prevails to such an extent in this State.

I have no hesitation in saying that apart from the comfort, health and safety of the miner, a well ventilated mine will be more remunerative to the operator than an ill ventilated one, for the very means taken to insure good air, will at the same time insure systematic working, and effect a great saving in material and labor, and secure many other advantages. Our mining laws require that a hundred cubic feet of air per minute be supplied to each person working under ground. That this is not too much will appear from the following well known facts :

Pure air is a mixture of nitrogen and oxygen, in the proportion by volume of 79 per cent. of nitrogen to 21 per cent. of oxygen. Oxygen is the life-sustaining principle in the atmosphere. Nitrogen only fills the office of a dilutant to the oxygen, which would exert too powerful an influence on the animal economy if breathed alone.

Although nitrogen has no poisonous properties, it will not (nor will any other gas except oxygen) support life. Air which, however, contains an undue proportion of nitrogen becomes injurious to health, for want of a sufficiency of the life-supporting element.

An ordinary man will inhale about one-third of a cubic foot of air per minute. A part of the oxygen is absorbed by the lungs, and is given back in the form of carbonic acid gas. This at first sight may appear to have a trifling effect upon the purity of the atmosphere, but when the poisonous nature of this gas is considered it will be seen that the operation of breathing renders a considerable amount of air unfit for use, for there is not only an abstraction of oxygen, but an addition of a gas which makes twelve times its own volume of air dangerous to breathe. Experiments have established the fact that light will cease to burn in an atmosphere containing ten per cent. of this gas, and of course a very much smaller per centage would be injurious to the human system.

This gas is composed of oxygen and carbon, and although it contains by weight nearly three parts out of four of the life-supporting element, yet in this case, as in many other cases of oxygen compounds, the result is a poisonous gas. To be suitable for breathing, oxygen must not only be diluted, but it must be free, that is to say, it must not be chemically united to any other gas.

Carbonic acid gas is not only generated in the mine by the respiration of men and mules, but a large quantity is produced by the burning of the miners' lamps, the oxygen of the air uniting with the carbon of the oil in the process of combustion. There is also a constant abstraction of oxygen and a consequent production of carbonic acid gas taking place in the mine, owing to the decomposition of timber and other materials. Most mines give off this and other deleterious gases in large quantities, and to this must be added the exceedingly hurtful gases resulting from explosions of gunpowder. The explosion of gunpowder gives rise to carbonic acid, nitrogen, sulphurous acid, steam, carburetted hydrogen, sul-

phuretted hydrogen, and carbonic acid. The last two named gases are so exceedingly poisonous that air containing one per cent. of them is dangerous to breathe.

Air in a pure state never reaches the working faces, for the force which propels it along the passages (or air ways) of a mine changes its physical condition, increasing its temperature and giving it a greater capacity for watery vapor, a gas from which it is never entirely free.

I call the attention of those concerned to one of the physical laws of ventilation, viz: That the friction of air in a passage varies as the square of the velocity of the current, and the power necessary to propel this current varies as the cube of its velocity. This is perhaps not the place to give any illustration of this fact, but the law reduced to practice simply means this. To propel a certain amount of air through a passage ten feet in area would require four times the power it would take to propel the same amount of air through a passage twenty feet in area. And hence the advantage of having air ways of large capacity.

A few of our mines generate light carburetted hydrogen (the fire damp of the mines) but not in large quantities. We are consequently free from explosions on a large scale, and I am happy to say I have none to report.

But who can say how much bad ventilation has contributed to the death rate of our miners. I believe that fire damp is not the worst enemy our miners have to contend with, for its presence necessitates good ventilation, and good ventilation means health to the miner.

Section 8 was framed by our legislators not only for the safety of the men, but also to insure their health and comfort. A few, and I am glad to say only a few, do not seem to comprehend this fact, but appear to think if they can put a man outside positive and immediate danger to his life, by supplying him with air which will not kill him outright, and at once, they have done all that could reasonably be expected of them. I think such operators as these only require to be convinced of the fact that bad air will surely undermine the health and effect the premature death of their workmen, and they will have their mines so ventilated that all the deleterious gases will be diluted and swept away as they are generated.

The safety of every individual miner depends upon his own skill and carefulness, but the air he breathes while at work is beyond his control; he has no choice in the matter, but if he works at all he must do so in such air as is provided for him. And I therefore think that the provision made in this section, which specifies the least amount of air with which he shall be supplied, a wise and necessary one.

A well ventilated mine does not consist in having abundance of air in the main air way, but in having a sufficiency for all purposes just in the place where it is wanted.

I have already intimated that it would be difficult to fully estimate the mischief wrought to the health of our miners by bad air. So far as our State is concerned, this in the past has undoubtedly caused more suffering than all accidents put together.

There is no need to repeat that the operators or their superintendents and pit bosses are alone responsible for this. They are also to a very great extent responsible for accidents resulting from the breaking of machinery, such as the bursting of boilers, the breaking of ropes, etc., for most accidents of this class referred to would be prevented by keeping the machinery of a mine in good condition. On the other hand the miner fully understands that while digging coal in his room, his safety depends upon his own discretion, and his skill acquired by long experience is such that he can work in perfect safety where a less experienced person would come to grief. He is constantly liable, while at work, to accidents, from fall of roof and coal, and but for his judgment and carefulness far more accidents of this class would occur.

There is, however, another class of persons underground, which from the nature of their employment, can not exercise this care over their own safety, and it must further be considered that this class is chiefly composed of young, inexperienced persons. I refer to the mule drivers whose business it is to convey the coal from the miner to the bottom of shaft, slope or drift.

The danger to this class of persons is not so great in a well conducted mine, but in a badly conducted one it is otherwise. Among other dangers these persons are liable to be crushed by rock falling from the roof and sides of the entries along which they convey the coal.

As a rule our coalseams are covered with an excellent roof, and if only ordinary care were taken to leave pillars of sufficient breadth

to support the entries, there would be very little danger from fall of roof. I have noticed in some mines the coal is excavated in such an irregular manner that in some places a great deal more pillar than is necessary is left, and in other places the rooms have been worked so near the entries as to practically leave no pillar for their support. In such entries I have noticed numerous large cavities in the roof, from which falls of rock have taken place. Some of these places I considered dangerous, and gave the bank bosses instructions to secure them with timber. It may be observed that when a road has once, in this way, been ruined it is always a source of trouble and expense, and I may add danger.

This irregular mode of working is attended by another inconvenience, especially in very shallow mines. The pillars in these mines ought to be sufficient to keep the strata above the coal firm enough to keep back the surface water, but if two or three rooms be allowed to run together there is danger of the strata being so disturbed as to let the water into the mine.

A number of our mines are troubled with a large quantity of water, which, of course, has to be pumped to the surface. At a number of the mines I noticed water on the roads to a depth, in some places, of twelve inches, the water lying in what are known as local dips, or swamps. These dips are very common in our coal fields, and are very troublesome where there is much water. Where the main entries cross these dips, and in cases where the dip is not too great, it would often be advisable to take down the roof to such an extent as would raise the road above the level at which the water would run off. When this can not be done the water must be dealt with.

The system which now prevails in some of the mines is to fill the water in tubs and haul it by mules to the pit bottom; but there are some objections to this plan. It is expensive, it seriously interferes with the traffic on the roads, either from leakage or from flowing over the top of the tubs; it keeps the road constantly wet, and renders it difficult to keep in repair, and also makes it very unpleasant for persons to travel thereon.

Where there is considerable water it would be advisable to use pumps, worked by compressed air, which might be taken down the shaft and along the roads in suitable pipes. If this plan was adopted the exhaust air would assist the ventilation of the mine, and have a tendency to keep it cool. Whatever means are adopted,

the water ought to be kept clear from the roads, and it would be difficult to give a reason why it is allowed to accumulate to such an extent. If suitable swamps were made at the bottom of each dip, the water might be kept from the roads, even by the present mode of dealing with it.

Every practical man understands the disadvantage of having water on the main entries. It is difficult to keep the track in repair, and there is a general want of dispatch with respect to the transit of coal, which makes it very expensive.

I believe I could point out instances where the item of baulage is costing three times the amount it would do if the roads were dry and the track in good repair.

Section 2 provides that the Inspector be supplied with a correct map or plan of the workings of each mine with the lines of the adjoining lands.

My call for these maps has been generally responded to, but my opinion is, many of them are mere sketches, and are in no sense true plans of the workings of the mine they are intended to represent. Of course the owner's signature ought to be a sufficient guarantee as to the general accuracy of a plan. It is difficult for any one, even the Inspector, to prove that a map is inaccurate; for to ascertain this would involve a re-survey of the mine, and I am, therefore, not prepared to say that the lines drawn on those plans are not correct, however suspicious they may look; but what I do say is, that a plan is not worth the name which fails to show the area of coal mined, and the underground roads, especially those used for ventilating purposes.

I am not one of those who look upon a plan as consisting in fanciful ornamentation, but rather as faithfully delineating all useful details.

It appears to me that it may be inferred from section 6 that the Inspector's acceptance of a plan is a guarantee of its accuracy, at all events it appears to me this section will bear that interpretation.

I think that owners of adjoining lands should have power to enter and survey the mine if they think well to do so. Of course it will not for a moment be understood that I wish to insinuate that any of the owners would knowingly issue an incorrect plan, at the same time I think it would be more satisfactory if interested parties had the means of knowing whether their rights were being infringed upon.

I can not exaggerate the importance of having correct plans. When our present mines are abandoned and filled with water, these maps will have to guide us in future mining operations, and if they are misleading we should be much better without them, for they may cause much destruction of life.

Section 20 invites the Inspector to recommend subjects for future legislation on mining. In the preceding pages will be found indicated such matters as in my opinion require attention. The fact is, while I am fully conscious that our mining law is not a perfect one, still it is a very good beginning and meets the more pressing cases of our mining community, and it appears to me that it is advisable to give it a fair trial before it is either greatly modified or extended.

It will not be inferred from this remark that I consider that legislation has gone far enough ; so far from this being the case, I believe it would be easy to show that not only the miner and operator would be benefitted, but the interest of the State would be materially advanced by a good mining law.

It has been already hinted in these pages that mining coal in each State is subject to dangers peculiar to itself, and therefore requires special legislation. This being the case, we shall be much more likely to get sound and useful legislation on the subject if we are guided by our own experience than we shall by copying from other States, where the law is more comprehensive.

A mining law for any State should make provision against the dangers to which mining is most liable, and I believe that a thorough investigation of all accidents as they occur would suggest measures for your consideration. I shall in the future do so, as they come to my knowledge, carefully examine into the nature and cause of all accidents, and if I am not exceeding my duty shall give my opinion thereon in my next report.

Respectfully submitted,

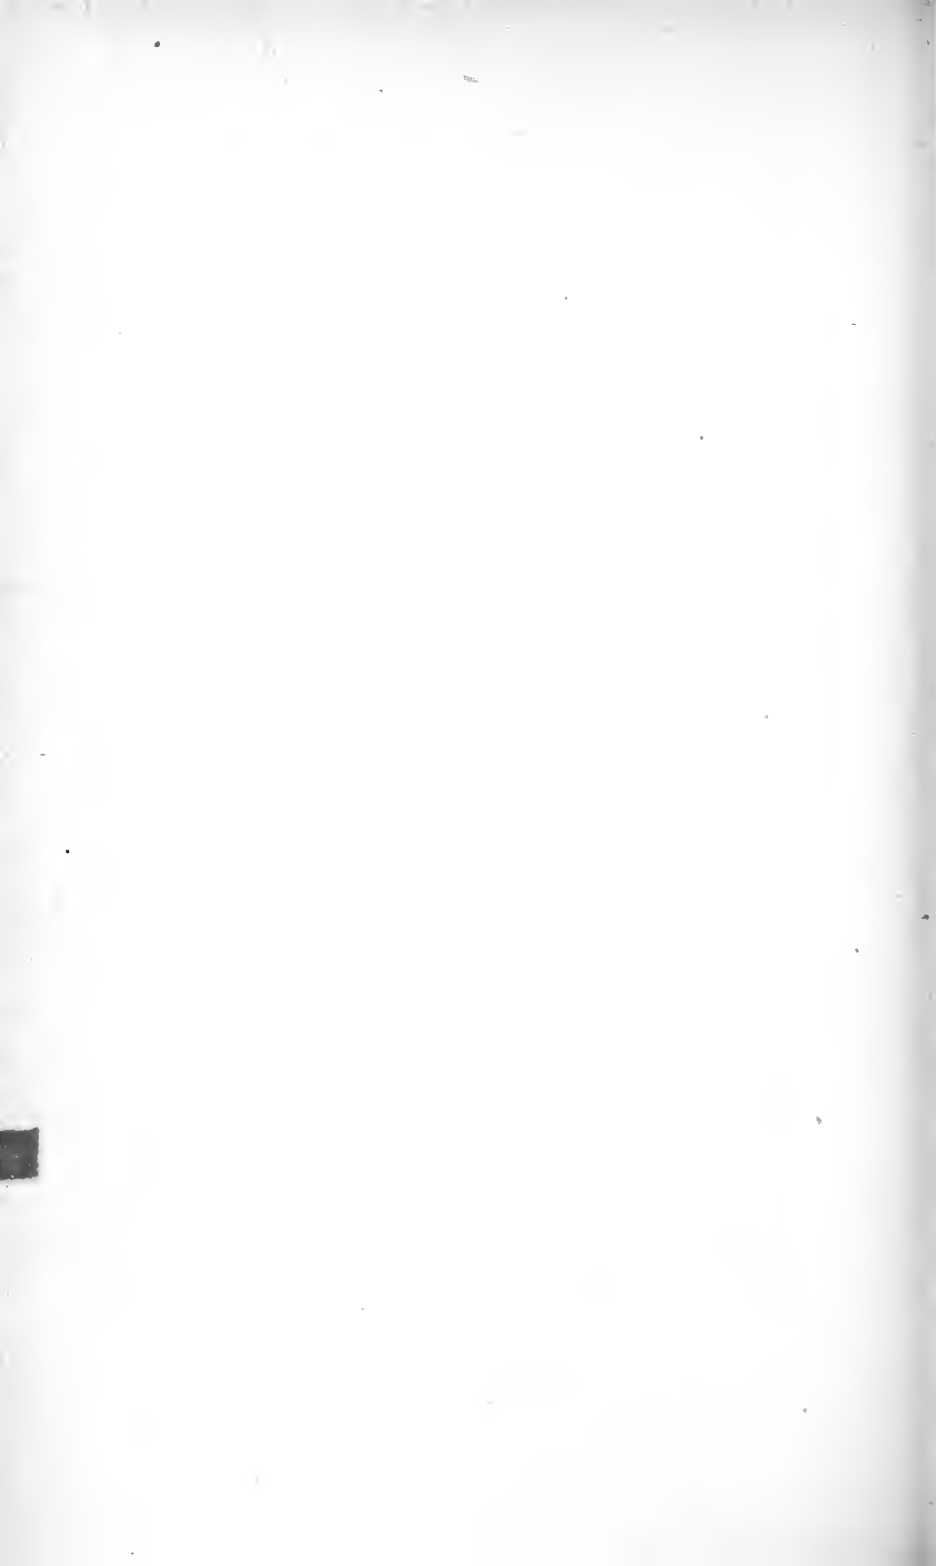

HERBERT H. RICHARDS.

ASCENSION, IND.

REPORT

OF THE

State Inspector of Mineral Oils,

TO THE

GOVERNOR OF THE STATE OF INDIANA.

FROM JUNE 6, '79, TO DECEMBER 31, '80.

INDIANAPOLIS:

CARLON & HOLLENBECK, PRINTERS AND BINDERS.

1881.

NOTE.—Inasmuch as the usual endorsement of the filing of this report in the Governor's office is omitted, I would explain that it was placed in the Governor's hands January 7, the day before he delivered his message.

H. CLAY,
State Inspector.

Filed in my office by the Governor, January 10, 1881.

J. G. SHANKLIN,
Secretary of State.

REPORT.

To His Excellency, ISAAC P. GRAY,
Governor of Indiana:

In compliance with the 4th section of the act providing for the inspection of mineral or petroleum oils for illuminating purposes, approved March 31, 1879, I herewith submit my report as State Inspector.

I was appointed State Inspector on the 6th day of June, 1879, and on the 8th day of said month filed my bond and oath of office with the Secretary of State.

I at once had a large number of copies of the law printed in pamphlet form, at my own expense, and distributed them over the State. In this I was very kindly assisted by the wholesale dealers, who have all manifested a willingness and desire to have the law strictly enforced. And in this connection I am happy to report that there has been no attempt to evade the law on the part of the wholesale dealers of the State.

For some months after my appointment there was very little oil used (being summer months), and the amount inspected up to the first of January, 1880, was so small I did not deem it important or necessary to submit a report at the close of the year 1879. The information contained in a report for a few months in the year would not have justified the expense of printing it. I, therefore, include in this report a full statement of the inspections made since I assumed the duties of my office, and up to the 31st day of December, 1880, inclusive.

THE OLD LAW.

The increasing consumption of petroleum oils for illuminating purposes, and the great danger to life and property arising from the use of an impure and inflammable article, made the passage of a law that should be uniform and stringent in its provisions, a matter of the greatest importance to the people of the State.

Under the old law the inspectors were appointed by the Judge of the Court of Common Pleas upon the application of five or more citizens of the county, and there was no uniformity in the execution of the law. Again, the temperature of one hundred degrees Fahrenheit's thermometer was entirely too low, and all dangerous oils were not rejected. Nearly all the oils in the State at the time I assumed the duties of my office were below the test of the new law, and their use was dangerous. I could not discharge my duty without prohibiting their sale, and they were shipped out of the State.

THE NEW LAW.

Under the provisions of the present law all oils are inspected by the State Inspector, or by his deputies who are under his control, and subject to such general regulations and rules as he prescribes. A uniformity of test is thus secured throughout the State, and less opportunity afforded to evade the law. The new law also prescribes the mode of testing oil, and requires it to bear a flash test of one hundred and twenty degrees Fahrenheit—being twenty degrees higher than the old law, so that the standard of the oils now used in the State is much higher than those sold under the old law, and consequently much safer. There are no means of estimating the advantages which the passage of the present law has been to the people of the State. Accidents from the explosion of coal oil lamps are very few and are generally traceable to the improper and careless handling of the lamps, and not to the character of the oil.

Thousands of dollars worth of property and many lives have doubtless been saved from destruction by driving out of the State the fire brands which were formerly sold as oil under high-sounding trade marks.

Nearly all the oil now brought to the State bears a higher test than that required by the law. This results from the fact that the dealers do not like to have oil rejected, and thereby subjected to the expense of return freight; and hence to insure its being ap-

proved, it is generally made several degrees higher than the standard required by law.

The following is a list of the deputies, and date of qualifying :

Name.	Residence.	Date.
A. C. Hardenbrook.....	Ligonier.....	Aug. 4, 1879
John H. Early.....	Laporte.....	July 18, 1879
L. C. Fletcher.....	Aurora.....	July 9, 1879
Tom M. Park.....	Lafayette.....	July 3, 1879
Wm. Sackett.....	New Albany.....	June 30, 1879
J. F. Elder.....	Richmond.....	July 3, 1879
John B. Foley.....	Terre Haute.....	July 11, 1879
Henry Mouning.....	Ft. Wayne.....	July 17, 1879
Thos. J. Immel.....	Logansport.....	July 16, 1879
Lee Linn.....	Wabash.....	July 22, 1879
Wm. Nelson.....	Evansville.....	July 23, 1879
Chas. S. Williams.....	Columbia City.....	July 29, 1879
L. A. Kirkwood.....	Muncie.....	Aug. 16, 1879
Thos. C. James.....	Shelbyville.....	Aug. 17, 1879
Ed. W. Cooper.....	Vincennes.....	Aug. 18, 1879
L. M. Develin.....	Brookville.....	Aug. 15, 1879
J. B. Peterson.....	Crown Point.....	Aug. 20, 1879
F. P. Carson.....	Evansville.....	Oct. 11, 1879
L. W. Childs.....	Valparaiso.....	Dec. 3, 1879
A. S. Parker.....	Kendallville.....	Jan. 16, 1880
John Frazier.....	Crown Point.....	July 24, 1880
W. L. Hallock.....	Evansville.....	Dec. 15, 1880

In December, 1879, Mr. Hardenbrook, of Ligonier, resigned, and A. S. Parker, of Kendallville, was appointed, this being a more convenient location for the Inspector to reside. September 1,

1879, Mr. Nelson, of Evansville, resigned, and on the 11th day of October following I appointed Captain F. P. Carson, who performed the duties of deputy to December 1, 1880, when he resigned. I then appointed W. L. Hallock, who is now Deputy Inspector at Evansville. J. B. Peterson, of Crown Point, resigned, and John Frazier, of the same place, was appointed in his place. Some time last month L. C. Fletcher asked to be relieved from further duty as Deputy Inspector, which was done.

DIFFICULTY OF EXECUTING THE LAW IN PORTIONS OF THE STATE.

I have labored under considerable difficulty in procuring suitable persons to act as deputies in the small towns along the Ohio river and in the southeastern part of the State. Each deputy is, by law, required to give bond in the sum of five thousand dollars, and furnish, at his own expense, his testing apparatus and brands, and depend for reimbursement on the amount of oil he inspects. As this part of the State is almost entirely supplied with oil by Cincinnati dealers, at their urgent solicitation, and in order to facilitate trade, I authorized Mr. A. M. Riddle, a very competent gentleman, to inspect and brand oils for shipment to that part of the State. This proved not only a great convenience to the dealers and people in that section of our State, but it saved them the inspection fee, as that is paid by the dealers at Cincinnati; and, moreover, shipments of oil for that locality are closely watched, and in this way low grade oils are kept out of the State. This plan is pursued in Ohio, Pennsylvania, West Virginia and Kentucky.

Deputy Develin is now, and has been for several months, attending to the inspection of oils at Cincinnati.

INSTRUCTIONS TO DEPUTIES.

In order to insure a uniform execution of the law I issued to my deputies the following circular :

OFFICE OF THE STATE INSPECTOR OF OILS FOR INDIANA.

INDIANAPOLIS, JUNE 16, 1879.

To Deputy Inspectors of Oils for the State of Indiana :

The law for the inspection of mineral or petroleum oils for illuminating purposes, approved March 31, 1879, requires the State Inspector to prepare rules and regulations for the direction of Deputy Inspectors.

In pursuance of that authority, I have prepared the following, which you will observe in the discharge of your official duties :

1st. Your special and careful attention is called to the act under which your appointments have been made for your guidance upon many points not necessary to be referred to in this circular.

2d. The process for testing oils is fully explained in the first section of the act with which you will strictly comply in making tests. The standard test for illuminating oils in Indiana is 120 degrees Fahrenheit's thermometer, and all illuminating oils that will bear a flash test of 120 degrees, as shown by the apparatus described in said section one, can be legally sold in Indiana ; and all illuminating oils that will not bear a flash test of 120 degrees can not be legally sold in this State for illuminating purposes. Keep a record of each inspection, noting the temperature at which the flash takes place. In testing oils from tanks, great care should be taken in seeing that the oil tested goes into the barrels branded for that purpose.

3d. The apparatus for testing and the brands for "approval" and "rejection" will be furnished from this office, at the expense of the Deputy. Brands furnished from this office only must be used, and but *one* of each kind will be allowed to each Deputy.

4th. Under no circumstances will Deputies allow their brands to be used by others, or to be out of their possession, but will brand the barrels *themselves*, or have it done under their supervision.

5th. Ordinarily the best place for branding is the guage end of the barrel, but when other marks interfere, then wherever practicable.

6th. Each Deputy Inspector is required to make a report to this office on the first day of each month ; blanks for that purpose will be furnished him.

7th. The fees allowed by the act are as follows, and are collectible upon approved and rejected lots :

Forty (40) cents for a single barrel, package or cask ;

Twenty-five (25) cents each when the lot exceeds one but does not exceed ten in number ;

Fifteen (15) cents each when the lot exceeds ten but does not exceed twenty in number ;

Ten (10) cents each when the lot exceeds twenty but does not exceed fifty in number, and

Five (5) cents for all lots exceeding fifty barrels, that is to say, ten (10) cents each barrel up to and including the fiftieth barrel, and five cents for each barrel of such lot over fifty.

8th. Although not provided by law, it is very desirable that Deputy Inspectors should investigate all accidents caused from the use of petroleum and its products as an illuminating fluid and report the facts to this office.

9th. The State Inspector enjoins upon each Deputy a personal supervision to the enforcement of the law, and especially so as to sections five, six and seven of said act, and promptly report all violations to the Prosecuting Attorney of the county in which such violation occurs, as provided in section ten of this act, and to this office.

Each Deputy Inspector will carefully examine the law and note all points not covered by these instructions, bearing in mind that only oils sold or manufactured for *illuminating purposes for use within this State* are subject to inspection.

In conclusion I would impress you with an appreciation of the great responsibility resting upon you officially. Human lives, as well as safety of property, depend upon a faithful and conscientious discharge of the duties entrusted to you. The law must be enforced impartially and without fear or favor.

H. CLAY, *State Inspector*.

It will be observed by the foregoing circular that Deputy Inspectors are instructed to investigate all accidents caused from the use of petroleum, and its products as an illuminating fluid, and report the facts to this office, but as none were reported it may be assumed that there were no accidents of a serious nature that came under their immediate notice. My personal attention was called to some three or four explosions of lamps in this city, but upon investigation I found them to be the result of gross negligence in not having the lamps properly cleaned; in each case the oil used was above the degree required by law.

THE FEES FOR INSPECTING.

Soon after my appointment a question was raised as to the proper construction of the fourth section of the law, as regards the fees

that the Inspector was entitled to charge. In order to have the matter settled by the proper authority, I addressed a letter to the Attorney General of the State, and received a reply giving his construction of the fee bill.

The following are copies of the letters :

OFFICE OF THE STATE INSPECTOR OF OILS,
INDIANAPOLIS, August 30, 1879.

Hon. T. W. Woollen, Attorney General :

SIR:—There is a difference of opinion among dealers in oil as to what are the legal fees for inspecting and branding oils. The law is as follows :

“Forty (40) cents for a single barrel, package or cask ;
Twenty-five (25) cents each when the lot exceeds one but does not exceed ten in number ;
Fifteen (15) cents each when the lot exceeds ten but does not exceed twenty in number ;
Ten (10) cents each when the lot exceeds twenty but does not exceed fifty in number, and
Five (5) cents for all lots exceeding fifty barrels.”

Now, a few dealers hold that whenever the number of barrels is over fifty, the whole lot, instead of simply the excess, must be reduced to five cents per barrel, and if this be so, the fees for inspecting and branding, say *fifty-one* barrels, would be two dollars and fifty-five cents, whereas, it is clear that the legal fees for a like service on a smaller number, say *fifty* barrels, is five dollars, and with this construction, the same inconsistency follows all through the fee bill. For instance, it is plain that the legal fee on ten barrels is two dollars and fifty cents, but if the number exceeds ten, then, if the whole lot must be reduced to fifteen cents per barrel, the fees for inspecting and branding, say *twelve* barrels, would be one dollar and eighty cents only, or seventy cents less than the clearly legal fees for a like service on *ten* barrels.

Will you, therefore, as the law officer of the State, give me your opinion as to what are the legal fees in the premises ?

Very respectfully yours, etc.,

H. CLAY,
State Inspector.

ATTORNEY GENERAL'S OFFICE,
INDIANAPOLIS, September 5, 1879.

SIR:—Your favor of the 30th ult. is received and has been considered. You inquire what fees are properly chargeable under the 4th section of the act approved March 31, 1879, in relation to the duties of your office. That section, so far as it relates to the subject under consideration, reads as follows :

Sec. 4. Said inspector or deputy inspector shall be entitled to demand and receive from the owner or party calling on him, or for whom he shall perform the inspection, the sum of 40 cents for a single barrel, package or cask ; 25 cents each when the lot exceeds one, but does not exceed 10 in number ; 15 cents each when the lot exceeds 10, but does not exceed 20 in number ; 10 cents each when the lot exceeds 20, but does not exceed 50 in number ; and 5 cents each for all lots exceeding 50 barrels," etc.

If read literally this section would lead to an absurdity. For 10 barrels the inspector would be entitled to charge \$2.50, but for 11 barrels he would receive only \$1.65. So for 20 barrels he would get \$3, but for 21 only \$2.10 ; and for 50 barrels \$5, but for 51 barrels only \$2.55. This construction making the operation of the law ridiculous, it must be rejected, if any other construction consistent with the intent and purpose of the Legislature can be found.

I think the Legislature intended to grade the fees so that as the number of packages was increased the compensation for the increased labor should be diminished, but that the increase in the number of packages should not decrease the aggregate fees. Hence, I think the following construction should be placed upon the section : Take a given lot—suppose it be 15 ; this exceeds 10, and you get your fees of 25 cents each on the 10, and the decreased fee of 15 cents on the excess. Or suppose it to be 35 packages ; you get your fee of 15 cents on the 20 and the decreased fee of 10 cents each on the excess. So, on 60 packages you take the lot of 50 at 10 cents and charge the decreased compensation of 5 cents each on the excess of 10. The following would be examples of the cases I have supposed :

1. Lot of 15—

On 10, at 25 cents each	\$2 50
On additional 5, at 15 cents each	75
	<hr style="width: 100px; margin: 0;"/>
Total	\$3 25

2. Lot of 35—

On 20, at 15 cents	\$3 00
On 15, at 10 cents	1 50
	<hr style="width: 100px; margin: 0;"/>
Total	\$4 50

3. Lot of 60—

On 50, at 10 cents	\$5 00
On 10, at 5 cents	50
	<hr style="width: 100px; margin: 0;"/>
Total	\$5 50

This, I think, is the construction most consistent with the intention and purpose of the Legislature. I have the honor to be,

Very respectfully,

T. W. WOOLLEN,

Attorney General.

To H. Clay, Esq., Inspector, etc.

The following table shows the amount of oil inspected from the date of my appointment up to and including December 31, 1880, and the fees received therefor :

Name of Inspector.	Residence.	No. of Bbls Approved.	No. of Bbls Rejected.	Amount.
State Inspector.....	Indianapolis.....	33,304	130	\$2,369 80
A. M. Riddle.....	Cincinnati, O.....	10,263	896 95
T. J. Immel.....	Logansport.....	6,626	52	823 43
Tom M. Park.....	Lafayette	9,660	12	956 55
John H. Early.....	Laporte.....	8,815	89	1,022 85
John B. Foley.....	Terre Haute.....	4,986	136	526 70
Wm. Sackett....	New Albany.....	7,711	109	842 05
Henry Monning.....	Ft. Wayne.....	11,405	194	1,122 75
J. F. Elder.....	Richmond.....	7,733	184	520 25
Chas. S. Williams.....	Columbia City.....	1,731	12	263 85
L. M. Develin.....	Brookville.....	2,296	21	228 25
Ed. W. Cooper.....	Vincennes.....	1,968	16	245 60
L. A. Kirkwood	Muncie	3,688	130	417 70
Lee Linn.....	Wabash.....	2,937	3	338 00
A. C. Hardenbrook.....	Ligonier.....	1,304	21	158 35
T. C. James.....	Shelbyville.....	18	2	5 90
Wm. Nelson, T. P. Carson } and W. L. Hallock..... }	Evansville, ..	5,450	1	377 95
L. C. Fletcher.....	Aurora.....	4,148	104	492 20 .
J. B. Peterson and Jno. Frazier	Crown Point.....	531	44	140 56
A. S. Parker, ..	Kendallville.....	2,531	6	312 05
L. W. Child.....	Valparaiso.....	754	85 05
Totals.....	127,859	1,266	\$12,146 79

Total number of barrels approved.	127,859
Total number of barrels rejected	1,266
	<hr/>
Total number of barrels inspected.	129,125

The 1,266 barrels of oil shown as rejected was nearly all in the State when the law went into force. Now very little is shipped in that is below the test required for the reasons heretofore given in this report.

RECEIPTS AND EXPENDITURES.

Total amount received from all sources . .	\$12,146 79
Amount paid Deputies	\$7,903 74
Office rent, stationery, postage, traveling and other expenses.	785 50
	<hr/>
	\$8,689 24
Net receipts for State Inspector . . .	\$3,457 55
for nineteen months of his entire time and close attention to the duties of his office.	

EFFORT TO EVADE THE LAW.

I take pleasure in reporting that there have been very few cases coming to my knowledge of an effort to evade the law. One case, however, demands more than a passing notice as the effort to put the "fluid" upon the market was continued over my protest with a persistency worthy of a better cause, or rather of a better article. The manufacturer of the "fluid" which he called by the high sounding name of "Hyperion" (the god of day), claimed he had a right to manufacture and sell it because he had obtained a patent from the United States, and he could not, therefore, be prohibited by a law of the State of its manufacture and sale. In this view of the case I did not concur, although he cited to me an opinion published in the Scientific American, which he claimed sustained his position. Some months afterwards I was called to Kokomo by a dispatch from Deputy Immel, of Logansport. I found that Mr. Immel had been called there to inspect the "fluid," or brand it, which he refused to do. The owner of the patent fluid had succeeded in getting some worthy gentlemen of the place interested with him in its manufacture, and as soon as I informed them that the fluid was prohibited by the law they declined to continue its manufacture. In order, however, to prove that the fluid contained the most inflammable products of petroleum, a sample was submitted to Prof. Collett for analysis.

The following is a copy of Attorney General Woollen's opinion on "Hyperion."

ATTORNEY GENERAL'S OFFICE,
INDIANAPOLIS, January 14, 1880.

SIR:—Your favor of the 2d inst., inquiring of me whether the burning fluid called "Hyperion," a sample of which you handed me, is of the character prohibited by the act approved March 31, 1879, has been received and duly considered. The law mentioned prohibits the sale of "all mineral or petroleum oil, or any oil fluid or substance which is a product of petroleum, or into which petroleum or any product of petroleum enters, or is found as a constituent element, whether manufactured in this State or not," unless it is inspected and bears the test required by law. It will be seen at once that your inquiry submits to me rather a question of fact than law; I accordingly handed the sample of the fluid submitted to me to Professor Collett, of the Bureau of Statistics and Geology, for analysis, whose report I herewith transmit to you as part of this communication. You will see by this letter that the sample of "Hyperion" submitted to him is found to contain the "product of petroleum as a constituent element," and must undergo the necessary inspections and test if offered for sale for illuminating purposes.

I have the honor to be, very respectfully,

T. W. WOOLLEN,
Attorney General.

To H. Clay, Esq., State Inspector, etc.

The following is a copy of Prof. Collett's analysis of "Hyperion:"

DEPARTMENT OF STATISTICS AND GEOLOGY,
INDIANAPOLIS, IND, January 12, 1880.

Hon. T. W. Woollen, Attorney General State of Indiana.

SIR:—The sample of burning fluid marked "Hyperion," submitted by Mr. H. Clay, State Inspector of Oils, has been examined:

1. Physical characteristics, as odor, color, limpidity and smoky combustion, indicate products of petroleum.
2. It is coagulated (thickened) by sapanaria officinalis, declared and authorized as a test of petroleum by the Journal of Chemistry.

3. At suggestion of Professor Wyley, of Purdue University with the assistance of John N. Hurty, chemist, subjected to the test directed by chemical text books of practical distillation, with the following results :

A. Vapors came over at 113 F, which were not condensed by iced water, indicating products lighter than gasoline.

B. From 120° to 180° F, the distillate was 37 per cent., with specific gravity, of 0.666, indicating gasoline.

C. From 180° to 220° F, distillate amounted to 33.60 per cent.; specific gravity, 0.698, indicating C naptha, mixed with gasoline.

D. The residuum which did not evaporate at 220° F. amounted to 29.40 per cent. of the whole, with specific gravity of 0.733: indicating B naptha, with a small amount of A naptha.

The following formula, describing products of petroleum, is from page 371, volume 13, of Appleton's Encyclopedia :

Articles	Boiling Point.	Specific Gravity.
Gasoline . . .	120 degrees F.	0.665
C Naptha . . .	180 degrees F.	0.706
B Naptha . . .	220 degrees F.	0.724
A Naptha . . .	300 degrees F.	0.742
Kerosene . . .	350 degrees F.	0.904

From the foregoing results and indications, I am clearly of the opinion that products of petroleum are constituent elements in the samples examined for Mr. Inspector Clay.

At my request, chemical tests were made of the same fluid by Henry Jameson, Professor of Chemistry at Indiana Medical College, with similar indications.

Glass bulbs partly filled with the fluid and hermetically sealed were placed in water. As it approached the boiling point one bulb exploded at 185 degrees F., another at 191 degrees F., without report. Another bulb as before, containing about nineteen or twenty drops, was exposed to the flame of a small quantity of the fluid. It instantly and violently exploded, with a report similar to that of a musket percussion cap.

Respectfully submitted.

JOHN COLLETT,

Chief of Bureau of Statistics and Geology.

From the foregoing it will be seen that were it not for the present law the State would be flooded with "Hyperion," and a person carrying a lighted lamp with such materials "holds his death warrant in his hand, and a stumble may furnish an executioner at any moment."

AMENDMENT.

I would respectfully suggest that if any change is made in the law, that it be so amended as to prohibit the use of the lighter elements of petroleum in coal oil and gasoline stoves.

All of which is respectfully submitted,

H. CLAY, State Inspector.

INDIANAPOLIS, January 7, 1881.

9
SECOND ANNUAL REPORT

OF EXPENSES OF

BUREAU OF STATISTICS AND GEOLOGY,

YEAR ENDING OCTOBER 30, 1880.

TO THE GOVERNOR.

INDIANAPOLIS:

CARLON AND HOLLENBECK, PRINTERS AND BINDERS.
1881.

THE STATE OF INDIANA,

GOVERNOR'S OFFICE.

Received November 5, 1880, and referred to the Auditor of State for verification. Returned, certified as follows :

OFFICE OF AUDITOR OF STATE,

INDIANAPOLIS, Nov. 8, 1880.

On examination of the records in this office I find the statement of Chief Bureau of Statistics, as to the expenditures of his office, to be correct.

M. D. MANSON,

Auditor of State.

Examined by the Governor and transmitted to the Secretary of State to be filed and preserved in his office, and published as may be ordered by the Commissioners of the Public Printing. Vouchers retained and filed.

SAMUEL R. DOWNEY,

Secretary.

Filed in my office November 12, 1880.

J. G. SHANKLIN,

Secretary of State.

REPORT.

DEPARTMENT OF STATISTICS AND GEOLOGY,
INDIANAPOLIS, IND., October 31, 1880.

To His Excellency, JAMES D. WILLIAMS,
Governor of Indiana:

SIR: In pursuance of the requirements of the sixth section of the Act of the General Assembly of Indiana, creating the Department of Statistics and Geology, I submit the following "detailed statement, accompanied with the proper vouchers" (Nos. 36 to 117, inclusive) of and for all moneys expended during the fiscal year ending October 31, 1880: .

1879.

Oct.	31.	Voucher No. 36.	Campbell.....	\$75 00
Oct.	31.	Voucher No. 37.	Carlton.....	13 75
Oct.	31.	Voucher No. 38.	Lloyd.....	39 75
Oct.	31.	Voucher No. 39.	Davis.....	32 85
Oct.	31.	Voucher No. 40.	Collett.....	41 25
Nov.	1.	Voucher No. 41.	Bowen & Stewart.....	3 32
Nov.	1.	Voucher No. 42.	Garvey.....	1 50
Nov.	1.	Voucher No. 43.	Lloyd.....	5 00
Nov.	1.	Voucher No. 44.	Gilkey....	2 40
Nov.	1.	Voucher No. 45.	Express charges.....	25
Nov.	1.	Voucher No. 46.	Lloyd.....	40

Postage and stationery.....	204 67	
Telegram expense and incidentals.....	184 99	
Current expenses, fair week.....	2,366 46	
Construction and repairs.....	2,545 77	
Total.....		<u>\$15,109 66</u>
Net surplus from State Fair.....		3,699 39
Total.....		<u>\$18,809 05</u>
In treasury November 1, 1880.....	\$14,932 76	
In treasury November 1, 1879.....	13,040 79	
Difference.....		<u>\$1,891 97</u>

There are outstanding claims on accounts current, unsettled, to amount of about \$700. There has been canceled \$1,050 of guarantee bonds of the Board. Otherwise, the assets and liabilities remain the same as at last report, being the fair ground property, with improvements thereon, mortgaged to pay the bonded debt.

The appropriation by the last Legislature of \$10,000 to pay the interest coupons on the bonds of the Board has been drawn as needed, semi-annually, \$2,400 of which yet remains in the State Treasury to pay the interest on the bonds due January 1, 1881, at which time the bonds, amounting to \$60,000, are due. The fair ground property is mortgaged to secure the bonded debt, and with the limited means in the treasury, we do most earnestly appeal to the General Assembly, through you, to purchase the property of the Board and relieve the indebtedness.

The work of the Board continues to increase. We are much encouraged by the mutual aid received from the State Industrial Associations. With good, comfortable and commodious quarters, and lecture room for their use, each and all work in perfect harmony with the Board, and their proceedings are made to form a part of our published reports, which are sought for far and near.

Respectfully submitted,

W. H. RAGAN,

Attest :

President.

ALEX. HERON, *Secretary.*

GEOLOGICAL DEPARTMENT.

Financial Statement.

The expenses in this department have been confined to placing the Cabinet and Museum in a proper condition for transferring to the Curator of that department, as required by law.

No. 14.

REPORT OF PROCEEDINGS

OF THE

Board of State House Commissioners,

FROM

JANUARY 1, 1879, TO DECEMBER 31, 1880,

TO THE GOVERNOR OF INDIANA.

.

INDIANAPOLIS, DECEMBER 31, 1880.

.

INDIANAPOLIS:

CARLON & HOLLENBECK, PRINTERS AND BINDERS.
1880.

THE STATE OF INDIANA,
GOVERNOR'S OFFICE.

Received, December 31, 1880, examined by the Governor, and transmitted to the Secretary of State to be filed and preserved in his office and published as ordered by the Commissioners of the Public Printing.

SAMUEL R. DOWNEY,
Secretary.

Filed in my office December 31, 1880.

J. G. SHANKLIN,
Secretary of State.

COMMISSIONERS' REPORT.

To *His Excellency*, ISAAC P. GRAY,
Governor of Indiana:

SIR:—On the 31st of December, 1878, this board submitted to the Hon. James D. Williams, then Governor of this State, its first biennial report, which embraced all of its most important official transactions to that date. To this was also appended a detailed report of the secretary, showing the receipts and expenditures during the same period.

Although not a requirement of the law to make annual or biennial reports, but simply quarterly reports, yet it is thought advisable to submit a general review or summary of all of the important transactions of the office during the interim since the last session, so that the Legislature about to convene may the more readily comprehend the situation, and act understandingly in regard to such State House matters as may be presented for legislation. And for the still better understanding of the members of the present Legislature, our several reports are referred to, and especially to No. 6, which, because of its general interest, as well as valuable tables, has attracted such attention among architects, builders and scientific men, that orders for it from different sections of this country and Europe are still being received. We make special reference to that report, as being full of particular interest, containing copies of all contracts, bonds, specifications, schedules, etc., as well as numerous tables, giving tensile and crushing strength of different kinds of material used in the construction of the new State House.

FINANCIAL.

In our report of December, 31, 1878, there had been placed to the credit of the State House Fund the sum of..... \$58,049 87

Since which date the following sums have been added, viz:

Jan. 31, 1879.	Balance second installment tax of 1877.....	20,167 49
May 1, "	Appropriation of March 13, 1879.....	100,000 00
June 30, "	Delinquent tax of 1877.....	7,326 40
" " "	First installment tax of 1878.....	83,129 68
Sept. 30, "	Appropriation March 13, 1879.....	100,000 00
Jan. 15, 1880.	Second installment tax of 1878.....	72,938 45
July 20, "	Delinquent tax of 1878.....	15,484 34
" " "	First installment tax of 1879.....	87,148 04
" " "	Tax on sequestered property, 1878.....	83 65
Nov. 5, "	Old State House (rent of fence).....	49 00
" 30, "	Appropriation March 13, 1879.....	100,000 00

Total\$644,376 92

There has been expended from State House Fund for all purposes the sum of..... 378,337 84

Leaving in the hands of the Treasurer of State to the credit of the State House Fund the sum of.....\$266,039 08

There will probably be received from the second installment of two cent tax for 1879 during January, 1881, the sum of..... 70,000 00

During the year 1881 there will probably be received from two cent tax levied for 1880 the first installment in June, 1881, the sum of..... 75,000 00

The second installment to be credited in January, 1882, the probable sum of..... 70,000 00

Making a total of.....\$481,039 08

The law does not allow the Board to make contracts requiring payment in any one year of more than 80 per cent. of the tax levy of such year. There should therefore be deducted from the above estimate of tax levy for 1881, the sum of..... 29,000 00

Leaving total unexpended State House Fund.....\$452,039 08

Contracts have been made for iron, granite and marble, calling for payment during 1881 the sum of.....\$111,019 08

It is estimated by the Supervising Architect that there will be expended by the contractors for work and materials from date to April 1, 1881, the sum of..... 81,850 00

There should be added to liabilities the 10 per cent. retained on estimates for work done by the contractors, being the sum of..... 35,218 32

Making in all the sum of..... 228,087 40

Which, deducted from the above total, leaves total fund available for work in 1881.....\$223,951 68

There has been expended to date, chargeable to the State House Fund,	
for all purposes the sum of.....	\$378,337 84
Deduct from this sum expenses for various purposes, as follows, viz. :	
For advertising.....	\$381 55
For architect	11,700 42
For commissioners.....	18,688 32
For engineering	262 21
For experts	3,312 08
For legal expenses.....	2,549 73
For office expenses.....	2,019 54
For old State House.....	158 19
For plans, expenses of	972 88
For secretary.....	4,747 02
For selecting materials.....	613 70
For superintendence	4,264 00
For printing	641 06
For rent of offices (Gallup block).....	2,500 00
For corner-stone expenses.....	350 00
	<hr/>
	53,160 70
Leaves as chargeable to the work done on construction of	
building.....	<hr/>
	\$325,177 14
	<hr/>

PROGRESS OF THE WORK.

During the last two years the progress of the work has been less rapid than we had hoped. The work was of such unusual magnitude that it seemed impossible for those furnishing materials to comprehend the necessity for greater exertions, and as a consequence, the failure to furnish material has been the main cause of the unsatisfactory progress.

The great number of very large footing and foundation stones required, and the limited supply from the few quarries at which such stone could be procured, necessarily delayed the work beyond our expectations. All of this class of stone has, however, now been placed in the building, and the contractors have made large preparations for procuring materials, both stone and brick, and the Commissioners anticipate no delay for the future on that account.

It will be seen by the estimate of the Supervising Architect, herewith presented, that if the requisite funds are provided, he believes that there might be properly expended in construction during the year 1881 the sum of.....\$414,324 31
And during the year 1882 the sum of..... 461,888 60

Making a total of.....\$876,212 91

By this estimate of the architect it is designed to complete the building up to the main cornice.

There should be deducted from this estimate the sum of sixty thousand dollars, being cost of marble for columns, pilasters, etc., and is included in former statement of outstanding obligations.

This will leave the architect's estimate of means required to prosecute the work for the years 1881 and 1882 the sum of...	\$816,212 91
To this should be added contingent expenses, superintendence, rent of State offices, architect's percentage, expenses of Board, etc., for two years, estimated.....	35,000 00
Making the sum of.....	\$851,212 91
From this should be deducted the unexpended amount of State House Fund available for 1881, as per statement.....	223,951 68
Leaving to be provided for, according to architect's estimate, to prosecute the work in the years 1881 and 1882.....	<u>\$627,261 23</u>

The board hope that, should the working seasons be favorable, they may be able to exceed the amount of work in the estimate of the architect. They feel assured that true economy would be subserved by completing the building at the earliest practicable period. Some of the reasons for this opinion may be summed up thus:

The house will cost considerably less money. It will save to the State the use of all the buildings now occupied by the State officers, and owned by the State, besides the rents paid for library building.

Above all, and of still greater importance, is an urgency felt for the completion of the work, in the security of the vast accumulation of the public records of the State against destruction by fire. Notwithstanding all the care that can be taken, a conflagration is imminent at any moment. The loss by such an overwhelming disaster could not be estimated, as neither money nor time could restore the damage.

NEW STATE HOUSE FUND.

The law authorizing the construction of the State House provides that certain taxes to be assessed in the years 1877 and 1878 shall be collected and paid into the State Treasury, to be kept and known as the "New State House Fund." Additions to this fund were made by the last Legislature by an appropriation from the general fund, and by taxes to be assessed for the years 1879 and 1880. There is nothing specific in the law as to the disposition of this fund, but the board, as advised by the Attorney General of

the State, has charged to this fund not only the expense of the actual work on the building, but all other expenses incident to the carrying on the work. By the State House law "the Board of State House Commissioners are authorized and directed, as herein provided, to build a new State House, the cost of which shall not exceed two million dollars." "And when it becomes necessary they shall cause the old building to be removed, and they shall provide temporary quarters for the General Assembly, and for the officers now occupying the present building." The expenses of the temporary quarters for the General Assembly and for the officers formerly occupying the old building have, until recently, been paid out of the "contingent fund" by the Treasurer of State, until that fund became exhausted, when the owner of the property, occupied by the officers removed from the old building, brought suit against the board for rent due and unpaid. Having obtained a judgment against us in the Superior Court of Marion county, we appealed to the Supreme Court, whose decision made the new State House fund under the State House Commissioners liable for the rent, which the commissioners then paid and charged to that fund.

The State Librarian has filed with the board a recent opinion of the Attorney General, that the expense of fitting up and preparing the halls for the use of the General Assembly, is, by the law, chargeable to this fund, and should be paid by this board, which will be done, until the Legislature makes other provisions for this expenditure.

It can be readily seen, that in the long time it will necessarily take to complete the new building, the State House fund will be charged with a large sum in no way directly connected with the construction of the house, and, therefore, the board feel great solicitude to have this fund properly classified, and the amount designed for the construction of the house definitely settled. This solicitude is enhanced by the fact that each of the commissioners is under bond of \$20,000 "for the faithful performance of such duties as may be imposed upon him by law, and that the cost of the building shall not exceed two millions of dollars."

In reverting to that part of the law authorizing the commissioners to select a plan for the new building, it will be seen that they are permitted to select a plan that "can be constructed within the limit of two millions of dollars"—should it "be suitable in respect to permanence and convenience, adapted to all the purposes

and aims of a State House building, and in keeping with the dignity of the State."

The board have always believed that it was the intention of the Legislature to expend two millions of dollars in the work of construction alone, and think that the language of the act before referred to admits fairly of such interpretation; but as it seems possible to give a different construction of the law, and as it is of great importance to have an authoritative declaration of its meaning made as early as practicable, it is hoped that the attention of the next Legislature will be called to the matter, and all doubt be removed by their action.

CHANGES IN DETAILS OF WORK.

The board feel assured that the whole of the two millions of dollars can be judiciously applied in the construction of the house, and that a due regard to permanence and suitableness require more costly material and workmanship in many particulars than that provided in the original specifications. It will be recollected that the time allowed by law to competing architects, to complete their plans was so short that necessarily many important details could not be matured. The board have, therefore, given close and critical attention, not only to the material used, but to every detail of construction, and have been compelled, in their desire to faithfully discharge their trust in erecting such a State House as the law contemplates, to make several changes in that part of the work now being constructed. Such changes are provided for in the contract for the building, and in no way impair its obligation or that of the sureties to it.

The *first* change in construction was made the 1st day of August, 1879, and provided for in a supplemental agreement with the contractors, by which that part of the basement story of the building between the ground line and the top of the basement windows, could be greatly improved in solidity and appearance, by substituting regular coursed, solid stone masonry throughout the entire wall, in place of the front ashlar, backed by stone as provided in the specifications under which the building was contracted.

The value of the work to be taken out, as jointly estimated by the supervising architect and the contractors, amounted to \$35,589, and the value of the work to be substituted in its place amounted to \$50,673, making the additional cost of the building, over and above the contract price, the sum of \$17,084.

The *second* change was made to increase the clear height of the basement story one foot and eight inches, by decreasing the filling around the footings. The work taken out was estimated by the architect and contractors to amount to \$374.55, and the value of the work to be substituted amounted to \$216.96, making a deduction from the original contract for the building of \$157.59.

The *third* change in construction was to change the granite base from "bush-hammered" to "rock-faced" work. The difference in the value of this work was estimated at \$155.55, being a deduction of that sum from the cost of the work as per original contract.

The *fourth* change was made to improve the appearance of the rock-faced work of the foundation walls, by which an additional sum of \$739.20 was added to the cost of the building, as per original contract.

The *fifth* change was an alteration in the schedules prepared for estimating the value of the work done as it progressed. These schedules were prepared for the purpose of facilitating the labor of making monthly estimates of work done by the contractors. They were the result of a mutual agreement between the contractors and the board as to the relative value of the various kinds of work, justly proportioned to their whole contract price for work, and in no way affect the total cost. Such an arrangement before the work is done settles all controversy between the architect and the contractors as to prices of the work in its various stages, and leaves no room in making monthly estimates for a disagreement, not unusual in such cases.

As the work progressed it became obvious to the commissioners that the relative value of the regular coursed stone work in the foundation of the walls, piers and dome to the first floor line, was too low; they therefore added six to ten cents per cubic foot on the various sub-divisions of this work to the original schedules, making an increase for monthly estimate purposes in the whole work of \$10,944.52, and deducted a corresponding amount from schedule prices for work in other parts of the building. Whilst this alteration has no effect on the total cost of the building, the increased schedules are still less than the original bid of the contractors for the work embraced in them.

The *sixth* change in the original specifications for the work was designed to improve the appearance of the Washington street front

by making a bolder projection of the center columns, and opening the dead wall above and introducing more light into the library room ; also to substitute marble columns on the first corridor, for the oolitic stone columns ; also marble columns in the second and third corridors, for the cast iron contemplated in the original plan, and protecting the base of the columns from staining by introducing under them a plinth of granite. The joint estimate of the architect and contractors makes the work to be dispensed with amount to \$96,160, and the cost of the work to be substituted to be \$176,160. The difference to be added to the original contract price being \$80,000.

The *seventh* change consists in dispensing with the medallions, designs for memorial tablets on the faces of the building, and substituting double brackets under the pilasters and columns, and placing modillions in the cornice of first story, in the intervals omitted in the original design ; placing ornamented window caps over all windows in the intermediates, and alternate moulded with plain ashlar at the pavillion corners ; also to line the inside of the smoke flues with fire-brick in place of tile, as originally specified ; also to construct transom windows over the doors in the basement of the building, not provided for in the specifications. The estimated cost of the work to be dispensed with in making these changes amounts to \$2,974, and the cost of the work to be substituted amounts to \$4,403.60, making an addition to the original cost of the building of \$1,429.60.

The *eighth* change consists in substituting red Jonesboro, Maine, granite, for the eight large dome columns, instead of oolitic limestone, provided for in original specifications ; also to change the pargetting on the back of the ashlar from Portland cement to asphalt roofing composition. In the dome these changes add greatly to its appearance, and is in better harmony with the inside finish of the corridors. The asphalt wash on the back of the ashlar has been tested, and has been found to prevent the moisture in the cement of the brick backing from discoloring the face of the stone, which is not the case with Portland cement. By the joint estimate of the architect and the contractors, the work and materials to be dispensed with in these changes amounts to the sum of \$4,140, and the work and materials to be substituted is \$14,840, leaving the sum of \$10,700 as a difference to be added to the original contract price.

The aggregated increased cost of the building over original contract price, by reason of the foregoing changes, amounts to.....	\$109,952 80
Deduct the saving in expense of these changes, being.....	313 14
Leaves total increase in cost.....	<u>\$109 639 66</u>

In addition to the changes above stated, the board are investigating the propriety of further alterations, all of which have for their object solidity of construction and suitableness of finish to the purposes of the building. In the original specifications the wainscoting and door casing in the lower corridor is of oolitic limestone, and the wainscoting of the two upper corridors is of oak. It is believed by the board that if it can be done at a reasonable expense, that the wainscoting of all the corridors should be marble, and the door casings above the marble of oak. This would add greatly to the beauty and durability of the corridor, and be additional protection against fire.

The board is also discussing the propriety of changing the grand stair cases from iron to marble. There are other minor improvements contemplated, involving but little expense, in the construction of the roof and pavillions. The board will continue their labor of thoroughly investigating all the specifications as the work progresses, and will make such improvements as their judgment dictates, always keeping in view their obligations to keep the cost of constructing the building below two millions of dollars.

The powers and duty of the board seem to be clearly and comprehensively set forth in the law creating it. It says, "the Board of State House Commissioners are authorized and directed, as herein provided, to build a new State House, the cost of which shall not exceed two millions of dollars." The board believe they do not mistake the wish of the people as expressed in the law and otherwise, to have as good a building as this sum properly and honestly applied, can construct. A building large enough to accommodate the various departments of the government, suitable in permanence and convenience, and in keeping with the dignity of the State, as specified in the law, will, it is believed, require the sum designated. Whilst the board have not presumed to change the design of the building, they have, in many particulars, made changes in the materials used in its construction, always having in view suitableness for the service required. This they believe fidelity to their trust demands, and they hope in the future that they may be able to add still more to the permanency and beauty of the building.

COST OF BUILDING.

Final cost of the building, if constructed under present specifications, will be as follows, viz :

Total amount of original contract.....	\$1,509,621 65
Add for items not included in this contract, as follows, viz :	
For steam heating, by contract.....	45,893 35
For encaustic tile, corridor floors, estimated.....	40,000 00
For marble mantels, estimated.....	4,000 00
For wash stands, estimated.....	651 00
For glass, estimated.....	25,000 00
For hardware, estimated.....	5,000 00
For vault doors, estimated.....	2,400 00
For cost of excavation, cellar, by Kennington.....	2,924 86
For cost of excavation, cellar, by Rouse.....	215 50
For cost of sewer, by Bruner.....	3,112 90
For extra work to secure foundations below level of concrete....	1,958 65
For increase in original cost by reason of changes in construction.	109,639 66
Makes total cost of building as per present specifications.....	\$1,750,417 57

LAW SUITS.

As the commissioners have expended a considerable sum under the head of "legal expenses," a reference to the cause of the litigation seems to be necessary.

The board has been compelled to appear in court as defendants to a series of suits, instigated mainly in the interest of disappointed competing architects, charging that the plan of the State House selected by the board was defective, unsuitable, and more expensive than the law permitted ; and that the drawings of some of the unsuccessful competitors had been mutilated and rendered worthless, causing damage to the amount of twenty thousand dollars.

These suits, backed up by newspaper criticisms discrediting the integrity of the commissioners, finally culminated in an anonymous pamphlet to the same purport, distributed to each of the members of the Legislature in session. After tedious litigation before the Civil Circuit and Superior Courts of Marion county, and in the Court of the United States, in this city, all these suits terminated in verdicts sustaining the action of the board.

The complaint to the Legislature resulted in the appointment of a committee of investigation. This committee exhausted all the evidence that the complainants could produce, contained in 1,060 pages of legal cap paper, and in their report vindicated the com-

missioners in all their proceedings. The charges preferred before the committee, and their report to the Legislature will be found in the Appendix, marked "A."

DEATH OF ARCHITECT EDWIN MAY.

On the 27th of last February, the board received the sad intelligence of the death of the Supervising Architect, Edwin May. The board feel it due to his eminent ability in his profession, as well as to the great service he has rendered to the State, in the production of a design for its capitol building of such conspicuous excellence, to pay some tribute of respect to his memory.

Without the advantages of early training for the profession of an architect, Mr. May may be said to have attained the highest rank in his profession in the State. In competing for public buildings he seemed to be particularly successful, and this success doubtless arose from an adherence to the useful and practical, keeping at all times in view the well known rules of classic architecture. Some of his work can be seen not only in numerous public and private buildings in this city, but in many of the different counties and cities in this State.

The board bear willing testimony to his integrity in every act as connected with their joint labors from the day of their award to his State House plans, to the day of his death. At no time did any selfish consideration seem to move him. Had he lived to see the completion of the last and greatest work of his life, it is believed that the measure of his ambition would have been full. He has died at the age of fifty-six, before he had scarcely reached the prime of manhood and professional usefulness.

The board indulge the hope that the memorial dome of the new State House, being one of the grand conceptions of his genius, may bear upon one of its tablets a suitable inscription to his memory.

APPOINTMENT OF SUCCESSOR TO MR. MAY.

The law provides that "the architect whose plans are selected shall be the Supervising Architect of the building, and shall give bond in the sum of one hundred thousand dollars, conditioned that he shall faithfully discharge the duties of his office, and he shall be liable on his bond for all losses or damages that may be incurred on account of his violating any of the provisions of this act, or on account of his neglect or incapacity for the duties of his office. He

shall receive such compensation as may be agreed upon in advance ; *Provided*, No contract with an architect shall be made allowing more than three per cent. commission as full compensation for plans, specifications, and the supervision of the erection of such building, as the architect thereof."

Section 6 provides: "In any plan and specifications accepted, the architect shall be required to, and shall guarantee, that each and every part of the building shall be perfect and complete in itself, and sufficient to accomplish the purpose for which it is intended, as fully and completely as it is made to appear, or represented in the plan or declarations of the architect, and he shall be required to give bond with acceptable sureties in the penal sum of one hundred thousand dollars, conditioned that said plan shall be complete and perfect for the purposes designed and intended, and that the building shall be fully completed and finished, as a whole and in every part, for and within the price and cost estimated and fixed by such architect, and which price or cost shall be stated in his proposition, or submission of a plan and specifications."

In carrying out the foregoing provisions of the law, the board entered into a contract with Edwin May, in part as follows: "It is agreed, promised and covenanted by said party of the second part (May), in consideration of the agreements and covenants of said party of the first part hereinafter set forth, that he does hereby make over to said Board of Commissioners, as the property of the State of Indiana, said plan, with all accompanying drawings, specifications, directions and estimates; and that he will in like manner furnish and make over to said Board of Commissioners as the property of the State, as soon as prepared, all other plans, drawings, specifications, directions and estimates that may hereafter be made by him and relating to the construction of said new State House."

"It is agreed that the said party of the second part shall receive, in consideration for his plans, drawings, specifications, estimates and all his services as architect and supervising architect, a sum equal to two (2) percentum of the actual cost of said building; provided, however, that said per centum shall not in any case be computed on a sum greater than two millions of dollars. And it being understood that of and as a part of said two per centum the sum of six thousand dollars shall be paid to said party of the second part, in consideration and as compensation for his plans, drawings, specifications and estimates prepared and submitted to

said Board of Commissioners. Said six thousand dollars shall be paid out of the first moneys in the State Treasury for State House purposes, that in the judgment of the Board of Commissioners can be properly applied to such purposes."

The contract with said May further provides that "said party of the second part guarantees that each and every part of the said new State House shall be perfect and complete in itself, and sufficient to accomplish the purpose for which it is intended as fully and completely as it is made to appear or is represented in his plans or declarations, and that his plans, drawings and specifications shall be perfect and complete for the purposes designed and intended, and that said building can be fully completed as a whole and in every part for and within the price and cost estimated and fixed by him as architect in his estimates, and that no extra work or material shall be necessary to fully complete the building more than his estimates set forth, and should any such extra work or materials be required, that he will do such work and furnish such materials at his own cost and finish the work complete for the price estimated by him as architect, unless such extra work and materials shall become necessary by means of some change or modification of plan to be hereafter made by said board or by direction of the Legislature."

In addition to this contract for purchase of plans and compensation as supervising architect, and guaranty of perfect plans, the board appointed Mr. May supervising architect, and required a bond in the sum of one hundred thousand dollars for the faithful performance of this duty.

As no provision had been made for a successor to Mr. May, the board requested the Attorney General to advise them on the following points:

1. Does the death of Mr. May terminate the contract made between him and the State in relation to his services as supervising architect?

2. Is it incumbent upon the board to appoint an architect to fill the vacancy, or can the construction be continued under the management of the superintendent of construction and assistants? and if a successor is appointed must he give bond in the sum of one hundred thousand dollars, as required by section 10?

3. Does the bond given by Mr. May, as required by section six of the act for the construction of the State House, remain in force

until the building is completed, notwithstanding the death of Mr. May? Or are the securities released by his death and the appointment of a successor?

In answer to the above questions, the Attorney General, after citing various decisions of the law in similar cases, says: "Applying these principles to the question under consideration, it would seem plain that the contract of Mr. May, as supervising architect, was one requiring his personal services, and terminated at his death, and that it did not survive to his executor or administrator. In such case no claim can be made against his legal representatives for performance of the contract, nor can his estate claim any rights to perform it after his death.

"While the letter of the statute does not provide for a successor in case of the death of the original architect, I think it evident that its spirit does, for it seems plain that a supervising architect was contemplated. I think, therefore, that it is incumbent upon you to employ a successor, and in doing so he should be held to the same accountability as the original one. He should execute a bond in the sum of one hundred thousand dollars, and should be bound therein as the statute directs. To proceed without such appointment would be clearly illegal."

With regard to the guaranty required by section six, of the State House act, the Attorney General says: "Mr. May executed a bond, with sureties, conditioned as set forth in section six. This bond was to be given by the successful architect as an assurance that the representations made by him in his plans and specifications, might be relied on by the State, and as a guaranty that the cost above his estimate should be borne by the architect.

"Any breach of this bond, whether during Mr. May's lifetime or after his death, would render the parties to it liable. Its obligations do not cease with Mr. May's death, but continue until the building is erected. Probably the guaranty of the cost of the building is satisfied by the contract, letting it at a less sum than his estimate, but the other parts of the bond are still in full force and virtue."

The Board of Commissioners, after full consideration of the matter, had the following proceedings on the 6th of March, 1880:

Whereas, The death of Edwin May, the supervising architect of the new State House, notice of which event has heretofore been taken by this board, it be-

comes necessary under the law, as advised by the Attorney General, whose written opinion is filed in this office, to appoint another architect to fill said vacancy; and,

Whereas, The importance of having an architect thoroughly qualified to carry out the plans as adopted and, as near as may be, in sympathy with these plans, and having proper regard to the interests of the State as well as the personal obligations of each member of the board, that the building shall be perfect and complete in all its parts, and constructed within the limit prescribed by law, has challenged its most careful thoughts in the selection of a successor to Mr. May; and

Whereas, We find in the person of Mr. Adolf Scherrer, a thoroughly educated architect, who was the draughtsman of the plans adopted, and according to which the building is being constructed, having been engaged with Mr. May for the past seven years, and who has been daily in communication with the board, having had as assistant to Mr. May the almost exclusive charge of his duties, and having the fullest confidence in his capacity and integrity, it is therefore

Ordered, That the said Adolf Scherrer be and he is hereby appointed, by the unanimous vote of the board, supervising architect; and that he shall receive as compensation for his services one and one-half per centum of the estimates of work done under his supervision, and that the duties, obligations, etc., of his office be more fully set forth in a contract. And that he also enter into bonds in the sum of \$100,000 for the faithful performance of said duty. This contract was executed by the parties and the bond of Mr. Scherrer approved on the 20th of March, 1880.

THE CORNER-STONE.

As the Legislature had made no provision for the ceremonies to be observed, or for any expense attending the laying of the corner-stone of the new capitol, the board felt embarrassed as to the extent and character of the proceedings that would be suitable to the occasion. As no appropriation had been made for this object, they did not feel authorized to call upon the various military, civil and benevolent organizations of the State, to participate in ceremonies and processions, but confined the programme to the smallest limits that an intelligent regard to the object in view demanded. They believe that corner-stone memorials of a State capitol should chiefly perpetuate a representative record of itself, and the times in which the building was commenced, and having that object in view the Commissioners made every effort to collect full statistics of the State, such as the numerical, educational, religious, financial, geological, mineral, agricultural, horticultural, manufacturing, and every business interest of the State as a whole, and also by counties and cities, including the number, extent, and value of railroad and other improvements, and to deposit them in the best manner known for preservation. This, it was believed by the Commis-

sioners, would meet all the requirements of the custom as observed elsewhere on similar occasions.

The corner-stone, placed in the northeast corner of the building, is six (6) feet long, four (4) feet high and four (4) feet wide, of oolitic limestone from Owen county, Ind. A moulded panel is cut on the east face of the stone, with the inscription "A. D. 1880," which is ornamented with carved wreaths of corn and wheat, the leading cereals of the State. In the center of the block a cavity was made and filled with an air-tight copper-box, containing the deposits. The ceremonies of placing the stone in position were performed on the 28th of September last, and witnessed by an appreciative audience as large as the grounds would permit. Supposing that the ceremonies might be of interest to the members of the Legislature, a full programme has been printed, and a copy will be presented to each member.

SUPERVISION OF THE WORK.

In view of the great responsibilities resting upon the commissioners by law, both in making contracts for the work and then seeing that they are faithfully executed, it is proper to say, that in their contracts they have acted under the advice of competent attorneys, and believe that all points have been included to secure the construction of the house for the sum embraced in the contract. They believe that the bond given for the faithful performance of the contract is ample, and that the sureties are abundantly able to fulfill their obligations. They feel sure that the work and materials in the building are equal to the best, and in strict accordance with the contract and specifications.

To produce the favorable results mentioned, and at the same time protect the interests of the State, the commissioners and their securities, they were soon convinced, after entering upon the discharge of their duties, that close personal attention became absolutely indispensable. That such attention has been given the records of the board will show, resulting, it is believed, in the saving to the State, a sum exceeding the cost of the entire commission to date.

No building of the kind perhaps has ever progressed as far as this without some of the work being taken down to make changes, cure defects, or to remedy mistakes. But in this building, not a single stone has been lifted from its position for such a cause, nor a

brick removed. Nor has there any expense been incurred unprovided for by contract before the work was commenced. Whether or not any of the credit is due to the almost daily presence on the work of one or more of the commissioners, certain it is that much of it is due to the efficiency and scrutinizing eye of Mr. Adolf Scherrer, the supervising architect, and Mr. F. W. Vogdes, the general superintendent.

The reports of the supervising architect, Adolph Scherrer, and that of F. W. Vogdes, the superintendent of construction, will be found appended to this report, marked "B" and "C." Each of these reports give in detail such information as the Board desired to perpetuate a history of the operations in their departments. The commissioners acknowledge with pleasure the valuable assistance of these officers. Their duties have in all cases been promptly and efficiently discharged, and their gentlemanly bearing has rendered our intercourse pleasurable and profitable.

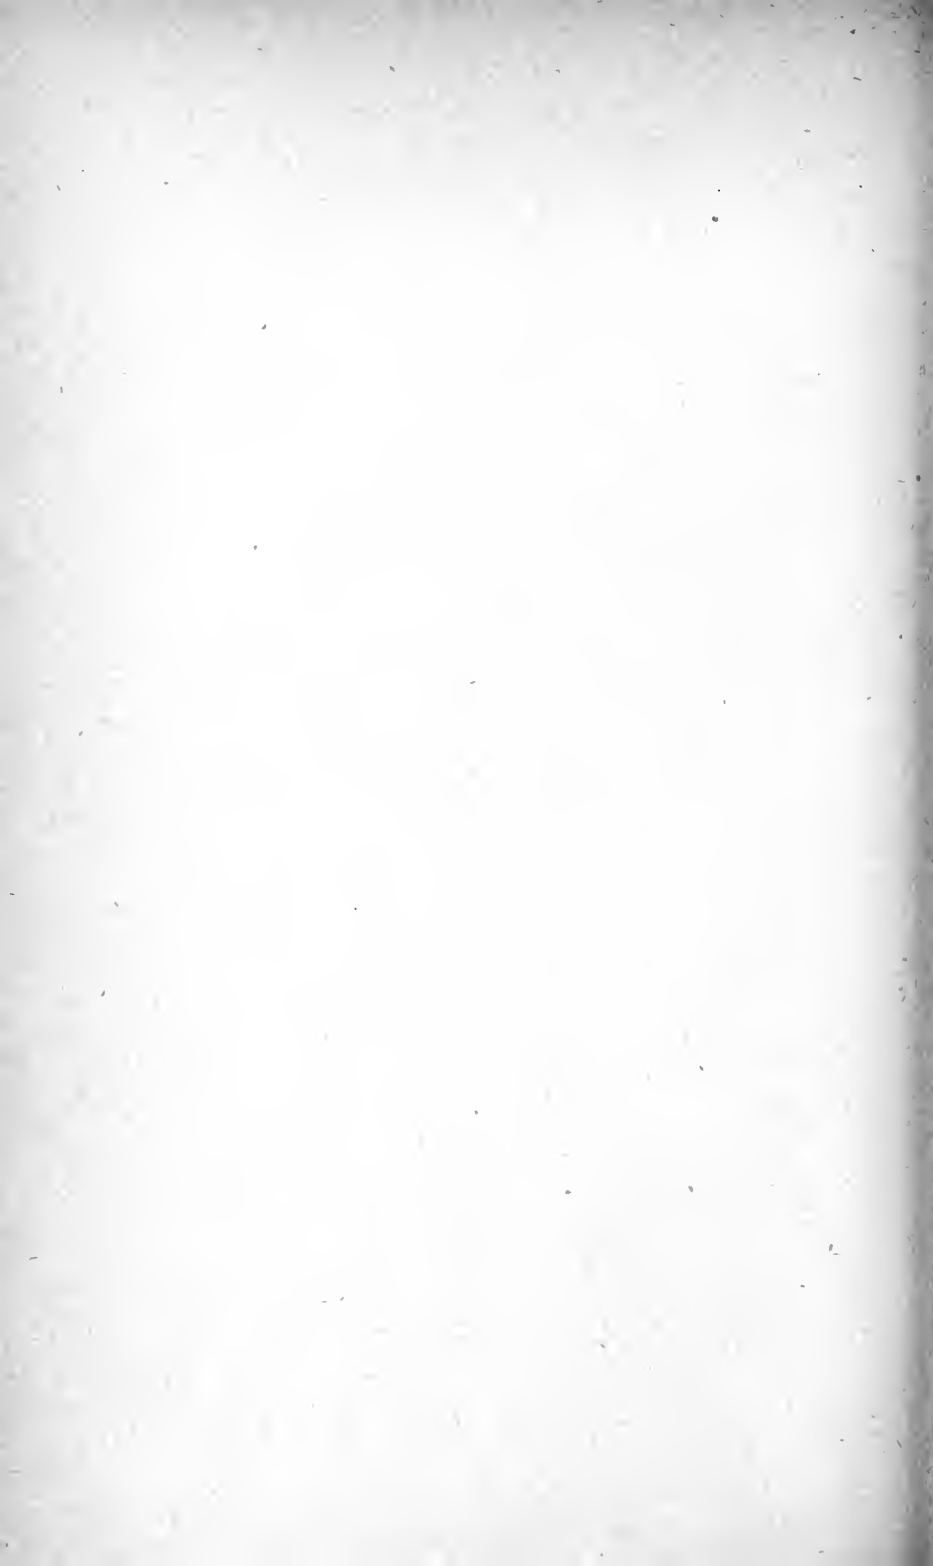

Exhibit marked "D" in the appendix is the annual report of the Secretary of the Board, required by section seven of the State House law, and gives a detailed account of the expenditures to date.

All of which is respectfully submitted,

JOHN LOVE,	}	<i>State House Commissioners.</i>

INDIANAPOLIS, IND., Dec. 31, 1880.

APPENDIX.

EXHIBIT A.

TRANSCRIPT

OF THAT PART OF THE HOUSE JOURNAL OF FEBRUARY 26, 1879,
WHICH REFERS TO THE STATE HOUSE
INVESTIGATION.

MR. SPEAKER :

The undersigned, members of the committee to whom was referred the following resolution, viz :

“WHEREAS, There have been grave charges made that the plan of the new State House was decided upon unjustly, and that the contract for the construction of the said building was let against the interests of the State; and,

“WHEREAS, Thousands of people in this State are of the opinion that these charges should be investigated, to protect the good name of the State and the character of the State House Commissioners, if they have faithfully performed their duty; and,

“WHEREAS, The people of this State, of all political parties are interested in ascertaining the real truth in reference to the adoption of the plan and the letting of the contract for said building; and,

“WHEREAS, This Legislature will be called upon to make appropriations for continuing the work upon said building, and should be fully informed in regard to all matters appertaining thereto; therefore,

“*Resolved*, That a select committee of seven, composed of all political parties, be appointed by the Speaker, which shall be charged with the duty of inquiring into the said charges in reference to the adoption of said plans for the new State House, and the letting of the contract for the same, and into the responsibility of the contractors who have undertaken to build said State House, and the sufficiency of their bonds, and to ascertain whether, under said contract, said new State House can be built within the amount provided by law for the erection of said building; and for these purposes said committee shall have power to send for persons and papers, to examine witnesses under oath, to hear testimony and receive and publish depositions, and shall have leave to report at any time, by bill or otherwise,” have had the same under consideration, and would respectfully report as follows:

That the committee invited any and all persons having cause of complaint of any action upon the part of the Board of State House Commissioners to present the same in the form of formal charges; that in response thereto, charges and specifications were presented, which, as finally amended, are as follows:

"The undersigned, Thomas J. Vater, a *bona fide* resident of the State of Indiana, complains, charges and avers against James D. Williams, John Love, Thomas A. Morris, I. D. G. Nelson and John Collett, constituting the Board of State House Commissioners, and complaining, has to say :

"*First.* That the said Board of Commissioners were duly appointed and qualified to act under and by virtue of an act of the Legislature of the State of Indiana providing for the organization of such board, and defining its powers and duties. That in pursuance of the authority vested in them by said act, they proceeded to perform the duties imposed thereby, advertised for proposals for the erection of a suitable State House building, according to certain general instructions, which they furnished those persons who signified their intention to compete for said plans and specifications. That, in order, as was alleged, to prevent any undue influence, and secure perfect fairness in competition, all the authors of plans submitted were kept secret from said board, the plans being designated by some motto. That there were twenty-four different plans submitted to said board for the erection of said building. That one of said plans was submitted by Edwin May, Esq., of the city of Indianapolis, county of Marion, State of Indiana. That said May is personally known to several of the members of said board. That a number of days before the time the award was made, and while there was a pretended secrecy in regard to the names of the competing architects, the names of all and the plans submitted by each, appeared in the public prints of the day, and were read by said commissioners, or some of them. That the plans submitted by said Architect May were imperfect and insufficient in essential and material particulars. That the walls and partitions were insecure and of insufficient strength; that the building was ungainly in appearance, and not 'in keeping with the dignity of the State;' that, in respect to permanence and convenience, it was imperfect, and not in accordance with the requirements of the commissioners, as set forth in their instructions, furnished each of the competing architects; that said commissioners, well knowing which of said plans had been submitted by Edwin May, and desiring to favor him and advance his interests by the acceptance and adoption thereof, and well knowing that the plan submitted by said May was, in essential particulars, deficient and imperfect, ordered and required the expert architect, J. K. Wilson, Esq., to so change the said plans that they would be acceptable and suitable for the purposes for which they were intended; that in compliance with said order from said board, said expert architect took the said May plans and altered them in essential and material particulars, to-wit: The building was made more solid and impressive in the exterior. The form and character of the steps leading up to the entrance were so changed as to obtain security and strength. The sub-basement was dispensed with, the whole structure lifted some fifteen or twenty feet above its original position. The corridors were changed in size, and columns introduced, forming colonnades. The dome was so extended as to make it secure. Skylights were added, so as to admit light into the halls and corridors. The foundation, interior and exterior walls were increased in thickness, to give the necessary strength. That the fire-proofing of the floors was changed from the fire-proof or terra cotta block to brick arches between the iron beams. That the strength of the iron beams was increased in order to render them more secure. That other and various material changes were made in said plans, to so perfect them that they were suitable and proper for guides in the construction of said building, in the estimation of said board, which can not be specifically alleged without a comparison of the first original plans and those as finally adopted. That

after said changes and alterations were made, so that in the estimation of said board the plans were suitable, the said May received the award. The complainant charges and avers that said original plan, as submitted, was imperfect and insufficient, and in some parts so insecure as to be dangerous, necessitating the changes above alluded to in order to make it sufficiently secure.

"Second. That, as evidence of the bad faith and unfairness of said board, it is charged by the complainant, that one Charles Eppinghausen submitted to said board, by letter, a proposition that, if in his plan there were any defects, he would bear the expense of any changes which the board might desire made therein, which proposal the said board rejected, with the statement that they had no power to make any changes in the plans submitted by competing architects.

"Third. As further evidence of the bad faith and unfairness of said board in relation to said competition, it is charged by said complainant that said board wholly failed to have proper estimates made of the various plans and specifications submitted.

"Fourth. That a careful estimate by experts of the present plans adopted by said board, will show that they are insufficient and imperfect. That the estimates are so indefinitely made that there is latitude for great and unjust speculation by the use of improper and insufficient materials.

"Fifth. That, as further evidence of their bad faith and unfairness, it is charged by complainant that, disregarding their legally imposed duty, they failed to submit the plans for critical examination to the experts appointed for that purpose, but relied wholly upon the opinion and judgment of one of said experts, to-wit: J. K. Wilson, and ignoring the services of the expert builder and engineer, who were ready at any time to render such service upon request.

"Sixth. That, in order to perfect the said May plan and render it passable, the said expert architect, Wilson, adopted from the various plans submitted such essential and minor points of merit as were necessary to complete and perfect the plan aforesaid.

"Seventh. That said May plan was, before its adoption, and is now, inferior, in every particular of permanence, elegance and convenience, to many of those submitted to the board, and does not correspond, in material points, to the requirements of law, which can be shown by reference thereto.

"Eighth. That the complainant believes that one of the commissioners, to-wit, John Love, has charged and received pay on sworn vouchers for services never rendered—believed to be sometime between the 1st day of May and the 1st day of June, A. D. 1878.

"Ninth. That said board, further disregarding their duty, and to suppress competition, reserved certain portions of the necessary work, alleging that they intended at some subsequent time to let the said work in a separate contract, and instructing competitors to allow certain sums in their estimates for this reserved portion of the work of construction. The board instructed contractors to allow \$50,000 for steam-heating apparatus, claiming that work reserved for competition. That one of the builders, to-wit, the Walworth Manufacturing Company, notwithstanding said instructions, proposed to do said work for \$45,000, and said board awarded them the contract. That if said board had not instructed competitors that said items were not in the list of competition, there would have been lower bids for the same work.

"*Tenth*, That said complainant charges that, by other and various means and pretenses, the said board operated in the interest of said May, having predetermined that his plan should be adopted. That by such unjust and unfair preference and suppression of competition the said board has acted against the best interests of the State; wherefore the complainant says that all of such matters should be fully investigated, and so he prays.

"THOMAS J. VATER."

That the following answer, under oath thereto, was filed in behalf of the Board of State House Commissioners, viz :

"Come now said respondents, to-wit, James D. Williams, John Love, Thomas A. Morris, Isaac D. G. Nelson and John Collett, the members of said Board of State House Commissioners, and for answer in their behalf herein to the charges preferred, say :

"That they deny, severally and specifically, all charges of corruption, dishonesty, collusion, conspiracy, failure to perform duty, or improper discharge of duty on their part, whether directly made or charged by indirection or implication; and further and more particularly answering the said several allegations in said charges and specifications, if such they be, in their order, they say that they admit that they were appointed and qualified, and entered upon the discharge of their duties, as is alleged; that there were twenty-four different plans submitted to said board, in response to advertisements made therefor; that they were designated severally by different mottoes; that the purpose thereof was that the authors of the said several plans should be unknown to the members of the board; that the sealed letters containing the names of the authors of the different plans, transmitted with the plans, for the purpose of subsequent identification, were placed in the possession, and entrusted to the custody, of the secretary, a sworn officer of the board, unopened; that the contents of such letters were never inspected nor seen by the board, nor any member thereof, until after the plan chosen had been formally adopted, nor had they any knowledge thereof. They further say that, before the adoption of a plan, publications were made in the newspapers purporting to give the names of some of the authors of the different plans, but the respondents had no knowledge of the correctness or incorrectness thereof until after such adoption, nor had they any means of obtaining such knowledge, nor did they, or either of them, ever desire or attempt to obtain such knowledge. The plan finally adopted was found to have been submitted by Edwin May. It was so adopted by the board because, after the most patient and exhaustive examination of all the plans submitted, in the opinion of the board, it was found to be the most meritorious of such plans, and that the building could be 'constructed within the limit of \$2,000,000, be suitable in respect to permanence and convenience, adapted to all the purposes and aims of a State House building, and in keeping with the dignity of the State.' And they deny that said plan is either imperfect or insufficient in any essential particular. They further say, that said plan was so adopted as aforesaid, honestly and fairly, and without any desire or intention to favor Edwin May or any other person.

"Further answering, they say that they did not order nor direct the said expert, J. K. Wilson, to change or alter the said plan submitted by said May, and he never did so alter or change such plan. They say, however, that after determining that said plan was the most meritorious, and should be adopted, they did deem certain minor changes—not affecting the general design—in the interest of economy, con-

venience and comfort, and for a better distribution of material wherever found excessive should be made; and before contracting with said May he was required to give his consent to such changes then or thereafter to be made. They further say that none of said changes were adopted, borrowed or taken from any competing plan.

“And further answering the several averments in said second specification, they say that said Eppinghausen, together with other competing architects, did offer to submit to changes in their plans, but these respondents aver that this was before a choice had been made of any plan, and they had no right, authority nor power to ask for nor accept any changes until after the most meritorious plan of those submitted had been chosen—for to have adopted such course would have been practically to reopen the competition for plans.

“And further answering the matters contained in said third specification, respondents say that they deny all the averments therein contained; and on the contrary thereof say that they did cause such estimates of the plans and specifications submitted to be made as, in their opinion, were proper, necessary and in accordance with law.

“And in answer, more particularly to said fourth specification, they deny all the allegations therein contained, and say that the same will fully appear to be unfounded in fact by an examination of said plans and specifications.

“And further answering said fifth specification, respondents say that they deny all the allegations therein made; and say that on the contrary thereof all said plans and specifications were submitted to, and in the possession of, all of said experts for more than two months.

“As to said sixth specification, they deny all the allegations therein contained, and for more specific answer thereto refer to the matters hereinbefore contained and set forth.

“And for further answer to said seventh specification, which avers that said May plan was, and is, inferior to other plans submitted to the board, respondents say that they deny the same; that the determination of that question was, by law, submitted to them as a board; that they have acted upon and determined the same honestly and fairly in their official capacity, and have since had no cause to change their views, nor do they believe that any facts exist that would cause them to change such determination.

“And said respondent, John Love, answering for himself the separate charge made against him contained in said eighth specification, says that he never at any time, nor in any manner, directly nor indirectly, either charged or received any pay upon any voucher or otherwise for services not rendered, or to which he was not justly and legally entitled. And each of said respondents, separately for himself, says that he believes said answer above made by said Love to be true.

“And said respondents, further answering said ninth specification, say that they admit that, in the letting of the contract for building, they reserved a portion, to-wit, the steam-heating apparatus, etc., for separate contract; that this course was pursued at the suggestion of bidders, and was believed to be the best course to be pursued; and in this connection they refer to their recent report to the Governor, which states the facts in this behalf truly; and they deny any disregard of duty, or any desire or attempt to suppress competition, or that they did so suppress it, and any and all improper action charged upon them in said specification.

"And as to the general, vague and indefinite matters charged in the tenth specification, these respondents deny specifically each and every one therein made.

"And said respondents further say, with reference to the charges made in this proceeding separately against Edwin May and J. K. Wilson, which have been submitted to them, that these respondents have not, nor has either of them, any knowledge, information or belief of the truth of any of said charges; but they do deny that either of said persons has, with the knowledge, procurement, connivance or consent of these respondents, or either of them, been guilty of any corrupt, dishonest or improper conduct in this matter.

"And these respondents pray that this honorable committee shall so conduct this investigation as that it shall be speedy, full and complete, and the real facts and truth in the premises be made apparent; this they ask in justice to themselves and in vindication of their conduct and character.

"JAMES D. WILLIAMS.

"JOHN LOVE.

"T. A. MORRIS.

"JOHN COLLETT.

"Subscribed, and sworn to, before me, a notary public, within and for said county and State, this 12th day of February, 1879.

"WILL A. HUGHES,

"Notary Public."

Your committee then proceeded to hear evidence in support of the charges, and in answer thereto—both the complainant and the respondents being represented by counsel. A large number of witnesses were examined, and a mass of documentary evidence introduced, and the plans, drawings, specifications and estimates for the new State House carefully examined, together with the contracts and bonds of the architect, builder and contractors, and the whole action of the Board of State House Commissioners from its organization up to the present time inquired into and reviewed by the committee. All papers, documents and records in the possession of the board were submitted for examination, both to the complainant and the committee. The undersigned would further report that they find, from the evidence and all the facts disclosed by their examination, that not one of the charges preferred against the Board of State House Commissioners, or any of the members thereof, has been sustained, or is true in point of fact; that no corrup-

tion, dishonesty, collusion, conspiracy, failure to perform duty, or improper discharge of duty upon the part of the board, or any member thereof, is shown or found to exist. That the Board of Commissioners, after calling to their aid an expert architect, an expert engineer and an expert builder, proceeded according to the law to carefully, critically and patiently examine all the plans—twenty-four in number—that were submitted to them for competition, together with the specifications and estimates accompanying the same; that such examination occupied a period of over three months; that the board, by means of such examination, by them personally made, aided by the experts, finally, on the 22d day of March, 1878, adopted the plan designated “*Lucidus Ordo*,” found to have been submitted by Edwin May, architect, of Indianapolis, as the most meritorious of all the plans submitted. We further find and report that the building contemplated in said plan, when so adopted, could be constructed within the limit of two millions of dollars, was suitable in respect to permanence and convenience, adapted to all the purposes and aims of a State House building, and in keeping with the dignity of the State, and that the materials in the construction thereof were in kind, quality and quantity such as to insure stability and permanence, and said building was, in all respects, such as contemplated by the law; that said plan was so chosen and adopted by the board honestly, fairly, in good faith, and without any purpose to favor said May, or any other person, but having in view only the interests of the State and a faithful discharge of official duty. We further find and report that, after the adoption of said plan as aforesaid, the board, upon further examination and investigation, found that, while said plan was the most meritorious and in all essential respects sufficient, that certain minor changes, not affecting the general design of the building, in the interest of economy, convenience and comfort could be made, that they, with the consent of the architect, directed the same to be made; that such changes consisted principally in removing from rooms and corridors a number of water-closets, and grouping the same in other parts of the building; in economizing space occupied by corridors, not needed after the change of said closets; in dispensing with certain stairways; in removing a portico from the Washington street to the Tennessee street front, and in dispensing with the sub-basement and applying the cost thereof to increasing the height of the building above the surface, and in certain minor changes in walls, rooms, etc., rendered necessary by these improvements. And we further find and report that these changes did not affect the general design or character of the building; that they were in the interest of economy, comfort and convenience; that they resulted in the saving to the State of a large sum of money, to-wit, the net sum of over \$50,000, and that we approve all said changes.

We further report that we have carefully examined the contract and bonds of the architect, the contract and bonds of Messrs. Kanmacher & Denig, the builders, and the contract and bond of the Wolworth Manufacturing Company, for steam-heating and ventilation, and that we find them all in proper form, carefully guarded and legally sufficient.

The plans and specifications, which are referred to and made a part of these contracts, are carefully drawn, full, complete and entirely up to the requirements of the law, and provide for every possible contingency. In the case of the architect and builders, any needed improvements directed by the Legislature or the board hereafter to be made are provided for, and will not affect the validity of the bonds or contracts; but in no case can the limit of cost provided by law be exceeded.

By the contract for heating and ventilating, the temperature of seventy degrees, Fahrenheit, is to be maintained in the coldest weather, and an entire change of air in every room of the building is required to take place at least once in every forty minutes. A test of its practical operation is to take place for one year before finally accepting the work.

We have also examined the records, books and accounts of the board, and find them well kept and properly systematized.

We further find that since the letting of the contract, under the direction of the board, the necessary excavations for the new State House have been made, and the concrete for the foundations been mainly put in, together with a portion of the footing-stones. The entire estimate for concrete was about \$26,000. Concrete to about \$25,000 has been put in. Cement for this was procured upon terms very advantageous to the State. In making the excavations an excellent foundation of sand and gravel was found. Besides this, sufficient sand has been obtained from these excavations, for use in the building, to more than pay the expense of the excavating.

The board has carefully inspected the products of the different stone quarries of the State, in their natural beds, and found a supply adequate, and the quality excellent—not surpassed, if equaled, west of the Alleghenies—and so located at different places, and upon different lines of railroad, that no monopoly thereof can be maintained, thus obtaining the sharpest competition.

We further find and report that a full examination of all the facts involved has shown that each and every member of the board has acted, at all times, in the discharge of his high official trust, with the utmost fidelity and integrity, and with the sole object of doing his whole duty, fearlessly and faithfully, subserving the best interests of the people and the State. They come out of this ordeal with not even so much as “the smell of fire upon their garments.” No motive for improper conduct has been even charged, much less shown to exist. The full facts disclosed do not even furnish a basis for the slightest suspicion for misconduct or failure to perform duty upon their part. In short, their whole action in the premises has been such as, from the well-established character for integrity and high-standing of each member of the board, the people of Indiana had the right to confidently expect. It is to be regretted that men whose lives and public service have fairly earned for them the elevated position which these commissioners occupy in the estimation of the public, should ever be formally assailed, with no better foundation for such assault than mere rumors and charges, without basis of truth, set afloat by disappointed and irresponsible persons for personal and selfish ends, while at the same time, and by the same means, the progress of a great and much-needed public enterprise may be retarded and its success hazarded.

We further find and report, from the facts developed by this investigation and the evidence therein heard, the contemplated State House, as now contracted, is sufficient in every material respect, complies with the requirements of the law, and can, without doubt, be built for less than two millions of dollars, if the work shall be prosecuted with reasonable promptness and alacrity.

All of which is respectfully submitted.

CYRUS B. TULLEY.
CHARLES O. LEHMAN.

EXHIBIT B.

REPORT

OF THE

SUPERVISING ARCHITECT

OF THE NEW STATE HOUSE.

INDIANAPOLIS, December 1, 1880.

To the Honorable Board of State House Commissioners :

GENTLEMEN :—Permit me, with this my first report of the progress of the work of the new State House, also to submit a programme of the progress in the construction to be expected in the next two years, 1881 and 1882.

Upon entering on my duties as Supervising Architect, the foundation of the whole building, including that of the dome, was already completed; my predecessor had examined the same with exception of that for the dome. The latter, the superintendent and myself examined in the most careful manner and found it perfect, so that the further construction of the building could be continued without delay. Thereupon, during the past year the outer walls and the inner brick walls were extended to the height of the first story floor beams. The foundation for the dome, the dome piers in the basement, the foundation for the treasury vault, as also the inner corridor walls constructed from flatrock, are partly brought up to the same height.

All the material necessary for the completion of these several parts is ready on the ground to be put in its place as soon as the state of the weather permits.

The wrought and cast iron, such as beams, girders and plates, necessary for the construction of the first-story floor has also been delivered on the ground.

Therefore the basement story up to the level of the first story can be finished in a very short time, when the building of the first story may be commenced.

Under such favorable aspect for the continuation of the work next season, it seems to be no difficult task to complete the first story and part of the second of

the building in the year 1881. A considerable part of the necessary material for the first story is already on the ground to be worked up during the winter, and more has been contracted for to be delivered when needed.

It will be proper here to mention, that the contractors, Messrs. Kanmacher & Denig, have made extensive preparations at their quarry at Spencer, Owen county, as well as at the State House yard, so that the work at the building in the spring will suffer no delay. It may also be safely calculated that their brickyard at Centerton, Morgan county (of a capacity of 50,000 to 60,000 bricks per day), will furnish most of the bricks needed in the coming season.

If the building, as proposed, shall be partly extended up to the third story during the year 1881, it may in the year 1882 be extended to the main cornice in all its parts.

For the purpose of erecting the building in the next two years up to the main cornice, the following sums will be needed, as the estimates below given will show, viz :

Expenditures for 1881.

Expenditures in Schedule No. 1, masonwork.....	\$26,257 93
Expenditures in Schedule No. 2, cut stonework.....	250,569 51
Expenditures in Schedule No. 3, brickwork.....	72,101 87
Expenditures in Schedule No. 4, ironwork.....	18,529 00
Expenditures in Schedule No. 6, carpenterwork.....	25,640 00
Expenditures in Schedule No. 11, inside finish.....	21,226 00
Total for 1881.....	<u>\$414,324 31</u>

Expenditures for 1882.

Expenditures in Schedule No. 2, cut stone work.....	\$238,914 60
Expenditures in Schedule No. 3, brickwork.....	43,768 00
Expenditures in Schedule No. 4, ironwork.....	39,220 00
Expenditures in Schedule No. 11, inside finish.....	8,446 00
Total for 1882.....	<u>330,348 60</u>

Expenditures on Preparations for the Year 1883.

Expenditures in Schedule No. 2, cut stonework.....	\$20,000 00
Expenditures in Schedule No. 4, ironwork	98,540 00
Expenditures in Schedule No. 5, copperwork and slate.....	13,000 00
Total	<u>131,540 00</u>
Total amount required for 1881 and 1882.....	<u>\$876,212 91</u>

Up to this time the work on the building has been strictly done in accordance with the plans and specifications in every respect, and I think to be justified in saying, that the building so far in all its parts has been constructed in the most solid manner, and that the contractors have conscientiously fulfilled their obligations.

In course of time different alterations have been made, in accordance with instructions from your honorable board, partly in regard to a more perfect construction and partly in relation to the artistical appearance of the building.

The alterations to which I here allude, were so proper and in every way so desirable, that the increased expenses of a monumental structure, as the State House of the State of Indiana, should not be taken in consideration, this the more so, as the cost of all the alterations are comparatively small, and the total cost of the building will thereby not be increased above the sum of \$2,000,000, the maximum fixed by law.

During the term of my predecessor an alteration of the outside walls from the grade line to the first story was made. These walls originally to be constructed from oolitic limestone, ashlar and flatrock backing, were built out of solid oolitic limestone through the entire width. It may here be remarked, that the construction of the entire walls in the manner described was needed, not only to preserve the monumental character of the building, but also to add durability and stability to it. Further alterations were made in accordance with carefully prepared plans and specifications, in managing the architectural parts on the Washington street front, for the purpose of bringing them in better harmony with those on Tennessee street front, and for the further purpose of bringing out the character of the pavilions, which had not been considered in the original plan of the Washington street front.

By far the most important improvement as well for the construction as the ornamentation of the interior of the building, is the substitution of marble and granite for the interior finish of the large memorial corridor and the dome, in place of oolitic limestone and iron for the same purpose as originally designed.

Hurricane Island, Maine, granite, has been selected for the plinth, oolitic limestone for the capital and base, and Sutherland Falls, Vermont, marble, for all the columns, piers and pilasters in the corridors of the first, second and third story.

The eight columns reaching through two stories in the interior of the dome, whose shafts are to be constructed of polished red Jonesboro, Maine, granite, instead of oolitic limestone, will certainly contribute greatly to the appearance of the interior of the dome.

The selection of proper material is one of the most important factors in the construction of a public building, the most important building of the State, which, according to the wording of the law shall be in keeping with the dignity of the State. Very frequently great mistakes are made in this respect, however the future will prove that the selection of the best and most suitable material is for the interest of the building. Time will also prove that a building constructed of the best and most solid material will be the cheapest for the State in the end—for the frequent repairs necessitated by the use of poor material are not necessary where marble and granite are used.

It may be proper here to state that in the selection of the material and its proper application, the new State House of Indiana will favorably compare with the capitol of any State in the Union.

Several other minor alterations, while as the building progressed were considered desirable, (mostly of constructive value,) were made without materially increasing the cost of the building.

In conclusion, allow me to state that the relations between the officers entrusted with the erection of this great building, were the most harmonious in their official intercourse, which is necessary to make their efforts for success effective.

Very respectfully submitted,

ADOLF SCHERRER,

Supervising Architect.

EXHIBIT C.

SUPERINTENDENT'S REPORT.

To Board of State House Commissioners:

GENTLEMEN:—In presenting the third annual report of progress upon the new State House it may not be inappropriate to briefly re-state (for purposes of comparison) the status of the work January 1, 1880.

At that day the excavations, the concrete and the footing courses of all the walls were finished. Outside walls proper built an average of five feet high around the whole building, and the interior stone walls an average of three feet four inches high. The materials on hand consisted of stone (dressed) sufficient to raise the outside walls two feet six inches, and the inside wall five feet six inches. There were four hundred thousand bricks on the premises, and the iron beams for the whole of the first floor; nine hundred and thirty feet of granite base course and stone footings for first course, part of second and part of third courses of the dome foundations.

COMMENCEMENT OF WORK, 1880.

One car load only of White river stone had been received prior to the 1st of January, but immediately thereafter the quantity was increased, and on the 7th of that month the work of cutting was commenced with ten workmen. The number of men was increased or diminished, according to the supply of stone on hand, from the number named, to about sixty-five cutters, independent of the foremen, setters, drillers, rubbers and other laborers.

COMMENCEMENT OF OUT DOOR OPERATIONS.

The commissioners having consented thereto, the walls were uncovered, and setting stone begun on the 15th of March.

A rigid examination of the work was made in every part of the building, but no evidences were found of any injury to any of the walls, or the mortar joints, by reason of the frost, except in a few spots a thin scale of mortar was frozen in the latest work, but nowhere over an inch in depth. The concrete of the dome did not show any scaling of surface anywhere.

A very thorough examination of the concrete of the dome was made by Mr. Scherrer, the supervising architect, and myself, before commencing the laying of footings. Channels, about ten inches by twelve inches, were cut in a number of

places in the sides of the mass, from the top surface down through the bottom layer. These channels were so located as to show a portion of nearly every day's work during its entire construction. Every part was found solid and perfect, each layer adhering to those above and below. The channels were nearly as square and straight as if cut in solid stone, the broken stones sustaining the force necessary to cut them through without being detached from the cement.

SETTING FOOTINGS AND BASE OF DOME.

This work was commenced on the 30th of March, and the footings finished the last of June. Setting on dome base began the last week in June, and has progressed to the fourth course, amounting to nearly 15,000 cubic feet on base. The dome footings amounted to over 49,393 cubic feet. The outside walls proper were completed December 1, amounting to about 42,000 feet for the current year. The inside walls (stone) have reached an average height of eleven feet three inches, leaving five feet eight inches to complete, ready for floor-beams.

GRANITE BASE COURSE.

All the granite necessary to complete the course around the building was received in January, except that portion needed for the south end, which arrived in May. The first piece of granite was set July 27, and the whole course amounting to 1,960 feet, was completed October 29.

SETTING CUT STONE IN OUTSIDE WALLS.

The first block of White river dressed stone, for the basement story, was set August 19, and this work has progressed with reasonable speed, and on closing for the season leaves unfinished about 1,000 feet, superficial, of the rock-faced courses and one-half of the water table. The stone needed to complete this part of the building is cut ready for setting. Due attention has been paid, during the whole year, to excluding all imperfect and unsound stone from this and all other parts of the building. No piecing or patching has been permitted, and the filling of cavities with composition or cement has not been allowed.

Of the White river stone, the larger part was brought from the contractors' quarries near Spencer, Indiana, but, in order to hasten the work, some eighty car loads, amounting to about 11,000 feet, were brought from the Ellettsville and Dark Hollow quarries, all being of same quality and formation and of nearly the same color as the Spencer stone.

The delivery of stone for the ashlar, cornice, etc., of first story commenced in June, and to this date there has been received over 10,500 feet, and 1,400 feet have been cut. Of the surplus and undersized stone delivered for the basement story, a considerable amount remains that can be utilised in the first story, increasing thereby the quantity of rough material that can be cut during the winter ready for setting in the spring.

One thousand eight hundred cubic feet of Dark Hollow stone have been received for the capitals of the columns and pilasters of the first story corridors, which may be cut this winter, if deemed advisable by the commissioners and architect.

BRICK WORK.

All the bricks used (except the four hundred thousand bought last year) were made by the contractors, at yards of their own, located near Centreton, about twenty-two miles from this city. The first car load was delivered June 12, the whole number amounting to three hundred and ninety-five cars. Brick laying was commenced June 28, with four trowels, the force being gradually increased to twenty trowels. The walls were completed ready for the floor beams of the first story on November 1, at which time the contractors were enabled to dismiss their whole force, excepting four men, who were retained to finish out a few points where the stone piers were not up to the full height. No bricks have been laid later than the 10th of November, prior to which date there had been no frost sufficient to injure the work. The walls built measure over three millions of bricks.

The majority of the bricks delivered on the grounds, and *all* of those laid in the walls, were of good quality. All soft and salmon bricks, and all excessively rough bricks, were carefully excluded from the work, and those brought to the grounds were condemned and stacked at the north end of the grounds, and marked by signs as "Condemned Brick."

Tests were made of the strength of average specimens of several of the different grades of bricks offered for the work, which gave very interesting and surprising results, as set forth in the accompanying table marked No. 1.

The mortar used was, as required by the specifications, composed of two parts of sand and one part of cement.

All the sand received this year has been unusually clean and most of it sharp, and sufficiently coarse-grained to make good mortar. All the cement used has been up to the required standard for strength, and was required to be slow enough in setting to be used by the workmen without retempering on the mortar boards more than one time.

During the warm weather each section of the walls, when finished scaffold high, was thoroughly drenched with water from two to four times while still fresh and new, in order that the properties of the mortar might be fully developed.

All scaffolding has been done upon trestles, independent of the walls.

CEMENT.

All the cement received has been tested as heretofore, and none allowed to be used in either the stone or brickwork until proved to be of the required strength. During the year 5,400 barrels have been received, of which 3,100 barrels were Indiana cement, 200 barrels Rock Haven and 2,100 barrels Hudson River Rosendale cement. One car load only of cement (Indiana), and several small lots of Rosendale and other brands purchased in this city were rejected and sent away from the lot.

Ten cars of cement (100 barrels each) were returned by the contractors to the manufacturers, being too quick setting for the brickwork and in excess of the quantity needed for the stonework.

The series of tests of various brands of cements commenced last year, have been continued during the present as far as time and opportunity permitted. The results, combined with those obtained last year, have been arranged in the accompanying table, No. 2, and diagram.

IRON BEAMS AND GIRDERS.

The floor beams, trimmers and girders for second floor have all been received ; and of those for third floor twenty-nine car loads have been received, and the remainder are reported en route.

Tests have been made of the quality of the iron. Pieces cut at random from beams on the ground, and worked under the hammer at the forge, show the material to be good and all that is required.

The beams for the first floor can be placed on the walls this winter, and on the first return of moderate weather in the spring can be set permanently, ready for the commencement of the brick work.

PREPARATIONS FOR THE WINTER.

The trenches and vacant spaces outside of the walls around the whole building have been filled up level with the base course, and so graded as to afford a good drainage outwards from the walls. The cellars and other spaces within the walls remain as they were last year, viz: Filled to top of footings and lowest in centre of rooms.

The brick walls have been covered with boards, to protect them from snow and rain.

PREPARATIONS FOR THE COMING YEAR.

There are now upon the grounds about one hundred and thirty-five thousand bricks, and a sufficient amount stone (cut) to finish the dome base and the interior stone walls within two courses of the floor beams ; White river stone (cut) sufficient to complete the basement story, and rough stone for, say, one-fourth of the first story and for all of the caps for interior columns and pilasters. In regard to the amount of materials at the quarry and brick yard, I will submit the following copy of a reply received from the contractors, to a note of inquiry addressed them on this subject :

OFFICE OF HOWARD & DENIG, STATE HOUSE CONTRACTORS.

INDIANAPOLIS, Nov. 23, 1880.

F. W. Vogdes, Esq.:

DEAR SIR:—In reply to your communication as to our arrangements for next season's work, we have to say that we have ready for use now one million bricks, and have capacity for making 60,000 per day, having three machines that will turn out 20,000 per day each. We have now on the ground the larger part of the stone for the ashlar for the first story. We can deliver in two months from our own mill and quarry all the ashlar needed to complete the first story. We have exposed and partially quarried all the stone needed to complete the first story, including the dome.

With our present facilities, five steam derricks, three steam channelers, and our steam stone saw mill of four large gangs, we will be able to furnish all the stone needed during the coming season. We are having built for our use here, three large stone planers, and with our steam rubbing bed and possibly two gangs of saws, we hope to complete during next season all, or nearly all the next two stories of the building.

Respectfully submitted,

HOWARD & DENIG.

PRESENT STATUS OF THE WORK.

The present condition of the building is as follows, viz: The excavations, concrete, footing courses of all the walls and dome, outside foundation walls, granite base course, and basement brickwork are finished complete. Cut stonework of outside basement walls all cut, excepting 1,000 feet, and setting of same finished within five per cent. Base of dome one-third finished; interior stone walls two-thirds finished. Of materials, there are the iron floor-beams, girders, etc., for three stories, and the brick and stone, named in the preceding clause.

Believing that the workmanship and the materials used thus far are fairly up to the required standard, and assuring the board that I have endeavored conscientiously to carry out their orders and directions, and those of the supervising architect, and to enforce the requirements of the drawings and specifications,

I am, with much respect, yours etc.,

F. W. VOGDES,

Superintendent.

Indianapolis, Ind., December 31, 1880.

TABLE No. I.

TESTS OF STRENGTHS OF BRICKS USED IN BASEMENT STORY OF
INDIANA STATE HOUSE.

NOTE.—The testing was conducted in the presence of two of the Board of State House Commissioners, the Supervising Architect, the Superintendent, and one of the contractors and their engineer. The machine was one of the hydraulic wheel presses used at the Brightwood shops of the C., C. C. & I. R. R., for forcing car wheels upon the axles, which registered the pressures up to one hundred tons. The bricks were placed against a cast iron plate one and five-sixteenths of an inch thick, covering the axle seat of the standard, and the pressure applied upon an oak block about eight by ten by twelve inches. The specimens had been rubbed to parallel faces.

Number of Specimen.	Quality or Designation of Grade.	First Sign of Yielding.	Greatest Pressure per Brick.	Result and Remarks.
1	Pale Red (not "Salmon")..	40 tons.....	Crushed.
2	"Pale Front"	70 tons.....	One end = one-half—crushed.
* 3	"Red Front"	55 tons.....	80 tons.....	One side and end—say one-fourth crushed.
4	"Dark Red".....	85 tons.....	100 tons.....	Unbroken portion sustained 100 tons when the back plate broke.
5	"Paving Brick"	95 tons.....	95 tons.....	And back plate broke.
A, or 6	"Paving Brick"	95 tons.....	95 tons.....	One end broken.
E, or 7	"Paving Brick".....	97½ tons...	Uninjured.

* Lowest grade admitted for use upon the building.

NOTE.—Greatest load on brick in the building, is 90 lbs. per square inch of surface.

Greatest load on surface on one brick is 2,880 lbs., or 1.44 tons.

NOTE.—The capacity of the crushing machine is 1,500 pounds, and quantities followed by sign + (plus) show that the whole force of the machine was applied, without injuring the specimen.

EXHIBIT D.

ANNUAL REPORT

OF THE

SECRETARY

OF THE

Board of State House Commissioners

FOR THE YEAR 1880.

TO THE GOVERNOR.

INDIANAPOLIS, INDIANA, DECEMBER 31, 1880.

INDIANAPOLIS:

CARLON & HOLLENBECK, PRINTERS AND BINDERS.
1880.

THE STATE OF INDIANA,
GOVERNOR'S OFFICE.

Received, December 10, 1880, and referred to the Auditor of State for verification. Returned by him, certified as follows :

OFFICE OF AUDITOR OF STATE,
December 15, 1880.

The statements in the following report, as to amounts paid out of the State Treasury for the New State House are correct.

M. D. MANSON,
Auditor State.

Examined by the Governor and transmitted to the Secretary of State, to be filed and preserved in his office, and published as ordered by the Commissioners of the Public Printing.

SAMUEL R. DOWNEY,
Secretary.

Filed in my office December 31, 1880.

J. G. SHANKLIN,
Secretary of State.

SECRETARY'S REPORT.

To His Excellency, ISAAC P. GRAY,

Governor of Indiana:

SIR—Herewith I present the annual report for the year 1880, agreeably to section seven of the State House law, requiring a “yearly statement of the cost of building, and a complete list of vouchers, and for what purpose and to whom paid,” to which I have added a statement of our account with the Treasurer of State.

All of which is respectfully submitted,

JOHN M. GODOWN,

Indianapolis, Ind., December 31, 1880.

Secretary.

REPORT OF THE TRUSTEES

OF

INDIANA UNIVERSITY

OF THE

RECEIPTS AND EXPENDITURES

FOR THE

YEARS ENDING OCTOBER 31, 1879, AND OCTOBER 31, 1880.

TO THE GOVERNOR.

INDIANAPOLIS:

CARLON & HOLLENBECK, PRINTERS AND BINDERS.

1881.

THE STATE OF INDIANA,

GOVERNOR'S OFFICE.

Received December 8, 1880, and referred to the Auditor of State for a verification of the financial statements. Returned by him certified as follows:

OFFICE OF AUDITOR OF STATE,
Indianapolis, December 8, 1880.

I hereby certify that the officers of the State University, during the two fiscal years, 1879 and 1880, drew from the State Treasury, on account of semi-annual appropriation, \$33,000, and on account of College Fund interest, \$11,400.

M. D. MANSON,
Auditor of State.

Transmitted to the Secretary of State to be filed and preserved in his office, and published as ordered by the Commissioners of the Public Printing.

SAMUEL R. DOWNEY,
Secretary.

Filed in my office December 9, 1880.

J. G. SHANKLIN,
Secretary of State.

INDIANA UNIVERSITY,
BLOOMINGTON, IND., December 1, 1880.

His Excellency, ISAAC P. GRAY,

Governor of Indiana :

SIR—I have the honor to transmit herewith, in accordance with law, the annual reports of the Trustees of Indiana University for the fiscal years ending October 31, 1879, and October 31, 1880, showing the receipts and expenditures for said two years; also the report of the Committee on Finance, with estimates for the year ending October 31, 1881.

Very respectfully, your obedient servant,

ADDISON L. ROACHE,
President of the Board of Trustees of Indiana University.

REPORT OF COMMITTEE ON FINANCE.

Your Committee on Finance beg leave to report that they estimate the receipts of revenue for the year ending October 31, 1881, as follows:

Balance on hand Oct. 31, 1880.....	\$610 51
State appropriation.....	20,000 00
Interest on endowment fund.....	7,000 00
Interest on land fund	1,000 00
Contingent fees from students.....	1,600 00
Fees from use of library.....	400 00
Total estimated receipts.....	<u>\$30,610 51</u>

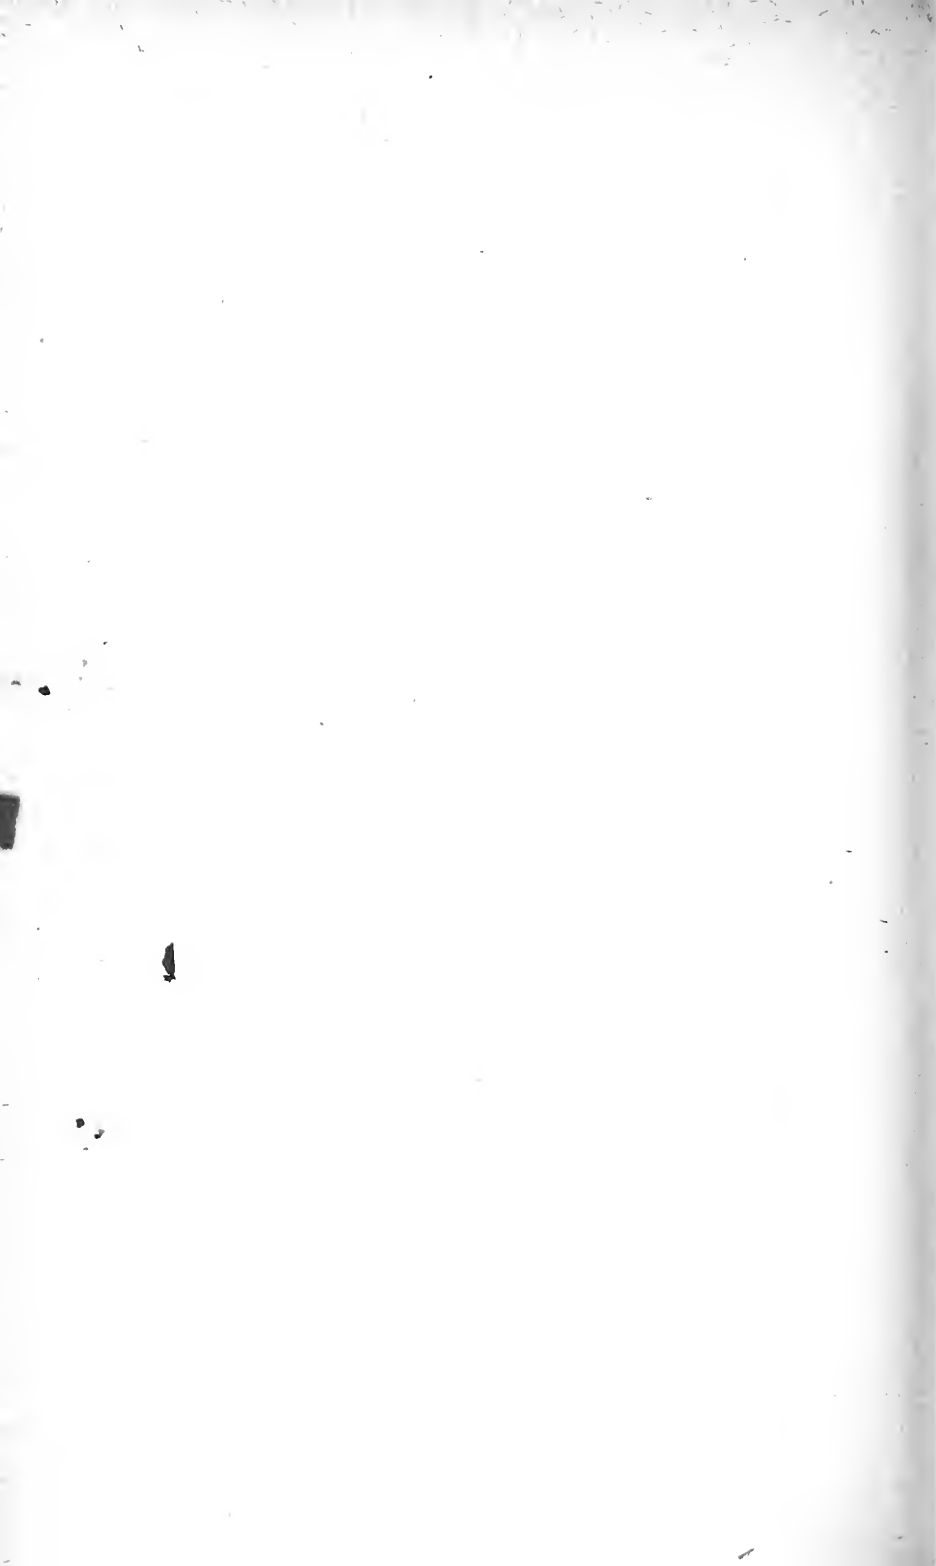

Your committee would recommend the adoption of the following resolution making appropriations for the fiscal year ending October 31, 1881, to-wit: *Resolved*, That there be appropriated from the general fund for the year ending October 31, 1881, as follows:

For salaries of President, professors and assistants.....	\$18,000 00
For purchase of books for library.....	3,500 00
For salary of officers of board and janitor.....	1,500 00
For salary of trustees.....	1,800 00
Lecture fund.....	800 00
Contingent expenses.....	2,000 00
Building and grounds.....	600 00
Department of natural philosophy.....	200 00
Department of chemistry.....	600 00
Total appropriations.....	<u>\$29,000 00</u>

On motion of D. D. Banta said report is approved.

All of which is respectfully submitted in behalf of the board of trustees of Indiana University.

WM. W. SPANGLER, *Secretary*.

Assistant Instructor.

The names of the Faculty are arranged in the order of seniority of appointment.

*Spring Term.

REPORT OF TRUSTEES.

To His Excellency, the Governor of Indiana:

The Board of Trustees of the State Normal School have the honor to submit to the Legislature, through you, their biennial report of the condition of the institution under their charge.

Accompanying this will be found a complete report from President Brown, showing the steady growth of the school from the time of its organization to the present, the sources whence the students come, where they find employment, the character and objects of the school, and its present needs. As there is a great misconception in the minds of many as to what the school really is, it is hoped that the report of the President of the Faculty will be carefully read.

Previous to 1878 the regular annual appropriation made by the Legislature for the incidental expenses of this institution was \$3,000. The last Legislature saw proper to reduce this appropriation to \$2,000. The Trustees, realizing that this sum was wholly inadequate to pay the necessary expense of heating the building and keeping it in repair, attempted to supply the deficiency by imposing a "janitor fee" of \$1 on each student. This has furnished us a revenue of \$800 for the past year, and yet, with the most rigid economy, we have been unable to materially lessen the amount overdrawn at the date of our last report. We find that the expense of repairs annually increases. The outside woodwork is rotting for want of paint. We submit that if \$3,000 was deemed necessary for incidental expenses when the building was comparatively new, more is needed now. We respectfully ask the Legis-

lature to increase the annual appropriation to the incidental fund of the school to \$3,000, and for the present year an additional sum of \$500 to cover the amount overdrawn at this date.

The steam heating apparatus, originally unsubstantial and imperfect, has been frequently repaired, and new devices for generating steam engrafted on it, but in zero weather it utterly fails to properly heat the building. We think the boilers now in use in the basement should be abandoned, and a boiler house, with smoke-stack, erected outside, to obviate any danger from an explosion. The boilers now in use are liable to break down at any moment, and certainly will not last during the remainder of the present winter. There is pressing necessity that the Legislature make provision for this emergency. For this purpose we respectfully ask of the Legislature an appropriation of \$5,000.

The Normal School building is beautifully located in a city distinguished for its handsomely ornamented enclosures. The valuable property of the State suffers by the contrast with its surroundings. The lot has been enclosed within the last two years by a plain but substantial wooden fence, but is entirely devoid of shrubbery or other ornamentation. Its condition is a reproach to the State of Indiana. We respectfully ask an appropriation of \$1,500 for this purpose.

In 1873 the late Chauncy Rose made a donation to the school of \$4,000 for the purpose of purchasing a Library for the use of the students. This fund was under the control of the President of the Faculty, and was judiciously invested in the purchase of books from time to time until a library of near eighteen hundred volumes has been secured. This was given by Mr. Rose at a time when the school was regarded as an experiment, and the Legislature was not disposed to be generous to it until its efficiency was demonstrated. Now that time has proved it to be so valuable an adjunct to our common school system, it is hoped the Legislature will cheerfully supplement Mr. Rose's gift with an annual appropriation of \$1,000 to supply such additions to the library as may be needed.

Attention is specially called to the remarks in the President's report as to the needs of the institution in regard to additions to the library, the want of a cabinet, and scientific apparatus. The school has never received a dollar from the State for any of these objects. His requests that these deficiencies be supplied is cordially endorsed by the Board of Trustees.

The report of Mr. Joseph Gilbert, the Secretary, will be found attached hereto, showing the itemized expenditures of the Board, during the past fiscal year, to which the closest scrutiny is invited.

MURRAY BRIGGS, .

Pres't Board of Trustees.

SECRETARY'S REPORT.

TERRE HAUTE, NOVEMBER 1, 1880.

*To the President of the Board of Trustees
of the Indiana State Normal School :*

According to your request, I herewith submit a statement of the receipts and expenditures for the fiscal year ending November 1, 1880.

SUMMARY.

Balance in hands of treasurer :		
Tuition fund		6,477 07
Building fund overdrawn . . .	1 95	
Incidental fund overdrawn . . .	430 27	
	<hr/>	\$432 22
		<hr/>
Total balance		\$6,044 85
		<hr/>

All of which is respectfully submitted.

JOSEPH GILBERT,

Secretary.

TREASURER'S REPORT.

The undersigned, Treasurer of the Board of Trustees of the Indiana State Normal School, submits the following report for the year ending November 1, 1880 :

By balance on hand November 1, 1879 . .	\$4,730 39
By amount received from school fund . . .	15,000 00
By amount received from appropriation of 1880	2,000 00
By amount received from janitor fees . . .	809 00
By amount received from Terre Haute pub- lic school	985 17
	<hr/> \$23,524 56

To amount paid on orders drawn by Secretary :

On tuition fund	\$13,927 96
On incidental fund	3,551 75
Balance	6,044 85
	<hr/> \$23,524 56

November 1, 1880, balance on hand	\$6,044 85
---	------------

Respectfully submitted,

W. R. McKEEN, *Treasurer.*

OFFICE OF AUDITOR OF STATE. }
JANUARY 3, 1881. }

The financial statements embraced in the foregoing report are correct so far as they relate to money drawn from the State Treasury.

M. D. MANSON,

Auditor State.

REPORT

OF THE

PRESIDENT OF THE FACULTY.

HON. MURRAY BRIGGS, *President Board of Trustees,*

Indiana State Normal School:

DEAR SIR—I herewith submit the following Report of the Indiana State Normal School for the year 1880, which is the Eleventh Annual Report made to your honorable body.

STATISTICS.

The number of pupils enrolled during the year was as follows :

Winter term	218
Spring term.	372
Fall term.	258
Total.	848
Average enrollment for each term	283

The enrollment for the corresponding terms of 1879, was as follows :

Winter term	198
Spring term.	385
Fall term	200
Total	783
Average enrollment per term	261

The number of different persons who have attended during the past year is 578

Of this number, 280 entered for the first time.

A record is kept of the vocation of the parents of all students who enter the school. From this record the following table has been compiled, which shows from what classes of people our students come. The table includes those only, who entered in 1878, 1879, and 1880 :

Vocation.	1878.	1879.	1880.
Number whose parents were farmers.. . . .	157	175	176
“ “ “ mechanics.	23	30	53
“ “ “ merchants.	11	18	9
“ “ “ professionals.	19	22	14
Children of day laborers, railroaders, etc.. . .	12	20	15
Number not reported	7	8	13
Totals.	229	273	280

The ratio of representatives from the different classes would not differ materially from that shown above, if the table were made to cover the entire period since the organization of the school.

RESIDENCE OF THE STUDENTS.

Every one of the ninety-two counties of the State has had one or more representatives in the Normal School since its organization. The following shows the number of different persons who have attended from each county :

Adams, 4; Allen, 6; Bartholomew, 10; Benton, 4; Blackford, 3; Boone, 32; Brown, 7; Carroll, 35; Cass, 29; Clark, 25; Clay, 44; Clinton, 11; Crawford, 2; Daviess, 13; Dearborn, 14; Decatur, 36; DeKalb, 11; Delaware, 14; Dubois, 9; Elkhart, 5; Fayette, 15; Floyd, 6; Fountain, 24; Franklin, 7; Fulton, 15; Gibson, 24; Grant, 14; Greene, 16; Hamilton, 21; Hancock, 21; Harrison, 8; Hendricks, 75; Henry, 12; Howard, 8; Huntington, 8; Jackson, 9; Jasper, 11; Jay, 7; Jefferson, 19; Jennings, 12; Johnson, 23; Knox, 44; Kosciusko, 26; Lagrange, 6; Lake, 2; Laporte, 8; Lawrence, 20; Madison, 14; Marion, 67; Marshall, 6; Martin, 6; Miami, 22; Monroe, 10; Montgomery, 29; Morgan, 41; Noble, 6; Newton, 2; Ohio, 3; Orange, 6; Owen, 22; Parke, 76; Perry, 9; Pike, 7; Porter, 1; Posey, 23; Pulaski, 11; Putnam, 32; Randolph, 4; Ripley, 6; Rush, 18; Scott, 15; Shelby, 14; Spencer, 6; Starke, 5; Stuben, 2; St. Joseph, 6; Sullivan, 35; Switzerland, 11; Tippecanoe, 30; Tipton, 5; Union, 8; Vanderburgh, 26; Vermilion, 56; Vigo, 362; Wabash, 35; Warren, 17; Warrick, 31; Washington, 12; Wayne, 63; Wells, 3; White, 10; Whitley, 1; Unreported, 613.

FROM OTHER STATES.

Illinois, 43; Kentucky, 5; Kansas, 2; Missouri, 1; New Hampshire, 1; New York, 1; Ohio, 14; Virginia, 1; West Virginia, 2.

The above exhibit shows that 2,665 students have attended the school since it was established.*

THE GROWTH OF THE SCHOOL.

The following table shows the enrollment each year since the school was opened :

In 1870-71	135
" 1871-72	153
" 1872-73	228
" 1873-74	304
" 1874-75	270
" 1875-76	227
" 1876-77	282
" 1877-78	450
" 1878-79	472
" 1879-80	454

WHAT THESE STATISTICS SHOW.

This school has slowly but steadily grown in favor since its organization. Its annual enrollment has been increased from 135 to 454. The number who enter with the intention of completing the course is larger each year. Eighty per cent of the students are from the industrial classes of society, and seventy per cent come from the farms. A large majority of the 2,665 who have received instruction in the school, have since taught in the common country schools. But few of them have passed from the Normal school into the graded schools of the cities and towns.

The demand from the cities for teachers who have been students of the school, and especially for graduates, has increased rapidly of late. This demand is now greater than the supply.

The Normal School is therefore making its influence felt where that influence is most needed, viz.: in the ungraded country schools. What is the effect of this influence, is best seen by noting the condition of the schools in those counties employing the largest number of Normal students. The following from the last report of the State Superintendent is evidence on this point:

“Wherever I go I find the Normal graduates are doing the best kind of work, and I think that to their efforts is due, in a large measure, the rapid advancement which our schools have made during the last ten years.”

THE NEEDS OF THE SCHOOL.

A magnificent building was erected by the State, but was never completed. The grounds have been recently enclosed by a substantial fence, but the yard remains the barren waste that it was while the building was in process of erection. The sand excavated for the foundation and spread over the surface of the lot, will not support any kind of vegetation, and is as sterile as the desert of Sahara. The grounds are broken by gullies made by the rain, and during the summer clouds of sand are blown about over them with every wind. At a very small expense these grounds could be made what they should be, and thus promote the comfort and the aesthetic education of the students.

The institution is much in need of a professional library for the use of the students. No appropriation has ever been made by the State for the purchase of books for the school. A small but val-

uable library was donated to the institution by the late Hon. Chauncey Rose, but it contains very few books of a strictly professional character. A large number of valuable publications are in the market, which contain the history of education in the different nations and in different periods of time; the lives and writings of the great teachers of the world; the principles and methods of teaching that are the result of the thought and experience of these teachers. There is a still larger number of books of more recent publication that contain an exposition of the science of teaching as it now exists.

These constitute the professional literature of the teacher, and are as necessary to his professional education as is the law library to the law student, or the medical library to the student of medicine.

The State Normal School has no laboratory, no cabinet or museum, and but very meager physical apparatus of any kind. There are few high schools in the State that have not superior facilities for the teaching of the physical sciences. Since an elementary knowledge of chemistry, natural philosophy and botany, is a condition for intelligent farming, it is essential that the common school teacher possess this knowledge. The Natural Sciences will never be well taught in the schools, until they are well learned by the teachers.

Our legislators, in determining the amount of financial aid they will give to this school, ought to consider that in this school persons are prepared for performing immediate service for those who pay the taxes which support the school. The benefits of this school are carried back by the student into his district, and the people receive immediate and direct return for the money paid for its support, in the improved instruction given to their children. This is the only institution supported by the State, except the common school, which benefits so directly the people. The people have as great an interest in the proper education of those who are to render them immediate service,—as does the teacher,—as they have in the education of those who are to serve them indirectly, as does the lawyer and the physician.

CONDITIONS OF ADMISSION.

The following are the conditions of admission prescribed by the State :

“First.—Sixteen years of age if female, and eighteen if male.

“Second.—Good health.

"*Third.*—Satisfactory evidence of undoubted moral character.

"*Fourth.*—A written pledge on the part of the applicant, filed with the principal, that said applicant will, so far as may be practicable, teach in the common schools of Indiana a period equal to twice the time spent in the Normal School, together with such other conditions as the board may from time to time impose."

A fifth condition imposed by the board is that applicants must pass a fair examination in reading, spelling, geography, grammar, arithmetic and penmanship.

COURSE OF STUDY.

No material change has been made in the course of instruction for several years. The views of my predecessor are stated very fully in his report for 1876 and they have prevailed to the present time. I deem it worthy of your attention that you consider whether the time is not at hand for such a modification of the course as shall provide for a more thorough and systematic instruction in the science and art of teaching than is now given.

A Normal School has for its purpose to educate and train teachers in the science and art of teaching. The art is the practical skill acquired through experience in *doing* what the science gives laws for doing.

Before the student is prepared to enter upon an intelligent study of the science of teaching, he must know the mind and also those sciences and arts which are used in the school as instrumentalities for the education of the mind; that is, he must have a knowledge of the branches of learning which are taught in the schools, and of the process of growth and development of the mind. He is then prepared to enter upon that study, the object of which is the determination of the nature of the matter to be taught to the child in the different stages of his growth; the general principles and laws under which the mind acts; and the deduction from these of the methods to be used in the education of the child. And when it is considered that the proper education of the moral nature of the child—which finds its expression in right conduct from right motives—is what the law demands of the teacher, and is of vastly more importance in securing good citizenship than is mere book-learning, the necessity that the teacher shall have clear and correct notions of the science of teaching, becomes manifest.

A course of study that aims to give but little more than a knowledge of these branches of learning which constitute the object matter of the science of teaching, can hardly be called a course of professional instruction, nor can such a school be properly styled a professional school. It does the work designed to be done in the academy and high school. For this kind of instruction the State has already made ample provision.

WHY SHOULD A NORMAL SCHOOL EXIST?

When a civilized community undertakes the establishment of a new institution, they first set to work to organize it. If a new form of government is to be set up, a constitution setting forth an organic system of mutually related parts is established. The chief concern of those appointed to conduct this government is, first, to perfect the external organization, so as to be secure from fraud, lessen friction, and economize time and labor. This we call the machinery of government. The school is an institution that has been no exception to this rule. As an institution of the State it is of recent origin. But little more than half a century ago a system of common schools was first established in the State of New York, by legislative enactment. The common school system of Indiana is of more recent origin. The magnitude of the undertaking, viz., the education of all the people, the novelty of the idea and consequent want of experience of those appointed to organize the system, the rapidly changing conditions of society resulting from a rapidly changing civilization, have all combined to direct the attention of people, legislators and school officials to the construction of the system. This has been brought to such a degree of perfection, and has become so well known to the people that little more is wanting in the way of external organization. The time now has fully come when legislators, school officials and people should direct their attention to the purpose for which this system was constructed.

The free school system is based upon the belief that the education of the people promotes the general welfare. To educate is not alone to impart a knowledge of the branches taught in the school. It is to form in those instructed, habits of right thinking and right doing. This was evidently the thought of the Legislature when they made good behavior one of the subjects to be taught in the common schools. It is the ethical requirements more than the scholastic,

that are to result in moral conduct, industrious habits, and worthy citizenship. Mere knowledge, certainly the small amount of knowledge acquired in the common school, will have little influence in forming good men and good citizens. "The mere acquisition of a certain facility in reading, writing and casting accounts, can scarcely be held to justify the present large outlay of wealth and energy." It is the ninth branch in the common school curriculum, styled good behavior, which is interpreted to mean the habit of right conduct, that, more than all others, must receive attention in the schools, if they are to be made efficient agencies in promoting the general welfare. Education viewed from this standpoint, is a very different matter from that of teaching the child to read, write and cipher, and it demands the exercise of a much higher order of talent by the teacher. So much has the thought of those having the school system in charge, been absorbed in perfecting it, that too little regard has been paid to the qualifications of the teachers. Girls and boys with none of that experience which attends age, with no study or special preparation or instruction, and with every little knowledge even of the branches which they are to teach, are employed to educate the children of this commonwealth. They know nothing of the mind and next to nothing of the matter which they are to use in educating the mind. They are like the physician who knows nothing of the disease for which he is called upon to prescribe, and nothing of the effect of his remedies upon the body. This condition of affairs calls loudly for an improvement in the qualifications of teachers. Well qualified teachers can not be procured. They are not in the market. The only recourse for the State, is to furnish opportunities to all who are willing to prepare themselves for this service, and to exclude as rapidly as possible all those destitute of the needed preparation from the vocation of teaching. To give this preparation the State Normal School was established. It is a logical necessity, and must continue until the common schools are supplied with competent teachers.

ANOTHER VIEW.

When we consider the amount of money expended for school purposes in the State, and the average length of time each teacher continues in the profession, the necessity for a preparation for teaching becomes still more obvious.

From the report of the State Superintendent for 1878, we find that in 1877, the entire school population in the State was 694,706. Of this number, 498,726, were enrolled in the schools. To teach this number of children, 13,574 teachers were employed. The amount of money paid to these teachers was \$2,967,539. The average amount paid to each teacher in the county schools, was estimated to be \$144. The total cost of the schools, including the money paid for school houses, repairs, apparatus, and other expenses, was more than \$4,000,000.

Indiana has a permanent school fund of about \$9,000,000. The interest upon this fund furnishes a portion of the revenue for paying the expenses of the schools, but by far the larger part is derived from a direct tax upon the property of the State. The schools cost the people every year more than three million dollars, in addition to the income from permanent investments. Whether the people shall get "value received" for this outlay, depends almost entirely upon the qualifications of the teacher for his work. Many teachers, from want of scholarship and of a knowledge of how to teach, work a positive injury instead of a benefit to the children under their charge. The money paid to them yields no valuable return. If teachers would continue in the profession during a long series of years, the great necessity for Normal School instruction, would, in time, disappear. But the fact is, that twenty-five per cent. of the teachers of the State leave the business of teaching every year. Their places must be filled by new and inexperienced teachers. The average time spent by any one person in teaching is four years. There is, therefore, no possibility for our schools to become filled with teachers who have learned from experience what it is the business of the Normal School to teach. Hence, the necessity that every teacher obtain this knowledge before beginning to teach, if the public shall receive adequate returns for the money expended.

COUNTY INSTITUTES.

In every county in the State a Teacher's Institute is held each year. This Institute is in session five days. An opportunity is here afforded to give much valuable assistance to the common school teacher. Different members of the faculty have given in-

structions in these from time to time, as their other duties have permitted. Since the first day of August last I have attended Institutes in ten counties, working from one to two days in each. I find every where hearty friendship and good will for this Institution.

GEORGE P. BROWN,

President.

15
THE SIXTH ANNUAL REPORT

OF

PURDUE UNIVERSITY

FOR THE

COLLEGE YEAR ENDING JUNE 30, 1880, WITH THE TREAS-
URER'S REPORT FOR THE FISCAL YEAR ENDING
OCTOBER 31, 1880.

TO THE GOVERNOR.

INDIANAPOLIS:
CARLON¹⁸⁸¹⁻¹⁸⁸² AND HOLLENBECK, PRINTERS AND BINDERS.
1881.

THE STATE OF INDIANA,

GOVERNOR'S OFFICE.

Received January 4, 1881, and referred to the Auditor of State for a verification of the financial statements. Returned by him certified as follows:

OFFICE OF AUDITOR OF STATE,

January 11, 1881.

The financial statements embraced in this report, so far as they relate to cash drawn from the State Treasury, are correct.

M. D. MANSON,

Auditor of State.

This report, having been examined by the Governor, is now delivered to the Secretary of State to be filed and printed, subject to the direction of the Board of Commissioners of Public Printing.

FRANK H. BLACKLEDGE,

Governor's Secretary.

January 17, 1881.

Filed in my office January 19, 1881.

E. R. HAWN,

Secretary of State.

ANNUAL REPORT

OF THE

BOARD OF TRUSTEES.

OFFICE OF PURDUE UNIVERSITY, }
December 31, 1880.

To His Excellency, ISAAC P. GRAY,
Governor of the State of Indiana.

SIR:—The Trustees of Purdue University have the honor to submit the following report for the *college* year ending June 30, 1880, with the Treasurer's report for the *fiscal* year ending October 31, 1880:

The report of the President of the University, with the accompanying reports of the several departments, gives full and gratifying information respecting the progress and condition of the institution; also a classified statement of receipts and expenditures for the college year.

The report of expenditures is made from the registry record, which shows the purpose and department for which each payment is made. The Treasurer's report covers the *fiscal* year ending October 31, 1880, and hence does not represent the receipts and disbursements for the *college* year. The manner in which the accounts of the University are kept, has been explained fully in previous reports. Three records of disbursements are kept—one by the Registrar, one by the Secretary, and one by the Treasurer; thus securing accuracy and system.

The Board of Trustees take pleasure in calling attention to the increasing prosperity of the University, and especially to the promising beginning made in practical training in agriculture and the mechanic arts—the great industries for the promotion of which the University was founded and partially endowed. These new departments, opened in 1879, complete the organization approved by the Trustees in 1876, and make the University in reality, as well as in promise, a “College of Agriculture and the Mechanic Arts.” The Trustees believe that the institution is on the right basis, and is working in the right direction, and they have increasing confidence in its complete success. The progress made in the past four years is a gratifying assurance of great usefulness in the future.

The Trustees also take great pleasure in reporting that for the past two years the farm has paid expenses and has a balance to its credit. At the opening of the institution the Board followed the example of several of the older Agricultural Colleges and created the office of farm superintendent. There was an unfavorable balance against the farm from the first, and after a fair trial of the plan, it was abandoned. The office was abolished in October, 1878, and the present plan of managing the farm under a committee of the Board was inaugurated in March, 1879. The farm has since paid its running expenses with a good balance in its favor. The design is to make it a model farm—a farm managed on both agricultural and business principles.

It is a matter of gratification to the Trustees to be able to certify to the admirable management of the business and educational interests of the University, as far as they have been in the charge of President E. E. White and the Faculty of the institution. They have done all that could be hoped and desired. All departments of management have been systematized to the entire satisfaction of the Trustees. All books and accounts are in a shape for ready inspection by the authorities of the State, or any party desiring information. As regards the educational development, the Trustees express the utmost satisfaction with the work of President White. He has not only supervised the daily education going on in the several departments of the University, but he has shown his zeal by investing his spare time in advancing the interests of the institution, as well as the general interests of education, in the various leading localities of this and neighboring States. The Trustees feel that it is no more than their duty to express this tes-

timonial of their respect for the faithful work of the President and his colleagues of the Faculty.

The endowment fund has been increased from \$212,238.50, the original amount received from the sale of the United States land scrip in 1867, to \$340,000. Of this fund \$325,000 is invested in Indiana State bonds bearing five per cent interest, and \$15,000 is still invested in United States bonds. It is a source of regret that the bonds in which the endowment fund is invested, bear so low a rate of interest. It would be a benefit not only to the University, but an advantage, in the end, to the State, if this entire endowment fund were taken by the State as a permanent loan at a higher rate of interest. The endowment fund, the gift of the United States Government, has been carefully husbanded and has been used exclusively for the payment of the salaries of the educational corps of the University. The fund is barely sufficient for the present wants.

The attendance of students is increasing rapidly; begetting a necessity for additional teachers and professional chairs. All other funds, heretofore received, either from private donation or from State appropriations, have been judiciously expended in permanent improvements and the scientific equipment of the University—all of which belong to the State of Indiana. The Trustees now look confidently to the State to protect their educational ward by appropriations adequate to the necessities of the case. They invite earnestly the attention of your Excellency and of the General Assembly to the report and suggestions of President White, sent in with this report.

JOHN SUTHERLAND,

President of the Board of Trustees.

JOHN A. STEIN,

Secretary.

PRESIDENT'S REPORT.

To the Board of Trustees of Purdue University:

GENTLEMEN: I have the honor to submit the report of Purdue University for the college year ending June 30, 1880.

The sixth annual session opened September 11, 1879, with an increased number of students in all departments. The whole number of students matriculated during the year was 203, classified as follows:

COLLEGE.

Resident Graduates.....	2	
Seniors.....	7	
Juniors.....	11	
Sophomores.....	22	
Freshmen.....	36	
Elective.....	8	
	—	86

SPECIAL SCHOOLS.

Chemistry.....	4	
Industrial Art.....	13	
Agriculture.....	11	
Mechanics.....	6	
	—	34

ACADEMY.

Second year.....	46	
First year and irregular..	71	
	—	117
		<hr/>
Students twice entered (deducted).....		237
		34
		<hr/>
Total		

The comparison of this summary with the attendance of previous years shows a steady and promising growth. The number of students in attendance the first year of the University (1874-75) was 64; the number the second year was 67; the third, 139; the fourth, 166; the fifth, 195; and the sixth, 203. The number enrolled the present term is 201 (some thirty more than in the Fall term of 1879), and the usual percentage of increase the next two terms will give an annual enrollment of 240 to 250. For two years past Purdue has ranked in attendance the third of the higher institutions in the State. This result has not been secured by liberal advertising or by personal solicitation—the means usually employed to build up new institutions. It has been a natural and healthy growth, and may be expected to continue, and even to increase as the superior and special advantages of the institution are more widely known.

The attendance upon all new institutions is, at first, largely local. Those who reside near are the first to know what advantages are offered, and they can attend at less expense than those from a distance. These two facts result in a comparatively large local patronage. Purdue University has not been an exception to this rule. When it first opened, nearly all the students were from Lafayette and vicinity, but the attendance from other sections has steadily increased until nearly all parts of the State are represented. The number of counties represented in 1878-79 was thirty-six, and the present number is forty-three. A majority of the counties of the State have already sent students to Purdue. No effort has been made to secure students from the city. On the contrary, the pupils in the public schools have been encouraged to complete the course of study before applying for admission to the University.

This increase in the number of students has necessarily increased the expenses of the institution. New dormitory rooms have been fitted and furnished, and there has been a corresponding increase in the cost of heat, light and water. All the rooms in the Dormitory and the Ladies Hall have been occupied the present term, and the accommodations for young ladies can not well be increased. A few more young men can be accommodated in the Dormitory by putting three students in each suite of rooms. This will crowd the building and increase the difficulty of maintaining the order necessary for successful study. Rooms, with or without board, can be obtained in Chauncey at reasonable rates, and as fast as there is a demand for such rooms they will be supplied. All

the rooms in the Dormitory and the Ladies Hall will soon be required to accommodate students in the college classes, and most of the rooms in the Dormitory will be occupied by students appointed from the several counties.

THE FACULTY.

The present Faculty is constituted as follows:

EMERSON E. WHITE, President and Professor of Political Economy, Intellectual Science, Rhetoric and English Literature.

HARVEY W. WILEY, Professor of Chemistry and Physics.

DAVID G. HERRON, Professor of Mathematics.

LANGDON S. THOMPSON, Professor of Industrial Art.

CHARLES L. INGERSOLL, Professor of Agriculture and Horticulture.

ROBERT F. WEYHER, Professor of the German language.

JOHN A. MAXWELL, Instructor in Latin and History.

CHARLES R. BARNES, Instructor in Zoology, Botany and Geology.

WILLIAM F. M. GOSS, Instructor in Mechanics and Foreman of the Mechanics Shop.

EDWARD E. SMITH, Principal of the University Academy.

EDNA D. BAKER, Associate Instructor in the Academy and Matron of the Ladies Hall.

MOSES C. STEVENS, Registrar and Librarian.

The continued growth of the University will soon necessitate the employment of more instructors. The two lower classes in the college have nearly reached the maximum number for good class work, and it is hoped that the number of students in the next freshman class may require its division into two sections. The division of the two lower college classes will require at least one additional instructor, and if Purdue is to meet the increasing demands upon it as a great school of science and industry, assistant instructors will soon be needed in several departments. The instruction of the President now includes political economy, constitution of the United States, intellectual science, rhetoric, and English literature—more branches than can be successfully taught by one instructor. He has hitherto consented to undertake the teaching of all these branches because of the small number of students in the two upper classes, but at least two of them should

be added to other chairs, or an additional chair established at the close of the present college year. The departments of chemistry and physics and of the natural history sciences will in time, require division. The professor of chemistry must hereafter give increased attention to agricultural chemistry, for the benefit of students taking the agricultural course, and the laboratory must increasingly serve the industrial interests of the State by the analysis of soils, fertilizers, minerals, etc. When the natural history department is divided it will be wise to establish a chair of botany and horticulture and a chair of zoology, physiology and geology. But with few exceptions, the true policy, at least for the present, is not a multiplication of departments and chairs, but the employment of needed assistant instructors in those already established. This will lessen the cost of instruction and, at the same time, secure efficiency.

Professor Ingersoll and Mr. Goss entered upon their respective duties in September, 1879, and their work during the year is spoken of in a subsequent part of this report. It must suffice to say here that they have both fully met expectations. In October, 1879, Professor John Hussey was stricken down with paralysis, and for weeks he was not expected to live. His recovery has since been very slow, and there is little hope that he will ever be able to resume the duties of an instructor. To assist him and his family in their extremity, several member of the Faculty assumed the duties of his chair, with the exception of the instruction in geology, which was given by Professor Barnes, then in the Lafayette High School. Professor Ingersoll carried the freshman class through the year's course in zoology and botany, and also took charge of the cabinets and museum. The Board of Trustees were thus enabled to continue Professor Hussey's salary to June 1, the time of his resignation, without pecuniary loss to the University. The suspension of his salary left the disabled professor with a wife and six small children, the eldest under twelve years of age, without an income and without a home. It was felt that something ought to be done to relieve the afflicted family, and as the professor owned a lot near the University, it was decided to make an effort to raise money by subscription and build a neat and comfortable house. The generous contributions of the members of the Faculty and of other citizens of Lafayette and vicinity were nearly sufficient for the purpose, and the family now occupy their own home. The immediate

wants of the family have been provided for, and it is hoped that they may receive continued assistance. It is to be regretted that the State has no provision for the care of those who are disabled in its service.

The chair vacated by Professor Hussey was changed by the Board to an instructorship, and the position is successfully filled by Professor Charles R. Barnes, of Madison, Indiana, a graduate of Hanover College. The position made vacant by the resignation of Mrs. Herron *nee* Alderman, in August last, is filled by Miss Edna D. Baker, a graduate of the Lake Erie Female Seminary at Painesville, Ohio. Miss Baker has made a very promising beginning.

It affords me special pleasure to bear testimony to the faithful manner in which my colleagues in the Faculty are discharging their duties. Each one is acting on the belief that he can serve the University most efficiently by making his own department a success. It is believed that there is not a harder working Faculty in the country, and, if my information is not at fault, no other land-grant institution in the West pays its professors as low a salary as Purdue. This has been accepted by the Faculty as a necessity, the endowment fund being invested in bonds bearing only five per cent interest, and yielding an income too limited to pay higher salaries. If this fund were invested in six per cent bonds, more instructors could be employed and the efficiency of the University otherwise increased.

AGRICULTURE AND MECHANICS.

The college year, under review, witnessed the successful opening of the new schools of Agriculture and Horticulture and of Mechanics, and the completion of the plan of organization, adopted in 1876. The reasons for the delay in providing this practical instruction and training have been fully stated in previous reports, and it is only necessary to add that subsequent experience has fully confirmed the wisdom of the course pursued. The delay enabled us to lay a good foundation for the proposed training in agriculture and mechanics, and, meanwhile, to avail ourselves of the experience of other and older institutions. We thus avoided the wasting of our resources in fruitless attempts to do what we were not prepared to do well, or in costly experiments which fuller information has shown to be valueless.

The above remarks must not be understood as an admission that nothing in the direction of practical training in agriculture

and mechanics was done prior to the opening of the special schools. The course of instruction in drawing, designing, and mechanical engineering, instituted at the first, are important elements in mechanical training, and the courses of instruction in zoology, botany, geology, physics, and chemistry have borne directly on both agriculture and horticulture. Special pains have been taken to make practical applications of these sciences to the industrial arts. The laying out of the grounds and their adornment with trees, shrubbery, hedges, and the planting of orchards and nurseries, gave the students some knowledge of landscape-gardening, and cultivated their horticultural taste. These and other means of training were, however, only preparatory to the more systematic work now undertaken and in progress.

SCHOOL OF AGRICULTURE AND HORTICULTURE.

This school was opened in September, 1879, and what has since been accomplished is an assurance of its great success and usefulness in the future. Its work includes (1) systematic and thorough instruction and training in agriculture and horticulture, and (2) well directed series of scientific experiments. In other words, it is both a school of *instruction and training* and an *experimental station*.

The course of instruction extends through three years, one hour each day, with accompanying work in the field, conservatory, etc. It includes lectures on breeds of horses, cattle, and swine, stock breeding, veterinary obstetrics, diseases of animals, etc.; dairying, market-gardening, drainage, rotation of crops, farm management and economy, etc.; horticulture floriculture and greenhouse management, landscape-gardening, etc.; entomology, meteorology, and agricultural chemistry. This is an outline of the special course. The regular or full agricultural course adds to this special course parallel courses in science, mathematics, industrial drawing, history, and English. It is believed that the instruction in agriculture in Purdue equals in thoroughness and practical value the course in any institution in the country.

The "Experimental Station" consists of a field of ten acres, carefully platted and tested; a full set of meteorological instruments, purchased through the United States Signal Service office, and other appliances for scientific experiment. The present need of the Station is a suitable building for the reception of the products of

the plats, the storing of grains, seeds, etc., and the keeping of utensils. There should also be a large cellar for the storing of vegetables. This building should be erected early in the coming summer.

The means of illustrations and practice in horticulture include the "Peirce Conservatory," well filled with choice plants; the campus, with its lawns, trees, and hedges; and the nursery and orchard. The conservatory is a donation by M. L. Peirce, Esq., the Treasurer of the University. It is a neat structure, about fifty feet by twenty feet, with addition for boiler, fuel and potting purposes. It is heated with hot water and admirably ventilated. The addition of two wings would permit the cultivation of plants, which require a lower temperature than those in the main house. The conservatory, nursery, and ornamental grounds are in special charge of Mr. George Vestal, of Wayne County, a practical horticulturist. It is not proposed to enter largely upon the cultivation of plants for sale, but to make the green-house, nursery, orchard and grounds a means of practical instruction and training in horticulture—to show the most approved methods of plant cultivation. The sale of plants will assist in paying the expenses of the department.

The School of Agriculture and Horticulture is in charge of Professor Charles L. Ingersoll, one of the best qualified men for the position in the country. After graduating at the Michigan Agricultural College, he filled in that institution successively, the positions of foreman of the farm, farm superintendent, and professor of agriculture. This training and experience admirably fitted him for the work of organizing the agricultural department here. It gives me special pleasure to be able to refer to his accompanying report for an intelligent statement of what has been accomplished in one year. Much of the experimental work has necessarily been preparatory, but it promises most valuable results in the near future. Experimental agriculture is one of the purposes for which the land-grant institutions were founded, and the Experimental Station of Purdue University should be one of the most successful and valuable stations in the country. This result can be reached with a small annual expenditure. I have more than once suggested the importance of a series of experiments in all the agricultural institutions of the country, under the direction of the National Department of Agriculture, or some other directing

agency. What the agricultural interests of the country need, is the assistance of scientific experiments on a wide basis, under diversity of soil and climate.

SCHOOL OF MECHANICS.

This school for practical training in mechanics was opened in October, 1879, with five students, the number which could then be accommodated in the shop at one time. All the students admitted have been enthusiastic in their work, and the progress made has been in a high degree satisfactory. The work of the students has been admired by many intelligent visitors to the University, including practical mechanics and machinists, and the exhibitions of the work in three of the courses at the Tippecanoe County Fair and the State Fair were commended by all who examined them, and many expressed their admiration in strong terms. The rapidity with which those instructed have acquired mechanical skill, is gratifying proof of the efficiency of their training. The school is in charge of Mr. William F. M. Goss, a graduate of the Massachusetts Institute of Technology, Boston, and a well trained mechanic.

The method of instruction and training adopted, is what is known as the instruction or model method, devised at the Imperial Technical School of Moscow, Russia, and recently adopted in a number of technical schools in Europe, and also in the United States. Its purpose is not to teach special trades, but to teach the use of typical hand and machine tools for working in wood and iron, and the elementary principles which underlie all mechanical trades. It is proving a most efficient substitute for the apprenticeship system, which is fast disappearing. The workmen thus trained are prepared to enter the work-shop as journeymen with lower wages, and, in a few months, they become skilled artisans.

The adoption of this system in the mechanical schools recently established in France, is strong evidence of its value. No city in Europe excels Paris in mechanical training and skill, and two of her most recent schools for the education of mechanics use this method, one exclusively and the other as a preparation for the courses in construction which follow. One of these schools is the *Ecole Communale*, situated in the Rue Tournefert, and founded in 1878. The course of training extends over three years, the first two being devoted to exercises in the different kinds of work in wood and in iron, and the third to one department or trade. Nothing is made to sell. In the opinion of the enthusiastic and able

Director, M. Laubier, the construction of articles for the market would not afford as good a training as the course pursued. He states that the apprentices of the school are at once fit for useful work on entering the shop or the factory, and in six months they are paid as regular workmen. The school is sustained by a small grant.

The other school, *Ecole Municipale d'Apprentis*, is situated in the Boulevard de la Villette. It was founded in 1872, by M. Leon Say, then Prefect of the Seine, at the expense of the city of Paris. The course continues three, and in some cases four years. No boy is admitted until his primary education is completed, and six hours a day are given to work in the shops. The first year is devoted to instruction work in the various shops (more hours than is given to the full course in Purdue), and when at the beginning of the second year, the apprentice enters upon a special trade, he does not attempt to make a salable article until he has first mastered the processes involved. "Better waste wood" says the superintendent of the shops, "than spoil the making of a good apprentice. Better to let the young workman see something of all the different corners of his trade, than by too fine a division of labor to keep him all his years learning only to shape chair legs." The trades taught in the latter part of the course are forging, metal-turning, fitting, carpentry, wood-turning, and pattern-making.

[An admirable account of the mechanical schools of Paris may be found in the November number of the *Contemporary Review* in a paper on "The Apprenticeship of the Future," by Silvanus P. Thompson.]

The two years' course in model or instruction work in the Purdue shop might be followed by courses in construction with a view of teaching special trades, but this would involve a much larger outlay for equipments and running expenses, than the present system demands.

The equipment of the *Ecole Municipale d'Apprentis* cost the city of Paris about \$175,000, and the working expenses of the school are about \$15,000 a year, offset in part by the sale of manufactured articles. The endowed Technical School of Worcester, Massachusetts, has an annual income of some \$8,000 a year for its shops in addition to the receipts from the sale of articles. The equipment and running expenses of manufacturing shops for wood-working and iron-working trades at Purdue would require a large investment. The present system is unquestionably the only feasible

one here, and it promises excellent results at a comparatively small expense. We are giving the students some valuable practice in construction by employing them to make hand-tools for the shop, models, apparatus and fixtures for the other departments, and to do other mechanical work. All this is extra work and is paid for at a given price per hour. The students in carpentry are now building a set of carriage sheds, and they are doing a very creditable piece of work.

I refer to the accompanying report of the school for full information respecting its outfit, methods, results and wants. It will require about \$2,000 to increase its equipment and pay running expenses the ensuing year.

SCHOOL OF INDUSTRIAL ART.

This department opened but a little later than the University, and it has grown with its growth. Its progress during the last three years has been rapid, and it is believed that the department has no equal in the industrial colleges of the West. Drawing is an essential element in all the regular courses of study, and the number of students taking special art courses is increasing from year to year. It is a valuable aid to all the other departments of the University, and it is indispensable to those taking the mechanical course. A technical school without drawing would be as defective as a classical school without language.

The accommodations of the school for several years were limited, but it now occupies a commodious and well arranged suite of rooms. The main lecture hall is the best room for the purpose that the writer has ever seen. The new apartments are in the building called the Boarding House, and the necessary changes and improvements were made at an expense not exceeding \$500.

The accommodations for boarding purposes are still ample and more convenient than they were before the change.

The greatest present want of the school is a Museum of Industrial Art. The utility of such a collection of illustrations in the different art courses is fully stated by Professor Thompson in his appended report. The list of appliances for art teaching, therein given, shows that a good beginning in this direction has been made. The accumulation of students' work is increasing the collections in the several departments, but for illustration the best artistic work is needed. The expenditure of \$1,000 a year would well meet the

necessities of the department for several years to come. A temporary room can be provided without any expense, and, in time, the second and third stories of the central portion of the Boarding House can be converted into a fine hall for an art museum.

SCHOOL OF CHEMISTRY AND PHYSICS.

The School of Chemistry has been a prominent department of the University from the beginning. No other was so early equipped or so liberally supplied with working appliances. It was, indeed, the only department of the University in working condition, that of mathematics possibly excepted, when the writer assumed the presidency in 1876. Its equipment has since been improved from year to year, and it is now well furnished for the successful work which it is doing. Sixteen improved desks and a furnace were added last year at a cost of \$360. The cost of added apparatus is about \$500 a year. The work done in the Purdue Laboratory has attracted the attention of chemists and other scientific men, not only in this country, but also in Europe.

Physics has, however, never assumed much prominence. In 1876 it was added to chemistry and the two sciences placed in charge of one professor. The physical apparatus, much of it expensive, was transferred from a small room in the Dormitory, to the second story of the Laboratory, which was fitted up as a physical laboratory. Several fine pieces of apparatus were added. It was soon found that most of the apparatus had not been selected for use by students, and the laboratory method of teaching the science was temporarily abandoned. The instruction is now confined to courses of lectures, largely illustrative and experimental, extending through two terms. This should be accompanied by laboratory work by the students, and to this end, the laboratory should be supplied with complete sets of working apparatus. In my judgment, physics compares favorably with chemistry in practical importance, while it takes even higher rank as a disciplinary study. It should have a prominent place in our courses in science, and the necessary apparatus for efficient instruction by modern methods should be supplied.

The School of Agriculture will, in the future, make increasing demands on the laboratory, and it should be provided with whatever may be needed to meet them. A statement of the original work done in the past two years, is found in Professor Wiley's report, which is appended.

SCHOOL OF NATURAL HISTORY.

Special attention is called to the report of Professor Barnes on the condition and needs of the Museum of Natural History and the Geological Cabinet. The natural history sciences should hold the first place in such an institution as this, and, to this end, the department must be supplied with objects and means of study and instruction. Purdue has made a good beginning. For two years past, the most valuable additions to the museum have been made by donations. What is now specially needed is the supplying of the most important deficiencies, and this can only be done by purchase. Additions will also be made by exchange and collection, as heretofore. In view of the smallness of the expenditures for the two years past, full \$2,000 will be needed to meet the demands of this department the coming year. The most pressing need is a sufficient number of dissecting and compound microscopes for the use of the students in laboratory work, and the next, perhaps, is a set of Ward's Casts, now found in nearly all the leading colleges of the country. It will take months of continuous labor to put the Geological Cabinet in a condition to serve the purposes of such a collection. Most of the specimens need to be classified and labeled, and the entire collection should be reduced to order.

The rooms now occupied for cabinet and museum purposes will suffice for two or three years, and then the museum cases can be transferred to the large room now occupied by the Academy, but originally designed for the Museum of Natural History, and the Academy be provided with other accommodations. The two basement rooms can then be both used for the geological cabinet, and the present museum room be made a reading room in accordance with the original design. These statements show that provision has been made for a large expansion of the present museum and cabinet.

OTHER DEPARTMENTS.

For information respecting the progress and condition of the other departments of the University, attention is invited to the accompanying reports. There has been in all a steady advance in instruction, interest, and results. Fewer students are falling below the prescribed standard, and an increasing number desire to complete the course. A small expenditure each year will meet the

demand for additional teaching appliances. The new telescope ordered from Alvin Clark & Son, Boston, will be an important addition to the apparatus of the mathematical department.

The Academy has fully justified its establishment as a department of the University. It fills the place between the common country school and the college, affording young people, who are not prepared to enter the freshman class, thorough instruction in preparatory studies. Hereafter, the requirements for admission, can include most of the first year of the present course of study. These elementary branches are universally taught in the common schools, and should be well taught. This change will obviate the necessity of employing an additional instructor.

RECEIPTS AND EXPENDITURES.

For the year ending June 30, 1880.

RECEIPTS.

ENDOWMENT FUND.

Interest on bonds.....	\$16,412 50	
Transfer from Purdue donation (borrowed).....	13,450 12

Purchase of United States bonds for endowment.....	13,455 00
Payment of the Reynolds note.....	5,000 00

CURRENT EXPENSES.

Next to the salaries of instructors, the principal item in the current expenses of the University is the cost of heat, light and water—\$3,974.76. This item has been quite uniform for three years past and it may be expected to continue at over \$4,000 a year. It includes the heating by steam and lighting by gas of four large buildings, supplying them with water pumped from a well one hundred and twenty feet deep and the furnishing of steam power to drive the machinery in the mechanics shop, etc. The prevailing westerly and northerly winds to which the buildings are exposed increases the amount of heat required to keep them comfortable.

The other current expenses, not including the farm, were \$3,234.55, making a total expenditure for current expenses (not including salaries of instructors) of \$7,209.31. This is offset, in part, by current receipts of \$2,629.14, leaving a deficit of \$4,580.17, the most of which was paid from the Purdue donation. This excess of running expenses over receipts has been paid since

1874 from this fund, (about \$4,000 a year on an average); but the entire donation is now expended or invested and the University must in the future look to the State for the means to pay its incidental expenses. The sum required will be \$5,000 to \$6,000 a year, varying with the amount needed for repairs. The last General Assembly appropriated \$2,000 to assist in paying current expenses, but an unexpected opinion of the Attorney General obliged the Board to use most of the money to pay the salaries of the officers of the University and the compensation of the Trustees. If these salaries and allowances are to be paid as a part of our running expenses, an annual appropriation of \$6,000 to \$7,000 will be needed.

APPOINTED STUDENTS.

In the last annual report attention was called to the fact that the income from student's fees, room rents, etc., had not increased correspondingly with the number of students. The receipts from these sources in 1876-77, with 139 students, were \$2,130.35; last year, with 203 students, they were only \$2,029.01. This was due to the number of appointed students in attendance, such students being exempt from the payment of tuition and incidental fees, and regular charges for room, heat, and light. This reduction amounts to about \$33 a year to each appointed student. The number of appointed students in attendance last year was sixty. It is recommended that the provisions of the "Students' Law" be so changed as to apply only to students in college classes or in special courses.

THE FARM.

The change in the management of the farm, which took effect March 1, 1879, has met expectation in bringing the running expenses within the receipts, and leaving the balance on the right side of the account. In the preceding years, the farm was an unnecessary tax upon the limited resources of the University. The cash receipts from July 1, 1879, to June 30, 1880, inclusive, for produce sold, pasturage, etc., but not including stock sold, were \$1,453.27, and the running expenses for the year (not including improvements, \$86.47, or stock purchased), were \$1,335.60. This gives a cash balance of \$97.67 in favor of the farm. It is difficult to determine the increase in the value of the stock sold in the year or on hand at its close, since no inventory was made in July, 1879, or in June, 1880. A careful estimate puts the increase, or gain, at \$300 to

\$400, and the net profits of the farm at \$400 to \$500. The cash deficit the preceding year was \$686.92. The report of the Farm Committee gives the receipts and expenditures for the year 1880, and also the inventory made at the close of the year, stock excepted.

SPECIAL FUNDS.

The appropriations hitherto made by the State have been for specified purposes, and they have been regarded as special funds. The condition of these special funds on July 1, 1880, was as follows :

APPARATUS, CABINETS AND FIXTURES.

Balance on hand July 1, 1879.....	\$3,297 45	
Charges for breakage in Laboratory.....	49 86	
	<hr/>	\$3,347 31
Expenditures to July 1, 1880.....		1,913 25
		<hr/>
Balance unexpended.....		\$1,434 06

HORTICULTURE FUND—[Improvement of Grounds.]

Balance on hand July 1, 1879.....	\$1,484 16	
Plants and trees sold.....	194 57	
	<hr/>	\$1,678 73
Expenditures to July 1, 1880.....		776 54
		<hr/>
Balance unexpended.....		\$902 19

LIBRARY FUND.

Balance on hand July 1, 1879.....	\$781 74	
State appropriation, November 1, 1879.....	500 00	
	<hr/>	\$1,281 74
Expenditures to July 1, 1880.....		837 39
		<hr/>
Balance unexpended.....		\$444 35

AGRICULTURAL FUND—[Experimental Station.]

State appropriation, November 1, 1879.....		\$1,000 00
Expenditures for equipment.....	\$383 20	
Expenditures on experiments	272 61	
	<hr/>	\$655 81
Balance unexpended.....		<hr/>
		\$344 19

TRUSTEE FUND.

Receipts.....		\$.....
Amount overdrawn, July 1, 1879.....	\$352 90	
Expenditures to July 1, 1880.....	1,473 90	
	<hr/>	1,826 80
Amount overdrawn.....		<hr/>
		\$1,826 80

STOCK FUND.

Balance on hand July 1, 1879.....	\$415 00	
Receipts from sale of stock.....	1,034 46	
	<hr/>	\$1,449 46
Expenditures to July 1, 1880.....		1,356 56
		<hr/>
Balance unexpended.....		\$92 90

The above unexpended balances on the first of last July constituted the available resources of the University for the purposes specified for the current college year. A considerable portion of each balance has since been expended.

The payment of the bill for the telescope ordered will leave only a small balance of the "Apparatus, Cabinet, and Fixture Fund." The "Horticulture Fund" will pay expenses to September 1, 1881. The "Library Fund" (increased November 1, 1880, \$500,) will secure a valuable addition of books.

The Board of Trustees divided the appropriation of \$2,000 for "improvements, machinery, school of agriculture and agricultural experiments" and credited \$1,000 to the "Agricultural Fund," and added \$1,000 to the fund for improvements and general expenses. The improvements made exceeded \$1,000.

The "Stock Fund" is not a special fund, the appropriation for this purpose having been expended several years ago. Most of the receipts credited to the fund, arose from the sale of stock in March, 1879. The expenditures have been chiefly for Clydesdale and Norman horses. It is hoped that the \$1,826.80 paid to the Secretary, Treasurer, and Trustees from the \$2,000, appropriated for current expenses, may yet be paid from the "State treasury," as provided by law.

FINANCIAL NEEDS OF THE UNIVERSITY.

The foregoing statements and exhibits show that the carrying forward of the work now undertaken by Purdue University, the next two years, will require the supplementing of the income from its endowment fund by annual appropriations, as follows:

Current expenses, including repairs and small improvements, but not including salaries of instructors.....	\$6,000
Labor and supplies for Experimental Station.....	1,000
Building for Experimental Station.....	1,000
Labor and supplies for green-house, nurseries, and campus (horticulture)...	1,000
Machinery, tools, fixtures, materials and other supplies for mechanics shop.	2,000
Industrial art apparatus, works for museum, and supplies.....	1,000
Chemical and physical apparatus and fixtures.....	2,000
Natural history apparatus and supplies, and specimens for cabinets and museum.....	2,000
Apparatus and fixtures for other departments.....	1,000
Books and periodical for library.....	1,000
Total annual appropriation needed.....	\$18,000

The above estimates do not include the compensation of Trustees, Treasurer, and Secretary, formerly paid directly by the State Treasurer. If this item is to be paid by the University, an additional appropriation of about \$2,000 will be required. It is suggested that the above appropriations be made in one sum, leaving the distribution and expenditure of the same to the Board of Trustees. This will enable the Board to use the money where it is most needed. It is difficult to determine in advance precisely what may be needed for a given department or purpose. The actual demands may exceed the estimate, or fall below it.

It is also earnestly recommended that the appropriation to Purdue University be made continuously, as is the case with the appropriations made to the State University at Bloomington, and the State Normal School. The three institutions should have the advantage of the same general policy. It is essential to the growth and success of Purdue University that its existence be made secure by a fixed income, adequate to meet its necessary expenses.

INDIANA'S DUTY AND PRIVILEGE.

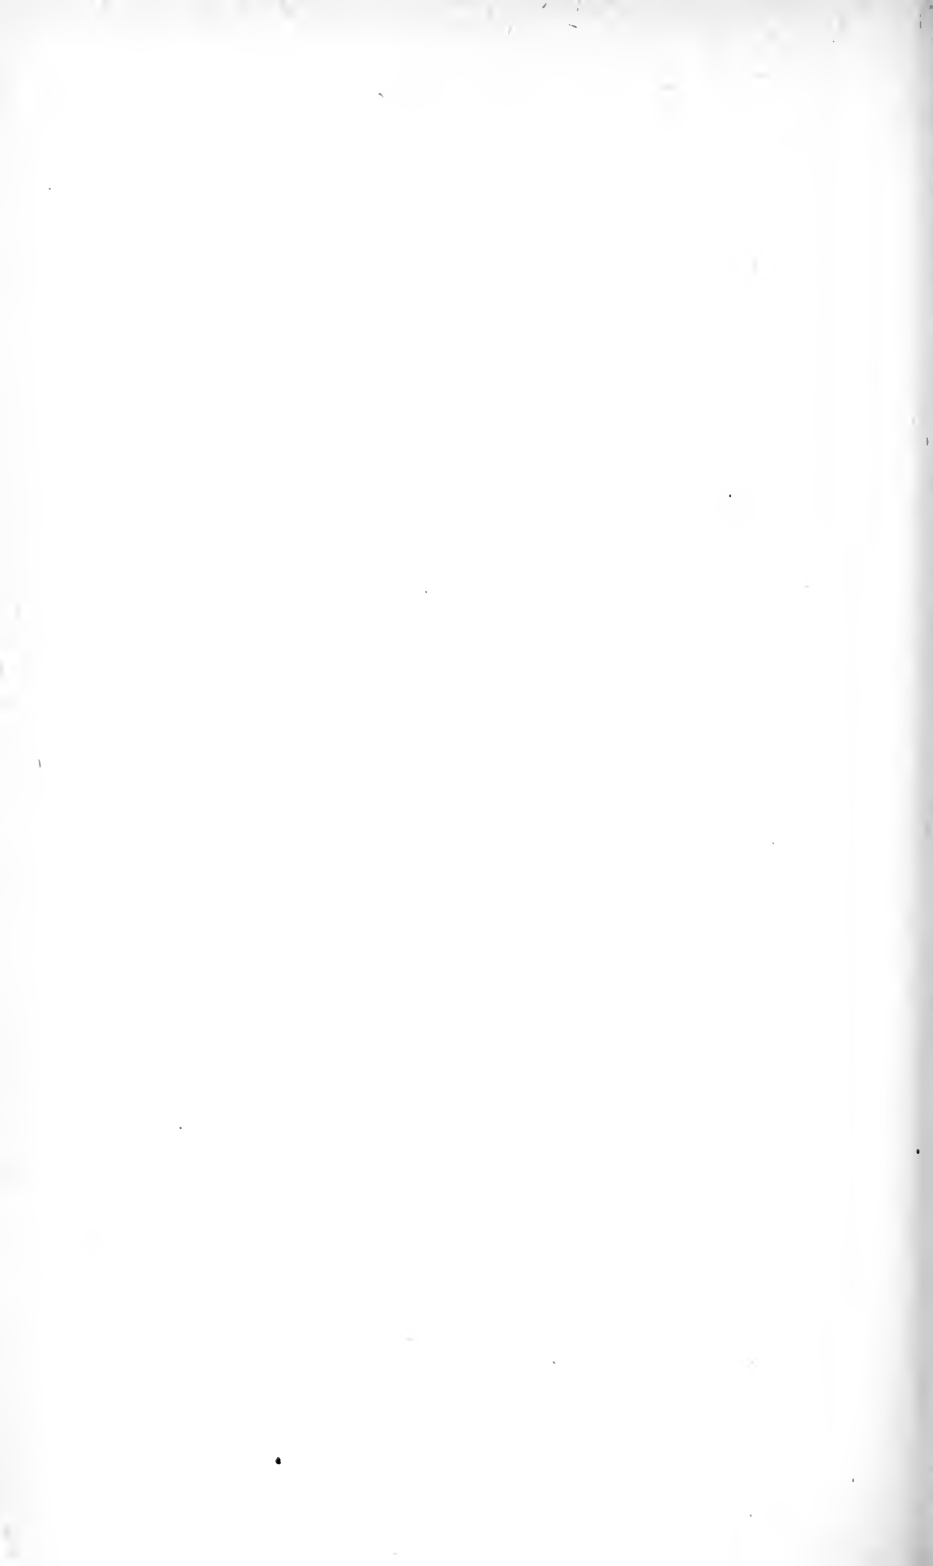

Purdue University, as it now stands, is largely a gift to the people of Indiana. The appropriations made by the State, are represented in the boarding house and military hall, the library, the cabinets and museum, the apparatus and other teaching appliances, and the stock and barn on the farm. All else had been donated to the State. The original farm of one hundred acres was donated by citizens in the vicinity. The eighty-seven acres which include the campus, the three large college buildings, the engine-house and fixtures, and other permanent improvements embody the donations of Judge Purdue and Tippecanoe County, excepting some thirty thousand dollars used to pay running expenses up to this time. The endowment fund of \$340,000, yielding an annual income of \$17,000, represents the proceeds of the munificent land-grant of the United States. These several donations, exclusive of the appropriations by the State, constitute a total bequest of FIVE HUNDRED AND SEVENTY THOUSAND DOLLARS, all embodied in a well organized, vigorous, and promising *College of Science, Agriculture, and Mechanic Arts*. The institution thus equipped and endowed, is the property of the State of Indiana, accepted in trust for the promotion of the great industries of the people, and with the obligation to make it efficient and successful.

The resources, so far at its command, have enabled Purdue University to pass in six years from a hopeful possibility to a recognized success. It stands before the people, not merely with plans and promises for the future, but actually and successfully meeting the requirements of the act of Congress which endowed it, and of the law of the State which provided for its organization. Its two score students have increased to over two hundred, and confidence and commendation are fast taking the place of doubt and criticism. The tide in its affairs has reached the flood, and the State has now the opportunity to make its prosperity and usefulness continuous and sure. Its munificent bequests are all invested or expended, and its future success depends on the State's supplementing the Nation's grant by a legislative act appropriating continuously a like annual income. Is not this the privilege as well as the duty of the General Assembly? Nothing less than this will make Purdue University worthy of the industrial interest of so great a commonwealth, and surely Indiana is ready to do as much for her own Industrial College as the Nation has done for it.

E. E. WHITE,

President of Purdue University.

December 31, 1880.

ACCOMPANYING REPORTS.

I.

REPORT OF THE

SCHOOL OF AGRICULTURE AND HORTICULTURE.

President E. E. White, LL. D.:

DEAR SIR: In accordance with the usual custom, I present the following as the first annual report of the work and results reached in my department.

I.

INSTRUCTION.

The work began by my assuming the responsibility of the chair September 1, 1879. The first work was to decide upon a course of study, and this, as planned, has been substantially adopted, and leads to the degree of B. S. when the full course of four years has been honorably completed. The agricultural studies are completed in three years, while some of the scientific studies are not completed until the fourth year. The *studies* are as follows:

FIRST YEAR.

First term.—Lectures on stock.

Second term.—Stock breeding and veterinary science.

Third term.—Veterinary science and entomology.

SECOND YEAR.

First term.—Horticulture.

Second term.—Veterinary science.

Third term.—Market gardening and drainage.

THIRD YEAR.

First term.—Landscape gardening and history of agriculture.

Second term.—Rotations of crops, farm economy and meteorology.

Third term.—Agricultural chemistry.

FOURTH YEAR.

Geology, political economy and United States constitution are required, while the student may elect his other studies.

It is believed that the above, with the studies in drawing, mathematics and science, will give a thorough and practical education; while such studies as history, rhetoric, English literature and language (two years), will give the student requisite culture in that direction.

A labor system is connected with this course, by which each is to labor two hours daily in experimental field, green house or campus, during the fall and spring terms, while in the winter term an abbreviated course in the mechanic shop is provided, consisting of wood-work and iron-work, in which forge-work is made a leading feature.

The year began with seven students, which number was increased to eleven, and I may add to the credit of the class, that their work has been highly satisfactory to me. They have evinced much more earnestness and thoroughness than I had expected in the work of a newly established course with no prestige in its favor.

During the month of October, I was called upon to take a part of the work in the department of natural history, on account of the sudden and protracted illness of Prof. J. Hussey. From that time I carried one class in its work through the college year in zoology and botany. This work was a pleasant one to me, and I hope was received with satisfaction by students and Faculty.

II.

EXPERIMENTS IN AGRICULTURE.

In the month of September, 1878, an assignment of ten acres of ground was made to use for purposes of experiment with field crops. This was laid off on the north side of the street leading to town, in the form of a parallelogram, fifty rods by thirty-two rods, with the longest side next the street.

This plat was subdivided into acre plats, 5 rods by 32 rods, and numbered, commencing from the east side, consecutively. Plats 5 and 6 were immediately plowed and the land prepared for wheat, which was sown on September 22; the south $\frac{1}{4}$ of plat 5 was reserved for sowing thirty-six varieties of wheat.

The ground was prepared by plowing the sod, about $6\frac{1}{2}$ inches deep, on September 18 and 19; harrowed twice lengthwise of furrow and twice catering on September 20. The ground was rolled on the 22d and the wheat drilled in (Fultz variety) at the rate of 1 1-7 bushels per acre, on the afternoon of the 22d. This area, $1\frac{3}{4}$ acres was left to be subdivided into smaller plats in the spring, and have several varieties of fertilizers tested by spring sowing after it was seen how the wheat had passed the winter. The remaining $\frac{1}{4}$ acre was sown with varieties of wheat, as follows, on September 22 to 25:

- | | |
|---------------------------|--------------------|
| 1. Jennings White Winter. | 2. Kentucky White. |
| 3. Post. | 4. Shaffer. |
| 5. White Rose. | 6. Powers. |
| 7. Michigan Wick. | 8. Silver Chaff. |
| 9. Treadwell. | 10. Buckeye. |
| 11. Diehl. | 12. Velvet Chaff. |
| 13. Louisiana. | 14. Armstrong. |
| 15. Golden Straw. | 16. Tappahannock. |
| 17. Trump. | 18. Victoria. |
| 19. Rough Chaff. | 20. Russian White. |
| 21. Dott. | 22. Fultz. |
| 23. Russian Red. | 24. Lammas. |
| 25. Arnold's Hybrid. | 26. Nursery. |
| 27. Red May. | 28. Lancaster. |
| 29. Mediterranean. | 30. Amber. |
| 31. Muskingum. | |

Cross fertilized varieties as follows :

32. Diehl and White Amber.
33. Armstrong and White Amber.
34. Clawson and Treadwell (pollen of the former).
35. Treadwell and Clawson (pollen of the former).
36. Asiatic Wheat (failed to germinate).

As will be seen by the preparation and sowing, the chances were rather poor for the wheat to do well, as the field was a stiff sward and had been in meadow that year. We had no drill by which definite quantities of seed could be regularly sown in small plats, and hence the quantity was not taken. The varieties that seemed to do best were mostly of the red and amber wheats. A few white varieties promised well. Nos. 1 to 20, inclusive, were white wheats; 21 to 29 inclusive, red wheat, and 30 and 31 amber varieties.

Of the white varieties, Nos. 1, 2, 4, 7, 8, 12 and 14 did well. Of the red varieties, Nos. 22, 23, 25, 28 and 27 did well. Of the amber varieties, the amber, sometimes called Michigan amber, did best. Of all the varieties compared, Nos. 1, 12, 22, 23, 28 and 30 did about equally well. These, together with several cross-fertilized varieties, will be tried another year.

In the spring (April, 1880), the wheat which had stood the open winter was surveyed into 55 plats, 50 of which contained 5 square rods each, or $\frac{1}{32}$ part of an acre. The remaining 5 contained 3 square rods each. Each plat was 5 rods long and 1 rod wide. The general plan of the ground is according to the accompanying diagram. The series of plats are designated by letter, while the plats in each series are numbered. The letter F points out the plats on which the fertilizer was sown.

Salt was used on series	A 320 lbs. per acre.
Bone meal was used on series	B 320 lbs. per acre.
Guano was used on series	C 480 lbs. per acre.
Blood and bone was used on series	D 480 lbs. per acre.
Gypsum or plaster was used on series	E 160 lbs. per acre.
Nothing was used on series	F

Fertilizer was sown on each alternate plat in each series.

DIAGRAM OF WHEAT EXPERIMENT.

A	1	2	3	4	5	6	7	8	9	10
	F.		F.		F.		F.		F.	
B	1	2	3	4	5	6	7	8	9	10
		F.		F.		F.		F.		F.
C	1	2	3	4	5	6	7	8	9	10
	F.		F.		F.		F.		F.	
D	1	2	3	4	5	6	7	8	9	10
		F.		F.		F.		F.		F.
E	1	2	3	4	5	6	7	8	9	10
	F.		F.		F.		F.		F.	
F	1	2	3	4	5					

Series A, B, C and D were harvested on June 22d; series E and F on June 23d. By this unfortunate occurrence the results of

these series can not be compared with each other. Circumstances over which we had no control caused this arrangement.

The yields were separately weighed in the straw, threshed in one-half day, and the wheat carefully weighed. The difference between the original weight in straw and that of the wheat was assumed to be the weight of the straw. In threshing, the yield from plat 10, series A, was mixed with outside wheat, so that the weight could not be ascertained; hence that number is left blank.

The results of the experiment are compiled in the following tables:

TABLE I.

* = F

Yield of Wheat in Pounds.

F.	Series.	1	2	3	4	5	6	7	8	9	10
Salt.	A	*38½	43	*38¾	47¼	*47½	54¼	*42¾	45½	*45	...
B. meal...	B	45	*46½	42¼	*47¼	44½	*52½	41½	*40	47½	*52
Guano....	C	*50¾	44½	*44¼	48½	*45¼	44¼	*61¾	44¼	*54	47½
B. & Bone	D	43	*52	41¾	*54½	44½	*51¾	48¼	*45½	42¾	*47¼
Gypsum ..	E	*43	47½	*44¼	52	*45½	37½	*49½	50½	*48¾	43½
Nothing .	F	48½	53	47	46	45¼

In this table the yield on numbers 6 to 10 of series E are computed at the same rate for 5 square rods for comparison.

TABLE No. II.

Yield of Wheat per Acre in Bushels.

F.	Series.	1	2	3	4	5	6	7	8	9	10
Salt.	A	20.26	22.93	20.67	25.20	25.33	28.93	22.80	24.27	24.00

None.....	F	39.12	41.52	41.76	40.80	41.04

The soil on which this experiment was tried, was very uniform in appearance, with a very slight slope to the south. If there was any difference in fertility, the soil grew gradually more fertile in traversing from series A to F, as the latter series was situated nearest the street.

To all appearance, the results are not very uniform in series A where salt was used, the salt being an apparent detriment for this season, which was very moist during the winter and spring months. (See report of meteorology accompanying this report). With bone

meal on series B, there is a gain which is almost regular on the fertilized plats. With the use of guano, it is more especially marked. It is also quite plain in the use of blood and bone fertilizer. In the use of gypsum, or land plaster, the same anomaly occurs as in the use of salt, with the exception of 1 plat (No. 6). The plats in series F did not vary much in yield of wheat or straw, and were nearly up to the yield of many of the fertilized plats. E and F series must not be compared with the preceding series, as they were cut one day later, and, hence, lacked the sun of one day to cure them as well. In the following table I have given the average results on each series of plats, fertilized and unfertilized plats averaged separately :

TABLE No. 5.

F.	Series.	Fertilized Plats.	Unfertilized Plats.
		Yield Per Acre.	Yield Per Acre.
Salt.....	A	22.61 bushels.	25.33 bushels.
B. Meal.....	B	25.41 bushels.	23.54 bushels.
Guano.....	C	27.25 bushels.	24.42 bushels.
B. and Bone.	D	26.78 bushels.	23.49 bushels.
Gypsum.....	E	24.60 bushels.	24.597 bushels.
None.....	F	25.55 bushels.	

The general average of results is as follows :

Salt produced a loss equal to..... 2.72 bushels per acre
 Bone Meal produced a gain equal to..... 1.87 bushels per acre
 Guano produced a gain equal to..... 2.83 bushels per acre
 Blood and Bone produced a gain equal to..... 3.29 bushels per acre
 Gypsum produced a gain equal to..... .003 bushels per acre

The yield of straw averaged as above is as follows :

TABLE No. 6.

F.	Series.	Fertilized Plats.	Unfertilized Plats.
		Cwt. Straw Per Acre.	Cwt. Straw Per Acre.
Salt	A	24.72	24.84
B. Meal.....	B	29.20	27.79
Guano	C	32.34	29.47
B. and Bone.....	D	29.26	28.00
Gypsum.....	E	28.68	27.60
None.....	F	40.85	

Results are as follows:

Salt produces a loss equal to..... .12 cwt. per acre
 B. Meal produces a gain equal to.....1.41 cwt. per acre
 Guano produces a gain equal to.....2.87 cwt. per acre
 B. and Bone produces a gain equal to.....1.26 cwt. per acre
 Gypsum produces a gain equal to.....1.08 cwt. per acre

The plats in series F without fertilizers gave a larger yield than any of the series of unfertilized plats in A, B, C, D or E.

I account for this in part by the fact that F series was nearer the fence, and was much better protected than the others during the cold weather. I would caution any one against drawing inferences from the results in any single season. The land should have been cultivated one year with the ordinary circumstances surrounding it, and the yield noted when no fertilizers were used. This would give data for comparison in the future. These results are only indicative, and we should at least need the results of the same experiment repeated over a series of years before we could draw any definite conclusion.

During the winter, the subject having been thoroughly considered, the first selection of ten acres was abandoned for experimental purposes (its permanent use not being assured), and another tract selected on the south side of the street and nearly opposite the campus. The wheat was to be harvested from the former plat,

and all work after that to be transferred to the new selection. This was fenced and plowed in the latter part of April, 1880. It was laid out in seven series of plats, with path or drive between each series. Each series was designated by letter, and was in form of a rectangle 18 rods long and 10 rods wide. Each lettered plat or series was subdivided into eighteen smaller plats 10 rods long and 1 rod wide, containing 1-16 of an acre.

A good driveway is left on two sides of the field for convenience in reaching plats, etc.

The subjoined plat of the ground gives a good idea of the arrangement.

I will take these plats in regular order, beginning at A, the first series on the north.

Plat A was not subdivided, but was reserved for work in Horticulture and Botany, which should be rather instructive in its character. In accordance with this view, on the west side of this plat were planted the following varieties of grapes, two vines of each variety :

1. Concord.	2. Wilder.	3. Elvira.
4. Merrimac.	5. Massasoit.	6. Agawam.
7. Brighton.	8. Isabella.	9. Iona.
10. Lindley.	11. Goethe.	12. Delaware.
13. Catawba.	14. Salem.	15. Ives Seedling.
16. Moore's Early.	17. Hartford Prolific.	18. Martha.
19. Senasqua.	20. Early Champion.	21. Rebecea.
22. Croton.	23. Eremelan.	

Next to these were planted a number of varieties of raspberries, viz.:

1. Herstein.	2. Clarke.
3. Catawassa.	4. Amazon.
5. Kirtland.	6. Highland Hardy.
7. Philadelphia.	8. Reliance.
9. Brandywine.	10. Turner.
11. Thwack.	12. Gregg.
13. New Rochelle.	14. Davison's Thornless.
15. Doolittle's Imp. Black Cap.	16. Ohio Everlasting.
17. Great Western.	18. Miami.
19. Mammoth Cluster.	20. Seneca Black Cap.

Of gooseberries we have :

1. Downing.	2. Smith's White Eng.
3. Smith's Improved.	4. Houghton's Seedling.
5. Mountain Seedling.	

Of currants we have :

1. Cherry.	2. La Versailles.
3. White Grape.	4. Black Naples.
5. White Goindoin.	

A space was cultivated during the summer for the fall setting of strawberries. These were set out very late, but as soon as the fall rains came so as to make it safe to do so. We have of these :

1. Black Defiance.	2. Capt. Jack.
3. Glendale.	4. Kentucky.
5. Sterling.	6. Green Prolific.
7. Crescent.	8. Huddleston's Favorite.
9. Great American.	10. Cumberland Triumph.
11. Chas. Downing.	12. Wilson's Albany.
13. Sharpless.	

Next the currants and gooseberries were planted a few grains of Peru or Chili corn, seed presented by I. B. Lutz, of Wea. This

did not ripen, but made a very tall growth. Only one ear set, and this did not mature any corn. A striking feature of its growth was the large number of aerial roots thrown out at each of the first four joints above ground. It is not adapted to our climate.

Next the vacant space were planted a few rows of corn, the seed of alternate rows from different localities, but of the same variety. This was left to cross fertilize to obtain seed for next year to observe its productiveness.

Next were planted fifty-four varieties of potatoes in small quantity, and the comparative yield noted. It may be well to remark that the latter part of the season was one of the severest drouth, and many fields of potatoes would scarcely pay for harvesting.

The varieties and the yield per acre in bushels is given below :

No.	Varieties.	Bu.	No.	Varieties.	Bu.
1	Whipple's Seedling.....	114.93	25	Climax	110.40
2	Trophy.....	138.13	26	Centennial.....	11.20
3	Ohio Russett.....	87.47	27	Snow Flake.....	227.81

50	Seedling No. 16.....	104.00	54	Seedling No. 19.....	111.83
51	Seedling No. 12.....	114.93			

The ten varieties which gave the best yield, in their order, are :

One, Snowflake ; 2, Strawberry Mercer ; 3, Michigan Prolific ; 4, Burbank's Seedling ; 5, Bliss' Triumph ; 6, Trophy ; 7, Early Snowball ; 8, Lily, No. 10 ; 9, Early Ohio ; 10, Tioga. Thirteen other varieties yielded over 100 bushels per acre, and were not far behind the last four varieties in yield, etc.

These varieties, with others, will be further tested next year.

On the central portion of the plat were planted several varieties of beans for comparison. These were—

- | | |
|-------------------------|----------------------|
| 1. Dreer's Imp. Lima. | 6. Early Mohawk. |
| 2. Giant Wax. | 7. Large Lima. |
| 3. Dwarf Blax Wax. | 8. Dutch Case Knife. |
| 4. Cuba Asparagus Pole. | 9. Black Wax Pole. |
| 5. White Dutch. | 10. Southern Prone. |

11. London Horticultural Beans.

Samples of each of these varieties, as well as the fifty-four varieties of potatoes, were exhibited at the State Fair at Indianapolis.

On the south side of this plat (A) are sown a large number of varieties of grasses and clovers, so that students and other persons may compare the manner of growth, etc.

We have of clovers—

1. Bokhara clover, *Melilotus Leucantha*.
2. Scarlet or Italian clover, *Trifolium Incarnatum*.
3. Hop or Trefoil Yellow clover, *Medicago Lupulina*.
4. Alsike clover, *Trifolium Hybridum*.
5. Rabbit-footed clover, *Trifolium Avense*.
6. Lucerne or Alfalfa clover, *Medicago Sativa*.
7. June clover, *Trifolium Pratense*, (2 Var.)
8. White clover, *Trifolium Repens*.

Of grasses—

Phleum Pratense, Timothy (herds grass.)

Lolium Italicum, Italian rye grass.

Lolium Perenne, Ray Darnel, English rye grass.

Poa Pratensis, Kentucky blue grass (June grass).

Poa Trivialis, rough stalked meadow grass.

Poa Nemoralis, wood meadow grass.

Poa Alpina, Alpine grass.

Poa Compressa, wire grass.

Dactylus Glomerata, orchard grass.

Fescue Duriuscula, hard fescue grass.
Festuca Viriole, green fescue grass.
Festuca Rubra, red fescue grass.
Festuca Elatior, meadow fescue grass.
Festuca ———, Darnel spiked fescue.
Festuca Glancesceus, ——— ———.
Festuca Clivaricata, ——— ———.
Alopecurus Pratensis, meadow foxtail.
Setaria Macrochaeta, ——— foxtail.
Bromus Erectus, brown grass.
Bromus Schraderi, rescue grass.
Agrostis Vulgaris, red top.
Agrostis Canima, Rhode Island bent grass.
Agrostis Stolonifera, creeping bent grass.
Avena Elatior, tall meadow oat grass.
Avena Hirsuta, animated oats.
Elymus Europeus, European wild rye.
Eleusine Corocina, crab grass.
Hordensu Jubatum, squirrel tail grass.
Arrhenatherum Avenaceum, bat grass.

Five or six other varieties were sown but failed to germinate, as did two or three of those mentioned. With the plats of Alfalfa clover were found growing plenty of parasitic plants of a species of Dodder.

It is thought that mowing and burning has destroyed this pest, which preys on flax, especially, in some localities. I would give this advice when trying Alfalfa: "Be careful of the seed you sow."

A sample of Board of Trade oats was tried on this plat; yield, 39½ bushels per acre. Another variety of many-headed oats was sown, but did not mature any grain worth mentioning. The seed was kindly presented by Mr. Martin.

Two varieties of spring wheat were tried in small quantity: one a white Russian variety, the other from Colorado. Neither raised as much seed as was sown, and that of very poor quality.

Plat B.—On the west side of this plat were tried nineteen varieties of cabbages, but on account of dry weather and the attacks of the cabbage butterfly larvæ (*Pieris Rapae*), they were almost wholly destroyed. Seven varieties of beets did nothing on account of the drouth.

Oregon, or wild corn, grew quite well, and matured a fine yield of ears. The seed was furnished by Prof. W. J. Beal, of Michigan Agricultural College, and Dr. Wiley, who furnished a sample which was a sprout found in a field near here. It reproduced itself on a number of stalks perfectly.

One-half the plat (90 square rods) was planted to early amber cane. This was worked up and produced 92 gallons of a good quality of syrup, or at the rate of 163.5 barrels per acre. The cane was hardly thin enough in the drills for the season, and the stalks rather ordinary size for that reason.

Next to this was planted the Lackawaxen corn, which proved to be a small, white flint variety. It was quite early; ripened in August. Not especially valuable for Indiana farmers, who have strong soil and long seasons. It will be tried again.

On the south side of B, 1 bushel each of Victor and Mahopac potatoes were planted. The yield per acre was, Victors, 49 bu., with $37\frac{1}{3}$ per cent. too small for market; Mahopac, 141.83 bu., with 21 2-5 per cent. too small for market. These suffered, as did all our potatoes, with dry weather. The Colorado beetle was ready, but was held in check with one application of London Purple and two more of Paris Green. This was applied in water with sprinkler.

The south end of this plat has been sown (Sept. 15, 1880), to several varieties of wheat. Each variety has four drill rows, 10 rods in length, on which have been sown equal quantities of seed with a Monitor hand drill.

The wheat came up well, considering the dryness of the soil and the subsequent dry weather. There is very little difference in the appearance of the varieties. Several varieties are cross fertilized, and their growth and development will be watched with interest.

The following list of varieties is sown:

Velvet Chaff (bearded).	Lancaster.
Powers.	White Rose.
Mich. Wick.	Victoria.
Red Russian.	Arnold's Hybrid.
Amber.	Diehl.
Buckeye.	Armstrong.
Tappahannock.	Kentucky White.
Shaffer.	Dott.
Silver Chaff.	Red May.
Fultz.	(Mich.) Amber.
Velvet Chaff (beardless).	Australian Wheat.

Cross fertilized :

Diehl x Lancaster.

Armstrong x Diehl x Treadwell.

Diehl x Treadwell, three specimen plats with variations.

Diehl x Lancaster (variation), Armstrong x Lancaster.

Diehl x Egyptian Red.

Diehl x White Amber.

Plat C was planted to corn to test the normal yield. This plat was subdivided into 18 small numbered plats, and the yields were as follows. By mistake Nos. 1 and 2, 3 and 4, 5 and 6, were cut together, which disturbed the full result somewhat.

PLAT C.—CORN.

No. of Plat.	Pounds Corn.	Yield Per Acre.	No. of Plat.	Pounds Corn.	Yield Per Acre.
1 } 2 }	301½	34.60	10	188¼	43.03
3 } 4 }	329¼	37.63	11	187½	42.86
5 } 6 }	374¾	42.83	12	190	43.43
7	180½	41.26	13	174½	39.89
8	199	45.49	14	155½	35.54
9	178	40.69	15	139¾	31.94
			16	144¾	33.09
			17	145	33.14
			18	167	38.17

These yields, although low, as the circumstances were not of the best to make a good crop, will serve as a basis of comparison in the future, when fertilizers may be tested, different quantities of seed sown, etc., etc.

Plat D was fallowed during the summer, and sown to Fultz wheat September 7, 1880; 97 lbs. seed sown with Buckeye Drill. The yield of wheat will be noted, and no fertilizers will be used this year.

All the numbered plats will be treated alike.

Plat E was planted to corn; yield as follows, in bushels:

PLAT E.—CORN YIELD.

No. of Plat.	Pounds Corn.	Yield per Acre.	No. of Plat.	Pounds Corn.	Yield per Acre.
1	168	38.30	10	142¼	32.51
2	181¾	41.54	11	150¼	34.34
3	179	40.91	12	132¾	30.34
4	187¾	42.91	13	136¾	31.26
5	195½	44.69	14	145¾	33.31
6	206¾	47.26	15	144¼	32.97
7	196½	44.91	16	141¼	32.30
8	216	49.37	17	164¾	37.61
9	156¾	35.83	18	203½	46.51

Each of the operations, as harrowing, planting, cultivating, hoeing, thinning, etc., was performed in one day, so as to bring the conditions as nearly alike as possible. The plowing only was an exception to the rule. Five to seven grains of corn were planted in each hill, and when fairly started and out of danger from accidents, all were pulled out but three, so that a uniform stand was secured on each plat.

The results show quite large variations, when, by the eye, no apparent difference in texture or character of soil can be seen.

Plat F.—This plat is devoted to a comparison of three rotations of crops. On the west we have on the first five plats, the following rotation, viz.: Corn, corn, wheat, grass and grass; a five-year rotation. On the next seven plats we have a seven-year rotation, viz.: Corn, corn, beans, oats, wheat, grass and grass. On the remaining six plats we have a six-year rotation, viz.: Corn, roots, oats, wheat, grass and grass. These are not for present results, but to furnish something definite after a few years by way of comparison. Each rotation is to be carried on without manure other than that furnished by the turning over and decay of the sward when the corn crop is planted.

Plat H.—This plat is divided as the others have been, into 18 plats, 1-16th of an acre each. On the west we have selected the

first 10 plats on which to cultivate five different crops without manure or even seeding to grass.

On Nos. 1 and 2 corn is to be raised year after year in succession with no fertilizers added, and with only the ordinary field culture as usually given by farmers. This is done to give the effect of raising corn successively on the same piece of ground, and by careful weighing to note the gradual exhaustion, if any there be, for a series of years.

On Nos. 3 and 4 oats will be raised annually. On Nos. 5 and 6 barley will be raised; and on Nos. 7 and 8 potatoes; on Nos. 9 and 10 buckwheat; and on Nos. 11 and 12 rye.

On the next 6 plats grain crops will alternate as e. g.: on Nos. 13 and 14 corn and wheat will alternate; on Nos. 15 and 16 corn and oats will alternate, and on Nos. 17 and 18 oats and wheat will alternate.

The yields each year will be carefully noted and recorded, and as time goes on we hope to have something in the comparison of results on these plats that will be interesting. We are not aware that any one has performed any experiments in agriculture that will cover this ground with corn as the leading feature in the work. The work of Drs. Lawes and Gilbert in England has been very valuable in the line of wheat and other small grains as barley, etc. By repeating these in our climate we will have results that will either verify their work as being of such a character that we may safely draw inferences from it, and at the same time add the experiment on Indiana corn, one of the leading staple productions of our State and the West.

Beyond this plat H we have a small area devoted to general uses, for which we shall, in course of time, have many calls.

In the case of the plats cultivated to corn this year, it was found that it would be impossible to cut the corn on account of the severe dry weather. A few plats were cut, but the wastage was so great by the breakage of stalks that the work was abandoned. On two of the plats the stalks were weighed and the result showed 117½ lbs. secured, but this was not accurate. At this rate the yield would be 18.76 cwt., or a little less than one ton weight per acre.

This being the initial year of work, this report is necessarily taken up largely with details of plans, and very few results are given for reasons previously assigned. As the work goes on we hope to give the *facts* in regard to everything we try as they appear to us; and

not to work in the interest of any one particularly, but to ever labor for the good of all the agriculturists and horticulturists of this great State.

In this connection let me call especial attention to the last section of this report, which gives the meteorology of this locality for the year. The season has been a very peculiar one, and, before criticism on results, I would ask a careful notice of the rainfall and temperature, as this will show how difficult it has been to reach even medium results.

II. HORTICULTURE.

Although the department is that of agriculture and horticulture combined, it seems necessary to make especial mention of horticulture, including the nursery and green-house, as these have been under the immediate management of Mr. George Vestal, a practical florist and horticulturist.

The grounds of the University have been laid out with beauty, and the effect has been none the less beautiful, if the planting has been done with a view to educational advantage and comparative observation in the growth of trees. There are about 2,000 trees on the campus, a portion of which are put in position for wind-breaks on the west and north. These latter are mostly Austrian and Scotch pines. While our hedges are of Hemlock and two species of *Arbor Vitae*.

The Nursery has been used to grow trees for further planting out, and to fill vacancies should any such occur. Some of these have been sold, as they were grown so as to be of no value for further keeping in nursery rows, and there was no place, at the time to put them.

There are now about 2,300 specimens in the rows, comprising Norway Spruce, *Arbor Vitae*, Scotch, Austrian, and White Pines, Hemlocks, Fir, Larches, Birches, Chestnuts, Carolina Poplars, and Mountain Ashes. The Norway Spruce leads the varieties, about

one-third of the whole number being of this variety. The Carolina Poplars were presented by our popular and well known nursery man, Dr. Furnas, of Danville, in this State.

It is the design of the present management to set aside a space for an "Arboretum," which, in connection with the grounds, shall, in time, show to the student and visitor all the varieties of shrubs and trees indigenous to this latitude, or that may be grown here, properly labeled, and in a shape for study. Of course, this can only be accomplished by care, labor, and time, but, when accomplished, it will be a very valuable acquisition to the University.

The conservatory has been a source of especial pride during this year. Completed in November, of 1879, it could scarcely be said to have had a fair chance to show what its true worth to the college may be.

With the plants on hand at that time, and generous donations from various sources, the house, 24x48 feet, has been well filled by the propagation of the various sorts. Some specimen plants were purchased more for the purpose of giving variety to the collection, and educational value to our students (who have made use of it extensively), than to make a show-house. Notwithstanding the fact that this single room *must* be used for all purposes, requiring for best results temperature from 50° to 75° or 80° F, for the different plants and operations, yet the house has looked finely—bloom has been reasonably abundant, and the number of plants propagated has reached 10,000 or more, these being mostly bedding plants, chiefly used for ornamenting the borders and beds on the grounds.

Plants have been sold from such propagation to pay nearly one-half the expense of the house including the gardener's time which was often devoted to other and outside work.

The University would take this opportunity to acknowledge the following donations from among several:

Mr. M. L. Peirce, valuable plants at various times, too numerous to specify; Mr. Fowler, three choice palms; Mrs. Dinwiddie, a collection of cactuses; Mr. J. W. Vestal, Cambridge City, a philodendron. The department is also under obligations to Mr. J. A. Foote, Terre Haute, for a fine collection of seeds for garden and conservatory; to the Michigan Agricultural College, for a collection of greenhouse plants (including several rare specimens), straw-

berries and potatoes; to Mr. N. Olmer, for a collection of strawberries.

There were several other smaller donations, but want of room will not permit us to specify.

The labor on the department was done by Mr. Vestal, the students, with some assistance from the hand who spent the greater part of his time on the experimental grounds. Mr. Vestal has taken each member of the class in Horticulture and given special practical lessons in potting plants, making cuttings, transplanting flowers, making walks, trimming hedges, pruning, etc.

As the department develops and grows, we hope to do more than we have done in this direction, and make the school of agriculture second to none in the United States in its practical instruction, as well as the course of study presented.

The necessities of this part of the department are more rooms in the conservatory, where we can have a higher and a lower temperature than in the main house; more sashes for hot beds for spring propagation. In addition to these, a considerable sum of money should be expended in new walks—in improving the lawns and in the planting of the “Arboretum.”

We would say, in conclusion, that the growth of this part of the work, must, of necessity, be somewhat slow, but we hope to make the work in these directions of value, first, to our students who should have prior claims on us, and, second, to the people of the State who visit us and read our reports.

We feel that, in the interest already manifested, we have an earnest of that success that awaits our efforts in the direction indicated.

III. METEOROLOGY.

It seemed necessary that accurate reports of the meteorology of the climate should be kept at this place, in order that such reports might be profitably consulted in connection with the experimental work.

The instruments were purchased through the agency of the Central Signal Office, War Department, Washington, D. C., and consist of—

One Standard Thermometer.

One Maximum Thermometer (self-register).

One Minimum Thermometer (self-register).

One Hygrometer (wet and dry bulb Thermometers).

One Rain Gauge.

One Robinson's Self-registering Anemometer.

One Wind Vane.

One Standard Barometer (Green's).

Observations are taken at 7 a. m., 2 p. m., 9 p. m., and the barometer reading taken a fourth time at sunset. At each regular observation the following readings are taken: The temperature, the humidity of the air, the rainfall if any (or snow) with duration of the storm, the direction and velocity of the wind, the amount of cloudiness with the kind of clouds and whether they are of the upper or lower strata, the direction from which they are moving, the height of barometer and the thermometer attached.

At the 9 p. m. observation, in addition to the foregoing, the maximum and minimum thermometers are read and reset, thus showing at a glance the highest temperature and the lowest for the preceding twenty-four hours.

The barometer readings in the following summary and tables are all corrected to the uniform temperature of 32° F., and for the elevation of 684 feet above sea level, this being the elevation of the Purdue Laboratory where the barometer is suspended.

The accompanying tables show a condensed report of this station for eleven months of 1880, closing with November 30th. These show the average corrected barometer for each day and the monthly average, the highest and lowest thermometer for each day and month, the average temperature, the average humidity (1,000 representing complete saturation of the air), the rain or melted snow in inches and hundredths, also the "prevailing wind" The last table shows averages of each of the preceding in a condensed form for the period of eleven months ending November 30, 1880. By this statement or table the conditions in each month can be quickly noted and compared, while from the monthly tables the particular state of the weather on any particular day can be seen at a glance.

Following these tables may be found a short summary of the important things with reference to the weather in each month, which I hope will not be wholly without interest.

January, 1880.

Day of Month.	Average Barometer, inches.	Highest Thermometer, °F.	Lowest Thermometer, °F.	Average Temperature, °F.	Average Humidity, per cent.	Rain or Melted Snow, inches.	Prevailing Winds.	Remarks.

Greatest velocity of wind 60 miles per hour, June 6, 9:00 a. m.

SUMMARY.

Interesting Data for Each Month.

JANUARY.

Highest barometer.....30.62 inches.....January 1.

Lowest barometer.....29.19 inches.....January 9.

Highest thermometer.....68°January 11.

Lowest thermometer.....16°January 31.

Range of temperature.....52°.

Rain fell on the 1st, 2d, 3d, 4th, 5th, 6th, 8th, 9th, 11th, 19th, 20th, 21st, 22d, 23d, 25th, 29th and 30th; in all, 17 days.

Wind was S., S. W., or W. 20 days.

FEBRUARY.

Highest barometer.....30.75 inches.....February 19.

Lowest barometer.....29.56 inches.....February 26.

Highest thermometer.....65°February 27.

Lowest thermometer..... 0°February 4 and 5.

Range of temperature.....65°.

Rain or snow fell on the 3d, 11th, 18th, 24 and 25th.

Wind from S., S. W. 17 days; from N. and W. 8 days.

MARCH.

Highest barometer.....30.41 inches.....March 15.
 Lowest barometer.....29.63 inches.....March 4.
 Highest thermometer.....69°March 5.
 Lowest thermometer.....90°March 17.
 Range of temperature.....60° .

Rain or snow fell on the 3d, 5th, 11th, 16th, 26th, 27th and 28th.

Wind from S. W. 5 days, from W. 5 days, from N. W. 5 days, from S. E. 5 days, and other points 11 days.

APRIL.

Highest barometer.....30.44 inches.....April 7.
 Lowest barometer.....29.21 inches.....April 18.
 Highest thermometer.....83°April 18.
 Lowest thermometer.....22°April 12.
 Range of Temperature.....61° .

Rain fell on the 1st, 2d, 3d, 5th, 15th, 16th, 19th, 23d, 24th, 25th and 29th.

Wind from S. W., 10 days; from N. W., 5 days, and 4 days each from the S. and the W.

MAY.

Highest barometer.....30.44 inches.....May 15.
 Lowest barometer..... 29.82 inches.....May 29.
 Highest thermometer.....89°May 17.
 Lowest thermometer.....32°May 1.
 Range of temperature.....57° .

Rain fell on the 8th, 10th, 19th, 20th, 21st, 25th, 26th, 27th, 29th, 30th and 31st.

Wind from S., 12 days; from S. W., 6 days; from N., 6 days; from other points 7 days.

JUNE.

Highest barometer.....30.31 inches.....June 18.
 Lowest barometer.....29.70 inches.....June 6.
 Highest thermometer.....94°June 11 and 12.
 Lowest thermometer.....51°June 17.
 Range of temperature.....43° .

Rain fell on the 6th, 9th, 13th, 14th, 15th, 25th, 26th, 27th, 28th and 29th.

Wind from N., 7 days; from S. W., 9 days; from W., 6 days.

JULY.

Highest barometer.....30.42 inches.....July 21.
 Lowest barometer.....29.63 inches.....July 14.
 Highest thermometer.....96°July 13.
 Lowest thermometer.....46°July 21.
 Range of temperature50°

Rain fell on the 4th, 5th, 9th and 19th in small quantity.

Wind from S. W., 10 days; from W., 7 days; from N. W., 6 days, and from S. 4 days.

AUGUST.

Highest barometer.....30.35 inches... ..August 25.
 Lowest barometer.....29.21 inches.....August 27.
 Highest thermometer99°August 26.
 Lowest thermometer.....47°August 4 and 5.
 Range of temperature.....52°.

Rain fell on the 11th, 17th, 20th, 25th, 28th, 29th and 30th.

Wind from S. W., 14 days; from N. E., 5 days; and from N. W., 4 days.

SEPTEMBER.

Highest barometer.....30.32 inches... ..September 22.
 Lowest barometer.....29.88 inches.....September 2.
 Highest thermometer.....91°September 1.
 Lowest thermometer.....30°September 30.
 Range of temperature.....61°.

Rain fell on the 1st, 2d, 3d, 4th, 5th, 12th, 17th, 20th, 25th, 26th, 27th and 29th.

Wind from S. W., 11 days; from W., 5 days; from S., 5 days; and 3 days each from N. and E.

OCTOBER.

Highest barometer.....30.40 inches.....October 30.
 Lowest barometer.....29.21 inches.....October 15.
 Highest thermometer.....84°.....October 11.
 Lowest thermometer.....20°October 20 and 23.
 Range of temperature.....64°.

Rain fell on the 4th, 14th, 16th, 22d and 26th in small amounts.

Wind from S. 13 days; from the W. 7 days, and from the N. 4 days.

NOVEMBER.

Highest barometer.....31.395 inches.....November 22.
 Lowest barometer.....29.738.....November 22.
 Highest thermometer.....65°November 2 and 3.
 Lowest thermometer.....18°November 22.
 Range of temperature.....83°.

Rain and snow fell on the 4th, 5th, 6th, 7th, 11th, 12th, 16th, 18th, 21st, 24th, 26th, 28th and 30th, in small quantity.

Wind from S. W. 8 days; from W., S., and N. W., each 5 days.

Thermometer below zero six nights, varying from 4° to 18°, as indicated by the self-registering minimum, alcohol thermometer.

The peculiar character of the season is best shown by referring to the rain fall, which for the first six months was 32.99 inches, while for the last five months it was only 10.09 inches, or more than three-fourths of the rain fall occurred in the first six months.

Slight omissions in the observations have occurred three or four times during the period covered by this report, but none that have

seriously interfered with the general result. One single slight rain fall of not more than one-hundredth of an inch was missed by the rain gauge being away for repairs and no provision being made for measurement in its absence. I feel like congratulating the students in the agricultural course and others who contributed so much toward the success of this part of the work, by their unremitting care and painstaking.

The work of this portion of our department has been made to conform to the regular work of the corps of observers in the signal service of the United States Army, where the observations are transmitted weekly by mail.

The value of this work may not be so plainly apparent to those who are asking for immediate results; this, however, will be more clearly shown as time goes on and the records of several years are obtained for comparison.

In conclusion, I wish to thank Mr. G. W. Vestal, for the efficient aid he has given in various directions, and especially for the assistance rendered in the green-house when the class in botany was having the benefit of that structure and its contents for study at a time when the season would not afford wild flowers and plants.

The thanks of the department are also due the department of chemistry for analysis of samples of gypsum. Also, to Prof. Weyerher for valuable reports of agricultural work and experiments in Prussia, obtained through his efforts from the minister of agriculture and forestry in that country, and added to our library. The additions to the library in this department during the year have been quite large and creditable, but much more should be obtained in order to provide important and necessary works of reference and reading in various branches of agriculture and horticulture. The year has been a pleasant one, and we feel much encouragement for the future in the pleasant attitude of the students, in the cordial endorsement and support we have received at your hands and the hands of our board of trustees, as well as from the hands of our co-workers in the cause of industrial education.

C. L. INGERSOLL,

Professor of Agriculture and Horticulture.

II.

SCHOOL OF PRACTICAL MECHANICS.

President E. E. White :

DEAR SIR:—I herewith present my first annual report on the condition and progress of the mechanical department.

Upon my arrival at Purdue, in September, 1879, I found nothing in readiness for the beginning of my work. A room had been set aside for my use but it had no floor or benches, nor was it ceiled over head. This state of affairs gave an excellent opportunity for beginning at the lowest round of the ladder and *working* the department into existence. A substantial floor was at once laid and it was then found necessary to ceil over head to prevent the sifting of dust from the floor of the Laboratory above. A ceiling of pine flooring was applied which has since proved a positive remedy.

Laying the floor and putting up the ceiling, together with the building of benches and making necessary alterations, occupied so much time that it was not until five weeks after the school year began, that class work by students commenced.

MEANS OF INSTRUCTION.

The appliances with which the department was provided at the beginning of the year were as follows: One back-gear, screw-cutting engine lathe, one large wood turning lathe, one vertical drill press, an emery grinder and a grindstone, all made by the Atlas Works of Indianapolis. They were provided with the necessary shafting and belting for receiving power from the engine house.

While improving the shop as already stated, vises, files and other tools necessary for a course in vise work in iron were purchased, and in December a power planer for working iron, made by Pond of Worcester, Mass., was added. This is a first-class

machine in every respect. In the following February it became evident that in order to keep my classes at work to their advantage, another course must be provided, and accordingly two forges were constructed by Kruse of Lafayette, from a design of my own. They are circular in form and are made of sheet iron—the bodies of No. 14 and the heads of ordinary galvanized iron. An iron tank for holding water is suspended from the upper edge in front, and on the back and near the bottom is a similar tank for the reception of coal. They are designed to carry a deep, heavy fire when working large iron, or a small one when on light work. They are compact and efficient and work very satisfactorily. At the same time the forges were being made, anvils and hammers and a No. 1 Sturtevant blower to furnish the blast were bought. These additions gave a very complete forge shop, convenient in its appointments and wanting in nothing but room and light. During the past summer means were afforded for buying wood working tools. Five complete sets of carpenter tools, four small wood-turning lathes (making five with the one we already had), and a No. 1 Fay scroll saw was bought, thus providing means for working in wood as well as in iron.

It will now be seen that as far as variety of work is concerned, the department is fairly provided with tools, but in some directions, notably in forge and machine work, where only two students can be accommodated at a time, duplicate machinery is needed. This want of accommodation, of course, restricts the size of the class, and by so doing belittles the work itself.

With the means now provided, instructions can be given in the following courses of work: Bench-work, wood-turning and pattern-making in wood, and vise-work, forging and machine-work in iron.

SYSTEM OF INSTRUCTION.

In teaching students the use of tools common to all of the ordinary trades, in a limited portion of time, it has been fully demonstrated by the success of several mechanical schools in this and other countries, that the so-called Russian system possesses advantages which no other plan offers. The one great feature of this system is, that it avoids, in a measure, the repetition of construction, and enables the student to pass from an operation, when learned, to another, which will present some new feature to him. Instead of building entire machines, the work is carried on by

making only such parts as will teach the maker something new at each step. In other words, the work is in the form of models *illustrating principles*.

The advantages of such a plan may be easily seen. Suppose for instance that we were to take the construction method, and were to require the students to build machines of some kind. It would necessarily be several weeks, working two hours per day, before they could become sufficiently skilled to enter upon the nicety of machine fitting; and after acquiring that skill the time remaining for such work would be very short and hardly sufficient to accomplish much. If the machine was built, they would probably understand how to make *that* machine and not a great deal else. On the other hand, with the model system, each one is taught the use of all the different appliances that the department affords, and learns to manipulate them by making some model which brings in their use. In this way, during a course in machine work, they became perfectly familiar with either the lathe or the planer, with screw-cutting or center planing, with using the center rest or boring bar, and, in fact, any and all means generally employed in actual construction. It is the same in wood-work; we can not build a house, but we can learn to make a mortise and tenon, to splice, rabbit, mitre and dovetail, and all the principles that underlie the trade. A moment's reflection will show that these principles will apply equally as well to either of the other courses of work—wood-turning, pattern-making, filing or forging.

Our aim then is not to construct, but to adhere to the model system, which, I believe in every instance, will give the most satisfactory results. If, however, in any branch of work it should ever become apparent that construction would be superior to the model system, I should not hesitate for a moment to recommend its adoption. In this connection I might add that the chosen system will not prevent, should it be thought advisable, a class when near the end of each course, spending a few days in making some one simple machine or structure which will give the students a little experience in "setting up," and which may be kept to show the class work. The work in models, however, will be made of first importance in all training. The cost of material in use is trivial, and, at present, is borne by the University, which entitles the institution to the results of the students' work. If thought expedient in the future, this expense may be charged to the student, which will allow him to claim what he makes.

OBJECT IN VIEW.

It has become a fact, which is acknowledged by most practical men, that it is very difficult for a young man, as an apprentice, to obtain a complete knowledge of the work he undertakes. The reason of this deplorable state of affairs is, that manufacturers can produce more and better work by the use of special machines and by the employment of *special workmen*; that machines or men that will turn out a vast amount of one kind of work, but that may be utterly incapable of doing anything else, will yield to them a greater income than machines or men calculated to produce a greater variety. Thus an apprentice to a trade soon becomes a *special workman*, perhaps at the bench or perhaps at a machine; but in either case, outside of his own sphere of special work, he is very apt to be entirely ignorant of the trade in which he professes to be skilled. It is thus the purpose of the mechanical department to make up as far as it is in its power, for the deficiency in the apprenticeship system by the establishment of these courses in both wood and iron, where young men may be taught the principles of not one trade alone, but of all the common trades; thereby putting him in possession of a broad and extending foundation upon which he may build in most any direction.

The advantage of such a course of work to a young man intending to become a mechanic is invaluable; to a farmer it is difficult to overrate its usefulness, and to one who expects, at some future time, to pursue a thorough course in engineering, it is imperative.

WORK ACCOMPLISHED.

As soon as the shops were ready (about the middle of October, 1879), practice was begun in vise work in iron, (filing, chipping and sawing), which continued until the middle of the second term. It was followed by courses in forging and machine work, continuing until the end of the year. In the latter two courses, the class was divided, one-half taking one course and the other half taking the other, as accommodations were wanting for the entire class in either one of the courses alone. Some of the work produced in all three of these courses was exhibited at our Tippecanoe County Fair, and at the State Fair at Indianapolis, where it attracted much attention, and was pronounced by all who examined it, as not only being very creditable work, but remarkable for its accuracy, neatness, and finish.

With the present year wood work was begun, and up to the present time (November 26), excellent progress has been made, both in bench work and in wood turning. There are, in all, nine students who are taking the course, and a lively interest is manifested.

The remainder of the present term will be a continuation of bench work and wood turning. Beginning with the middle term of this year, pattern making and foundry work will be taken up and continued through the term. As there is at present no foundry, instruction in its work will be given by a course of three or four lectures, illustrated by flasks, molds, etc., showing how the founder must proceed to obtain a perfect mold from a given pattern. In order, also, that a good idea of the practical workings of a foundry may be obtained, the class will, occasionally, visit some one of the manufacturing establishment of Lafayette, where they may see the different processes practiced, which were explained in the lecture room.

The last term of the year will be spent by the freshmen in vise work in iron, and by the sophomores in machine work. We are now following the plan of work laid out in the catalogue of last year. From the beginning, all students electing mechanics, have been required to devote two hours each day (Saturday excepted), to actual work in the shops, the entire shop course extending through a period of two years. *Special students* are admitted for any one course alone if desired, and are allowed to spend a longer time in any particular branch of work.

Beside the class work done in models, all our hand tools for the forge shop, such as tongs, punches, chisels, etc., were made in our own shop, and principally by students. In machine work, a planer chuck was made, which, if bought at the manufacturer's price, would have cost at least \$30. Much has been done in the way of making repairs about the buildings and grounds, and in the construction of models and pieces of apparatus for the use of other departments of the institution. At present they have partially built a series of carriage sheds for the accommodation of people driving to the University. The work in the construction of these sheds will be entirely done by students' labor, giving them an opportunity to acquire experience outside of their shop practice, and at the same time to earn a little. They are paid at the same rate as all student labor—10 cents per hour. I see no reason why all work of repair-

ing, as well as the making of tools and pieces of apparatus for our own and other departments, may not be done by students. This work will not, however, be allowed to take the place of their regular shop practice, or interfere with it in the slightest degree, but will all be done as outside work.

WANTS.

The shops are at present located in the basement of the laboratory, and are low in the walls, very poorly lighted and entirely inadapted to our use. In walking across the room one must be continually stooping to prevent coming in contact with belting overhead, the room not being high enough in the walls to allow the belts for the larger pulleys to go up out of the way. They are insufficiently lighted by small, square windows, two lights deep, and being under ground they are at times very damp, and consequently very destructive to the machines and fine tools which we have. I should also add that they are exceedingly small, necessitating the crowding of wood and iron-working machinery all together. There should be sufficient room to allow the separation of these machines, as the dust and dirt of one is not calculated to improve the appearance or efficiency of the other.

There should be two more machine lathes about the size of the one we already have, so that more than two students might be accommodated at one time in machine work. These could be bought complete for about \$500, and should be before next year. There should also be three more forges with the necessary accompaniment of anvils and hammers. This would require an outlay of perhaps \$175, which, considering the importance of the work, is very trivial. With these additions the department could accommodate five students at a time in either of the six branches of work. There should also be from \$200 to \$300 invested in small tools and apparatus, such as lathe chucks, files, drills, reamers, gauges, scales, dogs, etc.

I call your attention to the above wants as being imperative to the success of the department, and they should be supplied as soon as possible.

RECAPITULATION.

As will be seen from the foregoing, the department is at present provided with five sets of carpenter tools, with the necessary benches for the instruction of five students at a time; there are

five wood-turning lathes (one large and four small), together with the usual complement of chisels, gauges, compasses and calipers, and one power scroll saw for irregular sawing. These tools and machines provide ample means for a thorough course in wood work.

For iron work there are benches fitted with five Parker vises and files, chisels, hammers, squares and calipers for each vise. There is one machine planer, one machine lathe, one vertical drill press, one emery grinder, and one grindstone. There should be added two more lathes. We now have two forges which are furnished with blast by a Sturtevant blower driven by power. We need three more forges, the addition of which would not necessitate any change in the blowing apparatus, there being sufficient power for blowing five as well as two. And finally, the department is sorely in need of better quarters. Larger, higher, and better lighted rooms, which would be free from the moisture and other objections of an underground room, should be fitted up at once.

In conclusion, let me say that every thing is in good working order and the work done by students is of good quality. They evince a great interest and seem determined to make their work a success. With the expenditure of a few hundred dollars our shop can be made as complete, as far as appliances are concerned, as need be for the present. I sincerely hope that means will be provided by which we may supply our needs and thus place the mechanical department on a fair working basis. Personally I feel well pleased with the progress made, considering the difficulties under which I have been obliged to labor, and, during the coming year, am in hopes to accomplish greater results.

I have the honor to be,

Yours respectfully,

W. F. M. GOSS,

Instructor in Mechanics.

III.

SCHOOL OF INDUSTRIAL ART.

E. E. White, LL. D., President of Purdue University:

DEAR SIR:—I have the honor herewith to present a report on the progress, appliances, and wants of the Industrial Art Department at the close of the college year ending June 30, 1880. To understand rightly the progress that has been made during the last few years, it is proper to state that, at the introduction of drawing in the institution, it was taught in a small room in the dormitory with but little or no apparatus. About the beginning of 1877, a room was partitioned off from the chemical laboratory which was occupied as a drawing room until November, 1877, when the department was moved into a room provided for it in University Hall. At this time it was supposed that this room, especially constructed for it, would furnish the art department a home for a long time. It was soon found, however, that this room, with a small adjoining room, was too limited for the number of students seeking instruction in this department, as well as poorly adapted for model drawing and shading for large classes. For want of room the department was put to considerable inconvenience during the latter part of the year 1879, and until April, 1880. At this time, owing to the liberality of the board of trustees and their interest in the department, a suite of five or six rooms was fitted up in the building used as a boarding house. One large room used as a lecture and recitation room for large classes has been provided with improved desks placed upon raised platforms in semi-elliptical tiers, in such a manner as to render it probably the best adapted for model drawing and shading for large classes of any drawing room in the

west, if not in this country. A separate room is also provided for each of the following branches: Cast shading, mechanical drawing, clay modeling and casting in plaster, besides a small room used as an office and library by the instructor.

APPARATUS.

Our present rooms will probably be sufficient for our future growth for a number of years, but for apparatus and appliances we shall still need appropriations. Since the beginning of the Art School the apparatus had been increased from year to year, by purchase and construction, as necessity absolutely demanded, until the removal into the suite of rooms now occupied. At this time over thirty anatomical casts and casts of ancient and modern statuary were added to the previous collection. Thus far our needs for apparatus have outrun our ability to provide them.

The following list embraces the most important apparatus now in our collection:

The department is supplied with (1) flat copies for outline drawing; (2) flat copies in light and shade for crayon work; (3) colored copies, for water-color painting; (4) flat copies for carpentry, architectural, and machine drawing; (5) charts to illustrate the botanical analysis of plants for purposes of design; (6) charts to illustrate analysis of historical ornament; (7) charts to illustrate harmony and contrast of color; (8) a great variety of geometrical solids, vases, and casts for model drawing; (9) samples of prints and other textile fabrics, wall paper, carpets, etc., to illustrate the application of design to manufactures; (10) appliances for modeling in clay; (11) an excellent selection of casts from ancient and modern sculpture, recently purchased, including busts of the Venus de Milo, Apollo de Belvidere, Diana, Psyche, Paris, Ajax, Michael Angelo, Raphael, and medium sized statues of Minerva, Psyche, Flora, and M. Angelo's Moses; (12) twelve very fine photographs of western scenery, taken under the supervision of the U. S. War Department, presented by Mr. James R. Pigman, of Lafayette. The Library also contains a number of very valuable books of reference and journals for the use of art students.

INSTRUCTION GIVEN.

In the Academy the course of instruction has been somewhat changed since our last report. It has been found that the instruction in drawing in the Academy could not be made to advance the

drawing in the the College classes, owing to the fact that a great many students enter the College classes who have never been in the Academy, and have received no instruction in drawing before their entrance. Hence drawing in the Academy is now taught only during one year, and is made to include free hand from copy, dictation, memory, design and models or objects. Since our removal into the new drawing room, the progress of the Academy drawing has been quite satisfactory. We are now enabled to teach model drawing to a class of fifty or sixty as readily as we could formerly teach half a dozen.

By design drawing in the Academy we mean decorative design for flat surfaces, as borders, vertical and horizontal ; carpets, oil-cloths, textile fabrics, etc. This instruction is given from the black-board and from charts prepared for the purpose.

COLLEGE CLASSES.

There has been but little change in the course of instruction in the College classes. Geometrical drawing, or the solution of problems with ruler and compass, is taught from the black-board and from books. About one hundred problems are given in this way upon which the students must pass an examination.

ORTHOGRAPHIC PROJECTION.

This subject is taught entirely by lectures from the black-board. Over one hundred problems are given, showing how to draw the projections of the simple geometrical solids, their developments and intersections, and the application of all this to the making of "working drawings."

PERSPECTIVE.

Parallel and angular perspective are taught from text books and lectures from the black-board. Oblique perspective is taught entirely by lectures. Students are taught how to put into perspective the various geometrical forms under given conditions of size, distance, position with reference to the spectator, and position with reference to both picture and ground planes.

MODEL DRAWING AND SHADING.

These subjects are taught entirely from the observation of the actual objects, placed before the students in such a position that all can have a distinct view of them, and from diagrams explained

from the blackboard. The application of the drawing of regular solids to the drawing of irregular bodies, is shown, and some practice in dictation drawing of chairs, sofas, tables, doors, windows, interiors of rooms, buildings, etc.

SPECIAL STUDENTS.

Students beyond the regular college class work in drawing are taught water-color painting, shading from casts, mechanical drawing, clay modeling, wood carving, and generally whatever they may be prepared to undertake.

STUDENTS' WORK.

The walls and halls of the drawing rooms contain many specimens of drawings by the students, consisting of flat designs, water-color drawings, crayon drawings from objects, and casts of ornaments and the human figure. Examples of clay modeling are also on exhibition, consisting of ornament, hands, faces, etc.; also simple wood carving.

STATE FAIR.

Quite a large collection of students' drawings and other artistic work was sent to the State Fair at Indianapolis in September, 1880. Although no premiums were offered for such work, three diplomas were awarded to as many departments.

WANTS—AN INDUSTRIAL ART MUSEUM.

Perhaps our greatest need now is an Industrial Art Museum—a museum containing examples of artistic workmanship for inspection and study by the students in industrial art and mechanics. Such a museum will be found more and more indispensable to the highest success of both our art school and school of mechanics. We can not long compete with the technical schools around us without such a museum. Some of our best students who believe they can make a success in artistic work, are preparing to go to other schools in order to have the benefit of art surroundings that we have not yet furnished.

Massachusetts has a very extensive museum of both industrial and fine art at Boston. Pennsylvania has two at Philadelphia, one at least largely industrial and enriched by many rare pieces of workmanship from the centennial exhibition. New York has two or more that are already large and still growing, open to the

inspection of practical workmen. Washington City has its Corcoran Art Gallery. Other collections in the east might be mentioned, but some of our nearest state neighbors are also in advance of us in this matter. Cincinnati has over \$300,000 in hand, donated by wealthy citizens, and is about to establish an art museum worthy of the Queen City. Prof. Ives, of St. Louis, has just returned from Europe, where he has purchased a large collection for an art museum at that place. Chicago, in the exposition building, has a permanent collection which is growing from year to year. The Industrial University at Champaigne, Ill., our immediate and nearest rival in industrial education, has a very useful and attractive museum of art donated by a wealthy citizen. Being thus somewhat surrounded with art museums, we believe the success of at least two schools, that of industrial art and mechanics demand that we make an immediate beginning at Purdue.

The sooner this beginning is made the better. Approved art workmanship, embodying principles of good taste in ornament and construction, is necessarily limited in quantity, and, being in demand for other museums, is growing scarcer from year to year.

As a beginning, let our State Legislature make a suitable yearly appropriation for a time, until the public see the great money value to the industries of the State arising from the proper use of such a museum.

We believe if the State should do this, the time is not far hence, when some wealthy citizen of this great State, or of this exceptionally wealthy city, who is inquiring in his mind how he may use his money to the best interests of his race and the perpetuation of his own good name, would establish and endow a museum of art, perhaps of fine art, as well as industrial art, in connection with the Purdue University.

A POTTERY WHEEL AND KILN.

According to the State Geological report, many counties in this State furnish excellent clays for pottery uses, fine brick, flooring tiles, terra cotta window and door caps, and other building ornaments. We believe there are only two establishments in this country that manufacture floor tiles, and one of them is at Indianapolis. This firm, at Indianapolis, we have been told, is to make the floor tiles for the new State House.

If we had a pottery wheel and a kiln we could show the students how to turn crockery ware and burn it, and also how to make such building material and ornaments as would enable the people to turn the very soil that clings to their feet into gold. The very clay that is the most useless for farming purposes, may become as valuable as a coal mine.

We would therefore recommend that a small appropriation be made for this purpose. If Purdue University is to answer the wants of working men, which is the united aim of the present Faculty, it must be provided with such appliances as are found in older countries and institutions. Whatever may be said with regard to the sources of wealth to a State, let it be remembered and acted upon, that nothing so enriches as skill in hands and fingers guided by knowledge.

Respectfully submitted,

L. S. THOMPSON,

Prof. Industrial Art.

IV.

SCHOOL OF CHEMISTRY AND PHYSICS.

REPORT OF LABORATORY.

PRESIDENT WHITE:—Since the last biennial report sixteen additional working desks for students have been added to the laboratory. In constructing these desks an attempt was made to correct a trouble which has always attended laboratory work, viz:

DEFICIENT VENTILATION.

In the students' work room in the laboratory there is absolutely no provision for ventilation, as it was originally constructed. In the old working desks an attempt was made to remedy this by building hoods against the wall and connecting them with flues in the wall. These flues, however, were strangely constructed to end in the attic, and hence afforded practically no ventilation at all.

The new desks were built with hoods over them. These were connected with a central pipe and carried through the attic to a chimney. The hoods were each provided with a gas-jet by means of which an upward draught of air could be secured.

This provision, inconvenient as it is, has afforded great relief, yet it is far from securing that purity of atmosphere which is so necessary to the health and comfort of the student. The number of students in the laboratory is rapidly increasing, and the problem of sufficient ventilation is one which should command the early and careful attention of the Trustees.

Few changes have been made in the course of instruction since the last report.

Compared with the earlier methods, more attention is paid to analytical chemistry in the first year. The reason of this is found in the fact that many of the students take only one year of chemistry and thus, if not instructed during this time in the principles of chemical analysis, they fail of securing such instruction altogether. So far the plan has succeeded beyond my expectations. Although the students, after so short a course of instruction, are not finished analysts, yet they succeed in acquiring so many of the principles of analytical chemistry, that it becomes possible for them to pursue their studies further when so inclined, without the help of an instructor.

CONTRIBUTIONS TO SCIENTIFIC LITERATURE.

The American student is in so much of a hurry to get into active life that he is not inclined to remain long enough in the laboratory to engage in original research. It is our hope that this fault may gradually be overcome and that every year will see an increasing number who are willing to carry scientific work to the point of actual progress.

As a result of this the contributions made to scientific literature have been the result of my own work, except in the case of the test for cobalt, which was worked out by Mr. G. L. Spencer.

Following is the list of contributions :

1. Determination of the absorption spectrum of uranine. American Chemical Journal, Vol. 1, No. 2.
2. A new reaction for cobalt. American Chemical Journal, Vol. 1, No. 2.
3. Preparation of carbon electrodes for the electric lamp. American Journal of Science, July, 1879.
4. Composition of the sap of the sugar maple, read at Saratoga meeting of American Association for Advancement of Science, Aug. 1879. Published in proceedings of same and American Chemical Journal, Vol. 1, No. 3.
5. A new method of collecting and measuring gases soluble in water. Saratoga meeting of American Association, Aug. 1879.

6. A new test for hydrochloric acid. American Chemical Journal, Chemical News, London; Chemisches Centrall-Blatt, Leipzig.
7. Optical properties of glucose. Boston meeting of American Association for Advancement of Science, Aug. 1880.
8. Influence of heating with dilute acids and shaking with bone coal on the rotatory power of glucose. Boston meeting of American Association for Advancement of Science, Aug. 1880.

Following are the above papers in full with the exception of No. 5. This can not be intelligibly given without cuts.

I.

Note on the Absorption Band in the Spectrum of Uranine.

BY H. W. WILEY.

[American Chemical Journal, Vol. I, p. 211.]

Having only a small quantity of uranine I took for the experiment .0038 gram. I dissolved this quantity in 500 c. c. of water and examined in a glass cell 12 m. m. thick.

.0038 in 500 c. c. of water gave a very dark band, the left edge of which is almost coincident with F line of the solar spectrum. The absorption band extended from this point almost half way through the green.

.0038 gram. in 1000 c. c. of water gave a distinct band.

.0038 gram. in 2000 c. c. still gave a distinct band.

.0038 gram. in 4000 c. c. gave a faint band.

.0038 gram. in 8000 c. c. gave no distinct absorption.

From the above it is seen that one part of uranine in one million parts of water is readily detected by its deportment in the spectrum. By increasing the thickness of the liquid traversed the delicacy of this reaction would be made more striking. I employed indirect sunlight for producing the spectrum and Vogel's spectroscope for absorption, in the observations. The examinations were made immediately after the solution of the substance.

II.

*Note on the Delicacy of the Test for Cobalt with Cyonide of Potassium and Yellow Sulphide of Ammonia.**

 BY H. W. WILEY.

[American Chemical Journal, Vol. I. p. 211-213.]

Mr. G. L. Spencer, under my direction, has lately made some experiments to determine the limit of the above named reaction for Cobalt.

.0924 gram. of cobaltous nitrate was dissolved in 100 c. c. of water, 1 c. c. of the solution in 1 c. c. of water, on addition of reagents gave a pronounced red color.

.2 c. c. in 1 c.c. of water gave a distinct red color.

.15 c. c. in 1 c. c. of water gave a faint red color.

.1 c. c. in 1 c. c. of water did not give an appreciable tint.

Thus, it is seen that less than .1 m. g. of cobaltous nitrate in 1 c. c. of water can be easily detected by the above method.

This quantity evaporated to dryness and collected as fully as possible failed to give a blue color with a borax bead.

Sulphide of ammonium and cyanide of potassium are therefore more delicate reagents for cobalt than borax.

The presence of zinc, nickel and manganese salts diminishes slightly the delicacy of this reaction.

One milligram of the cobalt salt however, in 1 c. c. of water could still be detected in the presence of three hundred times that weight of the compounds of the other three substances. I am having my students use this method and with satisfactory results.

* Tattersall, Chemical News, February 14, 1879.

III.

A Method of Preventing the too rapid Combustion of the Carbons in the Electric Lamp.

 BY H. W. WILEY.

[From the American Journal of Science and Arts, Vol. XVIII, July, 1879.]

In using the electric light for projections, two chief points are to be considered, viz.: 1st, brilliancy in illumination, and 2d, steadiness of the light.

When the source of electricity is sufficient, the first of these ends is easily obtained. The second, however, is not so easy of accomplishment. The chief difficulty in the way of securing steadiness is found in the carbons themselves. Some carbons, and I find these to be the most common, burn away so rapidly that, where no mechanism is present to produce alternating currents, the electric arc is constantly passing out of the focus. Often, too, I have found that when the current is quite strong with the softer carbons, the arc would extend itself momentarily between points as far as a centimeter from the end of the carbons. At other times it would revolve about the electrodes something like a spiral flame in a pyrotechnic display. This leaping and dancing of the arc is, of course, fatal to its employment for projection.

In order, if possible, to remedy these defects in a lantern which I have in almost daily use, I made the following experiments. I first took the specific gravity of three specimens of carbon, obtained from different dealers, one in France and two in this country. The specific gravity of the French carbon was 1.85; of No. 1, American, 1.53; of No. 2, American, 1.55. The French carbon is hard, of a grayish black color. The American carbon is soft, easily broken up, and has no sign of a metallic luster. The light from the French carbon is quite steady and displays very little of that tendency to flicker, so troublesome in the American varieties.

A positive French carbon, which had been used for several hours, until consumed nearly to the lamp, burned away at the point, but otherwise retained its original shape. This carbon was used without any previous preparation.

A soft carbon, however, of the same size as the preceding, became red hot to a distance of four to six centimeters from the end, and rapidly wasted away; after being in use for half an hour, it was reduced to a slender, tapering form.

I first tried the plan so well known in France, but so seldom tried here, of coating the carbons with a film of copper. The precipitation of the copper should take place slowly, and with a current so regulated in quantity and intensity as to produce no spongy deposits. When the soft carbons were thus prepared they worked beautifully for a short time. The light was brilliant and steady, while any green tint imparted to it by the volatilized copper produced no effect whatever prejudicial to the purpose in view. But as the carbons, little by little, became heated, the copper film oxidized, and after half an hour the carbon was again reduced to the slender form above described.

I next tried the expedient of setting a copper wire, 4mm in diameter, into the center of the carbons. With a thin saw I cut a longitudinal groove to the center of the carbon, and after inserting the wire fixed it in place by filling the groove with plaster. The upper end of the wire was left projecting so that it could be brought into actual contact with the clamp. I hoped from this contrivance to hold the origin of the arc steadily at the end of the carbon and, at the same time by increasing the conducting power, to prevent the heating and consequent rapid consumption of the electrode. In placing the carbons in the lamp the grooved sides were turned from the lens. This device proved very successful in securing a steady light, but the carbons were

heated to their points of insertion in the holders and wasted rapidly away. The point, it is true, remained blunt, but the stem of the carbon burned away so rapidly that the experiment must be regarded as unsuccessful.

It was evident from my first experiments with copper-plated carbons, that, if any way could be devised of protecting the copper from oxidation, the copper would prevent the carbon from heating by increasing its conductivity, and diminishing the resistance. I accordingly covered the carbons, after copper-plating with a film of plaster of Paris, about 1mm in thickness. After this had set, the edge of the carbon, which was to be turned toward the condenser, was carefully denuded of its plaster-covering, which was also cut away until quite thin on the adjacent surfaces. These precautions were taken so that the plaster might not interfere with the radiation of light in the direction of the condenser. Before use the plaster must be thoroughly and slowly dried. The copper surface at the end of the carbon being uncovered it is fastened in the holder in the usual way. The carbons prepared in the way described left nothing to be desired. The light was steady and the carbons burned slowly away. The film of plaster melted gradually as the point was consumed and thus never interfered with the illumination. The points of both positive and negative carbons remained blunt, and there was no wasting away of the stem. A carbon prepared in this way will last at least ten times as long as one used in the ordinary way. But the chief advantage is found in the comparative steadiness of the light thus secured.

Carbons of the above description work best when well plated. The following numbers give what I regard as a minimum amount of copper to secure satisfactory results. In all the experiments I have tried, the carbon has been of the soft American variety, with an average specific gravity of 1.55.

Length of carbon.....	17.5 cm.
Each side.....	1 "
Number cm^2 of surface including ends.....	72 cm^2
Weight before coppering.....	21.1615 g
Weight after coppering.....	24.0410 "
Weight of copper.....	2.8795 "
Weight to each cm^20397

In order to dispense with the use of a reflector, I arrange the + carbons above as described in the Journal of Franklin Institute for May and June, 1878.

The peculiar cup-shaped appearance of the positive carbon helps to concentrate the light in the condenser. It is understood that any lamp, in which the carbons are arranged end to end, can be used with electrodes prepared as above. Such a lamp can be easily substituted in a lantern made for use with oxy-hydro-lime light. I use constantly such a lamp with one of Edgerton's physical lanterns originally made for the lime light. I am inclined to think a kaolin paste would be better than plaster for coating the carbons. The electric force used in all the experiments has been furnished by the Gramme machine, described in the Journal of the Franklin Institute already cited.

The use of projections for illustration in lectures on Chemistry and Physics has become so general that I hope the suggestions in this paper may prove of some benefit.

IV.

On the Sugar Content of the Sap of the Maple Tree and the Pressure of the Same.

BY H. W. WILEY.

From the Proceedings of the American Association for the Advancement of Science, Vol. XXVIII, Saratoga Meeting, August, 1879.]

I was unable to find, in the limited literature at my command, any exact statement of the percentage of sugar in the maple sap.

Farmers state generally that 40 gallons of water are required to make one gallon of molasses.

As the maple syrup usually sent into market contains but little over 50 per cent. sugar it would seem that, if the general idea given above be true, there is but little more than 1 per cent. sugar in the sap.

The determinations of sugar were made by the new half-shadow polariscope manufactured by Schmidt & Haench, Berlin.

The orchard from which the specimens were taken is an old one which has been in use more than fifty years. It is situated two miles west of Lafayette.

My first determinations were made on the 21st of March after two days of a moderately hard freeze.

Specimens of sap were taken from twelve different trees selected so as to represent in size, shape, age, etc., the average growth of the grove.

Following are the percentages of sugar obtained. I also give specimens taken from the same trees four days later, March 25, after two days and nights constant running.

Nos.	Per cent. March 21.	Per cent. March 25.
1	3.95	3.44
2	2.95	2.63
3	3.26	2.80
4	2.70	2.34
5	2.70	2.60
6	3.20	2.42
7	2.51	2.00
8	1.95	1.87
9	3.08	2.00
10	2.67	2.34
11	2.70	2.11
12	3.51	2.74

The twelve trees above given had been "tapped" about a week before the examinations were made.

Wishing to try some perfectly fresh trees, specimens of sap were taken on March 25 from three fresh trees which gave in the polariscope the following numbers:

Nos.	Per cent. sugar.
1	3.93
2	3.75
3	2.42

When I was a boy there was, on my father's farm, a maple tree, which we, in honor of its excellence, had named the sweet tree. The woodpeckers were equally aware of its good properties and every spring when its "sap was up," would fill it with holes, and the escaping juice drying had colored the bark almost a perfect black. I sent for a specimen of the water from this tree and found the percentage of sugar to be 4.30. This tree, situated nearly two hundred miles south of the grove already mentioned, had just about ended its season when its specimen was taken in the latter part of March. I feel confident that had the specimen been taken in February or early in March it would have shown a percentage of sugar higher by two or three than the one given.

The sugar product is no inconsiderable item in the income of many parts of the western forest land. Among the causes which make it less may be reckoned a mild, irregular winter and long use of the trees. Variations during the season may be referred to the length of time the tree has been "tapped" and the *time* of the season. The sap seems to be richer in sugar early in the season and when the tree is first bored. Subsequent experiments will show if there be any marked annual variation in the amount of sugar.

PRESSURE OF THE SAP.

The mercury gauge of an ordinary Bunser filter-pump was used in these determinations.

The experiments made were at distances of one meter from the ground. My intention was to make an extended series of investigations at different distances from the ground but the abrupt close of the season prevented this from being carried into execution.

A proper opening having been made, the gauge was connected water tight with the tree by driving a brass tube into the hole, and connecting it by stout rubber hose with the gauge. The pressure in a number of experiments, was—

minimum = 33.4 c m
maximum = 55.4 " "

Omitted.

VI.

Detection of Hydrochloric Acid by Sulphuric Acid and Acid Potassium Chromate.

 BY H. W. WILEY.

[Reprinted from American Chemical Journal, Vol. II, No. 1.]

This well-known test is more conveniently made in the following way than by distillation in a retort as recommended by Fresenius and others. Two small beakers are used, the smaller of which will fit into the larger, leaving a space of two or three centimetres between the two bottoms. The chloride and chromate are well rubbed together and placed in the larger beaker, care being taken that none of the particles adhere to the side of the vessel.

A few drops of sulphuric acid are added, and the smaller beaker put in place. A lump of ice, and if necessary a little salt, is then placed in the smaller beaker.

The chlorochromic acid (so called) is given off at a very gentle heat and is readily condensed on the cold surface of the small beaker. If there is more than a mere trace of chloride a watch glass can be substituted for the inner beaker. After the reaction has ceased the small beaker is removed, and the usual test (ammonium hydrate) is applied.

I extend and modify this test in the following ways:

1. After adding a drop of ammonia to the chromium oxychloride (still on the bottom of inverted beaker) acetic acid is added in excess. A drop of lead acetate is then added. Lead chromate is precipitated. This will detect hydrochloric acid when so little is present that the change of color with ammonia is not perceptible.

2. This is an easier and far more delicate reaction. In fact it seems quite as delicate and far more striking than the test with silver nitrate. The chromium oxychloride is prepared as above. With a stirring rod a fraction of a drop of sulphuric acid is placed in a porcelain dish, and by its side a minute crystal of strychnia. The stirring rod is then touched with the oxychloride, and this is stirred with the sulphuric acid and strychnia. The "color test" for strychnia is developed with even greater brilliancy than with potassium pyrochromate. The merest trace of a chloride is most unmistakably revealed by this test.

If bromides are present they do not at all interfere with the above reaction. Bromine itself with strychnia and sulphuric acid will not give the color test. If bromides are present, moreover, it is not difficult to detect them at the same time with the chlorides. The bromine formed is readily condensed and can be then easily detected. With iodides the case is quite different. In many cases I have found no trace of chromium oxychloride when both chlorides and iodides are present. At other times, the iodine

which is set free seems to be dissolved in the oxychloride. In such cases on adding ammonia to the reddish yellow liquid, the whole mass turns black from the formation of iodide of nitrogen. On filtering this off the reactions for the chloride can be obtained in the filtrate, but without exactness. The iodide of nitrogen on the filter paper will, when dried, explode spontaneously, or when scratched or jarred. Prepared in this way the iodide of nitrogen appears to be of a better quality than that prepared by the ordinary methods.

I have yet to investigate the order of succession of the phenomena above mentioned as influenced by varying proportions of the several substances in the mixture. I have not been without a suspicion that bromides might possibly give rise to a trace of chromium oxybromide when treated as described. I have not, however, been able to procure an absolutely pure bromide with which I could subject the matter to the test of experiment. All the authorities, however, which I have consulted, agree that only pure bromine is produced. The bromides I have tried have all given faint reactions by the strychnia test, but I can not say that they do not contain a trace of chlorine. If some one in possession of an absolutely pure bromide would make the experiment the result would be of interest. I am still investigating the anomalies produced by the admixture of iodides.

VII.

The Rotatory Power of Commercial Glucose and Grape Sugar. Method of Determining the Percentage of Reducing Matter present by the Polariscopes.

BY H. W. WILEY.

In "the trade" the name grape sugar is applied only to the solid product obtained from the starch, while 'glucose' is the appellation given to the thick syrup made from the same material. I shall use the words in the commercial sense. When I desire to speak of the actual amount of matter present in the sample capable of reducing at once the alkaline copper tartrate solution, I shall call it reducing matter.

INSTRUMENTS.

I used in these examinations two polariscopes, both made by the same firm, Schmidt & Haensch, Berlin.

The readings of these instruments after correction for displacements of the zero point, agreed well together.

The one was the instrument ordinarily in use, in which 26.048 grams of sugar in 100 c. c. give 100 divisions on the scale. The other was the Laurent "half shadow" reading for the same amount of sugar the same number of divisions. In addition to this scale the "half shadow" has another which gives the actual angular rotation. This is especially convenient when the specific rotatory power of a substance is to be determined. The angular rotation, however, can be calculated from the former instrument. For if we take the molecular rotatory for pure sugar (cane) at 73°S, then we have the following equation:

$$73.8 = \frac{\text{angle} \times 100}{2 \times 26.048}; \text{ whence angle} = 38.45.$$

Each division on the cane sugar scale is, therefore, equal to $.3814^\circ$ angular measure. This quantity corresponds to the transition tint. It is, of course, different for the different colored rays.

In the 'half shadow' instrument, one particularly valuable for persons afflicted with any degree of color blindness, the monochromatic light coming from the sodium-Bunsen lamp passes through a crystal of potassium acid chromate. The ray thus produced is less rotatable than the "transition tint."

For instance, when the instrument gives 100 divisions on the cane scale it shows an angular rotation of only $34^{\circ} 42' = 34^{\circ}.7$.

$$\text{Sp. rot. pr.} = \frac{34.7 \times 100}{2 \times 26.048} = 66.6$$

To determine the specific rotatory power for any other substance which has been determined for the transition tint we multiply that number by the fraction .9024.

Thus, if we take the specific rotatory power of dextrin for the transition tint at 139° , for the "half shadow" tint it will be $139 \times .9024 = 125.^\circ 4$.

These data rest upon the accepted formulæ—

$$\begin{aligned} 1. \text{ Specific rotatory power} &= \frac{a}{e.d.x.} \\ 2. \text{ " " " " } &= \frac{a.x.v}{x.w} \end{aligned}$$

Here: α = Angular rotation.

v = Volume of the solution.

e = Amount of the substance in one gramme of the solution.

d = Specific gravity of solution.

x = Length of tube, containing the solution, in decimeters.

w = Weight of substance in grammes.

Since 100 divisions of cane sugar scale give, in the 'half shadow,' 34.7, each division of the cane scale is equal to 0.347, angular rotation.

MATERIAL.

Nearly all of the material which I employed was manufactured by the Peoria Grape Sugar Company, Peoria, Illinois.

The grape sugar examined was made in Buffalo.

PROCESS OF MANUFACTURE.

This glucose is made by the process of open conversion, the starch and acid being boiled together by means of steam in a wooden tank for about two hours. As soon as a specimen of the milky liquid taken from the converter ceases to react for starch with iodine the operation is suspended.

On the other hand "grape sugar" is the name applied to the product which solidifies after the process is complete. This product is generally of late made by "close conversion" in stout copper cylinders and under a high pressure of steam. The conversion takes place thus much sooner and is carried further—i. e., is continued for some time after the starch reaction ceases to be manifested.

Chemically the two products differ only in the percentage of reducing matter they contain, as will appear from the figures given below.

The syrupy glucose is a thick tenacious liquid of a light color, inclining to yellow and differing much in different specimens. It has an average specific gravity of 1.416 and turns the plane of polarized light strongly to the right.

Its average specific rotatory power for the yellowish red ray of the "half-shadow" is not far from 85° . For the purple ray it is equal to 94° . It however varies extremely in different specimens. The following table will show the range of these variations.

Hereafter I will call the specific rotatory power T.

TABLE I.

Showing Variations of T in Different Specimens of Glucose and Grape Sugar.

No.	T	Sp. gr.	No.	T	Sp. gr.
1	91.50	1.406	11	89.36	1.416
2	91.50	1.407	12	87.73	1.422
3	98.10	1.440	13	89.77	1.417
4	79.93	1.414	14	70.84	1.463
5	75.47	1.414	15	69.40	1.463
6	83.97	1.417	16	87.67	1.412
7	82.75	1.416	17	109.99	1.427
8	86.41	1.415	18	93.17	1.431
9	84.11	1.416	19	89.75	1.409
10	87.19	1.417	20	91.31	1.421

From a study of this table it is seen that within small limits T is independent of the specific gravity of the solution. Nos. 14 and 15 were solid grape sugar. The law holds good for these also, although the sp. gr. is much higher. In Nos. 3 and 17, however, we notice a marked increase in T in conjunction with the increase in density.

In masses of homogeneous nature and structure we should expect *a priori* that T would always be proportional to the density of the body, i. e., to the amount of matter optically active in a unit number of grammes. I am speaking only of bodies which, like sugar and syrup, contains mostly optically active matter and water. Generally the amounts of other bodies in sugars and syrups do not materially affect their densities. It is thus seen, without further argument, that commercial glucoses are not optically homogeneous, even when made in the same factory and by processes which do not sensibly vary.

What is the cause of this peculiar action? this molecular optical inconstancy?

As a further proof, however, that this irregularity does not depend on the density alone, the case of No. 17 in the above table may be cited. This number presents an extreme case—a maximum of optical gyratory power. But we can not explain this *per saltum* increase as in the case of No. 3 from the marked increase in density alone. In No. 3 the sp. gr. = 1.440, which is greater by .03 than the mean. In No. 17, however, no such difference is to be found. Its sp. gr., 1.427, does not differ greatly from the mean. At least it does not differ from the mean much more than Nos. 1 and 12, where no such marked optical difference occurs.

The further study of these optical reactions convinced me that the dextro-rotatory power of commercial glucose increased as the percentage of pure glucose or reducing matter diminished.

This indeed is what we could foresee from theoretical considerations if it is remembered that starch, sugar and syrup are mixtures of glucose and dextrin and perhaps a small amount of some other optically active body. But dextrin has a higher value for T than glucose. For dextrin $T=125^\circ$ for the sodium bichromate ray.

Commercial glucose being chiefly formed of these two components, it follows that when the per cent. of glucose is low and the per cent. of dextrin high, T will be proportionately increased. On the contrary T is diminished when these bodies are present in inverted proportions. Let us see how far these theoretical considerations are verified by the facts.

The following table shows the value of T and the corresponding amount of pure glucose or reducing matter contained in the sample as determined by Fehling's solution:

TABLE II.

Showing Value of T and Percentage of Reducing Matter.

No.	T	Per Cent. Reducing Matter.	No.	T	Per Cent. Reducing Matter.
1	91.50	53.20	11	89.36	53.50
2	91.50	52.36	12	77.73	56.49
3	98.10	54.60	13	89.77	52.36
4	79.93	61.73	14	70.84	69.93
5	75.47	62.50	15	69.40	69.30
6	83.97	59.35	16	87.67	56.34
7	82.75	61.40	17	109.99	39.22
8	86.41	58.80	18	93.17	57.14
9	84.11	58.55	19	89.75	54.37
10	87.19	55.60	20	91.31	56.81

A brief discussion of the numbers in this table will prove that the provisions of theory were correct. As the per cent. of reducing matter increases, the value of T diminishes, and *vice versa*. Nos. 14 and 17 are types of the action of this law. They represent the minimum and maximum amounts of reducing matter, and also the maximum and minimum values of T, not counting the slightly less value of T in No. 15. Nos. 3, 18 and 20, by reason of their high specific gravities, are not considered here.

Having thus established the law that the per cent. of pure glucose or reducing matter in the commercial article is in general inversely as the value of T, it is next proposed to investigate the relation between these two quantities, and determine whether it is constant or variable.

It is seen from Nos. 1 and 2 of the preceeding table that $91.50 = T$ corresponds to 52.78 per cent. of pure reducing matter. Let us say, for convenience of calculation, that $T = 91.50$, corresponding to 53 per cent. of reducing matter.

Let us consider next some of the cases in which the value of T differs widely from 91.50.

We see an example of this in No. 17. The difference is $109.99 - 91.5 = 18.49$.

The difference in the per cent. of reducing matter is $53 - 39.22 = 13.78$ per cent.

Thus an excess of T above 91.5 of 18.49 corresponds to a deficit of 13.78 in the percentage of reducing matter. Therefore a variation of each degree in T above 91.5 corresponds to a diminution of .745 per cent. in the amount of reducing matter present.

By a similar calculation with the other data furnished by the preceding table I have found, not including Nos. 3, 18 and 20, that a variation of every degree in T from 91.5 corresponds to an inverse variation of nearly .75 per cent. in the reducing matter present. This number indeed seems to lie between .75 per cent. and .7856 per cent. I will give the calculations for the first of these numbers and compare them with the numbers obtained by analysis.

TABLE III.

No.	Variation of T.	Per cent. .75 factor.	Per cent. Reducing matter by copper test.
	0	-53	53.20
2	0	+53	52.36
3	-12.08	+62.06	61.73
4	-16.03	+65.03	62.50
5	-7.53	-58.64	59.35
6	-7.75	-59.57	61.40
7	-5.09	-56.81	58.80
8	-7.44	+58.58	58.55
9	-4.30	-56.21	56.60
10	-2.14	+54.62	53.50
11	-3.77	-55.82	56.49
12	-1.73	-54.29	56.18
13	-20.66	-68.32	69.93

TABLE III.—Continued.

No.	Variation of T.	Per cent. .75 factor.	Per cent. Reducing matter by copper test.
14	—22.10	+69.56	69.30
15	—3.83	—55.88	56.09
16	+18.49	—39.14	39.22
17	—1.75	+54.32	54.05
18	— .19	53.4	56.81
19 ₃	+6.60	47.15	54.60
20 ¹⁸	+1.66	51.75	57.14

In the above calculations, excluding Nos. 18, 19 and 20, the per cent. of reducing matter as calculated by the polariscope, falls short of the amount obtained by the alkaline copper test ten times, with an average of 1.018 per cent. It exceeds the amount obtained by the copper test seven times, with an average of .75 per cent.

Thus, in the cases examined, which are not selected, but taken directly from the factory as manufactured, the polariscope gives the average per cent. of reducing matter within less than one per cent. This is certainly accurate enough for practical purposes.

The three exceptions were those to which I have already referred as having exceptionally high specific gravities. They are given as Nos. 18, 19 and 20 in the above table.

Perhaps a larger number of determinations should be made before constructing a formula for determining the amount of reducing matter present in a "straight" glucose by the polariscope. Nevertheless, the seventeen determinations given in the above table can be taken provisionally until more data are accumulated.

We may have three cases—

1st. The value of $T = 91.50$.

2d. The value of $T < 91.50$.

3d. The value of $T > 91.50$.

In the first case the per cent. of reducing matter in the substance will be nearly 53. In the second case the per cent. of reducing matter may be found by the following formula: Let a =difference between T and 91.50.

G =per cent. of reducing matter

Then $G=53+a \times .75$.

In the third case we have

$G=53-a \times .75$.

The above formulæ give results in general within at most 1 per cent. of the truth whenever the sp. gr. of the substances does not vary greatly from 1.416 or 1.463 if the grape sugar be of the solid semi-crystalline type.

Since grape sugar solidifies by incorporating one molecule of water, I was led to suspect that the increase in the specific gravity of the solid body was due rather to this molecular condensation than to the greater degree of concentration of the original substance.

To test this I subjected 7.215 gr. of grape sugar to the action of the paraffine bath at 170°. It lost in two hours .67 gramme which gives 9.29 per cent. of water. Further heating showed only a loss of a few milligrammes.

A glucose when subjected to the same test gave 11.93 per cent. water, the specific gravity of the specimen being 1.416. The per cent. water in grape sugar corresponds more nearly to glucose of 1.430 sp. gr.

My supposition, therefore, concerning the high specific gravity of the grape sugar, was not wholly correct, since it really contains nearly 3 per cent. less water than the glucoses of 1.416 sp. gr. I will, therefore, not insist on the application of this rule to grape sugars until I have an opportunity to investigate them further. It is hardly probable, however, that its application to the two cases in question should be a mere coincidence. I made frequent attempts during the whole of the past month to get other samples for examination, but without success.

In order to make this rule of more general application, I have modified the calculations so as to apply the formulæ directly to the cane sugar scale. This makes it useful for any kind of polariscope. To this end, for instruments using 26.048 gr. of sugar for 100°, it is convenient to use only 10 grs. of the substance. This is the quantity which has been employed in the following experiments. If 26.048 grs. are taken the neutral point is thrown entirely beyond the limit of the cane sugar scale.

The average reading, for ten grammes made up to 100^{cc}., on the cane sugar scale is about 50 divisions.

In the following table will be found the results of the experiments:

TABLE IV.

No.	Cane Sugar Scale.	Calculated Per Cent. Reducing Matter.	Per Cent. Reducing Matter by copper test.	Difference.
1	52.65	53.43	53.20	+ 23
2	52.65	53.43	52.36	— 1.07
3	46.07	61.66	61.73	— .07
4	43.05	64.9	62.50	+ 2.40
5	48.04	58.75	59.35	— .60
6	47.7	59.63	61.40	— 1.77
7	49.8	57.00	58.80	— 1.80
8	48.45	58.56	58.55	+ .01
9	50.26	56.45	55.60	+ .85
10	51.50	54.88	53.50	+ 1.30
11	50.57	56.04	56.49	— .45
12	51.74	54.58	56.18	— 1.60
13	40.83	68.21	69.93	— 1.72
14	40.00	69.25	69.30	— .05
15	50.53	56.09	56.34	— .27

TABLE IV.—Continued.

No.	Cane Sugar Scale.	Calculated Per Cent. Reducing Matter.	Per Cent. Reducing Matter by copper test.	Difference.
16	63.8	39.50	39.22	+ .28
17	51.73	54.37	54.05	+ .32
18	52.63	53.46	56.81	
19	56.53	48.59	54.60	
20	53.7	52.1	57.14	

Starting with Nos. 1 and 2, and discarding small fractions to facilitate calculations, we see that 53 divisions on the sugar scale correspond to 53 per cent. reducing matter nearly. By a method of calculation similar to the one employed in determining the value of the fluctuations of T I have found that each degree of the sugar scale above or below 53 corresponds to an inverse variation of 1.25 per cent. in the amount of reducing matter present.

We have then simply to take 10 grams of glucose, make up to 100 c. c. fill 200 m. m. observation tube, and take the direct reading on the cane sugar scale. We find the difference between this reading and 53, multiply this difference by 1.25 and add or subtract the product from 53. The result will be the percentage of reducing matter present. I will state that this factor 1.25 is a provisional number subject to some small correction which can only be applied by the study of a larger number of samples. In all cases the specific gravity of the syrup should not vary greatly from 1.416. I have only studied two specimens of the solid grape sugar. These show that the specific gravity of the solid in order that it conform to the rule should not be far from 1.463.

We have then, as before in the calculations, three cases—

1st. 53 divisions of cane scale = 53 per cent.

Let g = per cent reducing matter.

a = reading of cane sugar scale.

2d. $G = 53 + (53 - a) \times 1.25$, when

a is less than 53.

3d. $G = 53 - (a - 53) \times 1.25$, when

a is greater than 53.

It is by these formulæ that the percentages of reducing matter in glucose and grape sugar have been calculated in Table No. IV.

In seven of the first seventeen cases the per cent. of reducing matter exceeded that given by the copper test, and by a mean amount of .539 per cent.

In ten of them it fell short, and by a mean amount of .938 per cent.

It is thus seen that this method can be relied upon for giving results which do not vary from the copper test, except by the fraction of one per cent. Not much more, in the way of accuracy, can be said for the copper test itself. In Nos. 18, 19 and 20 we have again the cases where the specific gravity differed by a notable quantity from the mean 1.416.

I next proceeded to investigate the causes of this variation in Nos. 18, 19

and 20, and soon found that the chief of them was the greater degree of concentration of these specimens. One of them, No. 19, had been made especially for confectioners' use, and Nos. 18 and 20, were what is called "heavy goods."

I determined the amount of water which these samples contained, and compared it with the amount contained in other samples of a different specific gravity. Following are the results of this work:

DETERMINATIONS OF WATER IN SAMPLES OF GLUCOSE.

I.

Glucose sp. gr. = 1.440
 Wt. taken = .515
 Loss = .350 at 170° 2 hours.
 Per cent. water = $.35 \times 100 \div 5.515 = 6.37$.

II.

Glucose sp. gr. = 1.431
 Wt. taken = 5.860
 Loss = .530 at 170° 2 hours.
 Per cent. = $.530 \times 100 \div 5.860 = 9.05$.

III.

Glucose sp. gr. = 1.409
 Wt. taken. = 4.038
 Loss = .622.
 Per cent. water = 15.40, 170° 3 hours.

IV.

Glucose sp. gr. = 1.416
 Wt. taken. 4.425
 Loss = .525.
 Per cent. water = 11.93, 170° 2 hours.

V.

Glucose sp. gr. = 1.417
 Wt. taken = 8.639
 Loss = 1.091.
 Per cent. water = 12.70, 170° 3 hours.

VI.

Solid grape sugar sp. gr. = 1.463
 Wt. taken = 7.215
 Loss = .61.
 Per cent. water = 9.29, 170° 3 hours.

The temperature in the above determinations was kept nearly at 170°. The samples were contained in a platinum dish.

Where larger quantities were taken as in V and VI, the time was extended to three hours.

These data are hardly sufficient to establish a rule for corrections for specific gravity.

The rule $53=53$ seems applicable to samples in which the per cent. of water is 12 to 14, and specific gravity, 1.412—1.416. For each variation of .001 in the specific gravity from these standards the percentage of water appears to vary about .3.

Thus if we take the two extreme cases, viz: 6.37 and 15.40 per cent of water we find the corresponding specific gravities to be 1.440 and 1.409; a difference of .031.

The difference in the per cent. of water is .0903. The quotient of $.0903 \div .031$ is 3 nearly.

Let us apply this principle, which of course does not include the grape sugar numbers, to the correction of Nos. 18, 19, and 20 in table IV, where the per cent. of reducing matter by calculation from the polariscope is quite different from that given by the reduction test. I give below the numbers and also their corrections:

	Cane Sugar Scale.	Reducing Matter by Calculation.	Corrected.	Copper Test.
No. 18	52.63	53.46	55.83	56.81
" 19	56.53	48.59	55.17	54.60
" 20	53.7	52.1	56.55	57.14

These corrections were based on the supposition that $53^{\circ} = 53$ per cent. reducing matter, when the sp. gr. = 1.409 and the per cent. of water = 15.

It is seen that these three numbers which gave such irregular results from the direct readings are nearly exact, after correction. We may, therefore, construct this provisional formula for estimating the correction which the readings of the cane sugar scale should undergo before being used for the calculation of the pure glucose present.

Let a = Direct reading of cane scale.

a^1 = Corrected reading of cane scale.

e = Sp. gr. of the sample.

Then $a^1 = a - 3a(e - 1.409)$ when the sp. gr. is more than 1.409.

And $a^1 = a + 3a(1.409 - e)$ when e is less than 1.409.

It appears from these numbers that the polariscope is capable of affording us exact knowledge of the percentage of reducing matter in a glucose or grape sugar.

O'Sullivan has explained these optical anomalies by showing the existence of a new sugar isomeric with cane sugar, but with a higher rotating power than glucose. I have not had access to his papers, and have had no opportunity to review his work.

VIII.

The Effect of Heating with Dilute Acids and Treating with Animal Charcoal on the Rotatory Power of Glucose; with notes on the Estimation of Cane Sugar and Glucose in Mixtures.

BY H. W. WILEY.

Shaking dilute solutions of glucose or grape sugar with animal charcoal produces a slimy precipitate.

I use the words *glucose* and *grape sugar* in their commercial sense. By *glucose* I mean the thick syrup made from corn starch and by *grape sugar* the solid product made from the same substance.

By *pure glucose* I mean the substances present capable of reducing the alkaline copper solution. I will not take time here to discuss the propriety of these names nor the exact nature of the substances present.

I have made some experiments to determine the effect of animal charcoal on the rotatory power of the glucose of commerce.

Following are some of the results obtained.

In each case 10 grams of the substance were taken and made up to 100 c. c. The observation tube was 200 m. m. in length.

EXPERIMENTS.

I.

Reading before addition of coal.....	52°
After shaking with 20 grms. coal.....	47.20
Loss.....	4.80

II.

Reading before.....	52°.63
After addition 10 grms. coal.....	50.28
Loss.....	2.35

III.

Reading before.....	52°.63
After addition 4 grms. ivory block.....	52.38
Loss.....	.25

IV.

Reading before.....	52.20
After addition 4 grms. ivory block.....	51.13
Loss.....	1.07

V.

Reading before.....	52 .20
After addition 10 grms. ivory block.....	48 .13
Loss.....	4 .07

From these figures it is seen that a glucose may lose nearly 10 per cent. of its rotating power when shaken with animal charcoal. This is a matter of great importance when attempts are made to examine commercial syrups with the polariscope.

These syrups are usually highly colored, and require a great deal of bone, black and lead acetate to make them fit for polariscopic examination. I have not yet tried the action of lead acetate on the rotatory power of glucose.

HEATING WITH DILUTE ACIDS.

The following readings, as well as those in the preceding part of this paper, are divisions on the cane sugar scale.

I.

A glucose gave direct reading.....	53°.7
Heated to 68° with 10 per cent. of its volume of strong sulphuric acid. Reading.....	52.96
Loss.. ..	.74

II.

Heated same glucose for 50 minutes at 68°	
Reading.....	50°.76
Loss.....	2.94

III.

Direct reading of another glucose.....	43°.36
Heated for 10 minutes at 68° with 10 per cent. of its volume strong HCl.	
Reading	43.02
Loss.....	.34

IV.

Heated same glucose 20 minutes at 68°	
Reading	42.36
Loss.....	1.00

V.

Heated same for 30 minutes at 68°	
Reading	40.16
Loss.....	2.86

VI.

Heated same for one hour at 68°

Reading	39.26
Loss.....	4.10
The per cent. of reducing substance in the above sample before heating with the acid was.....	62.50
After	65.58
Increase	3.08

Thus a loss of 4.10 on the cane sugar scale corresponded to a gain of 3.08 per cent. in reducing power.

VII.

A grape sugar gave direct reading.....	40.83
Heated with 1 1-5 its volume strong HCl. for 20 minutes at 68°	
Reading	31.70
Loss.....	9.13

VIII.

A grape sugar gave direct reading.....	40.00
After heating with 1 1-5 volume HCl. for 15 minutes at 68° gave reading	32.52
Loss.....	7.48
The per cent. of reducing substance in the above was—	
Before heating.....	69.30
After heating.....	71.50
Gain.....	2.20

Thus a loss of 7.48 divisions in rotating power corresponded only to an increase of 2.20 per cent. in reducing power.

It will be seen by inspection of the foregoing numbers that glucose and grape sugar undergo quite a degree of change when subjected to the process of inversion as it is practiced on cane sugar.

This change is sufficiently great to introduce an appreciable error into the process of estimating cane sugar and glucose in mixtures.

CONVERSION OF THE WHOLE OF THE OPTICALLY ACTIVE SUBSTANCES IN GLUCOSE INTO PURE MONO-ROTATORY GLUCOSE.

I next made an attempt to convert the whole of the optically active substances present in glucose into pure glucose by prolonged heating with dilute sulphuric acid.

The conversions were made in a flask fitted with a glass tube about one metre in length.

By this device, vapors arising are condensed and flow back into the flask. Thus no loss of volume takes place.

The flask was at first heated in a water bath at 100°.

The conversion, however, took place so slowly by this method that I afterwards added enough salt to the bath to raise the temperature to 104°. The sulphuric acid employed was of 1.25 sp. gr., and was used in the proportion of 10 per cent. of the volume of the glucose solution. The readings were made in a tube longer by 1-10 than half the length of the 200 m. m. and the results multiplied by 2.

The following table contains the results of my work.

Nos. 1, 2 and 3 were heated at 100°; No. 1 for 6 hours; No. 2 for 4 hours, and No. 3 for three hours.

Nos. 4, 5 and 6 were heated for 3 hours at 102°.

Nos. 7, 8, 9, 10, 11 and 12 were heated for 3 hours at 104°.

TABLE I.

No.	Reading Before Heating.	Per ct. Red. Matter. Before Heating.	Reading After Heating.	Per ct. Red. Matter After Heating.
1	52.65	53.20	25.92	81.30
2	48.40	59.35	27.14	80.00
3	48.45	58.55	26.10	80.00
4	43.50	62.50	24.72	79.00
5	50.26	55.60	24.18	82.00
6	51.50	53.50	25.38	81.14
7	52.65	52.36	25.89	83.33
8	56.53	54.60	27.36	90.10
9	51.74	52.36	26.19	82.00
10	47.70	61.40	25.36	82.64
11	49.80	58.80	26.02	84.00
12	40.83	69.93	26.07	84.80

In all cases the samples assumed a decidedly yellowish tint before the completion of the operation, interfering somewhat with the delicacy of the final readings.

No. 8 was a sample of glucose made for confectioners' use. If we exclude it we get the following general results: 1. The percent of reducing substance obtained is nearly 82.00.

2. The average reading of the cane sugar scale is nearly 25.5 divisions.

3. If the pure glucose present is mono-rotatory the specific rotatory

power T would be $T = \frac{8^{\circ}.85 \times 100}{2 \times 8.2} = 54$ nearly. $8^{\circ}.85$ is the angular rotation (half

shadow) corresponding to 25.5 divisions of the scale. But the specific rotatory power of pure glucose for the half shadow polariscope is nearly 50. We have then here an excess of T equal to 4.

4. This excess is due to the presence of optically active matter of a higher specific rotatory power than pure glucose which has not been changed even by prolonged boiling with dilute acid.

I conclude therefore that it is quite difficult to convert the whole of the optically active matter into pure mono-rotatory glucose.

EXAMINATION OF MIXTURES.

In the examination of mixtures of cane sugar and grape sugar, it is necessary first to obtain the direct reading. Afterwards the cane sugar is to be inverted, using at most not more than ten minutes for this, and keeping the temperature at 68°. It is simply necessary to heat to 68°, and then quickly cool.

After inversion the temperature is carefully noted and another reading taken. Then by Clerget's table the per cent. of cane sugar is calculated. This, however, will only be approximately correct. We next calculate the whole amount of rotation produced by the approximate amount of grape sugar present. Having determined this, the reading after inversion is to be corrected for the effect of inversion on the rotatory power of the grape sugar present. The average correction, when the heating has been carried just to 68°, will be about 2 per cent. of the whole rotation due to the grape sugar. If the process of inversion is carried on for an hour, as is the practice with some, this correction may amount to 10 per cent.

If the amount of glucose present is very small, this correction can be neglected. But if the amount is large a failure to correct will introduce an appreciable error into the result. If animal charcoal has been used a correction must be made also for it—depending as has been shown upon the amount employed, and also upon some other conditions which are not yet clearly made out.

It is easy to see into how grave an error we might fall should we attempt to estimate directly the per cent. of reducing substance present in such mixtures from its rotatory power. I have shown in a previous paper that the per cent. of such reducing substance is not *directly*, but *inversely*, as its rotatory power.

The error would be equally as grave if the amount of the grape sugar present should be computed by using a factor supposed to represent the amount of such substance for each division of the scale. Such a method is based upon the assumption that the rotatory power of grape sugar is constant and proportional to the reducing substance present. My paper already mentioned shows that this assumption is false.

SYRUPS.

When we come to the syrups of commerce, the case becomes still more difficult. These syrups are glucose adulterated with so-called cane syrups, *i. e.*, with the drippings and refuse of the sugar refineries.

Among the syrups which are commonly used I may mention the Revere and the Continental.

A Revere syrup which I examined had a specific gravity of 1.425 and contained 34.5 per cent. cane sugar.

A Continental syrup had a sp. gr. of 1.415 and 35.7 per cent. cane sugar.

It also contained of inverted sugar 32.64 per cent. It is easy to see how the admixture of such syrups with glucose tend to demoralize the results of the alkaline copper test and mystify the readings of the polariscope.

No wonder that heretofore such egregious blunders have been committed in these examinations. It is only when they are made with a full knowledge of the optical peculiarities of the commercial glucose itself, and of the composition of the cane syrups employed, while at the same time attention is paid to the changes produced by inversion and clarification, that they can be relied upon as correct.

OBSERVATION TUBES.

In the polariscopic observation of inverted sugars I use a copper tube silver plated inside and out. I find the most convenient length to be 110 m. m.

This enables the readings to be made without the trouble of neutralizing the acid.

The silver plating of the tube is not necessary but it makes the working with it a little cleaner. Pure copper can be used without any danger whatever of the acid acting on it.

I use a tube of thin copper and of small diameter. A few c. c. will fill one of these tubes. Such a tube, when filled, quickly takes the temperature of the surrounding air. I have found by experiments that when such a tube is filled with a liquid several degrees above or below the temperature of the air, in twenty minutes it will differ by less than half a degree from that temperature.

If an ordinary glass tube is employed it is quite difficult to say how much time will be required to restore the equilibrium of temperature. My experiments show that it will require from two to three times as long.

I also provide this tube with a metallic jacket, very conveniently made of a piece of zinc tubing. This jacket is a little less in diameter than the metallic caps of the tube and is of such a length that when the caps are screwed on the jacket fits against a shoulder turned on them. The joint is made water tight by using a rubber packing. This jacket is furnished with three openings fitted with short tubes. One in the center carries a thermometer. One at each end serves as a supply or exit tube for any liquid which we may wish to pass through the jacket.

By simply drilling a hole in the trough of the polariscope for the exit tube the whole apparatus can be placed at once in position.

If now you wish to make a reading at a temperature, say of 88°, it is done in the following way: In a large flask or tank, placed at one side and above the polariscope, and holding several litres water, is heated to a temperature of about 92°. By a rubber tube, this is connected on the principle of a syphon with the observation tube and its jacket. By means of a pinch-cock attached to the exit tube, the hot water is allowed to flow through the jacket until its thermometer shows the temperature desired. It is hardly necessary to say that the observation tube must be filled at a temperature near that at which the reading is to be made to prevent expansion.

If we desire to make a reading at 0°, corresponding to 44° to the left Clerget, we replace the water by alcohol, which is cooled by a salt and ice bath to 3° or 4°. The apparatus is then used as before.

We have thus a means of making readings at any desired temperature without having to mutilate the polariscope as is done by fitting it with a water bath. I will say, however, that a judicious use of Clerget's principle renders readings at a given temperature unnecessary. They are, however, useful in certain complex mixtures, by doing away with certain calculations.

I propose next to extend my investigations to candies and other confections, in which glucose enters as an ingredient.

APPARATUS AND SUPPLIES.

The rapidly increasing number of students has made it imperative to increase the supply of apparatus. I would urge upon the board of trustees the importance of securing a specific appropriation for this purpose from the incoming Legislature. If a liberal appropriation can be secured and made available at once, we will be able to secure a profit of nearly forty per cent. by purchasing supplies abroad. As is well known, apparatus intended for institutions of learning, is not dutiable, and if sufficient funds are placed at our disposal to justify an European order, the whole of the duty can be saved. Thus an appropriation of three thousand dollars, made available at once, would enable us to purchase goods in Europe for which we would have to pay five thousand dollars here.

I therefore urge the propriety and economy of securing such an appropriation and making it all available at once.

I take pleasure in reporting that my department was never in a more encouraging condition than at present.

Students are industrious and enthusiastic, and I do not exaggerate, when I say that they devote double the time required of them to their studies and work.

With the liberal support which I think we have deserved of the State, it is hoped that the future work of the laboratory may be more thorough, extensive and practical than it has been heretofore.

HARVEY W. WILEY,

In charge of Physics and Chemistry.

V.

SCHOOL OF NATURAL HISTORY.

To the President :

SIR :—I beg herewith to submit a brief report of the condition of the museum and cabinet, together with a statement of the needs of the department. Inasmuch as I entered upon my duties as instructor at the beginning of the present term, it will be impossible to give any account of work done the past year. Allow me, therefore, to substitute a statement of the future aims of the instruction.

It is a matter of congratulation among the friends of the institution and of remark by visitors, that so much has been done in so short a time in the formation of a museum of natural history. It is hoped that this rapid accumulation will not cease, and that what is brought together will not only be large in quantity but great in value.

I consider that the prime object of a collection in an institution such as this is designed to be, is to illustrate adequately the subjects taught. When this is attained the directors of the museum may enter profitably upon the task of making the collection of value for scientific study by making it complete first in some special department and then in others, gradually increasing the number of these as money and facilities increase.

ZOOLOGICAL COLLECTION.

This collection embraces, at the present time, several articulated skeletons, a few stuffed mammals, about 200 specimens of mounted birds, mostly from Indiana, alcoholic specimens of reptiles, batrachians and fish, a number of boxes of native insects, a fine set of South European coleoptera, an almost complete set of shells from the Wabash river, 144 species of marine invertebrates.

An inspection of this enumeration shows a deficiency in several important particulars.

1. *We need more articulated skeletons.* We have representatives of only two out of the fourteen orders of mammals, and no skeletons of birds, reptiles, batrachians or fish. The structure of the osseous system has such a prominent place in distinguishing not only classes and orders, but also families of vertebrates, that skeletons are more than useful—they are essential to a proper study of vertebrate zoology. While our students may assist in many ways in increasing our museum, this is work which they are unable to do properly, for the reason that it takes not only greater skill than they do possess, but a deeper knowledge of the relations of the parts than they could be expected to obtain. The only source, therefore, for such additions is by purchase.

2. *We need skins or mounted specimens of birds not found here.* For increasing our collection of native birds we can depend on our own exertions, but many specimens of foreign birds are necessary for proper illustration of the study.

3. *We need more alcoholic specimens.* By the kindness of the Smithsonian Institution, at Washington, we obtained 144 specimens of marine invertebrates. There are, however, a number of types not represented in this collection which are desirable in order that proper ideas may be formed of those species with which our pupils, having no access to the sea, are unacquainted.

GEOLOGICAL CABINET.

In its present condition the usefulness of the geological cabinet is small. It is hoped, however, that it may soon be reduced to order and made available. Our collection lacks—

1. *A large number of minerals.* While, perhaps, sufficiently extensive for a short course of instruction in the chemical properties of minerals, the series is so broken that it would be impossible to give a student any adequate idea of the mineral constituents of the rocky crust of the earth.

2. *Fossils illustrating the ages after the Carboniferous.* Of Silurian and Devonian fossils we have a fair representation, but in those found in later times the museum is sadly deficient. The sub-carboniferous crinoids are amply represented by a complete set of the very fine specimens found in the Crawfordsville beds.

3. *A set of Ward's Casts.* These are casts in plaster of the largest and most celebrated fossils of each age, colored as in nature. They are everywhere spoken of in the highest terms, and would be invaluable.

BOTANICAL COLLECTION.

This may be considered more representative than either of the foregoing. Our set of the ferns of the United States lacks only a few species of being complete. A herbarium of 1,500 species has been deposited by the instructor in charge. Through the kindness of Prof. Geo. L. Goodale, of the botanic gardens, Cambridge, Mass., a collection of between 300 and 400 specimens of the economic products of plants has been received.

Our means of illustration in anatomy are confined to a skeleton, a few disarticulated bones, and a very fine series of slides for the lantern. But pictures are inadequate to convey correct ideas of the structure of the human body. Either absolute dissections or models which permit dissection, are necessary. The first is, of course, out of the question, but the second is attainable. A complete model of the body, together with enlarged models of the brain, ear, eye, heart, and larynx, ought to be procured in order to make this branch, the importance of which can not be over estimated, comprehensible by the student. Considering the mere memorizing way in which anatomy and physiology are frequently taught, the complaints of students that they "never could understand the ear or the eye," are not to be wondered at. Having the means of illustration, which I suggest, the memory will be impressed through the sight of the parts themselves.

As may be inferred from the enumeration of the foregoing needs, the object of the instruction in the Natural History Department, will be to teach the students *how to study*. The day when a pupil was assigned a certain lesson in a scientific text-book and told to commit and recite it, has long since passed. I conceive that our aim should be not to teach the pupil a great mass of facts, but to direct him so that he shall be able to acquire these facts for himself. Of course before this can be done a certain amount of preliminary instruction is necessary, but the greater part of the work ought to be done by the pupil himself, who should go to *nature* for his *teaching* and to the professor only for guidance in the interpretation of nature. This method is nothing new—it is only the application to scientific work of a method which is producing such excellent results in other departments of the University.

The extent to which this aim can be realized, is to be measured largely by the provision for it. In order to accomplish it, we *must* have the Laboratory supplied with a sufficient number of dissecting and compound microscopes. I beg to call your earnest attention to this as by far *the most urgent need* of the department. With the proper instruments we hope to do much—without them we can only keep on with the dry details of knowledge, which are only too likely to be uninteresting because the student's own industry has no part in their gathering.

Respectfully submitted,

C. R. BARNES, *Instructor*.

VI.

DEPARTMENT OF MATHEMATICS.

President E. E. White, LL. D. :

DEAR SIR:—I have the honor to submit the following report of the department of mathematics for the aademic year ending June, 1880.

The Freshman class matriculated thirty-six and held its students well during the year, giving an average attendance beyond that of any preceding class since my connection with the University. The same may be said of all my classes, and, in my judgment, is a most encouraging feature. During the first and second term and half of the third term of the year geometry was the branch studied. In addition to the text some original work was done in order to develop the native powers of the students and to cultivate self-reliance and independent investigation on their part. This work was very commendable. After completing the subject of geometry, a few weeks were devoted to the higher algebra, as a preparation for entering more fully upon the subject at the opening of the present year.

The Sophomore class entered upon the study of higher algebra, having received the preparatory drill as just indicated, at the opening of the year. The first and longest term of the year, extending to the holidays, was given to this subject. That portion of the class which was in attendance the previous year did as satisfactory work as could reasonably be expected.

The subject under treatment during the second term of the Sophomore year is trigonometry, with its practical applications in *field work*. Students are made familiar with the use of the *theodolite*, and for the most part, take their own notes for class room work. Students are, as a rule, fond of this practical education. Even the

ladies do their own triangulating, reading angles and measuring base lines with chain or tape. During the summer term the young men take surveying, the ladies being permitted to elect a substitute for this study if they desire; several, however, have preferred to take this branch of the mathematics also. The work is made as practical as the time will permit. Surveying is done with an excellent transit instrument, with compass attached. The professor is in constant attendance for two or three weeks, but devolves the work upon the class, so that they soon become capable of doing it without his presence. Pupils from our classes have often been called upon to do surveying during their vacations, and have given satisfaction to parties employing them. Quite a number of pieces of graphic work were prepared by the students of this class for presentation at the State Fair at Indianapolis last fall, and, as I learn from the report of the committee from Purdue, gave satisfaction on exhibition.

The Junior class begins analytical geometry at the opening of the academic year and continues it till the middle of the second term. In this subject the lecture system is more largely introduced than in either of the lower classes. The investigations of the professor on collateral subjects are imparted to the class in order to impress, as much as possible, this subject, so difficult of retention, upon both judgment and memory. That this end may be accomplished more effectually, the students are required, almost daily, to *construct by scale* the geometrical figures representing the results of their solutions. This class also did much satisfactory work, both in analytics and astronomy for exhibition at the State Fair.

The studies of the Senior year being elective, two Seniors, one of whom was a lady, entered upon the study of the calculus. The contest was very close. Both were admirable students and entered into this difficult branch of mathematics with a zest that made the work a real pleasure both to instructor and students.

In conclusion, permit me to say that, in compliance with your request, I have ordered from Alvin Clark & Sons, the telescope, which, by the action of the board of trustees, we were authorized to procure for the University. The last communication from the Messrs. Clark informed me that they would soon be ready to ship the instrument. It is of $4\frac{1}{2}$ inch aperture and is to be mounted upon a tripod, made portable for field observation; estimated cost, four

hundred dollars (\$400). This will give our future classes advantages not heretofore enjoyed, and doubtless will add greatly to the interest of the subject of astronomy. This instrument, together with the transit and level, will afford facilities for the pursuit of the branches of which they are respectively the appropriate appliances.

Respectfully submitted,

D. G. HERRON,

Professor of Mathematics.

DECEMBER 7, 1880.

VII.

GERMAN DEPARTMENT.

President E. E. White, LL. D.:

DEAR SIR—I have the honor to submit a report of the condition and work of the German department for the two years ending June 20, 1880.

The study of German was introduced only four years ago. The first year the number of students was twenty-three; the second year the number was thirty-nine; last year, my department numbered forty-one; this year, 1879-'80, the number is fifty-four.

These students were divided into four classes, and, as the instruction had all to be given in the afternoon, it was very difficult to do them all justice, besides being very annoying from the frequent conflicts with other classes. Considering the disadvantages under which we labored, the work has been very satisfactory.

The aim of my department has been to give the student a practical acquaintance with and use of the German language. To this end practice in conversation and composition has been a leading feature of the students' work.

The course of instruction has been the same for both years. It includes for the Freshman year reading and translation, with composition and conversation suited to the students' vocabulary. In the Sophomore year the same course is pursued with the addition of the German grammar.

More attention is given this year to composition and conversation practice, and the student is required to conduct discussions on different subjects.

The third or Junior year is occupied in reading classical and scientific works in German three days of each week, and practices in conversation, together with the reading of essays two days of each week. Up to this time we have had no fourth year or Senior class, the fourth class being formed of such of the Junior class as wish to begin German. A fourth year course has been arranged. It will include reading of classics, history of the German literature and language by lectures, composition and conversation.

In the future many of the difficulties which we have labored under for the past two years, will be removed, owing to my being able to give instruction during the entire day.

If the German department had a regular room appropriated to its use, it would be much more convenient and pleasant.

Very respectfully,

ROBERT T. H. WEYHER,

Professor of German.

VIII.

DEPARTMENT OF LATIN AND HISTORY.

To Hon. E. E. White, LL. D.,

President Purdue University :

DEAR SIR: In accordance with your request, I have the honor to submit the following regarding my department :

LATIN.

I am reasonably well pleased with the progress of the students in Latin, considering the limited time given to this language in our curriculum.

When students elect the Latin in preference to the German, only three years, or on some conditions only two years, are required, and yet I am happy to state, that, since my connection with the University, I have had students in all four of the college classes. This shows the appreciation that students have of this grand classic, which is the depository of so much of the literary wealth of the ancients.

HISTORY.

I am not so well pleased with the work in history, though I think some measure of success has attended the efforts of instructor and students.

A weekly recitation in history, it seems to me, will continue to be unsatisfactory.

The instruction in history would be greatly aided by the use of "Adams' Synchronological Chart." It ought to be added to our other helps in history.

But the *greatest* need of this department, from *my* standpoint, is that the salary be made equal to that of a full professor.

This is but simple justice, in view of the amount of teaching I do, having now two departments, making six classes, to which rhetoric may be added.

All of which is respectfully submitted.

JOHN A. MAXWELL,

Instructor in Latin and History.

DECEMBER 8, 1880.

IX.

THE UNIVERSITY ACADEMY.

President E. E. White :

SIR:—I have the honor to present herewith a report of the condition, workings, and wants of the University Academy.

CONDITION.

The status of the Academy is excellent. It numbered seventy-nine when the board honored me with its management; the next year the enrollment was one hundred and one; the second and third years one hundred and nineteen; and the present fall term's enrollment of one hundred and two indicates an annual enrollment the present session of one hundred and thirty to one hundred and thirty-five. The growth has been gradual but sure, and seems to indicate strongly the need of such a department in connection with the University, (1) to more thoroughly prepare students for the college classes; (2) to afford an opportunity for accurate and thoroughly illustrated instruction in the higher branches of the common school work—such instruction as can not be given in most of our public schools from lack of the excellent apparatus possessed by the Academy.

The general deportment and bearing of the students is quite creditable to them. Their disposition is for the right and their morals in the main good. So far this term there has not been a single case requiring severe discipline, and the number of serious misdemeanors in past terms has been as small as could be expected under all the circumstances connected with their gathering in the University.

The order in the young men's dormitory has not been all that could be desired, but it will compare more than favorably with that

in the dormitory of any other institution in the country. It is believed that the tendency of the dormitory system, as generally conducted, is in itself pernicious. Many of the restraints that conserve and promote purity of thought and gentleness of manner are entirely lacking, whilst there are numerous temptations to mischievous if not malicious destruction of property. Implicit respect for the rights and property of others is thus not as deeply implanted in the moral natures of the young men as it should be.

From three to five hours of the evenings of each week are spent in visiting the young men in their rooms in the dormitory.

WORKINGS.

Instruction has been given in English grammar and composition with the elements of rhetoric, arithmetic, algebra, book-keeping, drawing, descriptive and physical geography, history of the United States, penmanship, physiology, reading and spelling. There has also been given in the spring term, for the benefit specially of those desiring to teach or to review for the college classes, a series of lectures on methods of, and the principles involved in, proper instruction. That these lectures have been appreciated is evidenced by the attendance of some fifty teachers upon the summer normal school conducted by myself in the academy rooms last summer.

The one great deficiency in the young people that come to us, notwithstanding years of previous schooling, is their inability to express themselves with fluency, ease, or originality upon even the most common topics. Their recitations at times would be ludicrous if they were not so painful to witness. To remedy this, our efforts have been specially directed for over two years. Latin and the elementary sciences have been dropped from the academy curriculum by the faculty, and as much attention as possible has been devoted to *instruction in the English language*. Our classes are so large, however, and our other duties so heavy that our success so far has not been such as we desired and hoped. Much of the work of criticism and correction has been done by the students, but with classes of thirty to fifty, our supervision has necessarily been general and cursory.

In all the instruction in the Academy, our aim has been to make original and thoughtful recitations, using the text only as a general guide and encouraging as much observation and individual expression as possible.

WANTS.

I have felt for the last year and the present a serious need of another assistant in my work. With ninety to one hundred pupils in the main academy room during a portion of the day, it is difficult to secure proper ventilation. Many of the classes are so large that individual work can not be done by the teacher, and thus many deficiencies peculiar to this or that pupil are overlooked, and the pupil's work, which might be much more creditable, is defective. The very urgent need of more complete training in the composition of the English language, to which I have previously referred, can not be supplied by Miss Baker and myself. Teachers should have leisure for reading, study, and self-culture, as well as for preparation for each day's recitations.

In this connection I would suggest that room No. 8 be fitted up with desks, where a portion of the pupils may study during the day, as the number enrolled the present term is six more than the main academy room will accommodate.

It is but just to state that I have been zealously and ably assisted in the heavy work of the present term by my associate, Miss Edna D. Baker. I am indebted to her for valuable suggestions.

The addition to our apparatus, within the past year, of an oxy-hydrogen lantern for projections, with numerous slides in physiology; of four excellent class-microscopes of high power; of a new set of physiological charts; and of a number of valuable reference works, will materially aid in our work.

To the credit of our students it should be stated that much of their individual class-work has received diplomas and highly favorable criticism at both our County Fair and the State Fair.

Very respectfully,

E. E. SMITH,

Principal University Academy.

TREASURER'S REPORT.

To the Board of Trustees of Purdue University:

The treasurer reports all warrants paid for the fiscal year, November 1, 1879, to October 31, 1880, inclusive, and also all receipts pertaining to the general expenses and improvement fund, to wit:

For amount paid for coal and hauling, for fuel: for coal, lime, retorts, etc., for gas works; pay-roll of employes and students; farm hands, seeds, tools, etc., and all other current expenses of the University.....	\$12,857 04
For amount paid Wm. F. Reynolds, borrowed money and interest	5,500 00
For amount borrowed of endowment fund and interest.....	13,450 12
For trustees per diem and mileage and salary of Secretary and Treasurer.....	1,447 70

FROM STATE APPROPRIATIONS.

For apparatus, cabinet and fixtures.....	1,304 63
“ experiments in agriculture.....	580 89
“ library and periodicals.....	827 04
“ horticulture and improvement of grounds.....	664 46
“ stock for farm.....	1,598 66

RECEIPTS.

From State Treasurer.....	4,500 00
“ estate of John Purdue.....	27,821 94
“ scholars' fees, etc.....	2,243 70
“ farm products and stock sold.....	2,883 52
“ sales, gas and coal.....	295 70
“ sale old iron... ..	10 00

CASH IN TREASURY.

Balance general expense and improvement fund.....	2,695 36
“ apparatus, cabinet and fixtures. “ “	872 40
“ agricultural experiment “ “	539 84
“ library and periodical “ “	73 77
“ horticultural and improvement of grounds.....	550 66
Less stock fund overdrawn \$99 36.	

The treasurer also reports the receipts and disbursements of the United States endowment fund, to wit:

RECEIPTS.

From interest on State of Indiana bonds.....	\$16,250 00
“ “ “ United States bonds.....	487 50
“ general expense fund, for loan and interest.....	13,450 12

DISBURSEMENTS.

Paid salaries of president and professors.....	15,926 27
“ for United States bonds and prem.....	15,490 00
Cash balance in treasury.....	922 00
Indiana State bonds.....	325,000 00
United States bonds.....	15,000 00
	————— \$340,922 00

Respectfully submitted,

M. L. PIERCE, *Treasurer*.

PURDUE UNIVERSITY, LAFAYETTE, November 1. 1880.

REPORT OF FARM OPERATIONS FOR THE YEAR 1880.

To the Board of Trustees :

GENTLEMEN :—Your committee charged with the management of the Purdue University farm, submit the following report for the year 1880 :

STOCK.

Horses.

Since last report the horses "Sam" and "John" have been sold ; the former for thirty-five dollars, and the latter for one hundred and twenty dollars. We have also bought one half Norman brood mare, six years old ; three heavy Clydesdale mares from four to six years old, and one Clydesdale stallion two years old. The four Clydesdales are pure bred and were imported from Canada. The horses now on hand comprise the above named and the two mares, nine years old, owned by the farm at the time of the last report.

Cattle—Short-Horns.

One of the Short-horn cows with her calf was exchanged for the thoroughbred Jersey cow "Trifle" with a bull calf. One bull calf was sold for thirty-five dollars. This leaves the following Short-horns on the farm :

One bull, pure bred, eighteen months old ; three cows, pure bred, from three to six years old ; one heifer, pure bred, thirty months old ; one heifer, pure bred, eighteen months old.

Jerseys.

The following are the Jerseys now on hand :

One bull, Duke of Dinsmore, three years old ; one cow, Trifle, four years old ; one half-blood cow, three years old ; one three-

fourths blood heifer, ten months old; one half-blood heifer, six months old, received in exchange for Jersey bull, obtained with "Trifle."

Hogs.

The following are the hogs now on hand:

One pure Berkshire boar, fifteen months old; one pure Essex sow, four years old; two pure Essex sows, sixteen months old; seven shoats, seven months old; nine Essex and Berkshire shoats, four months old.

CROPS.

Wheat.

The number of acres of wheat sown in the fall of 1879, was thirty-three (33). The following varieties were sown:

Fultz, fifteen acres; Clawson, seven acres; and Golden Straw, eleven acres. The yield was as follows: Fultz, $27\frac{1}{2}$ bushels per acre; Clawson, 26 bushels per acre; Golden Straw, 25 7-11 bushels per acre. Total yield of the thirty-three acres was 876 bushels.

Corn.

Twenty-eight acres were cultivated the present year, of which eighteen were drilled and the balance planted in hills. Ten acres of the drilled produced thirty bushels to the acre, and eight acres of the drilled produced twenty-five bushels to the acre. The ten acres planted in hills yielded $28\frac{1}{2}$ bushels to the acre. Total yield, 785 bushels.

The crop was short, owing to the unusually dry weather during the months of July, August, and September.

Oats.

Thirteen acres were sown to oats, ten acres of which were drilled March 23, two bushels to the acre. The yield was 400 bushels. The remaining three acres drilled April 8, two bushels to the acre, proved an entire failure, being destroyed by rust, owing, probably, to the late sowing.

Potatoes.

Two acres were planted to potatoes. The yield was thirty bushels. The dry season was the cause of the failure.

Hay and Pasturage.

There were, including four acres of Hungarian, twenty-four acres of meadow. Sixteen acres were in timothy and clover, yielding twenty tons; five acres were in clover, yielding five tons; and three acres were in Hungarian, yielding seven tons.

There were twenty acres in pasture, exclusive of stubble ground.

 FINANCIAL STATEMENT.

CASH RECEIPTS FOR FARM PRODUCTS AND FOR LABOR.

Received for farm products sold and for pasturage from Jan. 1 to Dec. 31, 1880.....	\$1,566 24
Received for labor for the University.....	132 00
Total receipts for the year	\$1,698 24
Received for the wheat crop of 1879.....	\$818 14
Bills not collected.....	12 70

CASH EXPENDITURES FOR THE YEAR.

For labor and management.....	\$968 70
For repairs and supplies.....	358 20
Total expenditures	\$1,326 90
For improvements.....	\$116 47

CASH RECEIVED FOR STOCK.

For horses "Sam" and "John" sold.....	\$155 00
On stock notes.....	589 46
For colt sold.....	100 00
Total receipts.....	\$844 46

CASH EXPENDED FOR STOCK.

For Clydesdale and Norman horses and other stock	\$1,280 36
--	------------

INVENTORY.

500 bushels of corn on hand.....	\$200 00
15 tons of hay on hand.....	180 00
150 bushels of oats on hand.....	52 50
10 bushels of potatoes on hand.....	5 00
Straw on hand.....	50 00
16 head of hogs on hand.....	83 80
2 Jersey calves.....	55 00

Total value of farm products and stock raised this year
now on hand..... \$626 30

The inventory value of the corn, potatoes, hay, oats and one spring calf (since sold) on hand at the beginning of the year, as given in the report for 1879, was \$918.00.

Making the proper reduction for this inventory of farm products of 1879, which have either been sold and included in the sales of this year or consumed on the place, and estimating the value of the Clydesdale and Norman horses at a reasonable advance on their cost, it is safe to consider the net income on the farm operations at about five hundred dollars.

All of which is respectfully submitted.

JOHN SUTHERLAND,
ROBERT P. HAYNES,
JOHN S. WILLIAMS,

Farm Committee.

DECEMBER 31, 1880.

HISTORICAL SKETCH OF PURDUE UNIVERSITY.

Purdue University had its origin in the Act of Congress of July 2, 1862, which "donated public lands to the several States and Territories which may provide Colleges for the benefit of Agriculture and the Mechanic Arts." The national grant was accepted by the State of Indiana, March 6, 1865, and a Board of Trustees, with the corporate name of "The Trustees of the Indiana Agricultural College," was organized for the management of the trust funds. This Board consisted of Governor Morton (*ex-officio* President), Alfred Pollard, of Gibson, Smith Vawter, of Jennings, Henry Taylor, of Tippecanoe, and Lewis Burke, of Wayne. Prior to the first meeting of the Board, held October 20, 1865, Mr. Pollard removed from the State, and Isaac Jenkinson, of Allen, was elected his successor. John J. Hayden, of Marion, was elected Secretary of the Board, and James E. Reeves, of Wayne, Treasurer. Mr. Reeves resigned May 1, 1866, and was succeeded by E. B. Martindale, of Indianapolis. The Board so constituted remained without a change in membership until March 7, 1870.

It was this Board that received the land script, amounting to 390,000 acres, and, April 9, 1867, sold it for \$212,238.50. By careful and wise management, this endowment fund has been increased to \$340,000, the sum of \$325,000 being invested in Indiana State bonds, bearing five per cent. interest, and \$15,000 in United States bonds, bearing six per cent interest. This Board also located the University, as stated below.

The act of 1865 made no provision for the location or the organization of the College. Governor Morton's special message to the General Assembly was followed by a strong rivalry between several places desiring the College, and the general sessions of 1863, '65, '67 and '69 failed to settle the location. At the special session in 1869, an act was passed (May 6), accepting a donation of \$150,000 by John Purdue, on specified conditions; a donation of one hundred acres of land, appurtenant to the institution, by citizens of Chauncey; a donation of \$50,000 by Tippecanoe county; and donations by the Trustees of the Battle Ground Institute, and by the Trustees of the Battle Ground Institute of the M. E. Church, both made on the condition that the College be located at Battle Ground. This act located the institution in Tippecanoe county, at such point as the Trustees might determine before January 1, 1870, gave it the name of Purdue University, and provided for its organization and management. The location of the University was definitely fixed by the Trustees December 22, 1869.

In March, 1870, the Board was partially reorganized. M. L. Peirce of Lafayette, succeeded Mr. Jenkinson; Rev. Thomas Bowman, of Greencastle, Mr. Vawter; Dr. Joseph L. Tuttle, of Crawfordsville. Mr. Lewis Burke, (resigned); and John Purdue became a Trustee by the act of the Legislature. Mr. Peirce was elected both Secretary and Treasurer, succeeding Messrs. Hayden and Martindale (resigned). In November, 1870. Dr. Tuttle and Henry Taylor resigned, and were respectively succeeded by John R. Coffroth and John A. Stein, both of Lafayette. In January, 1871, Mr. Stein was elected Secretary of the Board, and, by subsequent re-elections, Mr. Peirce has been continued as Treasurer and Mr. Stein as Secretary.

An act passed January 31, 1871, increased the number of Trustees to nine, including the Governor, *ex-officio* member and President of the Board, and provided that three of the Trustees should be members of the State Board of Agriculture, to be appointed by the Governor on the recommendation of the State Board. The three Trustees appointed under this law were I. D. G. Nelson, of Fort Wayne, John Sutherland, of Laporte, and L. A. Burke, of New Harmony. The Board was constituted as follows: Governor Baker, *ex-officio* President; John A. Stein, Secretary; Martin L. Peirce, Treasurer; John Purdue, John R. Coffroth, I. D. G. Nelson, Thomas Bowman, John Sutherland and L. A. Burke.

This Board, with the changes in its membership hereafter noticed, purchased the present site of the University, planned and constructed the buildings (the main building excepted), and made provision for the opening of the institution.

Governor Hendricks succeeded Governor Baker in 1873. Dr. Bowman resigned in May, 1873, and was succeeded by Judge H. P. Biddle, of Logansport, who resigned in November following, and was succeeded by Col. B. C. Shaw, of Indianapolis, who resigned in October, 1874. Mr. Nelson resigned in 1874, and was succeeded by Austin B. Claypool, of Connersville. Mr. Burke resigned in June, 1874, to accept the position of Farm Superintendent.

THE OPENING OF THE UNIVERSITY.

In 1872 the Board expected to open the University the following year, and Prof. Richard Owen, of the State University, at Bloomington, was elected President (August 13, 1872), and Prof. John S. Hougham was appointed to a professorship. President Owen was to enter on his duties upon receiving a three months' notice, but Professor Hougham entered at once into the service of the Board.

President Owen resigned March 10, 1874, and Supt. A. C. Shortridge, of Indianapolis, was elected his successor, June 12, 1874. To comply with the Act of Congress, which required the institution to be opened as early as July, 1874, Professor Hougham took charge of a class March 2, 1874, and gave instruction until June. The University was formally opened September 17, 1874, with the following Faculty: A. C. Shortridge, President; John S. Hougham, Professor of Physics and Industrial Mechanics; W. B. Morgan, Professor of Mathematics and Engineering; John Hussey, Professor of Botany and Horticulture; H. W. Wiley, Professor of Chemistry; and Eli F. Brown, Professor of English Literature and Drawing.

The plan of organization adopted by the Board of Trustees was based on the theory of special education, and the instruction of the University was distributed among the following Special Schools: I. School of Natural Science, including (a) Physics and Industrial Mechanics, (b) Chemistry, (c) Natural History; II. School of Engineering, (a) Civil Engineering, (b) Mining Engineering, (c) Architecture; III. School of Agriculture, including (a) Theoretical and Practical Agriculture, (b) Horticulture, (c) Veterinary Science; IV. School of Military Science. Detailed courses of study were adopted and announced in Agriculture, Chemistry, Engineering, and Physics and Mechanical Engineering.

The University was conducted on this plan of special education for two years, but there seemed to be little demand for the special courses of instruction provided. The only special students received entered the School of Chemistry, and the most of these were in the preparatory branches in other studies. Nearly all the students entered the preparatory classes.

At the close of the first year, Mrs. Sarah A. Oren was appointed Professor of Botany, and Professor Hussey was transferred to the added chair of Latin and Modern Languages.

An Act passed by the Legislature March 9, 1875, provided for the reorganization of the Board of Trustees. It reduced the number of Trustees to six, two to be nominated by the State Board of Agriculture, one by the State Board of Horticulture, and three to be selected and appointed by the Governor. It also provided that the Secretary and Treasurer should not be members of the Board. The law took effect August 24, 1875, and the Board was reorganized August 31, 1875, as follows:

JOHN R. COFFROTH, President, appointed by the Governor.

MAHLON D. MANSON, appointed by the Governor.

REUBEN WELLS, appointed by the Governor.

JOHN SUTHERLAND, nominated by the State Board of Agriculture.

ROBERT P. HAYNES, nominated by the State Board of Agriculture.

JOSEPH C. RATLIFF, nominated by the State Horticultural Society.

President Shortridge resigned November 5, 1875, to take effect December 31, 1875, and Professor Hougham became Acting President. E. E. White was elected President February 17, 1876, and entered on the duties of the office May 1, 1876.

REORGANIZATION.

At the meeting of the Board of Trustees, held in June, 1876, President White submitted the plan of organization on which the University has since been conducted. The plan was unanimously approved by the Board.

The University was divided into three departments—the University Academy, the College of General Science, and Special Schools of Science and Industry. The College of General Science was first organized with but one course of study, the Scientific Course, so arranged as to be a general preparation not only for all industrial pursuits but for the courses in the Special Schools. In 1879 the College was made to embrace three courses—the Scientific Course, the Agricultural Course, and the Mechanical Course—and the Special School of Agriculture, with its "Experimental Station," and the

School of Mechanics, with its workshop, were put into successful operation. It has required four years "to work out" the plan outlined in 1876, and described in preceding pages.

The Faculty, as reorganized in 1876, was constituted as follows: E. E. White, President and Professor of English Literature; H. W. Wiley, Professor of Chemistry and Physics; John Hussey, Professor of the Natural History Sciences; David G. Herron, Professor of Mathematics and Engineering; Edward P. Morris, Instructor in Latin and History; Walter L. Dean, Instructor in Industrial Art; R. F. H. Weyher, Instructor in German; George R. Chase, Principal of the Academy; and Sarah A. Oren, Associate Principal of the Academy.

In 1877 Charles E. Lambert succeeded Prof. Morris; Langdon S. Thompson succeeded Prof. Dean; and Edward E. Smith succeeded Principal Chase. In 1878, Olivia T. Alderman succeeded Mrs. Oren; and in 1879 John A. Maxwell succeeded Professor Lambert. In 1879, Charles E. Ingersoll was appointed Professor of Agriculture and Horticulture, and Wm. F. M. Goss, Instructor in Mechanics. In 1880, Charles R. Barnes succeeded Prof. Hussey, resigned; and Miss Edna D. Baker succeeded Mrs. Herron, *nee* Miss Alderman, resigned. Miss Lora Miller was appointed Librarian in 1878, and reappointed in 1879, and in August, 1880, M. C. Stevens was appointed Registrar and Librarian.

But few changes have occurred in the Board of Trustees since the reorganization in 1875. Hon. John R. Cofiroth resigned December, 21, 1877, and was succeeded by John C. Dobelbower, of Lafayette. Gen. M. D. Manson succeeded Judge Coffroth as President of the Board. Gen. Manson resigned January 20, 1879, to enter on the duties of Auditor of State, and John S. Williams, of Lafayette, was appointed his successor. Mr. Sutherland succeeded Gen. Manson as President of the Board.

The Act of 1865 provided that if Mr. Purdue should cease to be a member of the Board, he should be continued as an Advisory Trustee during his lifetime. His trusteeship expired in 1875, and he then served the University as an Advisory Trustee until his death, which occurred September 12, 1876.

STATE APPROPRIATIONS.

In 1873 the Legislature made an appropriation of \$60,000 to Purdue University for the erection of a college building, the purchase of apparatus, the improvement of the grounds, and other purposes—\$30,000 to be paid June 1, 1873, and \$30,000 June 1, 1874.

In 1875 the Legislature appropriated \$10,000 for physical, mechanical, chemical, and engineering apparatus; \$4,000 for farm-house and barn; \$4,000 for stock, agricultural implements, farming utensils, etc.; and \$2,000 for library, etc. One-half of each appropriation was paid in 1875 and one-half in 1876.

In 1877 the Legislature appropriated \$5,000 for payment of indebtedness incurred in 1876; \$4,500 for allowances to trustees and officers (\$1,500 in 1877, \$1,500 in 1878, and \$1,500 in 1879); \$5,000 for apparatus, machinery, cabinets, and fixtures; \$2,000 for books, and periodicals; and \$3,000 for stock, experi-

ments in agriculture, and improvement of grounds. One-half of each of the last three appropriations was paid in 1877 and one-half in 1878.

In 1879, \$4,000 was appropriated for current expenses; \$4,000 for machinery and improvements and for School of Agriculture, including agricultural experiments and \$1,000 for library—one-half of each appropriation to be paid in 1879, and one-half in 1880.

LAWS RELATING TO PURDUE UNIVERSITY.

AN ACT accepting the provisions of an act of the Congress of the United States of America, entitled "An act donating lands to the several States and Territories which may provide Colleges for the benefit of Agriculture and the Mechanic Arts," and providing for the receipt, investment, and management of said donation.

(Approved March 6, 1865.)

WHEREAS, By an act of Congress, approved July second, one thousand, eight hundred and sixty-two, it is provided as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there be granted to the several States, for the purpose hereinafter mentioned, an amount of public land to be apportioned to each State, a quantity equal to thirty thousand acres for each Senator and Representative in Congress, to which the States are respectively entitled by the appointment under the census of eighteen hundred and sixty; *Provided*, That no mineral lands shall be selected or purchased under the provisions of this act.

SEC. 2. *And be it further enacted*, That the land aforesaid, after being surveyed, shall be appointed to the several States in sections, or sub-divisions of sections, not less than one quarter of a section; and whenever there are public lands in a State, subject to sale at private entry at one dollar and twenty-five cents per acre, the quantity to which said State shall be entitled shall be selected from such land within the limits of such State, and the Secretary of the Interior is hereby directed to issue to each of the States, in which there is not the quantity of public lands subject to sale at private entry, at one dollar and twenty-five cents per acre, to which State may be entitled, under the provisions of this act, land scrip to the amount in acres for the deficiency of its distributive share, said scrip to be sold by said States, and the proceeds thereof applied to the uses and purposes prescribed in this act, and for no other use or purpose whatever; *Provided*, That in no case shall any State to which land scrip may be thus issued, be allowed to locate the same within the limits of any other State, or of any other Territory of the United States; but their assignees may thus locate said land scrip upon any of the unappropriated lands of the United States, subject to sale at private entry, at one dollar and twenty-five cents per acre; *And provided further*, That

no more than one million acres shall be located by such assignees in any one of the States; *And provided further*, That no such location shall be made before one year from the passage of this act.

SEC. 3. *And be it further enacted*, That all the expenses of management, superintendence and taxes, from date of selection of said lands previous to their sales, and all expenses incurred in the management and disbursement of the moneys which may be received therefrom, shall be paid by the States to which they may belong, out of the treasury of said States, so that the entire proceeds of the sales of said lands shall be applied, without any diminution whatever, to the purpose hereinafter mentioned.

SEC. 4. *And be it further enacted*, That all moneys derived from the sale of the lands aforesaid, by the State to which the lands are apportioned, and from the sales of the land script hereinbefore provided for, shall be invested in stocks of the United States, or of some other safe stocks, yielding no less than five per centum upon the par value of said stocks, and that the moneys so invested shall constitute a perpetual fund; the capital of which shall remain forever undiminished, except so far as may be provided in section fifth of this act, and the interest of which shall be inviolably appropriated by each State, which may take and claim the benefit of this act, to the endowment, support, and maintenance of at least one college, where the leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts, in such a manner as the Legislatures of the States may respectively prescribe, in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life.

SEC. 5. *And be it further enacted*, That the grant of land and land script, hereby authorized, shall be made on the following conditions, to which, as well as to the provisions hereinbefore contained, the previous assent of the several States shall be signified by legislative act.

First. If any portion of the fund invested, as provided by the forgoing section, or any portion of the interest thereon, shall, by any action or contingency, be diminished or lost, it shall be replaced by the State to which it belongs, so that the capital of the fund shall remain forever undiminished, and the annual interest shall be regularly applied without diminution to the purposes mentioned in the fourth section of this act, except that a sum not exceeding ten per centum upon the amount received by any State, under the provisions of this act, may be expended for the purchase of lands for sites or experimental farms, whenever authorized by the respective Legislatures of said States.

Second. No portion of said fund nor the interest thereon shall be applied directly or indirectly, under any pretence whatever, to the purchase, erection, preservation or repair of any building or buildings.

Third. Any State which may take and claim the benefit of the provisions of this act, shall provide within five years at least not less than one college, as described in the fourth section of this act, or the grant to such State shall cease and said State shall be bound to pay the United States the amount re-

ceived of any lands previously sold, and that the title to purchase under the State shall be valid.

Fourth. An annual report shall be made regarding the progress of each college, recording any improvements and experiments made, with their costs and results, and such other matter, including State industrial and economical statistics, as may be supposed useful; one copy of which shall be transmitted by mail, free, by each, to all other colleges which may be endowed under the provisions of this act, and, also, one copy to the Secretary of the Interior.

Fifth. When lands shall be selected from those which have been raised to double the minimum price, in consequence of railroad grants, that they shall be computed to the States at the maximum price, and the number of acres proportionately diminished.

Sixth. No State, while in condition of rebellion or insurrection against the government of the United States, shall be entitled to the benefits of this act.

Seventh. No State shall be entitled to the benefits of this act, unless it shall express its acceptance thereof by its Legislature within two years from the date of its approval by the President.

SEC. 6. *And be it further enacted,* That the land scrip issued under the provisions of this act, shall not be subject to location until after the first day of January, one thousand, eight hundred and sixty-three.

SEC. 7. *And be it further enacted,* That the land officers shall receive the same fees for locating land scrip issued under the provisions of this act, as are now allowed for the location of military bounty land warrants under existing laws; *Provided,* Their maximum compensation shall not be thereby increased.

SEC. 8. *And be it further enacted,* That the Governors of the several States to which scrip shall be issued under this act, shall be required to report annually to Congress all sales made of such scrip, until the whole shall be disposed of, the amount received for the same, and what appropriation has been made of the proceeds; *And, WHEREAS,* By an act of Congress, approved April 14, 1864, it was further provided, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That any State or Territory may accept, and shall be entitled to the benefits of the act entitled "An act donating lands to the several States and Territories which may provide Colleges for the benefit of Agriculture and the Mechanic Arts," approved July 2, 1862, by expressing its acceptance thereof, as provided in said act, within two years from the date of the approval of this act, subject, however, to the condition in said act contained; therefore,

SEC. 1. *Be it enacted by the General Assembly of the State of Indiana,* That the State of Indiana accepts and claims the benefits of the provisions of said act of Congress and assents to all the conditions and provisions in said act contained.

SEC. 2. That the Governor of this State, for the time being, and Alfred Poland (Pollard) of Gibson, Smith Vawter, of Jennings, Henry Taylor, o

Tippecanoe, and Lewis Burke, of Wayne, and their successors, are created a body corporate, under the name of the Trustees of the Indiana Agricultural College.

SEC. 3. Said Henry Taylor and Lewis Burke shall hold said office for two years and said Alfred Poland (Pollard) and Smith Vawter shall hold the same for four years, provided they so long behave well, and at the expiration of each period of two years from the passage of this act the Governor and the remaining Trustees shall choose by ballot two citizens of this State to fill the vacancy caused by the expiration of the terms of office of such preceding Trustees, who shall hold their office for the term of four years, provided they so long behave well. And whenever any other vacancy shall occur among said Trustees they shall, in like manner, choose some citizen of this State to fill the same, who shall hold his office during the residue of the unexpired term of his predecessor, provided he so long behave well.

SEC. 4. The Governor of this State, for the time being, shall upon the first Tuesday of May, A. D. 1865, and every two years thereafter, and whenever a vacancy occurs, elect, by ballot, a Secretary and Treasurer, whose compensation shall be fixed by said Trustees. The said Treasurer shall give bonds to the State of Indiana in a sum of not less than two hundred thousand dollars, for the faithful execution of his trust, with sufficient sureties to the approbation of said Trustees.

SEC. 5. That said Trustees shall, by the hand of their Treasurer, claim and receive from the Secretary of the Interior the land scrip to which this State is entitled by the provisions of said act of Congress; and, under their directions, said Treasurer shall sell the same in such manner and at such times as shall be most advantageous to the State, and shall invest the proceeds thereof, and any interest that may accrue thereon, in the stocks of the United States or of this State, yielding not less than five per centum per annum upon the par value of the stock; and that the said principal and interest shall so continue to be so invested, until further provision shall be made by the General Assembly of this State for fulfilling the requirements of said act of Congress.

SEC. 6. That there is appropriated, to be paid annually to said trustees, out of the State treasury, a sum of money sufficient to defray the actual expenses incurred in obtaining and selling said land scrip, and in investing and managing the proceeds thereof, the items of which shall be certified to by said trustees; and the Auditor of State shall draw his warrant on the Treasurer of State, and the Treasurer shall pay the same. And the said trustees shall receive three dollars per day for their services while so engaged.

SEC. 7. The Governor of this State shall report annually, to Congress, all sales made of said land scrip, until the whole shall be disposed of, the amount received for the same, and what appropriation has been made of the proceeds.

SEC. 8. That an emergency exists for this act to take immediate effect, and it shall take effect from and after its passage.

AN ACT accepting certain donations from John Purdue and others, and locating and naming the college contemplated by the act of Congress, approved July 2, 1862, providing for its organization and management, adding a member to the trustees of the Indiana Agricultural College, and changing the corporate names of said trustees, and declaring an emergency.

(Approved May 6, 1869.)

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana,* That the donations offered by John Purdue, as set forth and communicated to the present General Assembly in the message of the Governor on the sixteenth day of April, 1869, and the donations offered by the county of Tippecanoe, and the trustees of the Battle Ground Institute, and the trustees of the Battle Ground Institute of the Methodist Episcopal Church, as set forth and communicated to the General Assembly at its last session, in the message of the Governor of the twenty-seventh day of January, 1869, be, and the same are hereby accepted by the State of Indiana.

SEC. 2. The college contemplated and provided by the act of Congress, approved July 2, 1862, entitled, "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts" is hereby located in Tippecanoe county, at such point as may be determined before the first day of January, 1870, by a majority vote of the trustees of the Indiana Agricultural College; and the faith of the State is hereby pledged that the location so made shall be permanent.

SEC. 3. In consideration of the said donation by John Purdue, amounting to one hundred and fifty thousand dollars, and of the further donation of one hundred acres of land appurtenant to the institution, and on condition that the same be made effective, the said institution, from and after the date of its location as aforesaid, shall have the name and style of "Purdue University," and the faith of the State is hereby pledged that said name and style shall be the permanent designation of said institution, without addition thereto or modification thereof.

SEC. 4. From and after the date of the location made as aforesaid, the corporate name of the Trustees of the Indiana Agricultural College shall be "The Trustees of Purdue University," and they shall take in charge, have, hold, possess and manage all and singular the property and moneys comprehended in said donations, as also the fund derived from the sale of the land scrip donated under said "Act of Congress" and the increase thereof, and all moneys or other property which may hereafter at any time be donated to and for the use of said institution. They shall also have power to organize said University in conformity with the purposes set forth in said act of Congress, holding their meetings at such times and places as they may agree on, and a majority of their number constituting a quorum. They shall provide a seal; have power to elect all professors and teachers removable at their pleasure; fix and regulate compensations; do all acts necessary and expedient to put and keep said University in operation, and make all by-laws, rules and regulations required or proper to conduct and manage the same.

SEC. 5. In further consideration of his said donation, John Purdue shall, from and after the taking effect of this act, be added as a member to said

Trustees of the Indiana Agricultural College, and he shall also be a member of said Trustees of Purdue University; should he at any time cease to be such member, he shall be continued as an advisory member of said Trustees, and he shall, during his life-time, have visitorial power, for the purpose of inspecting the property, real and personal, of said University, recommending to the Trustees such measures as he may deem necessary for the good of the University, and investigating the financial concerns of the corporation. And he is authorized to make report of his examination, inspection and inquiries to the General Assembly at any session thereof.

SEC. 6. This act shall be subject to future amendment or appeal, except so far as it provides for the acceptance of donations, the location of the College, and the name and style thereof, and the rights and privileges conferred upon John Purdue.

SEC. 7. An emergency existing for the immediate taking effect of this act, the same shall be in force from and after its passage.

AN ACT making an appropriation to Purdue University, and declaring an emergency.

(Approved March 6, 1873.)

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana,* That the sum of sixty thousand dollars be and the same is hereby appropriated to the trustees of Purdue University, to be used by them in the erection of the main college edifice, the purchase of chemical, philosophical and mathematical apparatus, for fencing and ornamenting the grounds of the University, and for the advancement of the general welfare of the same; said money shall be paid to the treasurer of said Board of Trustees upon the warrant of the Auditor of State. Thirty thousand dollars thereof to be paid on the first day of June in the year eighteen hundred and seventy-three, and thirty thousand dollars thereof to be paid on the first day of June in the year eighteen hundred and seventy-four.

SEC. 2. An emergency is hereby declared to exist for the immediate taking effect of this act, and it shall therefore take effect and be in force from and after its passage.

AN ACT fixing the number of the Trustees of the Purdue University, prescribing the manner of their appointment, providing for the organization of said Board, and repealing all laws in conflict with the provisions of this act.

(Approved March 9, 1875.)

SEC. 1. *Be it enacted by the General Assembly of the State of Indiana,* That upon the taking effect of this act, it shall be the duty of the Governor of this State to appoint six Trustees for the Purdue University, two of whom shall be nominated by the State Board of Agriculture, one by the State Board of Horticulture, and three selected by the Governor himself; each of said Trustees to be appointed from a different Congressional District from the others, except that two may be appointed from the same Congressional District in which said University is situated.

SEC. 2. The persons so appointed shall constitute the Board of Trustees of said University and shall hold their offices as follows: Two members of the first board shall hold their offices for one year, and until their successors are appointed; two for two years and two for three years, and at the expiration of the term of office of any of the members of the first or any subsequent board, their successors shall be appointed in like manner and with like nomination as provided in this act, to hold their offices for the term of three years and until their successors are appointed.

SEC. 3. If, from any cause, a vacancy occurs in said board, the same shall be filled by appointment, to fill the unexpired term, the person appointed to fill such vacancy being nominated and appointed, or appointed in the same manner as his predecessor had been at the commencement of such term.

SEC. 4. Said trustees shall, at their first meeting after their appointment, and every two years thereafter, choose a president of said board, and they shall at such meetings and every two years thereafter, and whenever a vacancy occurs, elect, by ballot, a Secretary and Treasurer, neither of whom shall be a member of the board, whose compensation shall be fixed by said trustees. The said Treasurer shall give bond to the State of Indiana in the sum of three hundred thousand dollars for the faithful execution of his trust, with sufficient sureties to the approbation of said trustees, and he shall receive, take charge of, and, under the direction of said trustees, manage all the stocks and funds belonging to said University.

SEC. 5. All laws and parts of laws, conflicting with any of the provisions of this act, are hereby repealed.

AN ACT authorizing the appointment of students to Purdue University, by the Board of Commissioners of each county, and to provide for the admittance of such scholars, and defining their privileges therein.

(Approved March 12, 1877.)

SEC. 1. *Be it enacted by the General Assembly of the State of Indiana, That* the Board of Commissioners of each county of this State may appoint, in such manner as they may choose, two students, or scholars, to Purdue University, who shall be entitled to enter, remain and receive instruction in the same manner, upon the same conditions, qualifications and regulations prescribed for other applicants for admission to, or scholars in, said University; *Provided, however,* That every student admitted to said University by appointment, by virtue of this act, shall in nowise be chargeable for room, light, heat, water, tuition, janitor or matriculation fees; and said students shall be entitled, in the order of admittance, to any room in the University then vacant and designed for the habitation or occupancy of a student; and such student, so admitted, shall have prior right to any such room, subject to the rules of the University, over any student not appointed and admitted as aforesaid.

ANNUAL REPORT

OF THE

LIBRARIAN OF STATE

FOR THE

YEAR BEGINNING NOVEMBER 1, 1879, ENDING
OCTOBER 31, 1880.

TO THE GOVERNOR.

INDIANAPOLIS:
CARLON & HOLLENBECK, PRINTERS AND BINDERS.
1881.

STATE OF INDIANA,

OFFICE OF STATE LIBRARIAN,

INDIANAPOLIS, November 1, 1880.

To His Excellency, JAMES D. WILLIAMS,

Governor of the State of Indiana :

SIR—Herewith I hand you my annual report as State Librarian for the year beginning November 1, 1879, and ending October 31, 1880.

Very respectfully,

MAGGIE FITZGIBBON PEELLE,

State Librarian.

As will be seen, this report is addressed to Governor James D. Williams, but before it was ready to submit to him, the eyes that would patiently have scanned its pages have been closed in death, and I now readdress and submit this report to his honored successor, Governor Isaac P. Gray, in accordance with the requirements of the statutes.

Very respectfully,

MAGGIE FITZGIBBON PEELLE,

State Librarian.

STATE LIBRARIAN'S OF INDIANA.

The Indiana State Library was founded in 1825 by the Legislature, and was in charge of the Secretary of State until 1841. From this time the following Librarians have had charge :

JOHN COOK.

SAM. P. DANIELS.

JOHN B. DILLON.

NATHANIEL BOLTON.

GORDON TANNER.

S. D. LYONS.

JAMES R. BRYANT.

ROBERT D. BROWN.

DAVID STEPHENSON.

B. F. FOSTER.

M. G. McCLAIN.

JAMES DESANNO.

SARAH A. OREN.

LYCURGUS DALTON.

RICHARD A. CONNER.

MAGGIE F. PEELLE.

INDIANA LITERATURE.

During his life time, Daniel Haugh collected a library of books and pamphlets embracing over 1800 titles; books written by, or about Indianians or concerning the early history of the State.

Many of these books are out of print; the collection could not be duplicated, even at a great cost. As a part of the history of the State, this collection might prove a valuable addition to the State Library. I respectfully suggest the appointing of a committee to examine said collection, and consider the propriety of purchasing it for the State.

All of which is respectfully submitted,

MAGGIE F. PEELLE,

State Librarian.
